Break

Tall beer

Ian Beer, the new headmaster of Harrow, looks to be a model modern public school head. For one thing, he's about six foot two and a rugby international. For another, he's heard to murmur things like: "out of my depth among all you clever organization chaps—what I know about is boys", in places like the Schools Council. For a third, he knows all about the Certificate of Extended Education which, as a fellow head put it, is "relatively rare in the independent sector".

Mr Ian Beer, new head at Harrow.

Exam reform is one of his things. He was instrumental at leading the Head Masters' Conference against the N and F proposals (remember N and F?) two years ago. But rather than opposing change root and branch, he delivered an impassioned speech saying change was essential, and soon. Though A levels should remain, there should be subsidiary exams, N level and CEE, to add variety and breadth to the system.

Beer has climbed steadily up the public school league—housemaster at Marlborough, head of Ellesmere College at the age of 30, head of Lancing eight years later, now, at 49, Harrow. In recent years he has been an activist in the HMC—it was as head of its Academic Policy committee that he led it on exams. This year he is chairman, and bombarding members with papers on a variety of bread and butter topics—how to keep teachers going when promotion prospects are dim, links between independent schools, and with state schools, the family life (or lack of time for it) of housemasters.

Harrow has hired itself a big gun who is likely to lead the school out of the relative obscurity it has met in recent years. He is already on record as saying that he plans to make the intellectual life of the school his top priority, and is delighted that the school did better than usual last year in the Oxbridge scholarship stakes. Some Harrow parents, on reading this, felt a bit nervous. They like the place because it gets respectable academic results without pushing them on too fast in the academic paper-chase.

Ian Beer says he talked about the intellect because that was what he was asked about, and that it is an accident of fate that he is remembered for his work on N and F—"That's what papers like yours are interested in. I've written far more papers on the spirit of amateur games playing and the coaching of rugby football than about the reform of sixth form exams."

Mankind's better moments

The Jefferson Lecture in the Humanities is the highest honour the United States pays to an eminent humanist. The ninth lecture, given last week, was notable for two things. It was the first time it had been given in Britain, and it was the first time it had been given by a woman.

Pulitzer prize-winner, Barbara Tuchman, who describes herself as "a writer whose subject is history", and who is known primarily for her book *The Guns of August*, about the first month of the First World War, addressed a crowded Guildhall, in the City of London, on the subject of mankind's better moments.

Our age was not a time of self-esteem, she said. We all tended to see ourselves as Woody Allen. But the human race had many good instincts and achievements to its name.

To illustrate her point she painted a wide canvas which included the great effort of draining of the Zuider Zee and the building of Europe's beautiful medieval cathedrals. She also took in the "daring, stamina and skill" of Viking seamanship, and the "boldness, enterprise and determined independence" behind the founding of America.

Mankind had an enormous capacity for pleasure of all kinds, from carnivals to Olympic Games. The invention of the ball should be put beside the invention of the wheel, she said. And people could be selfless in their ambition, and comforting in their capacity to overcome life's misfortunes.

Afterwards, the distinguished guests did a little personal research into mankind's capacity for pleasure at a reception given by the American Embassy and the National Endowment for the Humanities.

In fact, it was the visit to this country by the chairman of the endowment, The Honourable Joseph D. Duffey, which prompted the lecture to be organized in London.

Dr Joseph Duffey: humanitarian hunches.

There is no British equivalent to this body, which embraces the functions of a number of institutions, including the University Grants Committee and the Social Sciences Research Council.

Dr Duffey said he was here "to celebrate relations that we too often take for granted". He was also interested in looking at how our publicly funded humanities institutions manage "not to be overwhelmed by politics".

During his week-long trip he visited the British Library, the British Museum, the Arts Council, Cambridge University and Goldsmiths' College. He called on Neil Macfarlane and Norman St John-Stevas, but was too exhausted to make his final appointment with Sir Isaiah Berlin, president of the British Academy.

Nevertheless, he left London with "some hunches" about possible fruitful areas of future Anglo-American collaboration in the humanities, on the lines of existing projects such as that involving the British Library and American scholars in cataloguing the British Library's short titles in eighteenth-century literature.

Now would seem a very good time indeed for anyone in Britain interested in such collaborative work to encourage their American colleagues to bend the ear of the National Endowment.

Meanwhile back in Washington it seems likely that Dr Duffey will also be doing some ear-bending, this time within the State Department, asking the powers that be to tell the British Government that its brutal cutback of British Council funds is likely to do serious harm to international relations.

Aakjaer to Zygia

One dramatic example of the speed of change these days is the way that encyclopedias can so quickly get out of date. According to estimates, even sets published two years ago may now be deficient in up to 20 per cent of their information, and at five years this figure can often rise to 50 per cent. Bearing this in mind, it is interesting to compare the sumptuously produced 1980 version of the *New Caxton Encyclopedia* with its equally opulent 1979 predecessor.

Some of the changes are predictable, with Margaret Thatcher now appearing as the first woman Prime Minister of the Western world, even though James Callaghan is still credited with the job elsewhere in the text. There are also technological changes, new countries and recent deaths to take into account, but reasons for other new entries are sometimes less obvious. Why does Guildford ("this important gap town") suddenly make it now as a separate entry, and how has the foremost pre-Islamic poet Imru'ul Qais managed at last to thrust his way into the public eye, especially when we are told that translations of his verse "do not always satisfy twentieth-century taste".

Other changes, however, show evidence of some quick political rethinking. This year, for example, it is held that Chairman Mao's "absolute dedication to the need for perpetual struggle had later tended to be counter-productive". In 1979, though, this same zeal in old age was described as "reactivating the revolutionary inspiration of Mao's earlier achievements".

But within all this change and flux, some constants remain. Jeppe Aakjaer, the well-known Jutland poet, of course, is still the first personal entry to appear, and 20 volumes later readers continue to be ushered out by Zygia, the wife of Zeus, and described—because of her chastity and faithfulness—as the ideal representative of the married woman. (another case for re-writing one day, perhaps?)

One last change, not mentioned as such in the encyclopedia itself, but still important for its readers: the price has climbed this year from £385 to £435.

Eastern promise

While universities tremble at the thought of having to charge overseas students full fees, the Inde schools carry on extracting a commercial rate from an inc number of wealthy foreigne school fees alone now earn nearly £30m a year, a figure could be as high as £50m w the pupils' extra spending cluded.

Until recently the schools ally adopted a take-us-or-l approach to overseas applica with growing interest fro Middle and Far East whe children speak English, the n special pre-entry courses ha reluctantly recognized.

Sherborne School, Dorset, to be the first in the field years ago it set up its own cra Greenhill House, which prep boys for entry to British schools (not just Sherborne) at 13 or 16. What distingu from the usual private t establishments is that the G boys use all the facilities the has to offer, and according warden Mr C. R. W. Franci boys learn to know of the ei daily routine of public schoo

But because of their specia lems—usually poor Engli boys are taught in small gro five permanent and five tem staff employed by Greenhill.

Older boys are offered a full four-term crash O level because they are able to u school's chemistry, physic

It would seem that we have unlisted sin-bin.

biology labs. In no case are parents guaranteed that their well eventually get a place public school, but so far they had no failures.

Sherborne has not always friendly to foreigners. King A spent part of his childhood (and may even have attended school), because the Scandin invaders were too close to Win ter and Sherborne criefly capital of Wessex.

Maths teaser

Pythagoras Theorem

Four right-angled triangles with perpendicular sides of lengths a and b and hypotenuses of length c, are fitted together as shown in the diagram to form the square PQRS, whole area is c^2, with a small square XYZW inside.

(i) Show that the area of the square XYZW is $a^2-2ab+b^2$, and that the area of each right-angled triangle is $\frac{1}{2}ab$.

(ii) By adding together the areas of XYZW and the four triangles surrounding it, prove Pythagoras Theorem, that $c^2=a^2+b^2$.

Simultaneous equations

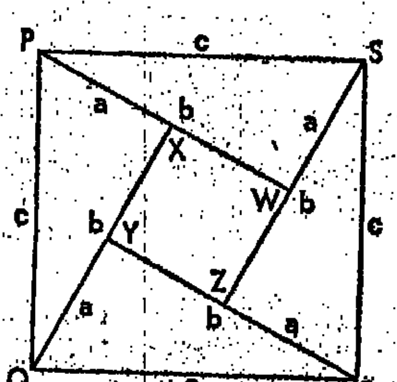
(a) In order to solve the simultaneous equations $4x+3y=9$, $3x+4y=5$.

(i) First add together the lef-hand sides of each equation, and the right-hand sides of each equation, and deduce the value of $x+y$.

(ii) Then subtract the second equation from the first, and deduce the value of $x-y$.

(iii) By adding and subtracting the two equations you have found for $x+y$ and $x-y$, deduce the values of x and y.

(b) Square each side of the simultaneous equations $x+y=p$, $x-y=q$, and then prove that $x^2+y^2=\frac{1}{2}(p^2+q^2)$ and that $xy=\frac{1}{4}(p^2-q^2)$.



(c) Find two pairs of solutions to $x+1/y=1\frac{1}{2}$, $y+1/x=3$.

(d) If $x+1/y=m/n$, and $y+1/x=n/m$, prove that $xy+1=my/n=nx/m$, and that $xy+1/xy=-1$. Deduce that $x/y=m^2/n^2$.

Solutions

Pythagoras Theorem. Each side of the square is $b-a$, and so its area is $a^2-2ab+b^2$. Hence $c^2=a^2-2ab+b^2+4(\frac{1}{2}ab)=a^2+b^2$.

Simultaneous equations

(a) $x+y=2$, $x-y=4$, $x=3$, $y=-1$.

(b) Add and subtract $x^2+2xy+y^2=p^2$ and $x^2-2xy+y^2=q^2$.

(c) $xy+1=3y/2=3x$. So $y=2x$. Substitute 2x for y in either of the original equations, and solve the resulting quadratic equations; $x=\frac{1}{2}$, $y=1$ and $x=1$, y

(d) Multiply each side of first equation by y, and of second equation by x, to obtain first result, from which the x/y is easily deduced. Multiply together the left-hand sides of two equations, and their handed sides to obtain the result.

Unions slam plan to give new teachers grants not wages

A new way of saving money on the teachers' salary bill and—at the same time—improving the arrangements for teachers in their first year at work has been floated by local authority officials, and opposed by unions. A better induction scheme could be devised, it is said, if new teachers were given grants instead of wages, and still treated as students. Bert Lodge reports.

'Student treatment' a slur on professionalism

Plans to pay grants instead of wages to new teachers have been put forward by local education authorities.

Students fresh from college or university would continue to get grants in their first year at work if the plan is approved. They would continue to be classed as students.

The proposal was put forward at a meeting of a Department of Education and Science working party on teachers' early period of service (TEPS), attended by DES officials, HM Inspectors and representatives from teacher unions and local authorities.

Though teacher unions voiced strong opposition to the idea, they concede that if the ideal induction scheme for probationer teachers is ever realized, the 25 per cent reduction in teaching time they are calling for will have to be balanced by the probationer being paid less than what the fully qualified teacher on Scale 1 is earning.

Talks on the probationary year between local authority employers, teachers and the DES have been going on for more than two years. During that time teacher union spokesmen have sought a commitment from employers that a new teacher should have 20 to 30 per cent free time.

Employers are still refusing to grant this although the most authoritative research yet conducted in this field by Bristol university school of education recommends no more than a 75 per cent teaching load for probationers.

The figure no more than echoes the reduction of teaching time suggested in the 1972 White Paper, *A Framework for Expansion*, and a date for starting the scheme, September last year, was pledged by Mrs Shirley Williams, then Education Secretary, at the North of England Conference in 1978.

Many education officers privately acknowledge the 25 per cent lightened load to be reasonable, but it does imply employing one supply teacher for every four probationers at a time when local authorities are being pressured to spend less and less.

But if the probationer could be regarded as a student and paid a grant, the saving could be set against the expense of paying for replacements.

Mr Fred Smithies, assistant general secretary of the National Association of Schoolmasters/Union of Women Teachers, said they had always wanted induction to be seen as a final year of training. "But I would not want to see them treated at students. It is important for their standing that they be seen as professionals."

He thought that with the introduction of the BEd degree for all intending teachers the training institutions were concentrating more on the academic and less on the practical side of their courses. "Probationers are probably less well prepared now than ever before."

Mr John Gray, a member of the National Union of Teachers' executive and member of the TEPS working party, said the authorities' idea of regarding the probationer as a student got no support from teacher representatives. "The teachers' view is that once you have come though that training, you are qualified though you need support."

The Council of Local Education Authorities acknowledged this week that the proposal would be a "pretty radical change". It was one of several options that could be pursued, a spokesman said.

Falling standards evidence in doubt

by Bob Doe

Serious doubt has been cast on the research which, four years ago, seemed to prove that academic standards were falling drastically.

The test results of West Midlands school leavers published in 1976 appeared to show that their English and mathematics were getting worse though their intelligence levels remained constant.

The research, carried out by engineering employers in Coventry, is now showing a rise in the achievements of school leavers applying for apprenticeships.

In 1976, this was about the only concrete evidence to support the view that standards were falling. It was soon followed by the Great Debate, the regional conferences on education and the examination of what goes on in schools that has now led to Government proposals for a common core curriculum.

The latest recruitment tests in Coventry have failed to confirm this downward trend, however. While intelligence test scores have edged up slightly, English and maths scores have improved considerably.

Mr Roger Gilbert, training executive of the Coventry Engineering Employers Association and the man who brought these figures forward in 1976, now admits the conclusions drawn from them then may have been premature. "This shows the danger of jumping to conclusions on the basis of limited samples", he said. The latest information "obviously completely alters the original supposition".

The results did not necessarily invalidate the earlier figures. Mr Gilbert thought it possible that the upturn was in part a response to the alarming indications of 1975. "Schools have become very much more conscious of the need to look at pupils' requirements after they have left school".

Though the numbers applying for these apprenticeships had increased in recent years, Mr Gilbert did not think this was the cause of the apparent improvements. With

Examine your change carefully, as mistakes cannot be rectified

It is notoriously difficult for a man to stand on his dignity while falling flat on his face. Professor Clegg, who was already planning his return to decent academic obscurity, has had the misfortune at the last minute to see his feet sliding away from under him on a graduate teacher's banana skin. Somehow it all brings the pay comparability saga to a fitting conclusion in a mixture of farce and tragedy.

The Clegg Commission was invented by Mr Callaghan as a desperate attempt to cobble together his fast unravelling pay policy in the final months before a General Election. The object was to buy time—to put off big pay rises for public sector groups, which had been forced to abide by Government-determined pay guidelines while private industry allowed market forces and trade union pressure to prevail. To buy time Mr Callaghan had to invoke an academic expert on industrial relations, who in his turn tried to devise a "scientific" method of working our new salary scales. In reality, the most important requirement of both Governments—the Labour administration which began the exercise; the Conservatives who saw it through—was that whatever was done should take a long time.

Hence the elaborate and largely abortive game played out by panels of judges comparing apples, pears and oranges and giving answers in lemons. *The Times Educational Supplement* was criticized by some of those concerned for reporting the facts as they leaked out. People, whose common sense told them that what was going on was nonsense, were caught up in the process to the extent that they resented outsiders learning about the bizarre activities in which they were engaged. And to what purpose? The purpose was not to undertake scientific research, but to establish new salary scales somewhere near revalued Houghton levels. A "quick and dirty" arbitration could have done this in six weeks, but six weeks would have been inconveniently quick. Half the trouble arose from having too much time: Parkinson found work—misplaced, but extremely difficult—to spin out the time.

What nobody could have foreseen was the final lurch from earnestness to farce—the 4 per cent error (so far) and Professor Clegg's chastened letter to the Prime Minister (come back Lord Alexander and bring the back of your envelope with you!). Now the cat is properly among the pigeons. The teachers say that they received an offer (albeit based on Clegg's erroneous figures) and that this is what they accepted—which is undeniably true. The employers say their acceptance was based on Clegg and that the Commission's second thoughts change everything. This also is plainly correct.

Burnham will now meet again and already the lines of debate can be clearly seen. It may be that the employers will get some sort of legal clarification. Mr John Wordie, QC, the chairman of Burnham, will have to decide whether to forward the agreement already reached for ratification. It is not clear that he is anything more than a postman once an agreement is reached. A ratified agreement would normally become mandatory as a matter of course, unless the Government were to introduce negative motions in both Houses of Parliament to overtu it.

The teachers' frustration is understan able and will have to be reckoned wit The crowning irony of Clegg is that th figures recommended look about righ even if they were based on a cleric error. The most likely outcome now mu be that Burnham looks at the Cleg award and the 1980 pay claim together that the authorities seek to lower the offer on the 1980 claim by the amou Clegg misled himself (and them). A this claim seems to be on its way t arbitration, it will then be left to th arbitrators to sort out the mess.

Where does this leave attempts to wo out more rational methods of fixing pa in public services, like teaching? Th answer must be that these have take another powerful knock. And this wa implicit in the morally dubious origin of the Clegg exercise—a political devic to buy time and simulate order, create to placate powerful unions by a disintegrating Government. It certainl suggests that the teachers and thei employers should redouble their ow efforts to find sensible ways of measurin the needs of the education service. Bu if salary revisions are to be conducte —as nobody doubts they are—in the shadows of cash limits and coordinate local government salary policies, then there is little scope for manoeuvre and almost none for sophisticated comparability exercises. And yet common sense also decrees that the education service doesn't exist in isolation and its salary scales must be competitive with those of other employers recruiting from the same pool of labour. Manifestly it is not now competitive with regard to teachers in shortage subjects like maths, science, handicrafts and modern languages.

A technical knock-out

The bust-up between the Technician Education Council and the City and Guilds (page 12) is rather more than the usual tenant-landlord row about leaky roofs and noise after midnight. It was always likely that as the TEC grew in strength it would one day feel the need to assert its independence from the CGLI, which up to now has provided it with a building and most of its administrative staff and services.

The Technician Education Council was set up by Mrs Thatcher when she was Education Secretary, as a result of the Haslegrave Report (a rare example of a report's recommendations being accepted).

The principal victims of its rationalizing have been the joint committees responsible for the ONC/D and HNC/D. The CGLI also lost a substantial part of its work—the technician courses that brought in about a third of its income—but this transfer to the TEC occurred amicably and efficiently. Originally Haslegrave envisaged a TEC that would have much in common with City and Guilds. But when it became clear that TEC would not be running exams as such—all assessment is done at the local level—the different administrative needs of the two bodies soon emerged.

Overlying it, and explaining some of the ill feeling, has been a simple struggle by the TEC for corporate status and prestige. In the wake of the Finniston Report, for example, the Government has been keen to give a new boost to technician education, it seems. Obviously this was not going to be achieved by a body that lived in the shadow of the ancient City and Guilds.

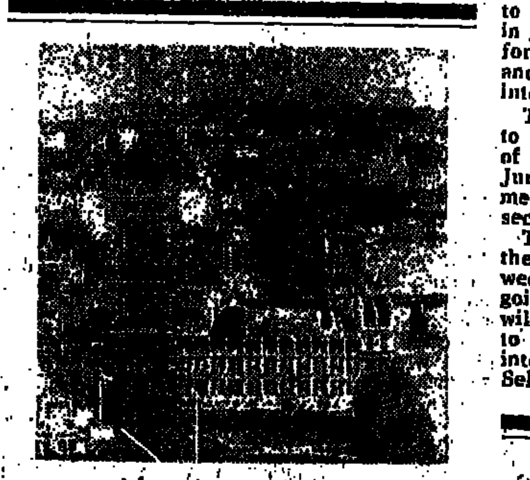
The trigger came from an unexpected source—last year's decision to increase VAT to 15 per cent. Because the TEC is a limited company, it has to pay VAT on many of the services provided for it by CGLI. Overnight TEC's bill jumped dramatically. After the failure of discussions about ways of reducing this, such as transferring some CGLI staff to the TEC, it was obvious that a break had to come.

The new potent image of an independent TEC may well help to give technicians a glamour and respectability. But, whether or not the split makes administrative sense—and it is arguable that the costs of the separate bodies will rise—those on courses below the traditional technician level seem likely to suffer.

In recent years the dividing line between craftsmen and technicians has become increasingly indistinct. The coming of the microchip and other new technologies will do away with the skill inherent in many craft jobs. At the same time it will create a demand for a completely new breed of man or woman, competent in several areas of skill, whose main occupation will be supervising complicated machinery and diagnosing faults.

Setting up suitable further education courses and qualifications for them will inevitably involve the TEC *and* the CGLI.

Both are anxious that the split should not affect either the students or industry and that collaboration in this area of common interest should continue. But the way feelings are running at the moment, there is clearly a very real risk of lasting damage.



More information please

The Commons Education, Science and Arts Committee this week published a special report alongside its interim report on the effects of higher fees for overseas students.

Impressively titled *The Provision of Information by Government Departments to Select Committees*, it is a slim volume with a succinct message: the Government is hiding behind interdepartmental organization to avoid providing information.

"Your Committee have had difficulty in assessing the quality of decision-making in the Department of Education and Science because of the refusal of successive Governments to reveal to Select Committees the nature and extent of interdepartmental consultation", says the Report. Without access to more information the Committee could not "fully discharge" its responsibilities.

In particular, it quotes an exchange with Mr Mark Carlisle, questioned about coordination on overseas students between himself, the ODA and the rest of the Foreign Office.

"I think there is very little I can say on this", replied the Education Secretary. "We would be wrong to give evidence as to interdepartmental advice".

Now, as the special report points out, this goes expressly against recommendations of the Select Committee on Procedures, which established the basis for the reformed committee structures.

Mr Christopher Price's Education Committee is not the only one to complain about the continuing difficulty of extracting information from departments, and it is pressing hard for the House to debate the matter.

There are essentially two areas where the committee wants to see how far it can get in testing ministers' willingness to inform MPs: will they, as recommended, reveal from whom they have taken advice (this is likely to be the line when Mr Carlisle is questioned in July about his decision to close the Centre for Educational Disadvantage—see page 5); and will this hold good if it is dependent on interdepartmental arrangements?

The next interdepartmental matter likely to be called into question may be the study of the proposal for breaking up ILEA. Junior ministers from six government departments, chaired by Lady Young, with a secretariat from the DES, are considering this.

The Committee on Education, Science and the Arts is effectively warning them this week that it may want to know how they are going to take evidence, from whom, and what will be their method of working. Answers to questions like those could provide an interesting measure of the new powers of Select Committees.

Schools Council ready for action

Like the first cuckoo in spring, the publication this week of a critique of modern language exams marks the opening of a new season of what could be far-reaching reforms in the examining of school leavers. The Centre for Information on Language Teaching is first off the mark with a root and branch reassessment of the aims, content and methods of assessing 16-year-olds.

There has never been a greater opportunity to influence the syllabuses, assessment techniques and purpose of exams and the way they match the comprehensive system as opposed to the selective system for which most of the present exams were created. Part of the Government's plan for the new common 16-plus involves the setting of "national criteria" for every subject—the bare bones that should be common to every syllabus named English, Maths, French or whatever.

The exam boards are charged in the first place with drawing up these skeletal criteria, with the assistance of the Schools Council and HMI. If these are to be informed and relevant—if they are to help schools break out of the examination cul-de-sac bemoaned in the HMI survey—subject specialists, teachers and users of exams should all now be making their views well known in the same timely way that CILT has.

The appointment of Mr Peter Dines as chief examinations officer at the Schools Council is relevant to the opening skirmishes of this contest. A seasoned campaigner in Great Portland Street, and at the DES—he was joint secretary responsible for exams at the Council for three years and one of the Waddell committee secretaries—the part the Council play in this reform will depend largely upon him.

The Council was not given the statutory coordinating role it once hoped for. The Government have only said they will consult the Council after the exam boards have produced the criteria; but by nods and winks the Council has since been encouraged to think it will have a major part to play, and it should be in a position to become an indispensable part of the new system.

Whether Mr Dines and the Council will be restricted to the subordinate role originally suggested will probably depend on their performances when the exam boards proposals are revealed. As with those who would support reforms in individual subjects, influence will have to be earned, rather than officially ascribed.

Across the binary divide

The internal reorganization of the DES higher and further education branches gives clear notice of intent to make sure that both sides of the binary divide are scrutinized together. It will also provide the administrative mechanism through which the universities are encouraged (and the colleges are obliged) to take account of external assessments of national need.

It is likely that the initial emphasis will be on finance and planning for the public sector, in the wake of the capping of the pool and the crude inequities which have followed from this. But the DES announcement explicitly states that the new FHE 1 branch "will provide a focus for . . . further and higher education as a whole". This is a highly significant development and follows closely on the meeting between CLEA, the DES and the University Grants Committee.

No comment

"The Regional Committee has decided to award £100 to local students in the form of prizes for exceptionally praiseworthy performance in 1980. (It) is anxious not to confine the awards only to students gaining high academic achievement, though it is felt that it might be inappropriate to award a prize to a student who failed his or her course."—From an Open University announcement about a charity donation.

Curriculum hit by cuts in part-time staff

y Richard Garner

drastic cut in the employment of art-time women teachers is seriusly hitting the school curriculum, According to research published esterday.

The first casualties are remedial education in primary schools and he teaching of a wide range of subjects including Russian and the lassics in secondary schools, says he report, carried out by Dr Anne rown, of Lancaster University's Department of Educational Research, for the Assistant Masters nd Mistresses Association and the Equal Opportunities Commission. It says: "Cuts have been made where defences are weakest with insufficient regard for the special functions of a part-time teaching force. . . . There is consequently an immediate threat to remedial teaching in primary schools and to curriculum diversity in secondary schools."

According to the report, cuts in part-time teaching jobs—90 per cent of which were carried out by women—were being made even during the time when the number of full-time teachers was increasing. It shows that their numbers dropped by 21 per cent—about 8,000—between 1970 and 1978 compared with an increase in the number of full-timers of 33 per cent.

The majority of primary schools that gave details of work done by part-time teachers said they were responsible for remedial reading and language classes and arts and music teaching.

The report adds: "In the secondary schools, where nearly all the part-timers were employed as specialists, there were over 700 mentions of specialist roles played by part-time teachers in schools."

It adds: "The part-timer's task was strongly orientated towards supporting individuals who had fallen behind in basic skills or to stretching children with special interests or talents." It is suggested that it is this kind of support for full-time teaching staff that has been lost in schools where part timers are no longer employed."

Radical measures to improve the career prospects of part-timers are suggested, including giving women teachers the promise of equivalent posts if they return.

Other recommendations suggest that part-timers should be treated as professional equals to full-time teachers and that opportunities for job-sharing between teachers should be more fully explored.

The report "Reduction in Part-time Teaching: Implications for Schools and Women teachers", was jointly funded by AMMA and the EOC and cost £9,000 to produce.

Lobby for sacked teacher

The National Union of Teachers has asked Lancashire councillors to back an industrial tribunal ruling—in direct opposition to the views of the education committee.

Councillors met yesterday to discuss the case of Miss Thelma Davies, a Skelmersdale teacher. Miss Davies was sacked as deputy head of Tawd Vale High School after refusing to submit to a medical examination. The authority ordered the examination following what the NUT describes as "difficulties about leave of absence".

A subsequent industrial tribunal ruled that the authority had no right to insist on the examination. This was only possible under sick pay conditions and Miss Davies was not ill.

The tribunal decided that Miss Davies should be reemployed, but the education committee wants to exercise its option under the Employment (Protection Consolidation) Act, 1978, to pay Miss Davies compensation instead.

Parents 'are contributing up to £84m'

y Philip Venning

arents could be contributing as much as £84m a year to maintained chools through fund-raising activiies, according to Mr Peter Boylan, a member of the Liberal Party ducation panel.

A meeting of the panel a fortnight ago voted unanimously in favour of banning parents from contributing towards the cost of textbooks, stationery, apparatus, or any other essential teaching materials. They also stressed the responsibility of local authorities under the 1944 Education Act for providing these materials.

After discussing a paper submitted by Mr Boylan and the special report in *The TES* on May 9, the panel passed a resolution expressing grave concern "at the increasing pressure that schools feel to organize voluntary fundraising to supplement the inadequate supply of resources by local education authorities". The consequence was, they agreed, that schools in affluent areas were able to raise substantial sums while others were not, increasing inequality between schools.

In April Mr Alan Beith, the Liberal education spokesman, was told by Mr Mark Carlisle, the Education Secretary, that there were no figures on the amount of money raised by parent-teacher associations and other bodies for maintained schools.

Mr Boylan believes that the dramatic rise in fundraising by parents in recent years is not fully appreciated. Two years ago, the auditor in one county authority told him that parents raised £3,500,000. Working on the assumption that primary schools raised on average £2,000 a year, and secondaries about £7,500, he estimated that the educational system was benefiting to the tune of at least £84m a year.

On Saturday, the executive of the National Confederation of Parent Teacher Associations will be drafting a questionnaire to be sent to their 4,000 members asking them whether parents should pay for basic educational services. Mr John Hale, general secretary of the NCPTA, said that the views of the various teacher unions were well known. But no one knew what parents as a whole thought of the trend. The survey (as well as one on school meals) is the first they have undertaken for some years.

In many parts of the country, both parents and teachers are debating the rights and wrongs of looking for financial help from parents. They are particularly worried about the amount of money for books and equipment that they will have after the next round of cuts.

Union boycotts advisory body

The National Union of Teachers is to boycott meetings of their newly reconstituted Advisory Committee on the Supply and Education of Teachers in protest at what it considers is inadequate representation.

Union mebers are angry that they have been given only two seats on the committee, which will be 29 strong. Also, they say the decision to give only nine seats to teachers' organizations is inadequate. They have said they will boycott committee meetings unless Mr Mark Carlisle, Secretary of State for Education, changes its constitution.

DES officials say that although the committee is larger than under the previous government, teacher representation is the same. In addition, two of Mr Carlisle's six appointments to the committee are teachers.

Peace move backed

Teachers have voted overwhelmingly in favour of accepting a new peace initiative to end the bitter five-month fight against spending cuts in Trafford.

Under the scheme, 10 of the 76 jobs to have been lost in September will be restored, with 10 teachers going on in-service training in in shortage subjects. Another 10 teaching posts will also be restored for the remainder of this academic year.

Standards evidence in doubt

Continued from page 1

worsening employment prospects, many pupils were now applying for 20 jobs where they once put in for only four or five. "We still get a hell of a lot who haven't a cat in hell's chance".

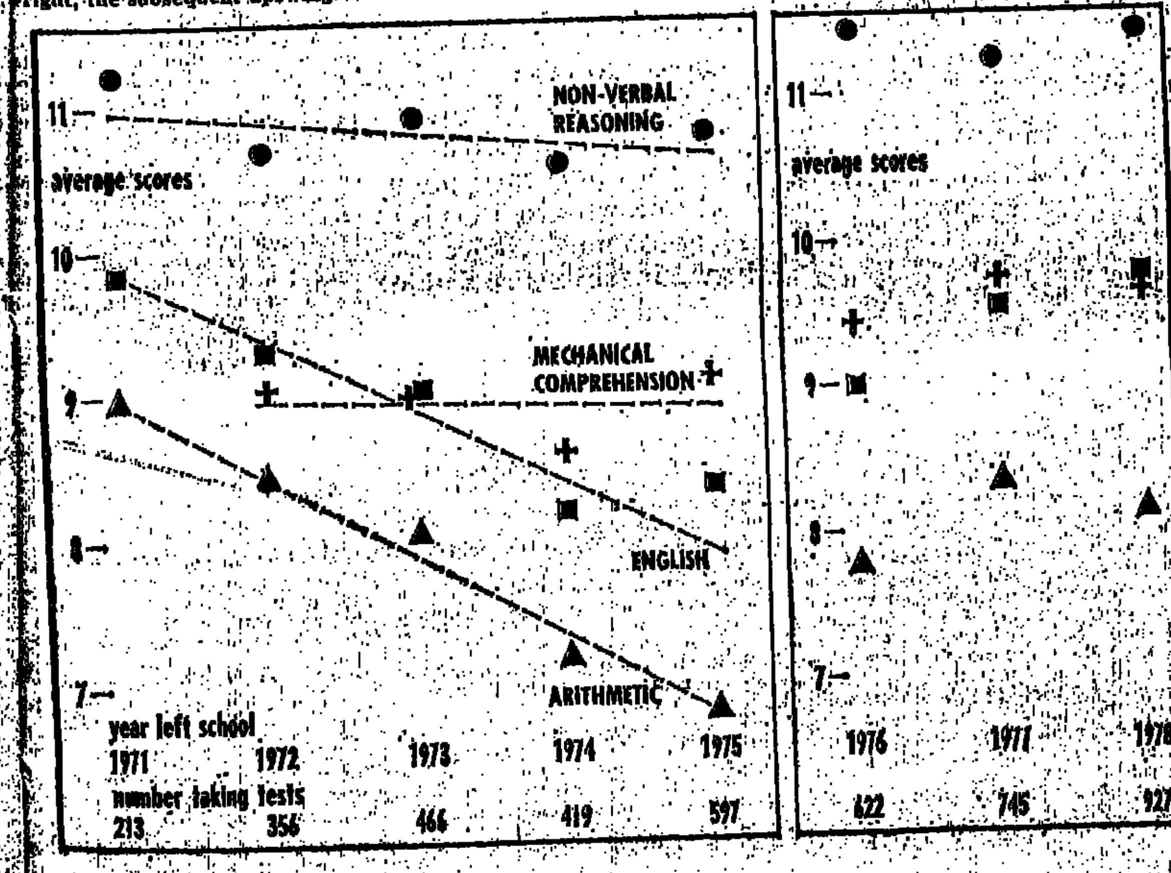
The tests used by the Coventry employers were all supplied by the National Institute of Industrial Psychology. They included a test of inteligence in diagrammatic form; a test of simple mechanical problems; a four-part English test requiring sentence completion, correction of jumbled sentences, analogies (black is to white as darkness is to . . . ?) and similars and opposites; and a graded arithmetic test.

Mr Alan Sanday, Coventry's chief inspector, said while he had reservations about some of the tests used it was fair to say Coventry schools had responded in recent years to the concerns of employers. But there were also probably long term and other reasons for the apparent upturn in results.

Mathematics and language initiatives in the city started five years ago were paying off. A maths and English task force had offered in-service education to every primary teacher.

But he regarded the upturn with some suspicion, just as he had the apparent downturn a few years ago. He questioned whether the intelligence test used was sensitive enough to reflect the differences in those applying for apprenticeships then and now.

Below left: How standards appeared to fall between 1971 and 1975 and, right, the subsequent upswing.



Lunchtime chaos

The school meals service could be thrown into further confusion this weekend when the National Union of Public Employees' conference will decide what action to take over sackings of school dinner ladies.

A dramatic decrease in the number of children taking school meals since prices went up at the start of this term has led to a sharp rise in the number of redundancy notices handed out to school meals staff.

In Hampshire more than 2,000 meals staff have been dismissed now that only 76,000 children take meals compared with 155,000 this time last year. School meals have gone up to 50p.

In Northants, where the price is 55p, a survey showed that in the first week of this term only 24,600 meals were served compared to 67,000 a year ago. More than 150 school meals posts have gone.

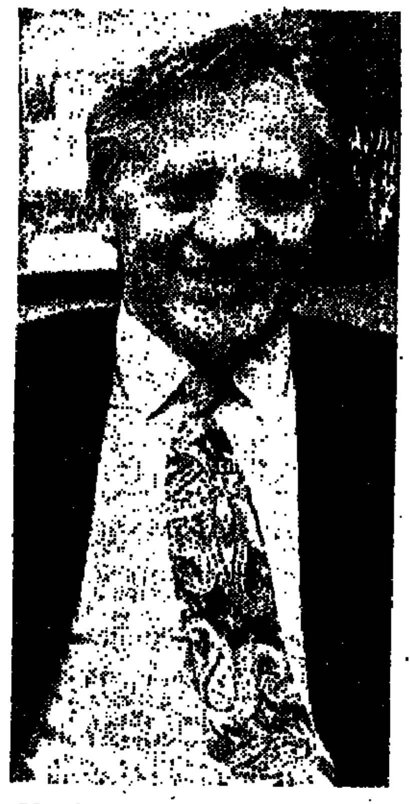
MACMILLAN EDUCATION

Platform

The Briault study has short-changed the curriculum in order to find a tidy answer, says **Maurice H**
Larger, fewer schools are not the answer to falling rolls. He urges a common curriculum plan.

Catch a falling roll



Maurice Holt: whole curriculum.

Falling rolls offer a great educational opportunity. But to seize it, teachers and administrators need to look beyond procedural solutions to the underlying curriculum issues. The sad thing about Professor Briault's two-year study of the problem, *Falling Rolls in Secondary Schools* (*The TES*, May 2) is that the research team has been preoccupied by the details of organizing the present secondary curriculum, and ignored the need for schools that can implement a better curriculum. In advocating larger, fewer schools, the Briault study is trying to solve the problems of the 1990s and beyond in terms of a curriculum which, after the heart-searchings of the 1970s, is now widely regarded as educationally unsatisfactory.

The distinctive feature of education—as opposed to managing factories, building houses or organizing bureaucrats—is that all its aspects are interconnected. You cannot update the mathematics programme without disturbing the geographers and the scientists; you cannot change school lunch arrangements without affecting school activities and teacher morale; you cannot talk about falling rolls without examining educational opportunity, and that means addressing fundamental questions about the nature of the curriculum. Yet the Briault study says nothing about what a school's basic curriculum should consist of, nor about how much choice should be offered.

Instead, we are told that a "good school" will offer "a well-balanced curriculum to all its pupils, with sufficient choices for older pupils to meet their varied needs". In short, some kind of common programme in the 11 to 13 years, with the inevitable core-plus-options curriculum in years Four and Five. Small schools, we are told, mean "a necessarily more restricted curriculum for the fourth and fifth years", and "the inevitability of mixed-ability groups". The implication is plain: the curriculum is conceived as a collection of subjects, with older pupils choosing from option lists, and effective teaching seen as most likely to occur when the ability range of the class is as homogenous as possible.

> "If we are to offer all our pupils a programme appropriate for the uncertain times through which they will live, there is no substitute for whole curriculum planning."

All this sounds depressingly familiar. For it is on precisely these assumptions that the grammar school curriculum was based and it is precisely this model of the curriculum which has been taken over by our comprehensive schools. The HMI secondary survey *Aspects of the Secondary Curriculum* spells out the dismal picture in detail. While all the survey schools sought to offer a broad curriculum initially, "only 11 per cent of the schools stated that they offered a wholly common curriculum in the first three years". There was subject setting in two-thirds of the schools, increasing from years One to Three.

In the fourth and fifth years, the omnipresent option schemes influence what goes before and after, and squeeze out the performance subjects like art, music and drama, as well as any adequate development of life skills. Political, social, economics or aesthetic education for all pupils over the five years of compulsory schooling simply does not happen.

The HMI concluded that there was a need "for all pupils to carry forward a broader programme of studies . . . with a consequent reduction in the number of 'options' taken". Yet here we have the Sussex team advocating the merger of schools to form large units simply to maintain the present ragbag of subject choices, and preserve the discredited cafeteria curriculum into the 21st century.

How could they get it so wrong? Well, curriculum issues are not easy to tackle. The Rutter research kept well clear of them, and so has Briault. But if we are to offer all our pupils a programme appropriate for the uncertain times through which they will live, there is no substitute for whole curriculum planning. And there is no reason why a common 11 to 16 curriculum cannot be offered in a reasonably staffed five or six form entry 11 to 16 school.

But it does mean seeing subjects not just as ends in themselves, but as means to further ends; it therefore entails extensive in-service education for staff, and new kinds of l.e.a. support services for schools; and it means viewing the 11 to 16 years of schooling as a continuum, with a curriculum based on a clear rationale of education rather than haphazard choice made at a premature age on the strength of inadequate understanding. To forbid 14-year-olds to choose the colour of their pullover, but allow them to drop science, is an educational cop-out which does the profession no credit.

This kind of curriculum planning is not easily tackled in large schools, and least of all in those resulting from shotgun amalgamations. It requires easy collaboration between staff, the careful deliberation of curriculum issues and a sense of organic unity which gives purpose and style to the school's solutions. It is tempting to go for the easy answer, and knock schools together so as to keep the familiar core-plus-options systems going for another generation of teachers. But this would do a great disservice to our pupils, and to our society.

Unless teachers, administrators and politicians grasp the nettle and follow through the implications of the HMI secondary survey, falling rolls will lead to ill-assorted federal schemes born of managerial compromise rather than educational vision. In the short run, the mechanisms of management will triumph and the unwieldy new structures be hailed as some kind of progress. In the long run, we shall have missed the chance to re-plan the curriculum and see it whole.

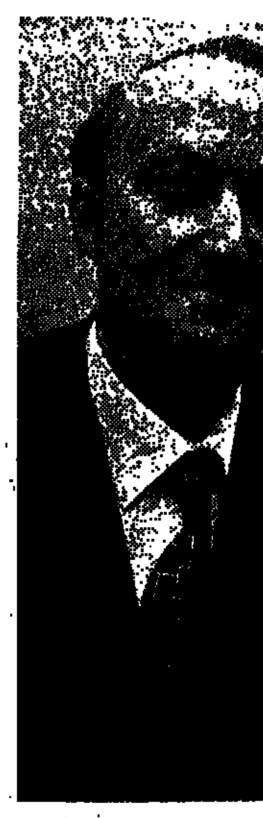
The Sussex study's preference for the managerial over the educational is evident from another proposal: that teachers take turns to become heads of departments or deputy heads. The need for outstanding qualities of leadership in the middle management of secondary schools is now recognized on all sides. But such qualities are not uniformly distributed in school staff rooms, any more than they are in offices or universities. And if new curriculum policies are to be hammered out and implemented, continuity is essential. Of course falling rolls will reduce promotional opportunities, and compensating devices will be needed: but if educational outcomes are valued, this suggestion must be dismissed as absurd.

Presumably, in asking an administrator to examine falling rolls the DES wanted an administrator's solution. And the Briault study is surely right to urge long-term planning by local authorities. But the DES must recognize that it itself defines the context for such planning. How much should parental choice govern the growth or decline of schools? Will the DES back up its call for a broad 11 to 16 curriculum by providing adequate resources? Can the DES not see that the HMI recipe of a broad, coherent curriculum for all pupils points to a network of manageable schools engaged in school-based curriculum development rather than a chain of educational hypermarkets?

> "In arguing for 'sufficient choices to meet varied needs', the Briault study fails to see that in a coherent whole curriculum scheme, what matters is not so much choice between subjects as within subject areas."

Choice is a key word here. Unconstrained parental choice is death to curriculum innovation: but the message of the secondary survey is that we need wholesale innovation to make schools more effective places. The Briault scheme for large amalgamated schools seems unacceptable electorally as well as educationally. There is much to be said for retaining more, separate, school units, coupled with a Sheffield pattern of parental choice which associates each school with a given group of primaries, but allows the few parents who want a different secondary school to make a case for it.

Choice is also a key concept inside the school. In arguing for "sufficient choices to meet varied needs", the Briault study fails to see that in a coherent whole curriculum scheme, what ma not so much choice betwe jects as within subject area. for example, a school has lished an 11 to 16 humaniti gramme linking English, hist geography, it can p experiences in political and education as well as in these areas, and use the richness team approach to develop a of learning strategies acro whole ability range.



Professor Eric Briault: schools

It is interesting to reflect th fessor Briault's last public that of the Schools Council's S Sixth Form Working Party (Working Paper 45), came for exactly the same reas advocating the ill-fated N and posals, it sought to offer bre the sixth form by requiring p take more subjects. It re that breadth could also be by developing courses within links could be formed b subjects, but took the id further. The administrativ ness of CEE plus N plus inviting, and the alternati quired new thinking in about the organization of 16 education. But in the event, based solutions were p independently by the City Guilds Institute, and its fou courses are increasingly for one-year sixth formers, y require teachers to subordin ject requirements to wider a

This is exactly what i needed in the 11 to 16 curri if all pupils are to be off good education which will a basis for continuing educat is difficult not to conclude th fessor Briault has done it aga short-changed the curricul order to find a tidy answer new monolithic schools are n the right answer for the 11 years than N and F were rig the 16 to 19 years. The lo whole curriculum planning common 11 to 16 curricul single institutions of modest followed if necessary by 16 education ideally in a te college. Rather than lose identity in new mergers, s should settle to lose their forms and develop an 11 common curriculum of free quality.

Carlisle under fire for 'scandalous' plan

by Diane Spencer

Mr. Mark Carlisle, the Education Secretary, is to face tough questioning from MPs on why he decided to close the Centre for Educational Disadvantage in Manchester. He has been summoned to appear before the Commons Select Committee on Education.

The committee, chaired by Mr Christopher Price, Labour MP for Lewisham West, is anxious to find out how decisions are taken by education ministers, who advises them and what notice they take of that advice. The closing of the centre will be one of the topics under scrutiny and MPs can ask to see any papers and documents they think necessary for their investigations in July.

A strong attack has been launched against Mr Carlisle's plan to close the centre. It was first threatened in November but reprieved until April for consultations. Mr Max Morris, chairman of the institution, has described the consultation period as a "totally spurious exercise".

Meanwhile, the centre has not taken it all lying down. Its governors will meet later this month and are expected to start campaigning for funds.

Mr Alan Richardson, the Conservative leader of Cheshire county council, and one of the governors, thought it a retrograde step to close the centre just as the place was getting on its feet.

He was disappointed that the meetings between the governors, the minister and the department had failed to divert the original course.

The National Association of Teachers in Further and Higher Education said it was "flabbergasted" that the Government could seriously think of closing the centre so late in the year. The association, with the National Union of Teachers, represents the professional staff including five field, one research officer and the director, Mr Bill Boaden, NATFHE's former education officer.

Mr Keith Scribbins, the association's salaries secretary, said it was a "scandalous decision". He contrasted its haste with the two or three years' notice given by Mrs Shirley Williams, the previous education secretary when she proposed to close many colleges of education.

Apart from joining the campaign to keep the centre open, NATFHE is preparing to get "substantial compensation, redeployment and retraining" based on the Crombie Code which applies to local government officers and civil servants.

Most of the staff are experienced teachers and between the ages of 40 and 50. Their work and status could be compared to education authority advisers. Given the economic climate, Mr Boaden is not over-optimistic about employment prospects both for the professional and the 20 clerical staff on whose behalf NALGO is fighting.

Major shuffle at DES

The Department of Education and Science is to make a major reorganization of its sections dealing with further and higher education. The changes will merge planning for the university and public sectors for the first time.

Higher and Further Education Branch 1 will blend with HFE 3 which handles university policy to form a new major branch for finance and planning.

Another branch will look after adult education, further education for industry and the youth service, while a third branch will look after Open University and student awards.

It will be the first time that a single branch is to look after the universities, polytechnics and colleges. The new deputy secretary in charge of higher and further education will be Mr Richard Bird, who succeeds Mr Alan Thompson who retires in July.

When Mr John Hudson, the deputy secretary with responsibility for schools, retires in August, he will be succeeded by Mr W. O. Ulrich, now deputy secretary for (among other things) science. Science will now go in with higher education, and one deputy secretary's post is eliminated.

Berkshire stops clothing grants

Berkshire will stop paying clothing grants to 7,000 needy pupils to save £100,000. The county council committee agreed the cut last week as part of a package to make up for the planned school transport charges dropped by the Government after their defeat in the Lords.

Nearly 4,000 primary pupils receive £7.50 a year and 3,000 secondary pupils £10 to help towards the cost of school clothes and uniform.

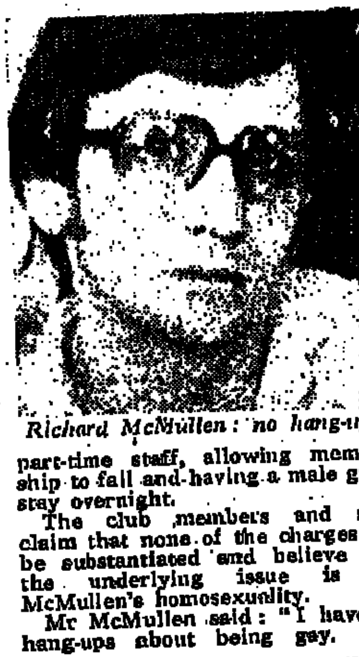
Union probes sacking of gay youth leader

The National Union of Teachers is investigating the case of a youth club leader sacked from a London club, grant aided by the ICEA.

Mr Richard McMullen, a member of the Community and Youth Services Association affiliated to the NUT, was dismissed from his job at the Third Feathers Club, Bramham Gardens, Earls Court.

Members of the club, which caters for 18 to 25-year-olds, are now occupying the premises in protest at the sacking and the subsequent closure of the club.

In a letter on April 29, Major Raymond Seymour, chairman of the club's management committee, asked Mr McMullen, who has been a youth worker for 15 years, to resign on three counts. He was accused of fostering bad relations with the part-time staff, allowing membership to fall and having a male guest stay overnight.



Richard McMullen: no hang-ups

The club members and staff claim that none of the charges can be substantiated and believe that the underlying issue is Mr McMullen's homosexuality.

Mr McMullen said: "I have no hang-ups about being gay.

Nursery groups: small is best

If children in nursery schools, classes and playgroups are to take part in activities that involve concentrated and creative thinking, and to engage in productive and interesting talk with adults and other children, the best bet is to put them in small groups (fewer than 26 children) with an excellent staff-pupil ratio (one to seven, or better).

They should be encouraged to work in pairs and have plenty of activities with definite goals and end-products—whether it is puzzles, art and craft, or large planks and boxes to make things with. They should play freely most of the time, but have definite sessions when they are all encouraged to settle to some adult-led task.

This is a crude summary of an elaborate research project published this week, which bases its findings on careful, minute-by-minute observation of what children actually do and say in nursery groups. The research was part of the Oxford Preschool Research Group, directed by Professor Jerome Bruner (see also page 17).

The results provide information on many controversial nursery topics—how "structured" activities compare (and fit in with) "free play", what kinds of settings and approaches encourage language development; the differences between nursery schools, nursery classes and playgroups;

Childwatching at Playgroup and Nursery School by Kathy Sylva, Carolyn Roy and Marjorie Painter. Grant McIntyre, £4.25.

Letters from Olympus

Dear Sir,

The campaign to persuade British athletes to boycott the Olympic Games is misguided. Its leaders not only fail to distinguish between politics and sport; they are unaware of the significant contribution to international goodwill and understanding that is made by this festival of youth and high endeavour. The Olympic ideal is one of the few we all share regardless of nationality, race and creed; and it would be tragic if it were to be squandered for short-term political ends. None of our athletes need have any hesitation about going to Berlin; they have trained hard and long and should not be denied the opportunity of pitting their skills against the youth of the world.

The campaign against the Games is being orchestrated by a group of leftists, trade unionists and Jews. It is a relief to know that Mr Baldwin and his Conservative colleagues in the National Government will have nothing to do with it. The grounds put forward by those who advocate a boycott merit only a brief rebuttal. The German occupation of the Rhineland a few weeks ago was a breach of the Locarno Pact but there is no doubt that it was carried out at the express wish of the people of that area. And it is clear that Herr Hitler has now realized the dangers of such precipitate action. His latest peace proposals provide, in the words of *The Times* leader, "a chance to rebuild". This is no moment to offend the German Government and people by a boycott of the Games.

Herr Hitler's treatment of Germany's Jewish minority raises different issues. Last year's Nuremburg Laws are wideranging and, by our standards, harsh. The same may be said of the Nazi's attitude to trade unionists and other political opponents. But we are much more likely to persuade the National Socialist Government to reconsider its domestic policies (insofar as that is our business) by remaining on friendly terms.

The wisdom of this approach is underlined by the reports that Herr Hitler has personally ordered distasteful anti-Jewish notices, such as "Juden unerwünscht", to be taken down. The suggestion that this has been done solely for the duration of the Olympic Games is typical of those who are incapable of believing any good of the German people.

The International Olympic Committee have declared themselves perfectly satisfied with the arrangements for the Games. They have refused to be drawn into a debate on Germany's internal affairs and have emphasized that the Games are not a German, still less a Nazi, occasion. The Olympic ideal transcends party and nationality.

The next Games are due to be held in Tokyo in 1940. No doubt some minority or other will find a reason to advocate a boycott. We must stand firm therefore on the principle of no political interference with sport. That way we shall help to guide Herr Hitler's "great social experiment" into democratic channels. To offend Germany now might well set us on the road to war. To extend the hand of friendship and détente through our participation in the Olympic Games will go a long way to guaranteeing peace in our time.

Yours faithfully,
Lord Blindasabat.

Dear Sir,

The campaign to persuade British athletes to boycott the Moscow Olympics is misguided. The politicians must not be allowed to use the Olympics as a stick with which to hit the Soviet Union. The Olympic ideal is one of the few we share regardless of race, creed and nationality and we must not permit it to be squandered for short term political ends. None of our athletes should have any hesitation about going to Russia; they have trained for four years for this moment and must not be denied the opportunity of pitting their skills against the youth of the world.

The campaign against the Games is being orchestrated by a group of Yankees, rightists and Russian emigrées. The grounds put forward by those who advocate boycott merit only a brief rebuttal. The Russian occupation of Afghanistan was at the express invitation of the Government of that country. It is clear that Mr Brezhnev is aware of the dangers of destabilizing the political situation in that part of the world and will soon be looking for an opportunity to withdraw Russian troops.

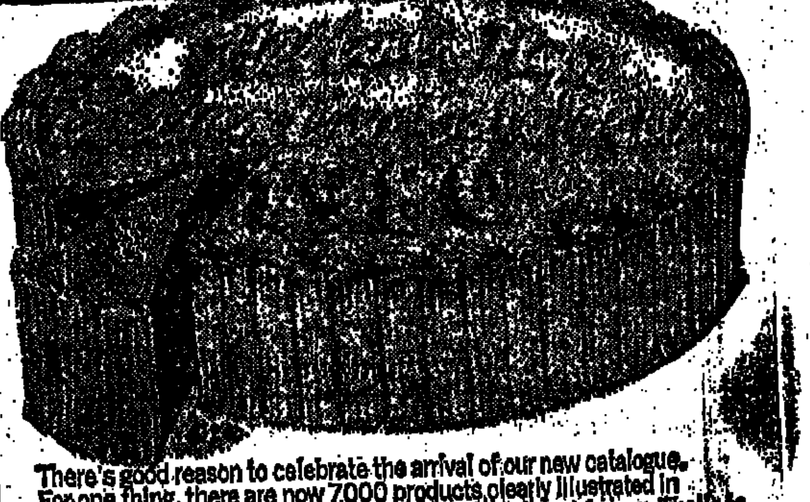
The Soviet Government's treatment of its Jewish minority raises different issues, but we must not make the mistake of judging other countries by our own high standards of personal liberty. We would do well to concentrate less on Soviet dictatorship and more on the great social experiment that is being tried out in that country. If we find some aspects of Russian society distasteful, then we are much more likely to influence the Soviet Government's policies by retaining friendly and open contact.

The International Olympic Committee and in particular, its chairman are satisfied with the arrangements for the Moscow Games. They have refused to be drawn into a debate on Russia's policies and have emphasized that the Games will not be a Russian, still less a communist, occasion. The Olympic Ideal transcends party and nationality.

The next Olympics are due to be held in Pretoria in 1984. No doubt some minority or other will suggest a boycott. We must stand firm, therefore, on the principle of no political interference with sport. That way shall help to heal the division of the world and to ensure that the Olympic flame lights our feet into the ways of peace.

Yours faithfully,
E. Ven Moreso.

We made it just for you.



There's good reason to celebrate the arrival of our new catalogue. For one thing, there are now 7000 products clearly illustrated in 884 full-colour pages. For another, we've made it just for you. That's to say, we've made it easier to find what you're looking for. We've given you concise descriptions, so you know what you are buying. And you'll be buying at real value-for-money prices.

But even when you are not buying it's still worth flicking through our catalogue. You'll find useful illustrated hints for class projects. And if you are wondering whether the industry as a whole will ever raise its standard of service, look no further! Even the answer to this imponderable is within our pages.

The Hestair Hope catalogue has always been food for thought. This year there's icing on it.

MPs call for special bursary fund to help overseas students

by Hilary Wilce

A substantial bursary fund for overseas students should be set up urgently to offset the effects of fee rises for students from abroad.

The fund should be established with a sizeable government contribution and private donations, according to a recommendation by the select committee on education, which presented its first report, an interim report on the effects of overseas student fees on higher education this week.

It would subsidize students of high ability, students in need, particularly refugees, and students serving United Kingdom and Commonwealth interests, and would help to maintain courses vital for British industry.

And, along with another select committee's report on the aid and development implications of raised overseas student fees, published simultaneously, it calls for an integrated government policy and improved information.

Both reports condemn the lack of coordination between the Foreign and Commonwealth Office, the Overseas Development Administration and the Department of Education and Science on overseas students.

Mr Kevin McNamara, chairman of the Overseas Development Subcommittee of the Foreign Affairs Committee, said his committee had been concerned to look at the quality of the decision-making process. "But there hadn't been any process at all. The Treasury took the decision, the Department of Education and Science implemented it, and the Overseas Development Agency took the thick end of the stick."

Mr Christopher Price, chairman of the education committee said: "We could have made a very much better report if the Government had provided us with the information we required."

Difficulties arose because information on inter-departmental consultation—a crucial factor in this inquiry—is not available to select committees. As a result the education committee has this week published a special report on the provision of information to select committees.

The education committee's report proposes that subsidies for overseas students should be carried on the Overseas Development Administration budget, that institutions should be given incentives to seek income from overseas students, and that the "ordinary residence" clause used to define overseas students should be clarified.

Both reports query the wisdom of subsidizing students from EEC countries without similar arrangements for students from poorer "special case" countries.

The development sub-committee noted that the number of students coming to Britain from poorer countries has been declining, while the number from middle-income countries has risen. Higher fees are likely to increase this trend.

The number of students financed under the aid programme will drop. The cost to the programme is estimated at about £3m, with a further loss of almost £29m in hidden subsidy because of the general withdrawal of subsidies for overseas students.

The report proposes that a minister in the Foreign and Commonwealth Office should be responsible for coordinating Government policy on overseas students and increased funds should be made available to ensure the present numbers of students supported by the aid programme are maintained.

The World University Service, welcoming the reports, urged that the recommendations on aid to refugee students be implemented immediately.

The National Union of Students said the reports were "damning indictments" of the decision-making methods of the government departments involved.

"However in their efforts to avoid offending the Cabinet Ministers concerned, the two committees have failed to offer any proper guidance on the role for Britain in educating foreign students", Mr David Aaronovitch, president of the NUS, said.

● Comment page 2

Chief exam officer appointed

Mr Peter Dines, a former joint secretary of the Schools Council, has now been appointed as the council's new chief examinations officer. One of the three secretaries who ran the council between 1976 and 1978, for the past two years, Mr Dines has been headmaster of Sir John Leman High School, Beccles, in Suffolk.

As head of the examination department, among the things he will be responsible for are the council's part in the new 16-plus examinations and the intermediate levels proposed to bridge O and A levels. He takes up his new appointment in September.

Governors, parents and teachers of Redbourne Secondary School chose a colourful way to protest this week when they presented a 3,000 signature petition to their MP, Mr Victor Goodhew, at Westminster. They are campaigning against Hertfordshire County Council's plan to close the school, which, they say, ignores Redbourne's high educational standards and healthy numbers of potential pupils.

At the same time, campaigns against closures are under way in Staffordshire, Cambridgeshire and Liverpool, while recently-announced proposals to close schools in the Manchester, Cheshire and Gloucestershire areas are expected to cause controversy. Staffordshire Council aims to lose around 50 rural schools by next July.

Bristol officials questioned on background to riots

Bristol's senior education officials and careers staff faced questioning from MPs yesterday about the background to last month's riot. They were asked to give evidence at a public hearing in the city by the Commons select committee on home affairs.

The committee is seeking to establish the extent of frustration among the black teenagers in the riot, and to identify its causes. It is aware of allegations of discrimination in employment, and of a slowness on the part of the city's schools to develop programmes to combat prejudice—and meet the specific needs of the black youngsters.

Youth leaders and community project organizers from St Paul's, the inner city district where the riot occurred, were invited to appear at the hearing with the police and representatives of both the city and county councils and of Bristol Council for racial equality, which has been fiercely critical of education in the city.

Mr John Golding, the chairman of the Commons select committee on employment, says that it will wait to see if the home affairs committee finds that employment difficulties contributed significantly to the St Paul's tensions before considering whether to visit the city.

Link-up with the Chinese

Language teacher assistants from China as well as young managers and technicians could be working here soon if British hopes for expanded Anglo-Chinese educational exchanges are met.

A seminar on links between the two countries, organized last week by the Central Bureau for Educational Visits and Exchanges, identified two areas for immediate exploration: a language exchange scheme and an industrial placement scheme. The bureau and the DES will now study the matter in a series of specialist meetings.

● Lord William's School in Thame, Oxfordshire, has become the first British school to be linked with a school in China. The tie-up, which is with a language school in Nanking, is still in its first stages; but Mr Peter Wells, the Oxfordshire school head, hopes it could eventually lead to student exchanges at sixth form level.

Literacy drive attacked

Central government and local au orities have failed to make a pro commitment to adult literacy p grammes, according to a report the government funded ad literacy unit.

The unit's annual report for 19 79 criticizes "short term initia and piecemeal measures" by t Government, which it says do n represent a coherent and long te policy. "Adult literacy provisi is seriously under-resourced almost every area of England a Wales when compared to the ne expressed by tutors and studen it adds.

The report has already been we by ministers who recently decid to broaden the role of the unit.

The report shows that 70,0 people attended adult litera classes in 1978-79 and over 37,0 people enrolled as volunteer tut In a foreword, Mr Mark Carlis Education Secretary, writes: "T report reveals that adult litera has taken its rightful place as a integral part of adult educatio provision but there is no cause f complacency and much still need to be done before we can say, we hope to be able to do, that a literacy is no longer a maj problem."

Adult Literacy 1978-79, Report o the Adult Literacy Unit's Manag ment Committee on the first ye of operation, HMSO, £3.25.

Independents agree to help with boarding fees

About 80 independent schools be longing to the Headmasters' Co ference (HMC) have agreed t offer help with the boarding fee of 400 pupils who get places unde the Government's assisted place scheme.

According to Mr Ian Beer, hea of Lancing College, who launche the private schools initiative in hi capacity as chairman of the HMC the plan has two main purposes: t demonstrate the long standing co mitment of the HMC to boardin facilities in this country, and to e courage the Government to includ in the scheme schools which mig otherwise be ruled out on th grounds that their tuition fees we too high.

Pupil-teacher ratio shows improvement

Teacher and pupil numbers fell la year leading to a small improv ment in the pupil-teacher rat government figures released th week show. The number of te chers in schools in January w 467,564, a reduction of 3,000 on th previous January. Pupil number fell by 2 per cent to 8,717,000 ov the same period and the overa pupil-teacher ratio improved fr 18.9 to 18.6.

Tories are divided over the future of ILEA

by Sarah Bayliss

Conservative members of the Inner London Education Authority are divided over the kind of reform they want to see in the running of the capital's education service.

A "substantial" majority in the Tory group of 20, favour abolition of the authority and devolution of its powers to the borough councils. But a minority, believed to include some important voices on the Tory side, want ILEA left intact but with members chosen by direct election, rather than indirectly through the Greater London Council or the London boroughs.

The difference of opinion is recorded in the group's submission to the Government's Young committee, studying the workings of the ILEA. It marks a shift away from the dogmatic but flimsy Baker report, chaired by Kenneth Baker, MP, which in March recommended disbanding the authority in favour of borough-run education services.

Professor David Smith, leader of the Tory minority on ILEA, told a press conference this week that his group was united in calling for some kind of fundamental change.

He said there had not been a vote in the group on what the alternative should be, but there were two differing views. The practical details of the alternatives—such as schools run by borough councils—were not included in the document to Lady Young because they had not been worked out yet.

Professor Smith's report, which includes some thorough analysis and statistics, criticizes the authority for its "extraordinary" financial powers.

The cost of education per head in 1977-78 was 30 per cent higher than the average for other cities in England. Academic results in London schools were below the national averages and did not justify this high spending.

Reports defending the ILEA were also submitted to Lady Young last week by Sir Ashley Bramall, the Labour leader and Mr Peter Newsam, the education officer.

The Young committee, made up of junior Government ministers, has set June 30 as its deadline for receiving written evidence on the ILEA. A wide range of alternatives are expected to be submitted, with at least one London Conservative suggesting a bigger education authority covering the entire Greater London Council area, with four or perhaps eight area education boards.

hatcher to set up inquiry after Clegg's £130m error

Probe after pay rise is frozen

Richard Garner

Prime Minister, Mrs Thatcher, ordered an inquiry into the 0m mistake made in the Clegg rt on teachers' pay. The 17 to per cent rises recommended by Clegg Commission, and agreed ween teachers and employers, e been frozen in the wake of commission's confession that it its sums wrong.

he investigation will cover the artment of Education and nce, Department of Employment the Office of Manpower Economics. The aim is to find out how ng information came to be given the commission.

r John Wordie, the chairman the Burnham committee, which otiates salaries, himself a lawyer, both sides to the agreement on nday that he would not be forwarding it to the Department of cation and Science for ratification until he had given it further sideration.

eanwhile, local authority leaders considering legal action, if ntually it is forwarded, to test ether the agreement—based on assumption the Clegg Commission had correctly assessed teachers' in their original report—should stand. They claim it is now ed on a "fraudulent premise".

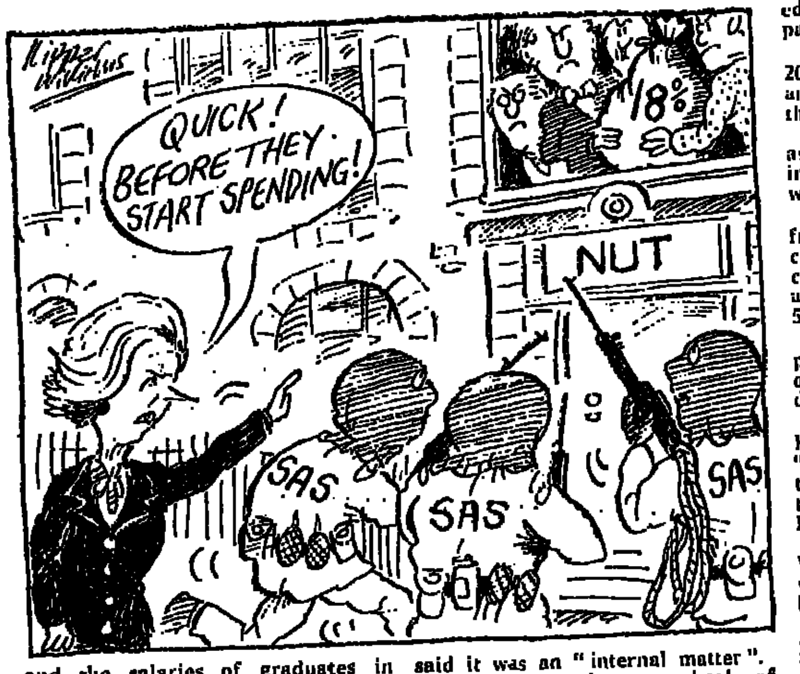
he management panel, which t yesterday, believes it has two ions—either to test the validity the agreement in the courts, or w back the £130 million through s year's pay claim for a 20 per t increase, which is in the middle arbitration. The management had ered 13 per cent, but this may w be reduced to around 9 per nt—the difference being the size Professor Clegg's error.

According to the procedure verning arbitration on teachers' y, either side is free to submit atever evidence it wants—even it had not presented it to the rnham committee before deadlock the claim occurred. However, a rther meeting of the Burnham mmittee may still be called before e terms of reference for arbitration are agreed.

The teachers argue that the management panel agreed in good faith pay the Clegg award of £640 llion and therefore the agreement ould stand. It was ratified by the ational Union of Teachers at a ecial conference at Scarborough the weekend and Mr Fred Jar- s, the general secretary, warned at "all hell would break loose" the authorities sought to go back it. Both the NUT and the ational Association of Schoolmasters/Union of Women Teachers said here would have been no agreement on the new figures put forward by Clegg.

Meanwhile, there were two burning questions left unsolved after rofessor Clegg's letter to the ime Minister admitting the error. ho supplied him with the false formation and why was it not otted before agreement was ached? The inquiry is expected provide answers.

In his letter to Mrs Thatcher, hich is said to have made her urious and confirmed Conservative inking that the Commission hould be wound up, Professor legg admits the report made a istake in assessing the number of ncrements received by teachers for heir different qualifications—thus roducing erroneous comparisons between graduate teachers' salaries and the salaries of graduates in other occupations. The net effect was that pay increases of between 17 per cent and 25 per cent were recommended—whereas they should be 13 per cent to 21 per cent.



QUICK! BEFORE THEY START SPENDING!
18%
NUT
SAS
SAS
SAS

In his letter, Professor Clegg says: "We greatly regret the fact that an error of this kind was made. It occurred in information presented to us and, of course, we accept full responsibility for the conclusions we drew from it."

Increments teachers get for their various qualifications (PGCE = postgraduate certificate in education).

	What Clegg report said	The truth
BSc ordinary		2
BSc honours		4
BA/BSc ordinary and PGCE	3	4
BA/BSc honours and PGCE	5	6
BEd ordinary (3 year course)	2	3
BEd honours (3 year course)	4	5
BEd ordinary (4 year course)		4
BEd honours (4 year course)		6

It was said at the Clegg commission that the mistake resulted from a telephone call made to either the management secretariat or the Department of Education and Science. The woman who made the call cannot remember which.

The management panel was adamant there was "no way" the information could have emanated from them. They say they were not consulted by the Clegg Commission after the abortive Inbucon job evaluation exercise.

Officials at the DES said there was "no reason to believe" they were at fault, but would not categorically state their innocence. They subsequently thought it "most unlikely" the error could have stemmed from them. They said that, if the story was true, the commission should have asked for confirmation of the information in writing or submitted a draft of the report for checking. Officially the DES said it was a matter for the commission and the commission said it was an "internal matter".

There was also a school of thought—canvassed by the NUT and NAS/UWT and supported by an independent research body, Income Data Services—that the error was cancelled out by another one.

According to Income Data Services, the second mistake was that the report did not take proper account of the fact that most graduates entering teaching had to do a year's training first. This meant that 25-year-olds in teaching were therefore being compared to 24-year-olds in industry, instead of comparing like with like.

On this basis, the Clegg commission had credited teachers with one increment too many. The two "errors" had cancelled each other out mathematically and therefore the award should not be reduced, the organization said. However, Professor Clegg said this extra year's training had been taken into account.

Mr Geoffrey Beynon, joint secretary of the Assistant Masters' and Mistresses' Association, told a meeting in Malvern on Monday night that—even if one accepted Clegg was wrong—the trained graduate teacher with a good honours degree should have got a 14.2 per cent rise and not 13 per cent, as recommended in the amended Clegg report. Again, the confusion arose over the age of the teacher when first taking up employment.

Pay negotiations for both university and polytechnic lecturers are also in a state of confusion this week in the wake of the misfortunes afflicting the Clegg Commission. The Association of University Teachers is now increasingly likely to withdraw from Clegg both its 1980 pay claim and the balance of the 1979 settlement, which is payable in October. The outstanding issues could then be settled through traditional negotiations.

A principal cause of the AUT's disenchantment with Clegg is its recent announcement that it would take up to 18 months to produce a thorough report on university lecturers' pay. But the AUT is also perturbed by the chapter of errors and counter-errors arising from the school teachers' and lecturers' report.

Budget chopped by £4m to meet the new costs

Kent county councillors are ordering cuts of more than £4m in their education budget after the Clegg pay award to their 14,000 teachers.

The drastic cuts include axing 200 primary jobs from September and cutting more than £1m from the capitation budget.

Council officials say they had set aside £10.3m to pay for Clegg during 1980/81 but the eventual cost will be £14.5m.

About £629,000 is also slashed from the school building fund, discretionary awards to further education students drop by 10 per cent, and adult education fees rise from 50p to 55p per hour.

Teachers' leaders believe the package cannot be introduced without redundancies and they condemned the proposals.

Mr John Barnes, chairman of Kent's education committee, said: "We roughly calculated the eventual size of the 1979/80 pay claim to be between 22 and 23 per cent. It was 27 per cent overall.

"We really were at rock bottom. We got to the point of doing what we haven't done before—moving backwards on pupil/teacher ratios.

"We get about 1,800 vacancies a year. There may be some compulsory redeployment but I would hope to avoid compulsory redundancies."

Mr Tony Hillier, county secretary of the NUT, said: "I am not as optimistic as they are about avoiding redundancy. There are no vacancies to which people can be redeployed".

In Hertfordshire, too, education officials are expected to be asked to make further reductions of £2.1m in their education budget which will include reducing the teaching force by 130 in primary and secondary schools from September. They stress that—although this will involve a reduction in the pupil/teacher ratio compared with 1979—ratios will still be better than in 1978.

A 2 per cent cut in capitation allowances for primary schools and the closure of a pupils' residential centre in Hitchin will also soon be considered by education committee members. County councillors say the cuts are to pay for the Clegg award to teachers and other pay increases for local government workers.

In a speech in Cambridgeshire last week, Mr John Sayer, president of the Secondary Heads Association, warned that several local authorities were planning last-minute staffing cuts "at the risk of vandalizing the planning of pupils' courses".

● A local authority has decided to stop paying teachers two months' salary at the start of the summer holidays to cut costs.

The London borough of Redbridge is to end the practice, adopted in nearly all authorities, of paying the July and August salaries at the end of the summer term. The council will also be encouraging teachers to accept salaries paid direct to their banks.

A spokesman for the council said this week: "Paying 12 separate monthly instalments means we do not have to borrow so much. And paying direct credit means that we can computerize the whole payroll.

Council finance officers estimate that they will be able to save as much by these measures as by having schools take more holiday in the winter and less in the summer to save fuel—an idea strongly opposed by local teachers.

The local National Union of Teachers' representative, Mrs Joan Moseley, said that teachers were strongly against losing some of their summer holiday.

Sweeping changes in pay negotiations proposed

Sweeping changes in the way teachers' pay and conditions of service are negotiated will be recommended soon to Mr Mark Carlisle, the Education Secretary.

Senior officials from the Department of Education and Science and local education authorities are drawing up a joint paper to be submitted to Mr Carlisle, which will outline their combined opposition to the present way the remuneration of the Teachers' Act operates.

While their suggestions may fall short of completely scrapping the present Act, they will urge the setting up of a new body which can negotiate both teachers' pay and their conditions of work. It is thought it may be possible to achieve this by amending existing legislation.

In addition, important changes will be sought by the local education authorities—such as ending the statutory right, as exists in the Burnham committee at present, to arbitration if deadlock is reached in pay negotiations.

Leaders of the local authority associations argue that this has been "too easy a road" to follow in the past and often leads to settlements too high for them to afford to pay. Opponents argue that it could lead to more disruption in schools in future if, say, the employers refused to go to arbitration.

Preliminary discussion between officials have revealed some differences over the proposed changes. For instance, local education authorities are anxious to remove the DES power of veto in pay negotiations.

The campaign to change the Act gathered momentum this week when the Council of Local Education Authorities delivered a strongly worded letter to Mr Mark Carlisle, the Secretary of State for Education, seeking an urgent meeting to discuss its repeal or amendment. CLEA calls for joint action "as a matter of extreme urgency".

Open plan used as money saver, claims report

by Bob Doe

Many open plan schools are not so much a bold innovation as a penny pinching expedient in which there is much muddle and make-do, a report to be published next month is expected to show.

Conceived originally as an adjunct to "modern" teaching methods in the 1960s, virtually all new primary schools are now built on this system because they are cheaper than conventional schools.

A Lancaster University research team led by Professor Neville Bennett, author of the controversial *Teacher Styles and Pupil Progress*, blame architects for many of the shortcomings of open plan schools. Such schools, they say, are no guarantee of informal teaching methods. In fact, generally the teaching in them is very similar to that in conventional classrooms.

Teacher training had "limped along behind" open plan developments and many teachers could not cope with an open environment.

In their research for the Schools Council, the Lancaster team contacted every head of the 2,000 open plan schools in the country, visiting over 100 and spending three weeks in more than 20.

Professor Bennett said this week, "Like traditional schools, there are good open-plan schools and bad ones."

Though there had been an educational rationale for them in the beginning, now architects said it was impossible to build anything but open plan primary schools within the official cost limits.

Reductions in space standards from 40 to 33 square feet per child were quite obvious when comparing the early and later open plan schools.

The researchers found a number of consistent design faults. In many schools practical or wet areas doubled as major thoroughfares resulting in extra disruption and the loss of teaching space. In many designs, space for pupils to move around had been virtually ignored.

A minority of architects and local authorities have tried to build better schools. But in a recent articles in the journal *Education 3 to 13* the Lancaster team accuse architects of a "cuckoo mentality" in which buildings are laid like the eggs of that irresponsible bird and then abandoned.

Teachers or heads were rarely consulted and mistakes were often reapeated in school after school because architects rarely checked to see how their designs were working. Over half the schools visited had no area where two or three teachers could teach in cooperation. This was condemned by half the 4,000 teachers questioned: "One indication of the mismatch between teacher and architect", the researchers say.

It is perhaps not surprising, then, to find that most teachers in open plan schools teach independently, as they would in conventional classes, though more cooperative or team teaching was found in infant schools which included shared teaching spaces.

As in most conventional schools, 70 per cent of the junior teachers in open schools used the "split day" in which the basics are covered in the morning and environmental studies, craft and project work is done in the afternoon.

The team's observational studies revealed that some teachers could keep children involved in their work for 19 hours a week whereas others only managed 13 hours, the equivalent of a whole day's schooling difference.

Half the time was devoted to English and mathematics, on average but the percentages on each varied considerably from school to school.

The majority of heads questioned complained that teachers coming to their schools were not competent to work in open plan settings. They lacked the organizational and interpersonal skills needed for team teaching. They could not draw up work plans, keep adequate records, teach small groups or share ideas, materials or space.

In spite of the fact that over 10 per cent of schools are now open plan, colleges seem to have done little to prepare teachers to teach in them.

Education 3 to 13. Vol. 8. No. 1. Spring 1980, price £1.41, from Nafferton Books, Nafferton, North Humberside.

SPECIAL ANNOUNCEMENTS

UNITED KINGDOM READING ASSOCIATION

UKRA offers
membership of a totally independent organization devoted to the improvement of reading—its learning and teaching at all levels,
UKRA provides for members
conferences
local councils throughout the United Kingdom
an information service
an agency for certain International Reading Association publications
an exchange and advisory service to teachers wishing to undertake research
Application forms and details of publications are available from: The Administrative Secretary, c/o Edge Hill College, St. Helens Road, Ormskirk, Lancs, England.

17TH ANNUAL COURSE AND CONFERENCE
THE READER AND THE TEXT
is to be held at
THE UNIVERSITY OF WARWICK, COVENTRY
MONDAY JULY 28TH-FRIDAY AUGUST 1ST

Meet the experts in this topical field and explore the attractions of Shakespeare's county.

The theme for the Conference is THE READER AND THE TEXT and many well known and distinguished speakers will contribute to the conference including: Professor P. David Pearson from the Center for the Study of Reading, University of Illinois, and Editor of Reading Research Quarterly.
Professor Eric Lunzer University of Nottingham School of Education and the Schools Council project "Effective use of reading".
Dr. Joyce Morris Reading Consultant, Author, Past President UKRA
Tom Gorman National Foundation for Educational Research in England and Wales, Monitoring Language Performance.
Asher Cashdan Past President UKRA and Schools Council Nursery Schools Research Project.
Patricia Wright Medical Research Council
Elizabeth Goodacre Consultant to the Centre for the Teaching of Reading, University of Reading.
Vera Southgate-Booth Extending Beginning Reading Research Project, University of Manchester, Past President UKRA.
Tony Pugh Open University.
The programme has been designed so that members, mostly in parallel sessions, may examine *texts* for, (a) primary children learning to read and (b) reading to learn in secondary schools and after. Members will then be concerned, again mostly in parallel sessions, with the problems *readers* may have negotiating these texts. Attention will be paid to various research topics and to reading in a second or foreign language.
There will be a full programme of Plenary, Semi-plenary and general sessions as well as Workshop Options, a Research Seminar, Civic Reception and Social Activities; including an evening trip to The Royal Shakespeare Theatre, Stratford-on-Avon—depending on the availability of tickets—and an afternoon trip through the Cotswolds to Hidcote Manor Gardens.

Heads warned of chaos as fewer staff take on lunchtime supervision

by Richard Garner

Stern warnings about "chaos" in Britain's education service will be delivered when headteachers meet this weekend for their annual conference in Cheltenham.

One area of major concern to be highlighted at this Whitsun's 83rd annual conference of the National Association of Headteachers will be over the school meals service and its supervision.

Motions have already been submitted drawing attention to the "chaotic situation" caused by "the complete absence of a positive government approach towards the provision of midday supervision in schools" and a special policy document is being prepared for presentation at the conference.

Headteachers are worried because fewer staff members are prepared to undertake what they see as a voluntary service and measures suggested for combating the current chaos include limiting the number of children allowed to stay on the school premises at lunchtime and introducing a strict staff/pupil ratio for midday meals.

However, it is not only the shortage of supervisors that is worrying headteachers. The different types of provision being made (quaintly referred to in one motion as "the various interpretations of what constitutes a packed lunch") make it even more difficult for those teachers who remain behind to keep an eye on all the children.

This is one of three items on which special policy documents will be presented over the weekend. The other major concerns are over teachers' conditions of service and education provision for 16- to 19-year-olds.

On conditions of service, the NAHT has been adopting the "softly, softly" line of the other teacher organizations (with the exception of the National Association of Schoolmasters/Union of Women Teachers, which is boycotting talks on a new deal on hours and conditions).

Increased industrial action by teachers over the past three years has prompted heads to believe the time is ripe for a new agreement but they are wary about defining a teacher's duties too closely.

Of course, the cuts in educa spending will figure as well dur the weekend debates with a blan motion deploring the cuts and s ing "these must now lead to fall standards". In this context, there will be bitter condemna of the Government's Assisted Pla Scheme.

On pay, there are motions c demning the "derisory" way which 1979 salary negotiations we conducted.

All in all, it adds up to the h that Mr Mark Carlisle, Secretary State for Education, can expect frosty—if not discourteous—rec tion when he addresses the conf ence on Tuesday morning.

Campaign Against Redundanci College lecturers meet tomorrow determine how to fight a growi wave of redundancies amo further and higher educati teachers (David Lister writes).

Mr Peter Dawson, general sec tary of the National Association Teachers in Further and High Education, said this week that mo than 200 redundancy notices h been issued in colleges and pol technics, and many more we threatened.

He added that some authorit were using "back door" methods persuading lecturers to take prem ture retirement to avoid prop redundancy agreements.

NATFHE is already taking ind trial action in Trafford and Surr and the union's annual conferen in Scarborough this weekend wi debate a number of strategies fi fighting the cuts, including th possibility of refusing to mark e amination papers.

Lecturers teaching TEC and BE courses will also be demandin more time off classroom teaching they claim these courses deman considerable administrative work.

FE teachers are also likely t protest at the conference against move by one authority, Herefor and Worcester, to change nationa conditions of service to make le turers spend more than the require 21 hours in the classroom. A counc policy committee report said tha fewer than half the county's 1,17 lecturers spend 21 hours lecturin and 600 had less than 19 hours week.

'Shoddy' move on Russian studies condemned

by Bert Lodge

More letters arrived at the Association of University Teachers' headquarters following the University Grant Committee's recommendations to close down Russian studies in several universities than were received on all other topics combined, including salaries, the AUT's annual conference was told last week.

Dr Andrew Taylor, president, said what was at stake was not rationalization but the credibility of the UGC and its standing in the university community. "I would ask them to shelve this incompetent and shoddy piece of work. The UGC should leave it to individual universities to deal with whatever problem may exist in Russian."

A motion to oppose the recommendations was carried unanimously. Proposing, Dr Gavin Orton, Hull, said the UGC had initiated the move because they believed there was a steady fall-off in the demand for Russian. Yet student numbers over a four-year period from 1974 had shown a drop of only 1.3 per cent.

"So it was decided to close Russian down in 19 universities, the equivalent of half the teaching force. They said it was wasteful. But they did not include any figures."

Dr Orton said the UGC had totally ignored the research contribution of Russian teaching. "They look at your research for promotion but not when they want to make you redundant." The UGC had neither consulted the British University Association of Slavists nor the AUT. "It just shows the UGC view of industrial relations."

The conference also carried unanimously a resolution to oppose the recent Flowers report which recommends a radical reorganization of medical education in London. This would involve the closure of at least one medical school and two pre-clinical departments in two other schools besides the re-location of several postgraduate institutions.

Mr John Akker, AUT deput general secretary, told the confe ence that when the associatio asked London University to substa tiate the figure of £3m for the co of the proposed reorganization th university admitted that this was "guesstimate". "We calculate th cost of just one amalgamation woul come to £14m."

But the crucial factor, Mr Akke said, was that the report contained no reassurance about staffing o transfers, not whether staff woul be able to retain their existing co ditions of service. A letter from Lord Annan in the last few day indicated some movement on th position of staff.

"It looks to me as if the Flowers report is going down the drain. The proposals of Flowers don't add u to a unified, cohesive approach t London reorganization."

The Association has decided to boycott all universities in South Africa. Lecturers have been urged not to work in the country.

Call to end child work 'national scandal'

by Sarah Bayliss

The law on child labour should be tightened up to force employers to insure children—like motor vehicles—before using them.

Mr Glyn Rowlands, chief education welfare officer for East Sussex, said this week that the employment of children in Britain was still a "national scandal".

In his presidential address to the annual conference of the National Association of Chief Education Social Workers at Llandudno, Mr Rowlands said that despite local efforts to publicize and carry out the present legislation, some of the employers were breaking the law.

In the recent early morning swoop in East Sussex, only five out of 26 children working were registered as required with the local education authority. Six newspaper boys had started their deliveries illegally before 7 a.m. Two children were under the legal age limit of 13 years.

Mr Rowlands said he wanted laws to make prospective child employers register every working child with the local Department of Employment office. Employers should have a certificate of insurance on each child before being allowed to employ one. They should also be made to provide proper clothing against bad weather including flourescent jackets for newspaper boys and girls.

Two aspects of the new Education Act also came under fire. Firstly, it had failed to introduce a third leaving date at Christmas time for 16-year-olds.

Secondly, the new Act has made nursery education discretionary at a time when there was a greater need for it. The difficult pupils whom officers met could be "the very ones who missed out on a nursery school start to life".

Oxfordshire stops awards for all postgraduate training courses except teaching

Graduate law students' grants axed

by Ian Kellas

Oxfordshire law students will have to find about £2,000 to qualify as solicitors or barristers. The local education authority has stopped awards for graduates on vocational training courses where grants are discretionary.

Mr John Makin, a teacher whose son is studying law at university, understands Oxford's need to cut spending but complains that because of the block on discretionary grants, "we have the ridiculous position of a course aimed at a particular profession, and which has been deliberately entered into by a student with a view to joining that profession, being stopped at three-quarters of its distance."

"If my son lived two miles up the road in Buckinghamshire he would get the complete grant and maintenance", Mr Makin says. Oxfordshire has cut second awards to "give a chance to people doing initial courses". The ban starts in September.

According to the Law Society, other l.e.a.s are also making cut-backs—but often only in the size of the grant awarded. ILEA has ruled that no grants will be given for second qualifications but has made an exception of "natural follow on courses", which means that graduates going to law schools will still be funded in full.

The Law Society now requires graduates to attend a year's course before sitting for the qualifying final examination. Until this year, the course could be done in six months. Tuition fees for the year at the College of Law amount to £960. There are no central government bursaries for graduate law studies as there are for instance for professional courses in librarianship.

The National Union of Students wants all full-time vocational courses to be designated for mandatory awards, but failed to win a concession on this point at the recent government triennial grant system review.

Despite the squeeze on grants, the 2,800 places at law schools in the country are heavily oversubscribed.

The Royal Commission on Legal Services gave strong support last year to public grants for students undergoing the vocational part of legal training and warned that unless this was given "the social balance in the profession cannot be expected to change appreciably". It quoted approvingly from the earlier report of the Ormrod Committee which said that unless changes were made in the grant system, "recruitment of the profession will continue to some extent to be limited to those with parents who are able to afford to maintain them during the period of the course".

According to Mr Christopher Snowling, secretary at the Law Society, there are no plans as yet to reorganize legal training along the lines of medical or architectural courses so that it might become eligible for complete mandatory grants.

Union refuses help in publishing staffing figures

NALGO, the trade union representing 500,000 local government officers, is determined not to cooperate with the Government in publishing staffing figures of individual authorities.

The union says that the figures, collated by the Joint Manpower Watch, are "misleading and meaningless" without any kind of background information.

Mr Michael Heseltine, Secretary of State for the Environment, has said the blacking action is "typical of the negative and hostile, almost Luddite attitude that so many people criticize local government for".

Appeal Court may rule on parent 'rights'

Richard Garner

The Court of Appeal may be asked to judge whether a parent has a right to be consulted in advance about the curriculum of a comprehensive school.

Mr William Winter, a parent of two children about to enter fourth-year studies at Ongar Comprehensive School, Essex, is considering an appeal against a High Court ruling which rejected his claim that an option list offered to his two eldest sons was "inhibitory and restrictive" and that the education authority had therefore breached its statutory duty.

Mr Winter, who lives in Mayflower Way, Ongar, and is a teacher himself, may also ask Mr Mark Carlisle, the Education Secretary, to intervene in the belief that the constraints imposed by the school's "option list" denied his two sons the right to take subjects which would aid them in pursuing a career.

At the conclusion of the High Court case, the county council said it would be prepared to offer Mr Winter's sons places at a school which operated the kind of system he preferred—provided he met their travelling costs.

Since then, the only offer made—and rejected by Mr Winter as "ridiculous"—has been at a school outside Essex in Newham. Discussions are still continuing over a transfer to a new school and Essex education officials have said they are prepared to consider any suggestion put forward by Mr Winter. They have not so far decided whether to press for costs incurred in the case—estimated to be about £3,000.

Adult courses 'should teach how to strike'

by David Lister

Adult education should teach working class people how to organize rent strikes and become effective trades unionists instead of pandering to esoteric middle class hobbies, according to the editor of a new book on the subject.

The book, *Adult Education for a Change*, contains articles by several university lecturers who say that people who felt alienated at school and particularly in the working class fail to take advantage of adult classes.

The book's editor, Jane Thompson, lecturer at Southampton University, told the *TES* this week: "Adult education should be places within the realities of political struggle. It should actually be a tool for the working class, but traditional provision is esoteric subjects such as Roman cookery."

In the book's introduction she writes: "The provision of (l.e.a.) classes in, for example, hostess cookery, beauty and skin care. Yoga is as likely to encourage an implicit celebration of domesticity, quietism, consumerism and sexism as anything the most coercive instruction in passive citizenship could achieve."

Adult Education For a Change, edited by Jane L. Thompson (Hutchinson), £.450.

Protesting head's early retirement is confirmed

by Sarah Bayliss

Birmingham education authority has agreed to early retirement for a head teacher of a comprehensive school who protested at the Government's decision to allow a neighbouring school to revert to a grammar.

Mr Kenneth France, aged 56, head of the John Willmott comprehensive in Sutton Coldfield for the past 12 years, will retire nine years early at the end of the summer term.

On May 2 *The TES* published Mr France's decision to quit his job after Mr Mark Carlisle, the Education Secretary, agreed to a request from the Conservative-controlled authority that Sutton Coldfield Girls' School be allowed to turn back into a grammar school.

Mr France said a selective school two miles away could turn his school into a secondary modern by depriving it of the brightest girls. Bright boys were already creamed off to the Bishop Vesey's school, which never went comprehensive and which recently declared an intention to go independent.

Mr Carlisle's decision came only eight days before the local elections when, as predicted, the Labour party seized Birmingham from the Conservatives with a majority of 13 seats. Labour candidates were publicly committed to reversing the Government's decision and keeping the Sutton Coldfield Girls' school a comprehensive.

Despite the change in political control Mr France—whose school went comprehensive five years ago—stuck to his decision. He said he had had enough of "political footballing" and believed the issue would continue to be kicked from party to party in Sutton Coldfield.

Mr France, who last week spoke at the launching of the Campaign for Comprehensive Education in London, said this week. "I am extremely sad to leave the school but there is no alternative course for me".

Dr Charles Gray, new chairman of Birmingham's education committee, also expressed regret at Mr France's leaving. "I regret if any head teacher feels obliged to resign on the issue of comprehensive education because it is our policy to produce a fully comprehensive system throughout the city. We shall do everything we can to reverse the Government's decision on Sutton Coldfield Girls' School."

Mr Ronald Wootton, a Conservative councillor and chairman of the John Willmott school governors at the time Mr France requested early retirement, said the school was a "first class" comprehensive and the headmaster was a "splendid teacher".

Evidence submitted to the Department of Education on the grammar school plan shows that 300 signatures were in favour and 889 were against. However Mr Carlisle also took into account a crucial vote of 520 parents in favour and 142 against, taken at a meeting at the school in November last year.

Foreign language exams under attack

by Bob Doe

The artificiality of most foreign language exams is attacked this week in a book calling for a radical revision of modern language testing at 16 plus.

Modern languages examinations at 16-plus is published by the government-financed Centre for Information on Language Teaching and Research. It blames most of the present O levels and C.S.E.s for distorting school language teaching by placing too much emphasis on the structure of language and not enough on its use.

In exams it is not what the language is doing or meaning that is important but whether it is well formed, say the CILT authors Alan Moys, Anne Harding, Brian Page and Valerie Printon.

"The effect upon teaching is very serious indeed", they add "The artificiality of examination tasks inevitably produces artificiality in teaching".

Pupils were taught translation, not native performance and to read for the purposes of comprehension exercises, not for pleasure. Most marks went for writing when this was the least used form of communication with foreigners.

"The use of language is one of the most natural of human activities. What characterizes foreign language exams is their unnaturalness."

Subtitled *A critical analysis*, the book surveys and compares all the existing O levels, Scottish O grades and CSEs in French, German, Italian, Russian and Spanish. The authors looked at what each exam claimed to do, how closely the syllabus was defined and at the marking schemes and papers.

"Not one specimen of genuine spoken language has been set in a public examination." Few exams even used pieces contrived to sound natural such as weather forecasts, train announcements or guide's commentaries.

Many exams included a "conversation" section, though this rarely resulted in anything that could be recognized as such. "A disaster area of some magnitude", is the authors' verdict.

Adolescents found themselves "incarcerated with a strange adult who gets them to attempt to talk about almost anything for no good reason except to trap them into the wrong verb formation." Far from being tests of communication many of these orals were little more than tests of grammar.

The view of life in other countries portrayed in exams was often out of date or reflecting the examiners' own biases. Customs inspections of luggage on borders between common market countries, is one example given.

The main distortion of life, however, was the stereotyping of male and female roles, and the low status accorded to women. Of the prose translations, passages for comprehension, dictation and reproduction and various outlines of letters to stimulate composition in the 1978 exams, 11 had completely male casts. Only two had female ones and even one of these spent most of her time dreaming of a handsome captain.

The Southern Universities Joint Board managed to produce a whole French exam totally excluding females. "There are boys, men, fathers, grandfathers, family friends, passengers in trains and every single one is male."

"In the course of the various papers from all the boards, men and/or boys appear as doctor, teacher, head teacher, policeman, postman, soldier, concierge, aeroplane pilot, jeweller, thief, train driver, explorer; they climb mountains, attempt to break records, catch thieves, fish, row boats, almost get drowned or save others from drowning, visit Paris with their fathers, run away from home or get kidnapped.

"Women and/or girls ask their husbands for money, make sure the man has a good job before accepting to marry him, prepare food, lay tables, walk very quietly about because father is working, play the piano, and receive orders from men for food and services."

The authors also complain of the lack of comparability between different boards. "How can one equate an Oxford candidate, who has passed an examination where 12 per cent is given for oral competence and 49 per cent for written composition with a Grade 1 C.S.E. candidate from the Middlesex Board where 35 per cent is given for the oral and 25 per cent for written composition? Is there any evidence to suggest that these two candidates are displaying similar intellectual powers?"

Because the oral demands made on pupils were now much greater, without any lessening in the grammar demanded, the burden was much greater on pupils now than 20 years ago and should be reduced.

● An analysis of O and A level history examinations has shown them to be obsessed with politics to the detriment of social, economic, religious and cultural history.

Dr Bill Inglis, a lecturer in Stirling University's department of education, has carried out a detailed "content analysis" of the examinations of the Joint Matriculation and Cambridge GCE boards, though he says other boards are much the same.

In the latest edition of the *British Educational Research Journal*, Dr Inglis says up to threequarters of the questions asked are about governments or political leaders, giving pupils a distorted view of society. By concentrating too much on the activities of a small ruling class, pupils were given the wrong impression about the multiple causes of major historical events.

The different boards' papers were so nearly identical as to duplicate each other's work. This restricted the freedom of both teacher and pupil, says Dr Inglis, who is campaigning for a broader and more modern approach to the subject.

"For the last 100 years most historians have accepted that their subject is and should be made up of different specialist types of history, none of which should necessarily have primacy", he says.

Modern Languages Examinations at 16-plus; a critical analysis by Alan Moys, Anne Harding, Brian Page and Valerie Printon published by CILT, 20 Carlton House Terrace, London, S.W.1. Price £9.25.

British Educational Research Journal. Vol 6, Number 1, 1980.

Board bars deaf girl from test

A deaf girl was prevented from taking part of her CSE English exam last week because she could not hear a recording that was supposed to test aural comprehension.

Her teachers at Churchfield High School, West Bromwich, wanted to read her a transcript so she could lip-read but this was vetoed by the examiners.

Denise Andrews, aged 16, lost 10 per cent of her marks by not taking this section and no concessions will be made by the West Midlands exam board. A spokesman for the board said it was not possible for them to assess what score she might have got as it was in cases of illness at the time of exam.

Surgeons put tattoos to the knife

by Ian Kellas

Plastic surgeons in Northern Irel are having their work cut removing unwanted tattoos fr children.

Mr N. Morrison, chief inspec at the Department of Educati Bangor, co Down, has sent circular about the problem to schools and further educati colleges.

The surgeon's job is made easier because some childr indulge in self-inflicted tatto using instruments such as needl and pen nibs with pigments su as ink, eyeshadow, and black le

They are particularly hard remove because they are irregul Excision and skin grafting is som times necessary; other cases c for dermabrasion (grinding do of the skin). In any case th process is "slow and painful", Morrison says.

Teachers are reminded that und the Tattooing of Minors (Northe Ireland) Order 1979, it is now offence to tattoo any one und 18. "Medically the most dang ous risk from tattooing", the c cular says, "is that of developi infective hepatitis or septicaem due to poor standards of hygiene.

There are also serious soci problems. "The subject matt may well prove at a later date be a constant source of embarras ment"—or even "dangerous to li in our society."

The Department of Health an Social Services, whose surgeon have more important things to d asked its advisory committee health education how best to co bat the problem of tattooing.

It gave a warning, however, th caution and sensitivity should b taken to ensure that efforts discourage the practice did n stimulate the natural curiosity young people.

Higbury Hill girls enraged at merger

by David Lister

Highbury Hill High School for Girls is to complain to the Equal Opportunities Commission over the decision by Mr Mark Carlisle, Education Secretary, that it must merge with another girls' school nearby.

The decision, says headmistress Mrs Margaret Mann, is discriminatory because it will mean fewer places for girls wanting single sex education in Islington, and will force many of them to travel to other London boroughs for their schooling.

Mr Carlisle has decided that the school must merge with Shelburne School on the Highbury Hill site. At the same time he turned down a similar merger plan by the ILEA for Highbury Grove and Sir Philip Magnus boys' schools on the grounds that this would damage the Highbury Grove system which had considerable parent support.

The Highbury Hill parents action group claims the plan to save Highbury Grove was influenced by the fact that Dr Rhodes Boyson, junior education minister, used to be the school's headmaster.

Mrs Mann said this week she would be pressing Mr Carlisle to state full reasons for his decision. "I am sure Highbury Grove was helped by being Dr Boyson's old school", she said. "We too have had excellent exam results and massive parent support, and I cannot see any educational reason why our school should be treated differently from Highbury Grove. The girls in Islington are going to be offered an inferior education because of this decision."

Mrs Mann added that she suspected the ILEA were going to use the Shelbourne buildings for a sixth form centre and "introduce a sixth form college by a back door method".

Mrs Helen Cagnoni, chairman of the school's action group, said: "This decision is unfair to girls in Islington. There will be 150 fewer places available in girls' schools from 1981 so that girls will have to travel to neighbouring boroughs. In this so-called age of equal opportunities this unjust treatment ensures girls are treated as second class citizens".

She added that if the EOC was unable to help, an appeal would be made to the European Court of Human Rights.

ILEA education officer Mr Peter Newsam said last week that it would be premature to comment on the total number of places available in girls' schools in Islington in the 1980s as the Education Secretary had only given a decision on two of the four girls' schools there.

But he added that the effect of his plans would be to reduce the number of girls' places to a level very close to the estimated need.

"There will, however, be a substantial margin of girls' places available both in Hackney and Camden. The proposals also help to correct the present somewhat imbalanced entries to the mixed schools in Islington."

Mr Newsam added that there was no proposal to create a sixth form or tertiary college "by back door or any other methods" as feared by the parents.

Knave tricks in the nave

by Bert Lodge

...AND DELIVER US FROM 3.C.

Some teachers dump their pupils in York Minster then go off to a pub, a café, shopping, or even the hairdresser's. And a party of school children was only prevented from settling down to a game of cards in the nave by the arrival of a verger, says a report from Mr Jack Allen, recently retired as the Minster's tourism and information officer.

On one day last July no fewer than 65 school parties visited the Minster. Of these only 11 bothered to notify their intention in advance and the 54 arriving unannounced included a party of 600 from Avon.

"Ideally, for the benefit of teachers and children alike, school outings to York Minster should take place at any time other than from May to July", says the report.

"When so many school parties are in a cathedral, probably already thronged by tourists, control is obviously a difficult problem. . . . Sadly, it is a matter of record that it is at these times that some teachers give up the unequal struggle and just leave their pupils to roam round the Minster on their own while they, the teachers, take themselves off for a beer or a cup of tea or to do some shopping or even to have their hair done.

"When the teachers are absent or are not exercising control it is not uncommon to see groups of children running about, shouting to one another, spitting chewing gum on the floor, drinking from cans or bottles of pop, clambering on or defacing monuments or even, as discovered by one of the vergers, settling down to a game of cards".

But the dean and chapter empha size that they are delighted to have school parties and for that reason have set up a schools advisory service. This provides information on when sightseeing is restricted, the walking distance from coach parks or the station and the availability of public conveniences. A range of resource material, including pupils' worksheets is also available.

In the school year, 1978-79, over 65,000 school children visited York Minster from 1,500 schools and from every county except Cornwall. In July alone there were 27,000 visitors from more than 600 schools.

"With such large numbers it is vital that teachers should plan the arrangements for an outing with great care. Sadly, not all teachers seem to have grasped this principle."

Jobs safeguards in Northern Ireland demanded

by Paul McGill

A government working party has said that Northern Ireland's deprived schools should get more resources, more freedom to use them and guarantees against teacher losses of at least two years.

The 10-member team was set up in March, 1978, under the chairmanship of the regional director of the Open University, Mr Gordon MacIntyre, to consider how additional resources could help to combat educational and social disadvantage.

The Report of a Working Party on Social Priority Schools, argues that, on any social indicator, Northern Ireland is the most deprived area in the United Kingdom. As a result, many schools face enormous difficulties in motivating pupils to escape from the cycle of deprivation.

It notes that steps have been taken on several fronts to tackle these problems, such as the Belfast Areas of Need project, but whereas in England policies were developed in a more or less coherent programme, in Northern Ireland they lacked any clearly articulated context.

The report rejects the idea of a firm cut-off point with schools above the line getting extra help and those below getting none. Instead it suggests that low income, family stress and school-based problems should be used as criteria to divide primary and secondary schools into about seven groups each.

Funds should be increased according to the degree of disadvantage.

The report says schools should have much more discretion in spending their money.

It complains that falling school rolls, by leading to staff losses, make it difficult to carry out strategic planning.

"We therefore urge that schools be given a guarantee for at least two years at a time, and if possible for longer, that staffing establishments will be maintained at a given level, and that when reductions are unavoidable, schools should be given notice of at least one year", it argues.

While outlining firm steps to combat disadvantage, the working party warns that education alone cannot break the cycle of deprivation. Its final recommendation is that child poverty and its causes be recognized as evils in themselves which can be remedied only by the creation of a more just society.

Southend plea

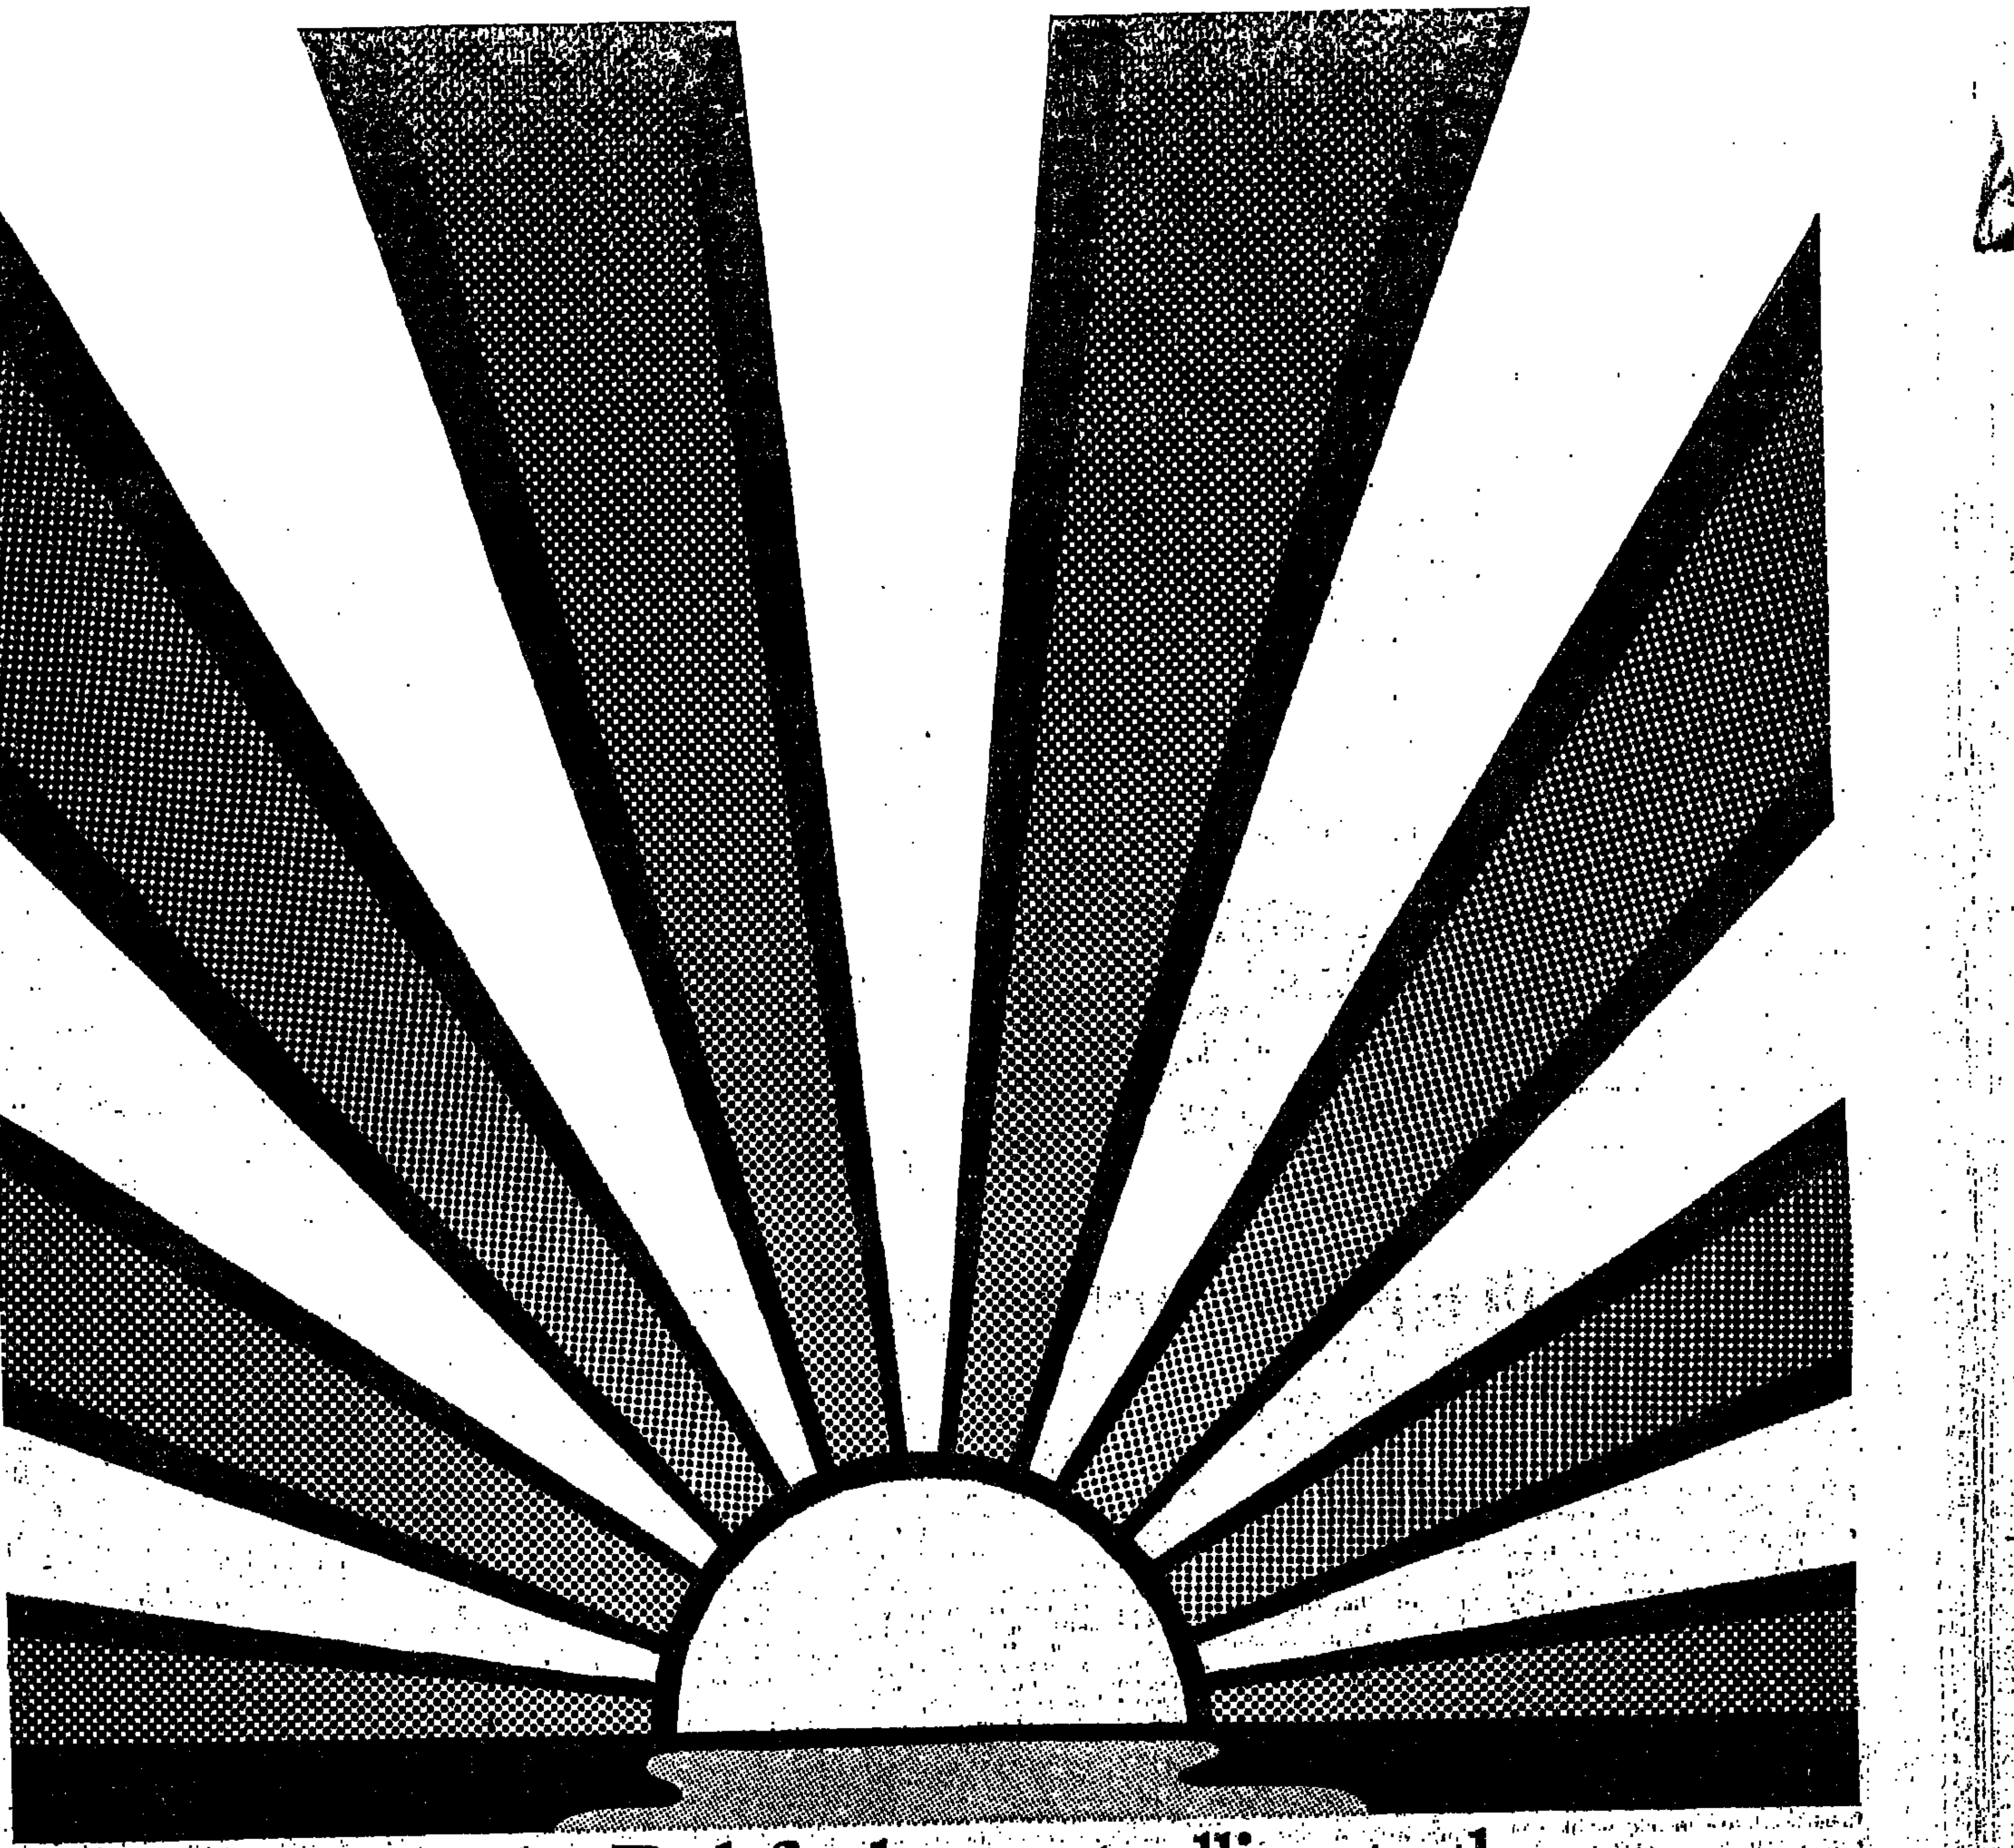
Concern is being voiced by teachers over a plan to merge two secondary modern schools in Southend because of falling rolls.

They believe the plan to merge Southchurch Hall High School for Boys and Dowsett High Girls' School in Southend in September, 1981, into one school for 11 to 16-year-old pupils will result in brighter children being "creamed off" to two existing comprehensives in the neighbourhood which both have sixth forms.

Healthy prospects

The final report of a six-year project exploring the theory and practice of health education has just been published. The project, directed by Mr Henry Fowler, was funded by the Leverhulme Trust and based at Nottingham University.

The report contains summaries of the project team's researches, lists of its publications and data, all divided according to the profession under scrutiny: teachers, nurses, dietitians, and paediatricians are included.



How the Pathfinders are selling to the world's toughest salesmen.

Everyone knows how successfully Japan sells to Britain, but do you know how much we sell to them?

Every day millions of Japanese ladies wear dresses dyed with ICI dyes; hundreds of thousands of Japanese patients take ICI medicines; and much of that delicious Japanese food is grown with the help of ICI crop protection products.

In fact, ICI are one of the biggest foreign chemical companies in the Far East; last year our exports to Japan alone went up by 25%, something which is all the more remarkable because the Japanese have a very large chemical industry of their own.

How did we do it?

Part of our success comes from manufacturing some of our products on the spot in Japan, in partnership with Japanese companies. Surprising though it may sound, manufacturing overseas like this actually increases exports from home. Because it creates a demand for the basic materials those factories need, and for other ICI products that we make here.

In fact, in the last couple of years, ICI have invested more worldwide than any other chemical company. In this way our overseas investments create jobs at home, which is one of the benefits of having an international network.

Of course Japan isn't our biggest market. But it is one of the most competitive. If you can sell to the Japanese, you can sell to practically anybody.

ICI

The Pathfinders
Selling worldwide for Britain.

School to work

The Government has finally agreed to allow the Technician Education Council to become completely independent. This means that the City and Guilds Institute, which fiercely opposed the move, will no longer have any real stake in technician education. The decision follows an attempt to maintain the TEC as an autonomous educational body within the institute's framework.

City and Guilds lose control over technician teaching after long battle

by Mark Jackson

The Technician Education Council has won its long battle for independence. The Government has agreed that it should become completely separate from the City and Guild's Institute, which will cease to have any major stake in technician education.

It means that colleges will in future have to deal with two bodies for their technical courses—one validating technician training, the other examining craftsmen.

The parting is not an amicable one and follows years of tension and increasing hostility between the two bodies. The Government's decision is bitterly resented by the institute—for reasons of prestige and hard cash, as well as educational considerations.

The council was set up in 1973, following the recommendations of the Haselgrave committee four years earlier that one body should be responsible for all technician education courses. The new creation was a quango, with a full-time chairman and part-time members from industry and the education service appointed by the Secretary of State for Education.

The City and Guilds' institute, an independent foundation which had become the world's largest examining body for craft and technician courses, volunteered to take both TEC, and its sister body, the Business Education Council under its wing.

Under the DES's original plan, TEC was to be an autonomous educational body within the institute's administrative framework. The institute hoped that this meant it would control the whole administration of the new structure of courses, leaving TEC with the planning, validation, and supervision of standards.

But as soon as it was formed the new council decided otherwise. It became a limited company; appointed its own chief officer (instead of the secretary or director of studies envisaged by the DES); and announced that it would adopt a completely different approach from that of the institute, namely that it would validate courses, but not examine students. Nevertheless, the council entered into a 10-year contract.

But City and Guilds provided all the staff for both sides of the operation, apart from a TEC chief officer and two assistants: TEC paid the institute out of its fee income and a DES grant.

On the strength of the contracts with TEC and BEC, the institute took on another 100 staff and a big new building at King's Cross in addition to its existing headquarter offices.

But after the appointment of the TEC chief officer, Mr Francis Hanrott, it rapidly became plain that TEC had different ideas about its role. His council refused to allow the new TEC courses to be run by the same people as the continuing City and Guilds courses, and insisted that the institute should set up a separate operating division for them under his control.

Senior institute staff began saying that TEC was flouting the spirit of the agreement: relations improved for a time after the arrival of a new City and Guilds director general, Mr Harry Knutton, who had been given secret instructions by the institute's council to do everything possible to heal the breach. But at the same time as it made conciliatory noises, the institute began to fight back.

Believing that colleges were being encouraged to set up TEC courses when they really should have been providing traditional craft training, they countered by developing advanced City and Guilds qualifications for "super craftsmen" which were clearly aimed at offering the equivalent of technician status. Mr Knutton says that TEC's approach has pleased both large companies who are able to get colleges to put on courses that meet their specific needs, and colleges, since technician courses mean higher status and pay for staff. But he maintains that it makes it more difficult, particularly in small towns where there are limited numbers of students, to get colleges to train the craftsmen whom small employers usually need.

TEC's chief officer agrees that problems have become increasingly difficult over defining the difference between technicians and craftsmen in many jobs, particularly as technological change makes new demands on craftsmen. In one field, agriculture, employers have finally refused, despite heavy DES pressure, to accept TEC courses at all, and the council has quietly allowed the agricultural committee to die.

His deputy, Mr Frank Fidgeon, admits that TEC has been so preoccupied with planning and curriculum matters that only recently had it been able to look at working out with the institute what could be done to cooperate over the technician craftsman inference.

Under the contract between the two bodies, three years' notice has to be given this October if it is not to be renewed in 1983. TEC might have been content to wait those three years before severing its links with the institute; but a few months ago a document came into its hands which persuaded the council that their independence was at stake.

The document was an institute discussion paper prepared for internal circulation which set out a role for TEC as a policy committee

City and Guilds Institute Director, Mr Harry Knutton, outside the Britannia Street headquarters.

of the institute rather than a separate body. Mr Knutton says that it was not a declaration of policy, but simply a staff paper setting out a number of options for the council to discuss. "It didn't mean anything, and it was scrapped by the council. I don't believe that it really triggered off anything—TEC have gone their own way from the start and it was clear what they were really after."

The institute itself, which knew that the final decision would have to be made by the Government, began to manoeuvre to strengthen its position. A powerful argument for TEC is that its committees represent employers. Last autumn the institute pulled off an agreement with the regional examining bodies, which control FE courses in many parts of the country, under which their representatives joined the institutes' governing and policy bodies and the institute takes over certification of their examinations.

Since the REB's usually have local employers on their councils, it meant that the institute could now claim that industry throughout the country had a say in their affairs. But in the end it has made no difference.

A month ago, the 12 members of TEC's council decided that the TEC must separate itself completely from the institute for the body to achieve full recognition of its independent status. It decided formally that it would give notice that it was ending the contract, but unofficially gave Mr Hanrott the go-ahead to get TEC away from the institute as quickly as practicable.

Mr Knutton recently visited the DES hoping to persuade ministers that it would be nonsense to set up an expensive quango which would create a confusing and arbitrary division in technical education.

He came away saying: "It's settled as far as they're concerned. Mr Macfarlane, the Education undersecretary, was not interested in discussing the matter."

The sums involved in compensating City and Guilds are likely to be fairly large—"millions rather than hundreds of thousands", says Mr Knutton.

Mr Fidgeon says that TEC hopes to leave within a year—"obviously, the quicker the better in view of our relationships"—and that it hopes to be able to dispense with the DES subsidy next year after a terminal grant. TEC is about to announce a small rise in fees to meet inflation, but Mr Fidgeon was unable to say whether a further rise will be necessary to meet the costs of independence.

Year 'in the world' suggested for 14s to 16s

by Sandra Hempel

A widening in the size and scope of apprenticeship schemes, with training allowances instead of wages are among the recommendations put forward in a report out this week.

In a series of wide-ranging proposals, the report also calls for a voluntary examination and certificate in basic literacy and arithmetic. Successful candidates could opt to leave school at 15 or to take a year off "in the world" between 14 and 16. This could take the form of conventional employment, pre-apprenticeship experience, voluntary service, self-employment or a combination of activities, including even unemployment.

The report, entitled Youth Unemployment and the Bridge from School to Work, has been produced by the Acton Society Trust and funded by the Anglo German Foundation for the Study of Industrial Society.

A working party compared youth employment in Britain with those countries with a comparatively large apprenticeship system, such as West Germany, Austria and Switzerland.

The report argues that the state of the labour market is not the only or even the main contributor to youth employment problems. These can be just as great in a bouyant labour market.

Young people in high apprenticeship countries had suffered less from the tough labour market than those in Britain. This was because apprenticeship systems helped to insulate them.

Calling for an extension of apprenticeships in Britain, the report says that German apprenticeships cover over 400 jobs, including office work and selling as well as manual trades.

Schools come in for criticism. "In their preoccupation with exam passes the schools have neglected the personal development of pupils and have increasingly cut themselves off from the outside world."

EXCHANGE

International education is not a subject to be taught; it is a frame of mind. Educational exchange is a network through which the spirit and fact of international education can spread.

UK/US SCHOOL EXCHANGE

- 4 weeks in the USA for £400 at Easter 1981 or, for Scottish schools, in May/June
- living in an American family and attending the neighbourhood school
- optional tour of New York City
- open to all students 13+
- staff member travels free with group of 10 students

UK/CANADA SCHOOL EXCHANGE

- participate in a pilot scheme—limited number of places
- francophone and anglophone link schools
- reciprocal homestay hospitality
- varied school-based programme
- broaden your pupils' horizons

UK/INDIA SIXTH FORM EXCHANGE

- open to both individuals and groups
- 5 to 6 weeks in India at Christmas
- a homestay, a study period and a community service project
- time for touring
- development education through experience

Take the initial step by obtaining full details from the School Exchange Officer.

Students 'can sue colleges for cutting courses'

by Bert Lodge

The withdrawal of a course by a college when students are already part-way through it could entitle them to sue for damages for breach of contract, says a book due out next month. And a college could similarly be liable if it attempted to levy an extra fee half-way through the course.

Students' legal rights and liabilities are explained in the book from the National Association of Teachers in Further and Higher Education. Once a student has enrolled, a legally binding contract exists. This means statements made in college prospectuses, course, advertisements, correspondence and interviews have contractual implications and could be the subject of a breach of contract.

Described by NATFHE as the definitive handbook to public sector further and higher education, the 900 pages of *College Administration* include sections on college management, finance, buildings, local authorities, curricula, staff and students.

In a section on staff development, the editor, Mr Ian Waitt, lecturer in education management at the Anglian regional management centre at North-East London polytechnic, suggests teachers should exchange jobs with colleagues in other institutions so as to get wider experience.

Mr Waitt also suggests job rotation within an institution would avoid staleness in the current situation of lessened opportunity for mobility and promotion.

Assessment or "appraisal" has to be a part of any staff development programme, Mr Waitt argues. "It has been suggested that it would be better to use the word 'review' but this is to dodge the issue."

In some institutions the principal interviews each teacher once a year.

Publication of the book has been held up by a printing industry dispute. It is expected to appear early next month.

College Administration: a handbook. NATFHE, Hamilton House, Mabledon Place, London, WC1. £16, including packing and postage.

Postgraduate certificate under study

A questionnaire covering more than 60 topics has been issued to all teaching staff in 30 university departments of education. It is part of a £66,000 research project into initial teacher education in universities.

The project began last autumn when questionnaires were sent to the 5,000 students beginning their postgraduate certificate in education. Centred in Leicester university school of education and headed by Professor Gerald Bernbaum, the inquiry will last three years.

In a letter accompanying the lecturers' questionnaire Professor Bernbaum points out that this is the first full study of the postgraduate certificate ever undertaken. Preliminary research had shown a wide diversity of practices but certain common responses. These included comments on the relatively unfavourable staff-student ratios in university departments of education, the size of teaching loads and the relatively poor opportunities for research compared with colleagues in other parts of the universities.

The 1,000 lecturers receiving the questionnaires are asked to say what should be done with weak students, who should be responsible for final assessment of students' teaching performance and what they think are the most desirable attributes of the good teacher.

They are also asked to comment on the contribution made by the schools to students' teaching practice, whether students are given unnecessarily difficult classes, whether their supervisors are made to feel welcome by the school teachers and how school practice generally should be organized.

The initial questionnaire to students was returned by 4,350—representing an 87 per cent response.

Boarding schools too dear for Services families

Families in the armed services seeking a boarding education for their children face increasing problems, Mr Edmund Double, senior education officer for Lincolnshire, told the annual conference of the Boarding Schools Association last week.

Costs were forcing many service families to switch their traditional educational allegiance from the independent schools to those main-all, 90 per cent of service children tained by the local education authorities, he said. However, the local authorities were now under financial pressure themselves and many were having to put a more personal emphasis on the term "boarding need".

"In the past such cases have fairly automatically qualified for grant", he said, "but why should they? Is there not sometimes a case for saying the child will be better off living with his parents and attending day school? After are in day schools, 70 per cent in maintained schools and 20 per cent in schools run by the Service Children's Education Authority".

Challenging the orthodox view that changes of school were educationally damaging, he told the conference, meeting near Grantham, that recent research suggested it made little difference.

There was a danger that rising costs would cause places to disappear. "This worries me. When that recent research suggested it made little difference. ance looming ahead."

Sex bias robs girls of top jobs in industry

by Bob Doe

Boys are apprehensive of showing interest in domestic science and girls are afraid to opt for metal or woodwork because they are worried about what their teachers, parents or friends might think, according to the junior education minister Lady Young.

She calls for a change in the deep-seated attitudes and habits that rob girls of equal opportunities in education in the latest issue of the National Association of Inspectors and Educational Advisers' journal. She thinks that by not taking mathematics and sciences, girls deliberately exclude themselves from the top jobs in industry, commerce and research.

"As you go up the age range of pupils you find a steady decline both in the rates of participation and the achievements of girls", Lady Young says.

At the age of 16 girls get more O levels than boys but two years later girls enter for only three-quarters as many A levels as boys. Twice as many young men as women go on to degree courses and three times as many take advanced courses leading to recognized qualifications.

"At another level there is a striking discrepancy in the rates of day release offered to young men and women."

"The school curriculum is the heart of the matter", she says, though it was not enough just to open all subjects and options to boys and girls alike.

● Fewer girls take advanced level mathematics because they are less sure than boys about their abilities, an American survey suggests. They see it as a male domain and have more "maths anxiety", according to the United States Education Commission of the States.

Thirteen-year-old girls were found to be better than boys of the same age at computations and even spatial visualization which in the past has been claimed to be one of the barriers to women's success in maths. They were equal on problem solving and algebra.

By the time they were 17, boys showed a significant (up to 12 per cent) lead over girls in solving problems in word form. In other forms of maths the boys were about equal to the girls who continued with the subject.

The boys were found to have more confidence in their mathematical abilities than the girls, though both sexes equally said they enjoyed maths.

Captain Jack Terry accompanying a teacher on her goodnight rounds on board the schoolship Uganda. Captain Terry is retiring after four years in command of the 17,000-ton P & O vessel to take up a post as schools liaison officer for the West Country within P & O's educational cruising division.

Miss Joan McMurtry has been appointed to the post of head of Workington Grammar School Cumbria following the retirement of Mr G. Scott.

Mr E. Batley, head of the German departmen at Goldsmiths' College, University of London, was recently elected president of the Fédération Internationale des Professeurs do Langues Vivantes for a three-year period beginning January 1, 1981.

Mr Bernard Myers from the Royal College of Art will be Brunel University's first professor and head of department of design technology.

Professor Godfrey Vesey will be Acting Vice-Chancellor of the Open University from June 23 to December 31. He takes up his duties as the founding Vice-Chancellor Lord Perry goes on study leave before his retirement in June, 1981, and finishes them when the new Vice-Chancellor Professor John Horlock takes up post on January 1 next year. Godfrey Vesey is Professor of Philosophy.

Mrs Marjorie Christensen has been appointed head of Cockermouth Grammar School, Cumbria.

Mrs Juliet Baxter has been elected chairman of the national executive committee of the Pre-school Playgroups Association (PPA) and succeeds Mrs Daphne Tams. Juliet Baxter, who was previously chairman of PPA's legal and constitution committee will lead the associations 13,000 play groups in England and Wales.

Mr Denis Lampard has taken up the post of education adviser with Barnardo's. Mr Lampard was previously head of Northway School for children with moderate learning difficulties. He succeeds Mr E. Collins.

Mr G. Milton currently headmaster of Seaford Court, the Malvern preparatory school, is to become the assistant head of a school to be known as the Elms with Seaford Court. The appointment follows the decision to merge Seaford Court with the Elms School at Colwall. The Elms headmaster is Mr Andrew Collier.

Mr Lawrence Campbell has been appointed deputy county education officer for the Isle of Wight. He succeeds Mr J. Brown who now becomes deputy chief education officer for Wakefield.

Miss Julie Barton, 21, has been elected chairman of the National Union of Students in Wales. It will be the first time a woman has held the post. She is in the final year of a history degree at University College, Swansea. She is a member of Plaid Cymru and the Socialist Student Movement.

Dr Jill Key has won the first Goldsmiths' industrial fellowship for teachers designed to strengthen links between secondary schools and British business. She will spend the first year of her fellowship working at the Post Office Telecommunications headquarters and at Midland Bank. During the second year she will be attached to the economics and business studies department at the Institute of Education in London.

Roger Lewis has joined the National Extension College as an assistant director (education).

Mr Keith Anderson, education officer for Mid-Sussex area, has been appointed to the post of deputy chief education officer, Gloucestershire County Council, from June 23, 1980, following the retirement of Mr. G. Neasham.

Mrs Helen Church, formerly head of Nelson Infants' School, Twickenham, has moved to be general adviser for primary education with special responsibility for the infant age group in Bromley.

Mrs Llionos Parkin, head of Hurlfield Comprehensive, Sheffield, has been appointed head of Chichester High School for Girls West Sussex succeeding Miss Pamela King who retired at Easter.

Cleaner environment scheme cuts crime and vandalism

by Diane Spencer

A widely held theory that an improvement in people's environment leads to a reduction in vandalism and crime has been put to the test on a housing estate in Widnes, Cheshire, notorious for its high rate of vandalism. The results are impressive.

The National Association for the Care and Resettlement of Offenders and Social and Community Planning Research, which organized the three-year scheme, began by asking the tenants what improvements they would like and then getting the local council to implement as many as possible.

Although firm and conclusive evidence is unavailable, there is a consensus on the estate that crime and vandalism have declined; the local police inspector said it had changed out of all recognition.

And surveys among residents showed that in 1976 nearly half the adults interviewed had noticed serious damage to shops compared to one in eight in 1979. Vandalism was rated the most serious of estate problems in 1976 whereas employment was top of the list three years later.

The main reasons for the improvements were:

- ● Police foot patrols—a local "beat Bobby" who got to know the children and residents, leading to better crime detection and deterrence
- ● Higher morale of residents, who began to take a pride in their homes when they were repaired and painted by the council in colours of their own choice
- ● A new adventure playground with a playleader and a youth and community centre for teenagers
- ● Better relations between adults and children helped by outings and events organized by the newly created and successful residents' association

This association has been one of the outstanding and lasting benefits of the scheme. Not only has it raised enough money for a sports field, but it serves as a useful link between the tenants and the council.

The council, too, has learned many lessons from the scheme. Mr Ron Turton, Halton Borough Council's chief executive, said what began as an exercise in tenant participation and an attempt by the council to understand the causes of vandalism, very rapidly widened into a series of questions that dealt with the organization and delivery of services by the council.

"In the end we were reflecting upon our internal organization as a local authority and its ability and capacity to respond and deliver services to the community."

As a result, the council has changed the structure of three departments in order to simplify the housing repairs procedure, and has made greater efforts to consult tenants and keep them informed of plans.

In-service training plan rapped as 'too ambitious'

The biggest in-service training scheme ever launched in this country, now involving 18 colleges, scores of schools and teachers and hundreds of student teachers, was too ambitiously planned, says one of its tutors.

Announced in 1977, the IT-INSET (initial training and in-service education) programme was described in *The TES* as "the most ambitious research project ever undertaken in this country into in-service training for teachers".

Begun in September 1978 to run for three years, it is directed by the Open University and paid for by the Department of Education and Science.

The project is original in the concept of students on school practice and their teacher learning together with a college tutor making up the team.

Three institutions were chosen to initiate the project: Charlotte Mason college, Middlesex polytechnic and Sheffield polytechnic. This involved more than 200 students and about 80 teachers from 40 primary and secondary schools.

The idea was that observers would be sent from three other institutions who would then return to start a similar programme in their own colleges. These would in turn be observed by staff from another trio of colleges. The multiplying effect would result in the scheme operating in nine institutions by September this year it was thought.

But according to Mr John Carnie, deputy principal of Charlotte Mason College and responsible for the IT-INSET within the college, interest in the scheme has been so great that by autumn last year 18 institutions were taking part.

But "the time scale of the model was in most cases too ambitious", writes Mr Carnie in the first issue of the twice-yearly *Curriculum*. "Teachers now in their second year in the project are mostly still working at the level envisaged for the first year, and are still profiting from it."

Another problem has arisen from the limited time the students could spend in school. In the original plan this was to be one day a week but this too has proved over-ambitious. "The college's experience in the first 18 months has shown that the model could not be closely adhered to.

"A day a week of practical education in school was highly desirable but could only be made available through the autumn and spring terms of the first two years". Block teaching practice and part one examinations occupied the summer term, Mr Carnie explains. "Other institutions have similarly found a continuity of student participation impossible to provide in the summer term".

In some cases continuity has been broken by the movement of teachers or tutors for personal or professional reasons. Students too, have been concerned "at the way in which the IT-INSET work in specialized areas of the curriculum might reduce the attention they understandably felt they should be paying in their initial training to basic areas of the curriculum".

Curriculum. *Journal of the Association for the Study of the Curriculum. Twice yearly from Studies in Education, Nafferton, North Humberside. £4.50 a year plus 30p postage.*

Best chance for a job

The graduates who have the best chance of finding a permanent job are sandwich students from the non-university sector. Graduates who could have most difficulty in finding permanent employment or could have to take temporary jobs are full-time students at the polytechnics ands other public sector colleges.

These trends are shown in a recent statistical bulletin from the Department of Education and Science, "First Destination of Graduates and Higher National Diplomates: 1975-76 to 1977-78". The bulletin shows that over the years 1975-78, there was an overall decrease in the proportion of students going on to further education or training and an increase in the proportion going directly into a job.

Consortia proposed

Local authorities should consider consortium arrangements between schools or between schools and further education colleges instead of traditional sixth forms as pupil numbers fall. That is the message from Mr Neil Macfarlane, Parliamentary Under-Secretary of State, at the Department of Education and Science.

He told a conference of the Association of Principals of Colleges in Leeds that, as student numbers declined, authorities would have to consider whether they could justify retaining small sixth forms.

● Mrs Angela Rumbold, chairman of the Council of Local Education authority's medical adviser", Authorities, has predicted that pupils over 16 will all eventually be based in single colleges with the consent of the parents and the teaching profession.

In brief

Dramatic move on physics shortage

An unprecedented move to solve the shortage of physics teachers by guaranteeing teaching posts is under way in Leicestershire.

The authority has just negotiated a scheme with Leicester University's school of education whereby it will guarantee at least eight teaching posts to postgraduate certificate of education students who complete their course successfully. There are currently about 10 vacant physics teachers' posts in the county.

Moonies warning

The Director of Education for Leeds has suggested to all Leeds secondary school heads and youth club leaders that they warn young people against the activities of the Moonies.

In his circular letter, Mr R. S. Johnson points out that "in one area of the city, a booklet, entitled *One World*, is being handed out to young people. This publication is the recruiting material of the Unification Church".

Killer dust cleared

The inner London school suspected of being contaminated with blue asbestos dust has been given a clean bill of health after independent tests were carried out.

Daneford boys comprehensive in Bethnal Green is known to contain the dangerous blue asbestos. On the advice of the health and safety inspectorate it has been "sealed" with paint.

But tests carried out by independent consultants established that the amounts of asbestos free in the air of the school were "negligible, or less than one-tenth of the hygiene standards set by the authority's medical adviser" according to a spokesman for the Inner London Education Authority.

Deadline extended

Officials at the Department of Education and Science have extended the deadline for the teacher unions to submit their membership figures.

Dificulties in collecting the information in the form the DES wants has been cited as the reason. For instance, the DES wants details of the England and Wales membership in state schools while the Assistant Masters and Mistresses Association has members in independent schools.

The statistics are now expected to be handed in by July.

Science diary

The oldest question

by John Maddox

The question of the origin of life is understandably absorbing. The authors of *Genesis* knew that. Regular scientists have, however, discovered that the question is simply an endless source of frustration. The essential difficulty is that there is no hope of finding traces of the earliest forms of life by hunting for fossils even in the most ancient rocks. By now it is clear that some rocks which are known to be 3,500 million years old contain small spherical structures which are probably the fossils of single-celled organisms of some kind or other, but it is also clear that these must have been the products of a long period of evolution. Traces of the earlier forms of life have almost certainly been obliterated from the geological record. Accordingly, reconstructing the first steps in evolution is a problem of inference, and not an easy one.

At last, however, some progress is being made. So much was clear at the annual meeting of the United States National Academy of Sciences in Washington recently, which took the form of a joint meeting of the American and Belgian academies described as a Solvay Congress—a series of scientific symposia going back to the early 1900s and previously always held in Belgium. (It was at a Solvay Congress in the 1920s that the now celebrated dispute between Einstein and Bohr about the meaning of the quantum theory confirmed Einstein in his lifelong scepticism about this, the most characteristic feature of modern physics.)

There were few disputes this time. Most people seemed only too ready to applaud the signs of progress towards an understanding of the origin of life that were reported. Perhaps inevitably, the molecular biologists had the most to say.

The starting point for everybody's speculation is the belief that the early atmosphere of the earth was very different from the one we live in now. Soon after the earth condensed from the solar nebula, the argument goes, the chief constituents of the earth's atmosphere would have been gases such as methane, ammonia and hydrogen sulphide, with some water vapour thrown in. These, of course, are the materials now found in the atmospheres of the outer planets—Jupiter and Saturn, for example.

Nearly 30 years ago Stanley Miller, a then young graduate student at the University of Chicago, carried out what has ever since been regarded as a landmark experiment in this field. Simply by passing electric discharges through a mixture of these primeval gases, he was able to show that a large proportion of all the methane was converted into four or five of the simplest amino-acids which are known to crop up as the constituents of protein molecules.

At the meeting in Washington, Miller (who is now a professor of the University of California) was able to show that the same simple amino-acids occur in more or less the same proportions in the organic matter which is found in some kinds of meteorites—the meteorites called carbonaceous chondrites, to be precise. So, Miller claims, there must have been means in the early history of the solar system whereby gases such as methane could be converted into the building blocks from which protein molecules are made.

But so what? That has been the general reaction to Miller's experiment in the past 30 years. For even if the simple amino-acids, formed early in the earth's history were assembled by chance into protein molecules, there is no known way in which these molecules could have produced replicas of themselves, the essential feature of any living system.

Accordingly, there has grown up a kind of consensus that the first steps in the emergence of living things must have depended on the presence on the surface of the earth of the chemicals from which nucleic acids can be constructed. Luckily, it is now realized, these building blocks could have been formed by simple interaction with water from one of the by-products of Miller's early experiment, the simple gas cyanogen. Indeed, it requires very little of the organic chemist's imagination to conclude that almost any simple chemical, simple sugars such as glucose for example, would have been formed in the earth's primeval soup.

The central question, then, is how these simple molecules were assembled into the more complicated molecules that might have been capable of sustaining the most primitive forms of life. Hitherto it has been customary to suppose that this must have been a matter of chance. The view that is now emerging is that it was not chance at all, but sheer chemical necessity.

This argument is really due to Dr Leslie Orgel, a Cambridge mathematician now working at the Salk Institute in California. It goes like this. Suppose you have a mixture of organic chemicals such as there might have been on the surface of the primeval earth. Inevitably, some of these will combine together to form more complicated molecules, some of which may be polymers constructed on the same pattern as some of the polymers which turn up in living things, nucleic acid molecules and proteins in particular. To each single polymer molecule like this, two things can happen. Either it can get longer or it will decompose, producing a smaller molecule.

In what is called the primaeval soup in which it is supposed that life began, there would then emerge a mixture of chemicals, some of them simple and some more complicated.

Professor Manfred Eigen, from the Max Planck Institute at Göttingen, at the Washington meeting gave a more explicit description of the first dominating chemical in the primeval soup than I have heard before. It was, he said, a molecule of the material called RNA, short for ribonucleic acid. Molecules of RNA play a vital part in all living cells, for they are the means by which genetic information carried now by DNA is converted into the structure of protein molecules. RNA molecules also serve as the genetic basis of many viruses.

In modern life, RNA molecules do not replicate themselves—that is what DNA does—but both Orgel and Professor Sol Spiegelman from the Albert Einstein Medical Centre in New York (who is a molecular biologist concerned with the causation of cancer) have now shown that simple RNA molecules can indeed be persuaded to replicate themselves in the laboratory. Each of them has found that replication is most efficient in the presence of traces of zinc or even lead.

Eigen's primitive RNA molecule is then easily defined. RNA (like DNA) is a polymer made by stringing together simpler chemicals called nucleotides. The first significant product of molecular evolution, he argued, would have been an RNA polymer consisting of about 100 nucleotides arranged in such a way that one half of the molecule would be the mirror image of the other.

The experiments on replication so far carried out in the laboratory have shown that such a molecule should be able to replicate itself with a reasonable degree of fidelity, but that a longer polymer would rapidly lose its distinctive identity because of errors in replication.

Several conclusions follow from this view of how life began. First, the emergence of life was not a matter of chance but was rather an inevitable consequence of the mixture of chemicals on the surface of the primitive earth. Secondly, it should be possible to tell by means of laboratory experiments just what chemicals dominated the primeval soup at successive stages. Indeed, there is no reason why these first steps in evolution should not one day be simulated in the laboratory.

Those prepared to chance their arms at the meeting in Washington were saying that, on the primitive earth, the emergence by natural selection of the first self-replicating RNA molecule need have taken no more than a few million years, and that it was most likely to have taken place soon after the formation of the earth itself and therefore a whole 1,000 million years before the appearance of the first fossils in the geological record.

The question then arises of what meaning can be attached to our customary definition of life. Quite properly, we are all told that a living organism is one that is capable of producing replicas of itself, and which ideally does so in such a way that the offspring are not identical with each other or with their parent organisms, so that natural selection has something to get its teeth into.

The trouble, of course, is that this definition applies to exactly the kinds of RNA molecules Eigen was describing. It follows that while it may be possible to tell *how* life began, there is no point in asking *when*.

Scientists see progress towards an understanding of the origin of life.

"Good wheeze of Quelchy's, to set up a tuck shop with those AB bounders."

Boys and girls all love a tuck shop.

Not because they hate school meals, but because they like to add to them.

School grub is fine nutritionally, so what better to follow than a Jacob's Club?

And during breaktime, what better than a Trio to chew over before the next lesson?

The catering division of Associated Biscuits can advise you on setting up a tuck shop, or perhaps improving an existing one.

You'll get speedy delivery of high-quality, famous products, together with all the help you need.

And your pupils won't have to dig too far into their pocket money.

If you'd like to know more, call Brian Kenway on Reading (0734) 583535.

We're sure that Cherry and the rest of the Remove would quite appreciate it.

South Africa

Needs of industry make Coloured protests well timed. John Kane-Berman reports

Boycott forces commitment to equality

JOHANNESBURG

The single most important consequence of the recent boycott by Coloured schoolchildren in South Africa is that the Verwoerdian doctrine of education for servitude has been officially declared dead. "The Government commits itself to the goal of equal education for all", said Mr P. W. Botha, the Prime Minister, at a recent press conference.

Twenty-five years ago, when the state first nationalized black education, Dr Verwoerd, the then Minister of Native Affairs, proclaimed that the Government's policy would ensure that blacks were educated only in accordance with their designated status in economic life, which was to perform manual labouring jobs. The African section of the black population suffered most under this policy, expenditure on their education being pared to the bone. The Coloured and Indian sections did not fare much better, and it was inevitable that their anger would sooner or later force itself into the open.

The resulting boycott could not have been more superbly timed. For the disastrous legacy of Verwoerd has never been more painfully apparent to white South Africa than it is now.

After half a decade of recession, the South African economy is poised to grow this year in real terms by between five and six per cent—a performance that will make it the envy of the western world. But businessmen are suddenly discovering to their consternation that educated manpower is in such short supply that the eagerly-awaited economic boom is in danger of being choked off prematurely.

During most of the last decade the shortage of skilled manpower was blamed on the fact that the reactionary but powerful white trade union movement refused to allow blacks to perform skilled jobs.

But now that the industrial colour bar is at last being removed, businessmen are finding that blacks are ill-equipped to fulfil the hitherto whites-only jobs.

So however much Mr Marais Steyn, the Minister of Coloured Relations, blamed the boycott on agitators and boasted of his department's achievements in improving "coloured" education, there was not a businessman in the country who did not know from his own experience that the boycotters were absolutely right when they said their education was inferior.

As a Prime Minister committed to rapid growth and sympathetic to the needs of the business sector, Mr Botha had no choice but to intervene. He has stated not only that the Government has now bound itself to equal education for all, but that he will consider setting up an in-depth enquiry into the country's education system. He has even said he has an "open mind" on whether the presently separate education departments for whites, Indians, Africans, and Coloured people should be merged.

Mr Botha's personal intervention broke the back of the school boycott as it was entering its fourth week. But several questions have yet to be answered: Will Mr Botha's promises be fulfilled? How fast? And will they satisfy the demands of the Coloured and Indian pupils?

● Black schoolchildren stoned a man to death in Port Elizabeth when mediators chosen by parents tried to persuade children to end a boycott of classes. Pupils boycotting classes in the black homeland of Kwazulu have been threatened with action by Mr Oscar Dhlomo, Minister of Education in Chief Gatsha Buthelezi's Government.

Zimbabwe

Distance learning 'only answer' for new nation

by Isabel Marlow

SALISBURY

A new education system, with a strong distance learning component, was called for by educationists attending the first national education conference in the new nation of Zimbabwe.

"New approaches will have to be developed which take into account the harsh realities of the majority living at subsistence level", Professor Jack Lewis, vice-chancellor of the University of Zimbabwe, said in opening the conference.

The Government now spends £70m on education. But if this was doubled and foreign aid provided another £70m, it would not be enough even for universal primary education, the conference were told.

Professor Peter Kinyandui, director of the Institute of Adult Studies at the University of Nairobi, told the conference that the ideal of the individual's right to education was far from reality in the developing nations.

In spite of all the efforts and resources that had gone into education, developing countries had managed to educate fewer than half of the people. He advocated alternative forms of education, buttressed by modern technology and techniques, for Zimbabwe, which has to grapple with the problem of quantity before quality.

Distance teaching was one such alternative. "It is a cheap and cost-effective method of expanding education, reaching isolated parts of the country, supporting and extending rather than supplanting formal education."

Mr Alan Dock, senior science lecturer at the University of Zimbabwe, took up this theme which caught the attention of all those at the conference. He said that it was possibly the only interim answer for Zimbabwe, which is committed to promoting education for all.

"We have everything—radio, television, a national mail system, well-developed commercial correspondence schools, community development organizations and a network of mission stations."

The drawbacks to the scheme were seen by conference delegates as being opposition from parents and children who see it as second best, the fact that study group tutors are not at present part of the recognized salary structure for teachers, and the difficulties of teaching science.

But research being done at the University of Zimbabwe proves that science by distance teaching is possible, the conference was told. Cheap, throwaway apparatus—a pin, a matchbox, paperclips and two plastic straws are all that is required to teach electrostatics to O level students, according to Mr Dock.

United States

Stamp marks new department

by Clive Cookson

WASHINGTON

Mrs Shirley Hufstedler, the Education Secretary, shows off the design for a new United States postage stamp, to be issued in September. It was completed within one month, rather than the two years the Post Office usually takes to launch a stamp, so that Mrs Hufstedler could unveil the design during the celebrations to mark the official opening of the new Education Department (ED).

The stamp bears the words "learning never ends" and it is based on an abstract painting by the late Joseph Albers. Mr Albers did not intend his picture, which he called "Homage to the square: glow", to have any connection with education, but Mrs Hufstedler said it symbolized her department as "a vibrant constructive force for good in this country. I intend it should have a ripple effect—as depicted schematically by Albers—starting from a deep solid base and reaching out to more and more people each year."

The week in which the Education Department came into existence was proclaimed "Salute to Learning" week by President Carter, and it was marked by an assortment of public relations events: White House celebrations; meetings and symposia; visits by Government officials to schools and colleges; and several speeches by Mrs Hufstedler, expressing high hopes for the department but giving little away about its future policies.

Spokesmen for Washington's educational associations have been critical of the way Mrs Hufstedler went about organizing the department in the months following her appointment at the beginning of December. They said the 200 or so outside experts and consultants she brought in to advise on the reorganization caused confusion and stirred up unnecessary bad feelings.

But they like most of the permanent appointments she has made to senior positions in education. Perhaps their main gripe is that she chose as Under-secretary (her deputy) Steven Minter, a black foundation executive who, like her, has had no professional experience as an educator.

President Carter committed himself to setting up a Cabinet-level education department during his 1976 election campaign. (Ronald Reagan, the most likely Republican candidate in this year's Presidential election, has said he will abolish the department.)

EEC

Council called off yet again

by Hilary Wilce

For the third year running the scheduled meeting of education ministers from the nine European Community countries has been cancelled. It was due to take place next week, but has now been rescheduled for the end of June.

Continuing objections from the Danish Government, that education is not a Community matter, caused the cancellation, although the French Government, which in the past has raised similar objections, wanted the meeting to take place.

Last week the Danes said they would be willing for education ministers to meet and review EEC education work provided no decisions were taken.

The meeting is now set for June 27, in Luxembourg. This is just three days before the end of the Italian presidency of the EEC and allows the Italians, who have been anxious to see the education ministers meet during their six-month term of office, the maximum time to work out a solution.

China

How to overcome the three barriers

Peter Mauger looks at one way in which socialist China deals with young people who commit anti-social crimes

Just over a year ago the Xicheng District Reformatory was set up again on the outskirts of Peking for children who have committed offences of one kind or another "such as fisticuffs, petty larceny or hooliganism". The school has 171 boys and 39 girls between the ages of 13 and 18, organized in 11 classes.

The school was originally founded in 1955. Wang Shengchuan, who was the reformatory head from its foundation until it closed down during the Cultural Revolution, has now resumed his post after 10 years of absence.

In a recent interview with the

admitted to the school came from capitalist families who had lost their privileged position and some were children of criminals executed by the People's Government.

But the number of reformatories has increased to 10, with 1,423 students (Peking has 1,047 secondary schools with a total enrolment of 830,000) since the Cultural Revolution.

This increase is attributed to the anarchism of the period when the Gang of Four were in power.

"This was the time", he says, "when our schools were adversely affected. Then our students were dissuaded from studying under the pretext of guarding against the emergence of 'intellectual aristocrats'. Opposition to 'the teachers' dignity' was used as an excuse, and our teachers were often criticized and not allowed to run schools and give guidance to the students as they should. So a growing number of teenagers were led astray, which was not at all surprising.

"In the last two years things have

tion of holidays. The children asked if they could go home once every two weeks, given good behaviour, and the staff agreed.

The minimum stay at the reformatory appears to be six months. The students are expected to overcome three "barriers": to observe rigid discipline and live as a member of the collective; to break away from their former associates; and to make efforts to find out the causes of their misdemeanours.

On admission they are placed in classes according to their educational level, with extra evening lessons for those who have fallen far behind. The curriculum is the same as in normal secondary schools, except that school work takes up four days and manual labour two. In normal schools only one day out of six is spent in productive labour. Their names still remain on the roll of their former schools, so that they may return there when they have "mended their ways".

The first batch of 80 active young ringleaders came with all kinds of

Australia

Referendum to be held on funding of private sector?

by Bill Purvis

SYDNEY

The Prime Minister, Mr Malcolm Fraser, has pledged that his Government will hold a national referendum on the issue of aid to private schools if the High Court rules that such aid is legally invalid.

The High Court last month reserved its decision on a claim by a group known as Defence of Government Schools (DOGS) opposing federal funding of non-government schools.

The DOGS claim is based on its reading of a section of the constitution prohibiting federal "establishment" of any religion. As most of the private schools are run by religious bodies the High Court has to decide if federal funds are being used to establish a religion.

The DOGS case was concluded early in April and a decision is expected sometime between September and November.

If the result goes against the Government it is now committed to holding a referendum to amend the constitution.

The federal opposition spokesman on education, Senator John Button said the Australian Labour Party would campaign for a "yes", vote in such a referendum.

However Senator Button said ALP support was conditional on the referendum seeking approval for federal funds to go to state and private schools on the basis of their needs.

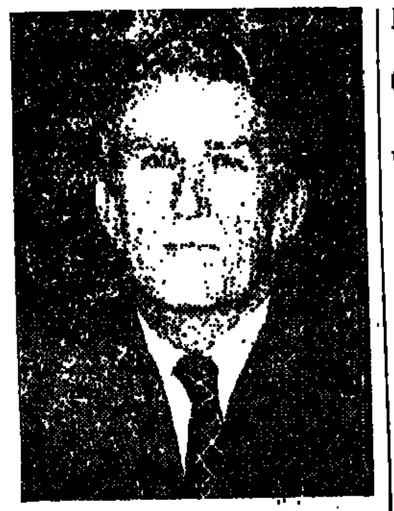
When the Labour Government was in office under Mr Gough Whitlam from 1972-1975 it sought to allocate funds to private schools on the basis of their needs—more money going to the poorer private schools and very little to the wealthier colleges.

But Senator Button pointed out that even if the High Court ruled in favour of DOGS it might still be possible to allocate federal funds to schools without infringing the constitution.

One way that has been suggested is for the Federal Government merely to hand over certain funds to the states and leave it to state governments to allocate the money as they see fit. There is no constitutional prohibition on the states spending money on religious schools.

The president of the Australian Teachers Federation, Mr Gerry Tickell, accused the Prime Minister of using the issue to disguise his Government's shortcomings

Mr Tickell said Mr Fraser's statement was a cynical attempt to play down the needs of government schools by stirring up old sectarian conflicts. There were bitter debates in the early 1960s when state aid was first granted.



Prime Minister Fraser.

He said the Fraser Government had transferred A$90m (£45m) in the past three years from the public education sector to the private schools.

More than 20 per cent of Australian school pupils attend non-government schools. The types and the quality of education vary. Some are expensive boarding schools. Many are small parish schools run by the Roman Catholic Church with fewer facilities than state schools—and even higher teacher-pupil ratios.

Republic of Ireland

Computer studies examined

by John Walshe

DUBLIN

A committee has been set up to advise Mr John Wilson, the Education Minister, on the introduction of computer studies into the secondary school curriculum. It will look at educational and financial implications of moves in this area.

Until it reports, the Minister has agreed to allow an optional computer studies section on the mathematics syllabus for the state's 320 secondary schools. Until now computer studies have not been officially recognized in the schools, one in 10 of which have computing facilities.

In the tertiary sector colleges have expanded or introduced computer studies courses to help meet skill shortages in this area.

The micro-electronics industry is of recent origin in the Republic and has proved highly successful. Already there are more than 70 companies in the country, principally subsidiaries of United States organizations. Twelve out of the top 100 American electronics firms have plants in Ireland or have announced their intention of setting up here.

It is expected that there will be rapidly increasing demand for more electronic engineers, electronic technicians, computer programmers and systems analysts. Proposals are being implemented to raise numbers of electrical and electronic technicians annually.

Sweden

Industrial crisis disrupts schooling

by Chris Mosey

STOCKHOLM

Sweden's worst ever industrial crisis badly disrupted schools and day-care centres around the country.

The worst hit area was Gothenburg where 29,000 children were affected as teachers staged a one-day strike. Another one-day strike of 400 teachers closed schools in Lidingo, near Stockholm.

Child minders and pre-school teachers in the Solna area of Stockholm went on strike forcing parents to take children to work with them or stay at home. And at other day-care centres staff joined in the wave of industrial unrest to protest unofficially against low pay and understaffing.

Action was on two fronts. In the private sector 75,000 workers were locked out of their jobs, another 100,000 workers went on strike and thousands of others banned overtime in support of an 11.3 per cent pay claim, after being offered a 2.3 per cent rise.

In the public sector 14,000 workers went on strike, 12,000 were locked out and thousands banned overtime in support of a 12 per cent pay claim. They had been offered a 4.8 per cent rise.

Mr Gunnar Ohlsson, Lidingo schools' director, criticized the strikers. "Their action hits those most in need of education the hardest", he said.

All educational radio and television programmes were halted by the crisis and classes had to be cancelled when teachers failed to arrive at their schools because of transport problems.

All-night exam protest staged in Stockholm's main square

STOCKHOLM

Sweden's schoolchildren's union recently mounted a 24-hour vigil in Stockholm's main square in protest against examinations.

This was the first of several planned demonstrations against the examination system by members of SECO, the *Sveriges Elevers Centralorganisation*, which made considerable strides towards their goal of an exam-free school system during the years of Social Democrat rule but which, since the swing to the right in the mid-1970s, has been fighting increasingly a rearguard action.

In the present three-party coalition government, Mrs Britt Mogard is a Conservative, and a staunch defender of the examination system.

"Examinations, as I see them, have a definite place in the preparation for adult life", she said. "Adults ought to realize this. That children already do know it. We know from many investigations we have made. Seventy, 80, 90 per cent of young people in school want some form of examination."

She is much more guarded when it comes to teachers and parents and admits, "of the political parties only we Conservatives consider that examinations are something good; the others see them as something of a necessary evil.

"Examinations give a clearly defined goal for pupils' work in school and for the school's work with pupils. Each side knows exactly where it stands.

"Opponents of the system say examinations put pressure on the weak but an investigation in Uppsala showed that children from non-study oriented homes need better exam passes before they will dare to apply for admission to upper secondary school than children of highly educated parents.

"Children from homes without a tradition of study clearly need more encouragement, more support than others to dare to take further steps along the road to further education. They need to know that they can do it. They need an answer in

A SECO leaflet protests against exams.

learn what might seem to be boring subjects is taken away. Studies are not just pleasure they are also hard work."

Not surprisingly her words found no sympathetic echo among the SECO storm troopers crawling into their sleeping bags on the hard concrete of Sergels Torg, the square opposite the Parliament building.

One of the protesters, Anna Roberts, 16, of Alby School, Stockholm, said: "We want to work together, not compete, against one another. Everybody needs a good education. Everybody should be allowed to have a place in high school or university."

SECO's campaign weapons range from a leaflet showing a child being branded a second-class citizen by a teacher, to a flysheet that asks "What examination pass did Father Christmas get?"

South Africa

Needs of industry make Coloured protests well timed. John Kane-Berman reports

Boycott forces commitment to equality

JOHANNESBURG

The single most important consequence of the recent boycott by Coloured schoolchildren in South Africa is that the Verwoerdian doctrine of education for servitude has been officially declared dead. "The Government commits itself to the goal of equal education for all", said Mr P. W. Botha, the Prime Minister, at a recent press conference.

Twenty-five years ago, when the state first nationalized black education, Dr Verwoerd, the then Minister of Native Affairs, proclaimed that the Government's policy would ensure that blacks were educated only in accordance with their designated status in economic life, which was to perform manual labouring jobs. The African section of the black population suffered most under this policy, expenditure on their education being pared to the bone. The Coloured and Indian sections did not fare much better, and it was inevitable that their anger would sooner or later force itself into the open.

The resulting boycott could not have been more superbly timed. For the disastrous legacy of Verwoerd has never been more painfully apparent to white South Africa than it is now.

After half a decade of recession, the South African economy is poised to grow this year in real terms by between five and six per cent—a performance that will make it the envy of the western world. But businessmen are suddenly discovering to their consternation that educated manpower is in such short supply that the eagerly-awaited economic boom is in danger of being choked off prematurely.

During most of the last decade the shortage of skilled manpower was blamed on the fact that the reactionary but powerful white trade union movement refused to allow blacks to perform skilled jobs.

But now that the industrial colour bar is at last being removed, businessmen are finding that blacks are ill-equipped to fulfil the hitherto whites-only jobs.

So however much Mr Marais Steyn, the Minister of Coloured Relations, blamed the boycott on agitators and boasted of his department's achievements in improving "coloured" education, there was not a businessman in the country who did not know from his own experience that the boycotters were absolutely right when they said their education was inferior.

As a Prime Minister committed to rapid growth and sympathetic to the needs of the business sector, Mr Botha had no choice but to intervene. He has stated not only that the Government has now bound itself to equal education for all, but that he will consider setting up an in-depth enquiry into the country's education system. He has even said he has an "open mind" on whether the presently separate education departments for whites, Indians, Africans, and Coloured people should be merged.

Mr Botha's personal intervention broke the back of the school boycott as it was entering its fourth week. But several questions have yet to be answered: Will Mr Botha's promises be fulfilled? How fast? And will they satisfy the demands of the Coloured and Indian pupils?

● Black schoolchildren stoned a man to death in Port Elizabeth when mediators chosen by parents tried to persuade children to end a boycott of classes. Pupils boycotting classes in the black homeland of Kwazulu have been threatened with action by Mr Oscar Dhlomo, Minister of Education in Chief Gatsha Buthelezi's Government.

United States

Stamp marks new department

by Clive Cookson

WASHINGTON

Mrs Shirley Hufstedler, the Education Secretary, shows off the design for a new United States postage stamp, to be issued in September. It was completed within one month, rather than the two years the Post Office usually takes to launch a stamp, so that Mrs Hufstedler could unveil the design during the celebrations to mark the official opening of the new Education Department (ED).

The stamp bears the words "learning never ends" and it is based on an abstract painting by the late Joseph Albers. Mr Albers did not intend his picture, which he called "Homage to the square: glow", to have any connection with education, but Mrs Hufstedler said it symbolized her department as "a vibrant constructive force for good in this country. I intend it should have a ripple effect—as depicted schematically by Albers—starting from a deep solid base and reaching out to more and more people each year."

The week in which the Education Department came into existence was proclaimed "Salute to Learning" week by President Carter, and it was marked by an assortment of public relations events: White House celebrations; meetings and symposia; visits by Government officials to schools and colleges; and several speeches by Mrs Hufstedler, expressing high hopes for the department but giving little away about its future policies.

Spokesmen for Washington's educational associations have been critical of the way Mrs Hufstedler went about organizing the department in the months following her appointment at the beginning of December. They said the 200 or so outside experts and consultants she brought in to advise on the reorganization caused confusion and stirred up unnecessary bad feelings.

But they like most of the permanent appointments she has made to senior positions in education. Perhaps their main gripe is that she chose as Under-secretary (her deputy) Steven Minter, a black foundation executive who, like her, has had no professional experience as an educator.

President Carter committed himself to setting up a Cabinet-level education department during his 1976 election campaign. (Ronald Reagan, the most likely Republican candidate in this year's Presidential election, has said he will abolish the department.)

Zimbabwe

Distance learning 'only answer' for new nation

by Isabel Marlow

SALISBURY

A new education system, with a strong distance learning component, was called for by educationists attending the first national education conference in the new nation of Zimbabwe.

"New approaches will have to be developed which take into account the harsh realities of the majority living at subsistence level", Professor Jack Lewis, vice-chancellor of the University of Zimbabwe, said in opening the conference.

"The Government now spends £70m on education. But if this was doubled and foreign aid provided another £70m, it would not be enough even for universal primary education, the conference were told.

Professor Peter Kinyanjui, director of the Institute of Adult Studies at the University of Nairobi, told the conference that the ideal of the individual's right to education was far from reality in the developing nations.

In spite of all the efforts and resources that had gone into education, developing countries had managed to educate fewer than half of the people. He advocated alternative forms of education, buttressed by modern technology and techniques, for Zimbabwe, which has to grapple with the problem of quantity before quality.

Distance teaching was one such alternative. "It is a cheap and cost-effective method of expanding education, reaching isolated parts of the country, supporting and extending, rather than supplanting formal education."

Mr Alan Dock, senior science lecturer at the University of Zimbabwe, took up this theme which caught the attention of all those at the conference. He said that it was possibly the only interim answer for Zimbabwe, which is committed to promoting education for all.

"We have everything—radio, television, a national mail system, well-developed commercial correspondence schools, community development organizations and a network of mission stations."

The drawbacks to the scheme were seen by conference delegates as being opposition from parents and children who see it as second best, the fact that study group tutors are not at present part of the recognized salary structure for teachers, and the difficulties of teaching science.

But research being done at the University of Zimbabwe proves that science by distance teaching is possible, the conference was told. Cheap, throwaway apparatus—a pin, a matchbox, paperclips and two plastic straws are all that is required to teach electrostatics to O level students, according to Mr Dock.

EEC

Council called off yet again

by Hilary Wilce

For the third year running the scheduled meeting of education ministers from the nine European Community countries has been cancelled. It was due to take place next week, but has now been rescheduled for the end of June.

Continuing objections from the Danish Government, that education is not a Community matter, caused the cancellation, although the French Government, which in the past has raised similar objections, wanted the meeting to take place.

Last week the Danes said they would be willing for education ministers to meet and review EEC education work provided no decisions were taken.

The meeting is now set for June 27, in Luxembourg. This is just three days before the end of the Italian presidency of the EEC and allows the Italians, who have been anxious to see the education ministers meet during their six-month term of office, the maximum time to work out a solution.

China

How to overcome the three barriers

Peter Mauger looks at one way in which socialist China deals with young people who commit anti-social crimes

Just over a year ago the Xicheng District Reformatory was set up again on the outskirts of Peking for children who have committed offences of one kind or another "such as fisticuffs, petty larceny or hooliganism". The school has 171 boys and 39 girls between the ages of 13 and 18, organized in 11 classes.

The school was originally founded in 1955. Wang Shengchuan, who was the reformatory head from its foundation until it closed down during the Cultural Revolution, has now resumed his post after 10 years of absence.

In a recent interview with the *Peking Review* he tells of his efforts to find out why, in socialist China, some young people still commit anti-social crimes.

He could understand why juvenile delinquency was a problem in the 1950s, he says. Many of the children admitted to the school came from capitalist families who had lost their privileged position and some were children of criminals executed by the People's Government.

But the number of reformatories has increased to 10, with 1,423 students (Peking has 1,047 secondary schools with a total enrolment of 830,000) since the Cultural Revolution.

This increase is attributed to the anarchism of the period when the Gang of Four were in power.

"This was the time", he says, "when our schools were adversely affected. Then our students were dissuaded from studying under the pretext of guarding against the emergence of 'intellectual aristocrats'. Opposition to 'the teachers' dignity' was used as an excuse, and our teachers were often criticized and not allowed to run schools and give guidance to the students as they should. So a growing number of teenagers were led astray, which was not at all surprising.

"In the last two years things have turned for the better and I do believe that the situation will continue to improve. But a complete transformation of society is a Herculean task for a long time to come."

All the children are boarders. When the school restarted the staff called a meeting to discuss the question of holidays. The children asked if they could go home once every two weeks, given good behaviour, and the staff agreed.

The minimum stay at the reformatory appears to be six months. The students are expected to overcome three "barriers": to observe rigid discipline and live as a member of the collective; to break away from their former associates; and to make efforts to find out the causes of their misdemeanours.

On admission they are placed in classes according to their educational level, with extra evening lessons for those who have fallen far behind. The curriculum is the same as in normal secondary schools, except that school work takes up four days and manual labour two. In normal schools only one day out of six is spent in productive labour. Their names still remain on the roll of their former schools, so that they may return there when they have "mended their ways".

The first batch of 80 active young ringleaders came with all kinds of apprehensions—"the school was fenced in with barbed wire, the teachers carried pistols"—but they appear to have been impressed by the effort to encourage them to criticize their own faults and to identify their reasons for their delinquency.

Australia

Referendum to be held on funding of private sector?

by Bill Purvis

SYDNEY

The Prime Minister, Mr Malcolm Fraser, has pledged that his Government will hold a national referendum on the issue of aid to private schools if the High Court rules that such aid is legally invalid.

The High Court last month reserved its decision on a claim by a group known as Defence of Government Schools (DOGS) opposing federal funding of non-government schools.

The DOGS claim is based on its reading of a section of the constitution prohibiting federal "establishment" of any religion. As most of the private schools are run by religious bodies the High Court has to decide if federal funds are being used to establish a religion.

The DOGS case was concluded early in April and a decision is expected sometime between September and November.

If the result goes against the Government it is now committed to holding a referendum to amend the constitution.

The federal opposition spokesman on education, Senator John Button said the Australian Labour Party would campaign for a "yes", vote in such a referendum.

However Senator Button said ALP support was conditional on the referendum seeking approval for federal funds to go to state and private schools on the basis of their needs.

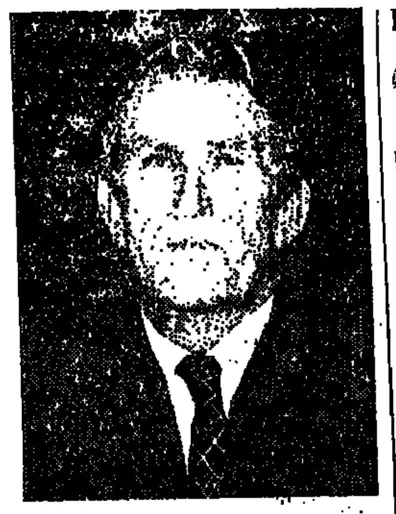
When the Labour Government was in office under Mr Gough Whitlam from 1972-1975 it sought to allocate funds to private schools on the basis of their needs—more money going to the poorer private schools and very little to the wealthier colleges.

But Senator Button pointed out that even if the High Court ruled in favour of DOGS it might still be possible to allocate federal funds to schools without infringing the constitution.

One way that has been suggested is for the Federal Government merely to hand over certain funds to the states and leave it to state governments to allocate the money as they see fit. There is no constitutional prohibition on the states spending money on religious schools.

The president of the Australian Teachers Federation, Mr Gerry Tickell, accused the Prime Minister of using the issue to disguise his Government's shortcomings

Mr Tickell said Mr Fraser's statement was a cynical attempt to play down the needs of government schools by stirring up old sectarian conflicts. There were bitter debates in the early 1960s when state aid was first granted.



Prime Minister Fraser.

He said the Fraser Government had transferred A$90m (£45m) in the past three years from the public education sector to the private schools.

More than 20 per cent of Australian school pupils attend non-government schools. The types and the quality of education vary. Some are expensive boarding schools. Many are small parish schools run by the Roman Catholic Church with fewer facilities than state schools—and even higher teacher-pupil ratios.

Republic of Ireland

Computer studies examined

by John Walshe

DUBLIN

A committee has been set up to advise Mr John Wilson, the Education Minister, on the introduction of computer studies into the secondary school curriculum. It will look at educational and financial implications of moves in this area.

Until it reports, the Minister has agreed to allow an optional computer studies section on the mathematics syllabus for the state's 320 secondary schools. Until now computer studies have not been officially recognized in the schools, one in 10 of which have computing facilities.

In the tertiary sector colleges have expanded or introduced computer studies courses to help meet skill shortages in this area.

The micro-electronics industry is of recent origin in the Republic and has proved highly successful. Already there are more than 70 companies in the country, principally subsidiaries of United States organizations. Twelve out of the top 100 American electronics firms have plants in Ireland or have announced their intention of setting up here.

It is expected that there will be rapidly increasing demand for more electronic engineers, electronic technicians, computer programmers and systems analysts. Proposals are being implemented to raise numbers of electrical and electronic technicians annually.

Sweden

Industrial crisis disrupts schooling

by Chris Mosey

STOCKHOLM

Sweden's worst ever industrial crisis badly disrupted schools and day-care centres around the country.

The worst hit area was Gothenburg where 29,000 children were affected as teachers staged a one-day strike. Another one-day strike of 400 teachers closed schools in Lidingo, near Stockholm.

Child minders and pre-school teachers in the Solna area of Stockholm went on strike forcing parents to take children to work with them or stay at home. And at other day-care centres staff joined in the wave of industrial unrest to protest unofficially against low pay and understaffing.

Action was on two fronts. In the private sector 75,000 workers were locked out of their jobs, another 100,000 workers went on strike and thousands of others banned overtime in support of an 11.3 per cent pay claim, after being offered a 2.3 per cent rise.

In the public sector 14,000 workers went on strike, 12,000 were locked out and thousands banned overtime in support of a 12 per cent pay claim. They had been offered a 4.8 per cent rise.

Mr Gunnar Ohlsson, Lidingo schools' director, criticized the strikers. "Their action hits those most in need of education the hardest", he said.

All educational radio and television programmes were halted by the crisis and classes had to be cancelled when teachers failed to arrive at their schools because of transport problems.

All-night exam protest staged in Stockholm's main square

STOCKHOLM

Sweden's schoolchildren's union recently mounted a 24-hour vigil in Stockholm's main square in protest against examinations.

This was the first of several planned demonstrations against the examination system by members of SECO, the *Sveriges Elevers Centralorganisation*, which made considerable strides towards their goal of an exam-free school system during the years of Social Democrat rule but which, since the swing to the right in the mid-1970s, has been fighting increasingly a rearguard action.

In the present three-party coalition government, Mrs Britt Mogard is a Conservative, and a staunch defender of the examination system.

"Examinations, as I see them, have a definite place in the preparation for adult life", she said. "Adults ought to realize this. That children already do know it. We know from many investigations we have made. Seventy, 80, 90 per cent of young people in school want some form of examination."

She is much more guarded when it comes to teachers and parents and admits, "of the political parties only we Conservatives consider that examinations are something good; the others see them as something of a necessary evil.

"Examinations give a clearly defined goal for pupils' work in school and for the school's work with pupils. Each side knows exactly where it stands.

"Opponents of the system say examinations put pressure on the weak but an investigation in Uppsala showed that children from non-study oriented homes need better exam passes before they will dare to apply for admission to upper secondary school than children of highly educated parents.

"Children from homes without a tradition of study clearly need more encouragement, more support than others to dare to take further steps along the road to further education. They need to know that they can do it. They need an answer in black and white that they will be able to cope with higher education. Only an examination gives this", Mrs Mogard said.

"In an examination-free school achievement is not rewarded. The reward lies instead in that you get pleasure out of what you learn. Without examinations the drive to learn what might seem to be boring subjects is taken away. Studies are not just pleasure they are also hard work."

Not surprisingly her words found no sympathetic echo among the SECO storm troopers crawling into their sleeping bags on the hard concrete of Sergels Torg, the square opposite the Parliament building.

One of the protesters, Anna Roberts, 16, of Alby School, Stockholm, said: "We want to work together, not compete against one another. Everybody needs a good education. Everybody should be allowed to have a place in high school or university."

SECO's campaign weapons range from a leaflet showing a child being branded a second-class citizen by a teacher, to a flysheet that asks "What examination pass did Father Christmas get?"

"Not many people support us", said a young campaigner sadly, as the protest wore on. "Of the political parties, only the Communists have said they will do away with examinations." The last opinion poll showed the Communists were supported by 6 per cent of the electorate.

A SECO leaflet protests against exams.

LETTERS

'Brainwashing' secondary trainees to need help

Sir,—If as Mr W. J. Millington, of Brighton Polytechnic, claims it is necessary, at the age of 22 and 23, for young entrants to the teaching profession to be propped-up by their senior colleagues, then I do not see a very rosy picture in the future for the meek.

Surely, if young people can face arduous circumstances in other walks of life without any hope of being supported on each step of the way, when will the young graduate in teaching be in a position to cast aside the line and sail on his own steam?

It is no good the young soldier of 18 in the thick of battle looking round for support—if he is to survive—when all his comrades are dead, or, similarly, the young missionary priest ordered to serve, often, alone in a far off semi-civilized land. Such people have to decide and do things for themselves.

The obvious theme of Mr Millington's letter is that my previous claim is true: that university-departments of education must be brainwashing trainee-teachers nowadays to depend on *total* help from already fully work-loaded experienced teachers. The young primary school teachers of infants rarely have anyone in a two or three-teacher school on whom they can depend to advise on the difficult job of teaching four to six-year-olds.

So why the problem with their counterparts at the secondary level—where the resource materials are probably more readily available? furthermore, the secondary entrant has in the past supposedly been better equipped academically.

Two final points. First, Mr Millington omitted two words from my letter, "at least" prefixed "12 hours per week". Secondly, I am glad I trained in the early 1950s and not in the 1980s, even though I was confronted during my training with reluctant mine-entrants at the Wigan Mining and Technical College, whose only keenness to learn was the art of coal-cutting. Having survived without any help I knew I would succeed.

R. H. EDWARDS,
Cil Y Coed,
Y Bala,
Gwynedd.

Let children have a little sun

Sir,—I can't share Carolyn O'Grady's attack on the Thames pre-school programme *Rainbow* ("Sweet factory," April 25). True, the series is "relentlessly sunny" but why deprive our young children of a little sun in a very stormy world? In addition to the series on safety, there have been other themes such as moods, with useful ideas on anger, sadness, selfishness, etc. Nor can I agree that not one of the puppets has an inch of backbone. The boastful Zippy (my favourite character!), the timid George and the naive Bungle all convey interesting ideas. The music, too, is catchy and often original and certainly not unsophisticated. Some young children I know eagerly await each episode.

It is nice to know that even in this area imitation is the sincerest form of flattery, since on a recent visit to Israel, I noticed that Jordan Television had their own version of *Rainbow*. All the characters were there, including a female presenter. At a time when our relations with some Arab countries are strained, a Zippy speaking in Arabic gives one hope that not all ITV programmes are bringing us nearer to World War Three!

RABBI DOUGLAS S. CHARING,
Director,
Jewish Education Bureau, Leeds.

Dilemma of school status highlighted

Sir,—Kenneth France's request for early retirememt from his post as headmaster of John Wilmott Comprehensive School highlights a problem which requires attention. Mr France is rightly concerned that, if a neighbouring comprehensive school is to revert to grammar school status, his own school may henceforth be considered to have reassumed the role of a secondary modern school.

You report that Mr Ronald Wootton, Conservative councillor and chairman of the governors at John Wilmott, is an active supporter of the grammar school idea.

I would suggest that any school should be governed by people who support its philosophy and aims wholeheartedly.

If Mr Wootton considers grammar schools preferable to comprehensive schools he should seek nomination to a more appropriate governing body in order that he may be succeeded by a person committed to furthering the best interests of the pupils of the John Wilmott School.

SARAH E. BIRKIN,
Bentlea Road,
Gisburn,
Lancashire.

Ms is as good as a Miss

Sir,—Did it really take two adults to produce the extraordinarily absurd 400-word filler headed "Lingo" (May 2)? The underlying logic behind it is (a) that marital status creates titles (lords and ladies—not to mention princesses) and (b) that all men using the title "Mr" are falsely pretending to be married.

The title Ms is now accepted administratively for any woman who chooses it, be she married or single, progressive or regressive. My driving licence and my passport are evidence of that. Both my sister and I use the same surname and the same title; one is married, the other is single. Neither friends nor family are in doubt as to which is which. As for the rest, if they choose to misread our intentions perhaps they should consider their own.

You seem to have overlooked that the words "With this ring I thee wed" are still part of the marriage ceremony and the choice to wear a ring or not lies with both partners. A quick check round any group of people will soon reveal which partners are falsely pretending.

Take your heads out of the sand, ostriches. Even garage attendants today write bills for women without asking that archaic question "Is it Miss or Mrs?"

Since titles are meaningless in any sense but as a matter of courtesy, surely the choice of which title to use should lie with the one who has to hear it? Peers of the realm seem to think so. So why don't you?

S. F. R. ROOME,
Tiverton Road,
Loughborough,
Leicestershire.

Pride in spelling the lingo right

Sir,—"The eldest of the gaggle of sisters in *Pride and Prejudice* was Miss Bennett", write Randolph Quirk and Janet Whitcut in *Lingo* (May 2).

She was, in fact, Miss Bennet.

MICHAEL GROSVENOR MYER,
Head of Upper School,
Chesterton School,
Cambridge.

Energy conservation programme vital

Sir,—Your Comment (April 25) on the needs and possibilities for the application of energy conservation measures in school and college buildings came at an opportune time.

A number of initiatives aimed at such energy conservation are already under way. At this large, multiple site college we are currently setting up an Energy Management Group consisting of academic and caretaking staff and representatives from the County Architects' Department. Reduction of the College's high and costly consumption of energy is the Group's immediate aim. It is hoped that it may be possible at some stage to negotiate for extra capitation in return for established energy saving—as is the practice in certain other parts of the country.

I would certainly agree with your assertion that ". . . no campaign (of energy saving) will succeed unless day-to-day users of buildings are alert and informed and keen to tackle the business of saving energy".

Your suggestion that there is scope for local experiments in "self help" energy saving is fully endorsed here.

However, it is important to say something about the wider significance of such experiments. Quite apart from the saving of money and energy for its own sake, there is a real opportunity for significant staff and student involvement in the complex multi-disciplinary task of monitoring energy waste and setting about reducing it.

We feel that a likely spin-off from such involvement will be the emergence of adaptations to the College curriculum of a kind that will better reflect the immense and growing importance of energy issues in business, industry and in society at large. Whilst your article referred to energy saving merely as an acceptable education cut, we would maintain that it could be a positive benefit to education in so far as it might help lead us towards a major aim of educational reform—a relevant curriculum.

Recent articles (January 11) the appearance of courses such as the JMB Energy Resources AO Level GCE, and the arrival of more and more energy-based teaching material from the energy agencies as well as commercial outlets all point to the increasing need to generate public "energy awareness" by the enrichment of energy ideas in the curriculum of schools and colleges. This need was emphasized in the recently published Energy Paper 37 from the Advisory Council on Energy Conservation (HMSO 1979).

After all, the presently much discussed need to invest in equipping industry and business with the plant to meet the challenge of commercial survival in the microchip age is surely prejudiced to the extent that we remain crippled by the financial penalties of massive and unnecessary energy waste. The United Kingdom is comfortably isolated from the most severe effects of world energy problems in its position as a practically self-sufficient producer of energy from the North Sea and its coalfields. Is this isolation preventing us from really getting to grips with the clear need to make all our citizens "energy aware" in time for when we cease to be self-sufficient in energy somewhere towards the end of the century?

School and college based curriculum development for energy awareness, with the assistance of industry and government departments wherever obtainable, is an essential need for the future. The energy group activities in this college will be part of our contribution to the Lancashire Energy Studies Development Group which has been established with the help of the County Advisory Service and in which most of the Lancashire FE institutions have now become involved.

Perhaps through the pages of your publication it may be possible to identify further ways and means in which teachers and lecturers feel energy education can best be promoted.

JOHN GRAY,
Head of Physical Sciences Section,
Department of Science and Maths,
Blackpool and Fylde College of Further and Higher Education,
Bispham, Blackpool.

LETTERS

Question mark hanging over future of Goodwill

Sir,—The question mark over the future of the Goodwill Shop in Glasgow (May 2) is unfortunate. The reestablishment of facilities which enable Youth Opportunities and Special Temporary Employment Programmes to progress to enterprise workshop status and thence to self-supporting, permanent employment companies is essential if new job opportunities are to be created on a sufficient scale to employ many more young people in Inner City areas.

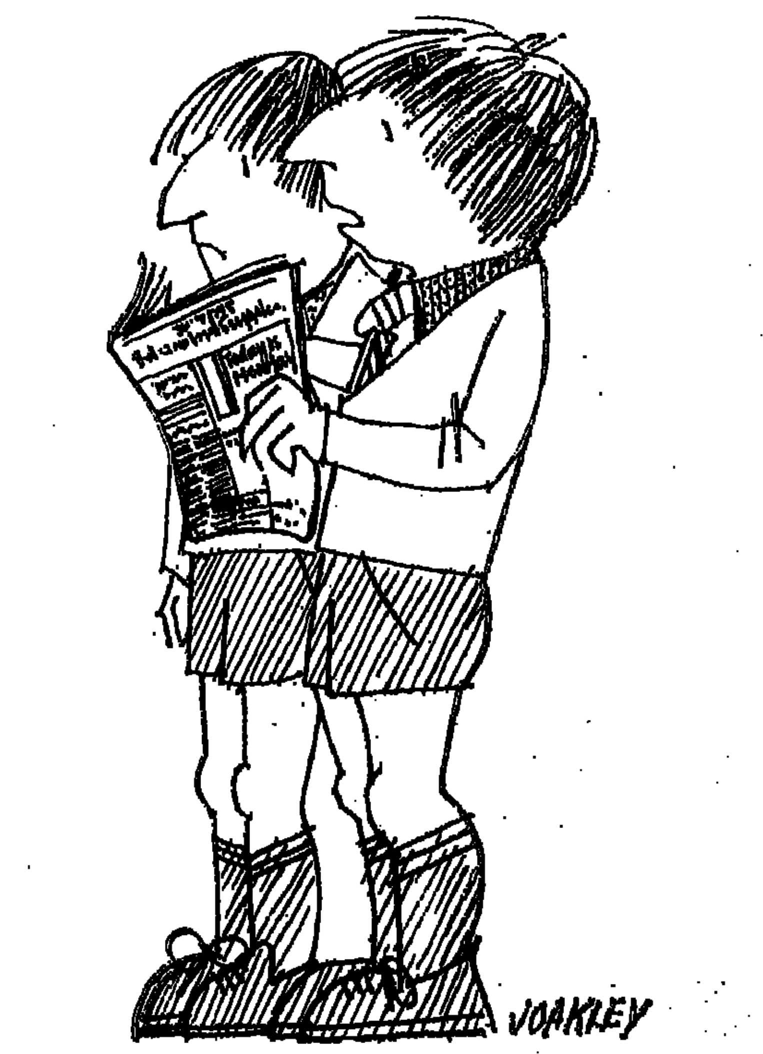
Recent research indicates that some two thirds of new jobs in the manufacturing sector are in firms employing less than 20 employees, and 80 per cent in firms employing less than 100. Larger firms tend to show either static or declining labour forces.

We must therefore explore every opportunity of creating new businesses, including spinning off enterprises from YOP and STEP programmes.

There are obvious difficulties. It means the injection of more marketing skills into programmes, including the cooperation of some successful local industries and such bodies as local chambers of commerce. It may mean working out ways of interesting more redundant executives registered with PER in spending periods working for projects. It will certainly require the whole-hearted cooperation of local authorities and local councillors, especially in releasing land at economic rents. It will also mean the introduction of "self enterprise" modules on a much wider scale into life and social skills teaching, before and after leaving school.

Some may query the abilities of young people to take part in such exercises; but there are already sufficient signs of success, given the availability of expert help, to make further representation highly desirable. Unless we do so we face the prospect of training many more young people through YOP for no job at all.

G. J. FORD
St David's Road, Otley,
West Yorkshire.



"I suppose they'll be giving us the teachers' views now—and we'll be back to square one!"

Mr Boxley still head of hall

Sir,—For the benefit of associates and friends, I should be obliged if you would kindly correct the false impression of my present status given in your May 2 issue. In your report of a schoolmaster who lost a court action over the length of the school day and the "right" of an employer to deduct salary, you referred to my own case, due to be heard in the High Court early next year, erroneously stating that I had retired from teaching. This is not so.

Though near retirement age, I am still in the service being Head of Hall at a local comprehensive school.

ALFRED W. BOXLEY,
Lodge Crescent, Warwick.

Support for Bristol riot inquiry

Sir,—We are very concerned that the significance of the Bristol riots is going to be lost in the media's weekly need to look for different news items. While there is a need to let everything calm down, just because things are quiet does not mean that the underlying causes of the riot have somehow been removed by the acts of violence themselves.

We would strongly support the need for a wide-ranging public inquiry, as demanded by local black leaders in Bristol itself. This should look not only at the role of the police in all aspects, but also at the position of the black community in Bristol vis-à-vis the provision of employment, education, social and other community services.

A. M. BIRD (Vice-chairman),
Severnside Branch of the Institute of Careers Officers).

Technological disaster

Sir,—In an otherwise perceptive leader (Comment, April 25) you suggest that schools may well be advised to point their weaker candidates towards careers as technicians. How utterly disastrous such a policy would prove to be in an era of microtechnology depending upon high-grade multi-skilled technicians with a wide range of know-how.

Regrettably, it is what society wills which determines ultimately what happens in schools. Our failure to spread a technological culture through the fabric of society has been the main cause of our inability to exploit British ingenuity and inventiveness. British technological ingenuity — e g, viewdata — does not cause adrenalin to flow in our bloodstream: so we are content that the Post Office's first objective for Prestel is profitability. In sharp contrast, the French intend to encourage people to use viewdata by supplying sets free to subscribers to replace telephone directories, doubtless in the confident expectation that the new technology will then be developed and exploited in all sorts of ways and circumstances.

Ironically, the work of pioneers in our schools in designing, making and controlling all manner of systems and artifacts is far in advance of technological work in French schools. We do not lack the know-how to diagnose and develop the technological ingenuity and skill of our children: what we lack is a nation with technology in its bloodstream and the will to provide the means.

EDWARD SEMPER,
Association for Technological Education in Schools,
Alderson Drive,
Doncaster.

Getting the Monday message

Sir,—Congratulations on your feature article "The Monday Report" (May 2). It is one of the most interesting pieces I have read for a long time and confirms my own experience of the classroom to a remarkable degree.

The message seems clear—if only we listened less to ourselves and more to the children, junior schools would be better places than they are at present. Heaven knows it is hard enough to do but your report has given me great encouragement.

STEPHEN SCOFFHAM,
Prospect Cottages,
Shepherdswell,
Dover, Kent.

Letters for publication should be as short as possible and should be written on one side of the paper only. The editor reserves the right to cut or amend them if necessary.

Alarming view on training

Sir,—Some parts of the recent manpower research group at Warwick University make alarming reading. Although their view about re-training and such courses as the TOPS are very welcome, there is a danger the Government could use their report as an excuse for further cuts in training—especially with their projected possible unemployment of 3 million by 1984.

Although there will always be some skilled workers unemployed in declining regions or industries, there are still even today, real shortages in many areas. The history of manpower planning since 1960 shows how difficult it is to make specific predictions about the types and numbers of skilled workers required.

Surely, the most flexible approach would be to expand such courses as the TEC and OND (besides ad hoc courses such as TOPS, to create a pool of technician talent from which industry could select and train up to higher standards in their specialized fields as and when required.

W. K. WHITAKER,
Central Liberal Association, Hull.

Happy to be gay

Sir,—Professor Weightman in his review of Somerset Maugham's recent biography seems to imagine that unhappiness, misery and "secret wounds" are prerogatives of homosexuals, and that a "fundamental cheerfulness" blesses the heterosexual condition. I suggest two things. First, that he meets a few gay people. Secondly, that he examines some heterosexuals of our culture and asks himself whether they were happy. Unhappiness is an occupational hazard of being alive, and has no essential connexion with being gay or het.

JOHN SKETCHLEY,
The Shires,
Royston,
Herts.

Recipe for peace

Sir,—I should think that most teachers would be delighted to accommodate their employers' wishes in connexion with conditions of service, if, in return, a guarantee was made to keep teachers' salaries in line with Houghton.

Could this be a basis for negotiations? It would certainly be a recipe for long-term peace.

R. A. CLARKE,
Aldersley School,
Barnhurst Lane,
Codsall,
Wolverhampton.

The school buses for now. Devon

Right now is when you need Devon buses. Now for economy, now for reliability, now for durability, now for nationwide after-sales back-up and NOW for delivery too.
Devon Buses mean superb quality and craftsmanship, a choice of base vehicles, engines, colours, interior specifications—and all Devon buses are manufacturer approved.
Now is the time to fill in the coupon for full details of Devon Buses. We look forward to hearing from you.

Industrial Sponsorship in Schools
Universities and Polytechnics
HOTEL RUSSELL
16 JULY 1980

An important day conference to outline and discuss industrial sponsorship for education. Among the topics will be the sponsored student; research contracts; business and management schools; vocational course sponsorship; help for schools and short courses.

The speakers include Mr Robert Rhodes James, MP; Mr K. J. Johnson, Director, Dunlop; Professor David Sharp, Glasgow University; Professor P. F. Moore, London Business School; and senior managers from industry—Esso, BP, IBM, Metal Box, the Post Office and other companies.

An essential conference for industrial and educational staff concerned with sponsorship in all its forms.

For conference details, write to or telephone CRAC (Careers Research and Advisory Centre), Conference Office, Bateman Street, Cambridge. Telephone 0223 69811, ext. 28

B.A. (Hons) in BUSINESS LAW

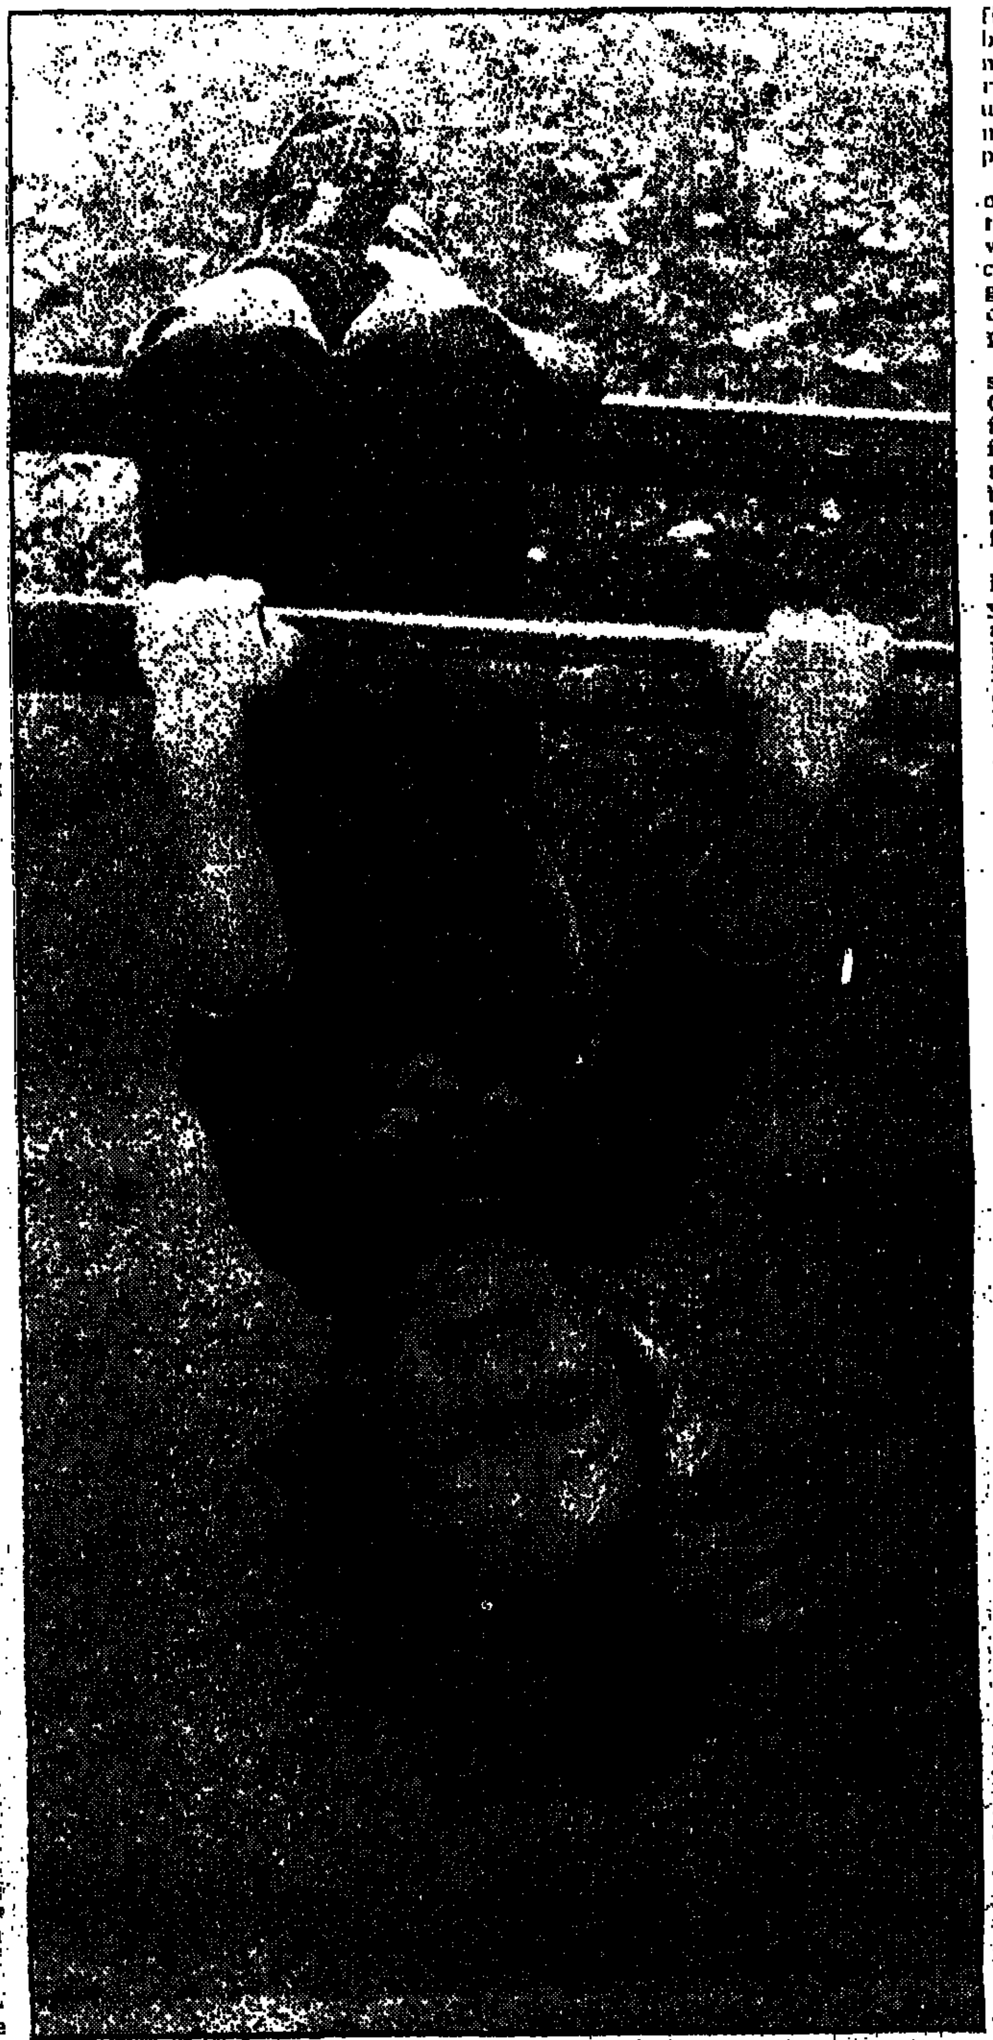
This three year course is designed for those who wish to pursue a career in business and commerce where a legal background is relevant or alternatively for those who seek qualification as solicitor or barrister, in which case exemption from the Common Professional Examination is granted to successful graduates.

For further details contact: The Registrar, The Polytechnic, Queensgate, Huddersfield, HD1 3DH. Tel: Huddersfield (0484) 22288.

Part of the action

Should researchers take a more active role in the educational debate?

Alan Little examines this and other issues arising from the findings of Jerome Bruner's Oxford Preschool Research Project



Five years ago Jerome Bruner, the senior author of the Project books*, warned us that education was in a state of crisis largely because of forces "far beyond those classically considered to influence the effectiveness of schools." One way of looking at these books (the product of a Social Science Research Council initiative) is as his way of showing how research can help resolve that crisis.

The context for these studies was optimistic; the White Paper "Education: a Framework for Expansion" accepted the targets for pre-school provision outlined in Plowden. The government's aim (the word mandate seems to have entered the vocabulary two elections later) was to make nursery education available to those three to four-year-olds "whose parents wished them to benefit from it".

Plowden's estimate was that this would mean 15 per cent of the age group in full-time provision and 35 per cent of three-year-olds rising to 75 per cent of four-year-olds in part-time provision. Government "action" would achieve this through increasing numbers of nursery places, so as to provide half a million places in nursery classes and quarter of a million in nursery schools.

The political will for expanding pre-school provision was there. Within the research community (both DES and SSRC funded) the feeling was that the problem of implementation was less ignorance about what needed doing, and more how ample research evidence could find its way into professional practice. The central task was the transmission of existing knowledge and expertise to professional practitioners.

Jack Wrigley, writing on behalf of the SSRC, acknowledges this in the introduction to these books. When the Council was considering what sort of work it ought to sponsor, "What quickly emerged was a view that much of the fundamental work on preschool children had already been carried out. What was lacking was the dissemination of that knowledge, and its implementation in the field."

It is this judgment that resulted in Jerome Bruner being given the main part in the council's work in this field, and it is crucial to appreciating both the design of the research and the nature of the finished reports. Clearly the economic and political climate has profoundly changed over the last six years. Oddly, that does not invalidate the basic assumptions of these studies; in a sense it makes them more relevant to the current debate.

In reading the Council's decision five things stand out:

1. That although education by itself is not a major instrument of achieving social equality, this affects the educational strategies for achieving equity, and not the objective.
2. That early experiences and opportunities within and outside education affect and constrain later ones, and serve as a basis for later basic skill and attitude formation.
3. That a variety of social changes (for example, nearly one million children now have working mothers) has made more urgent the need for effective support for children outside the family.
4. That because of the failure to implement the White Paper recommendations, the scale of existing provision is grossly inadequate. (DHSS figures show that at least one-third of mothers of under-fives are unable to find the help they need from existing preschool provision, and only 5 per cent of under-fives in one-parent families are in day nurseries.)
5. That the principal provision for under fives is informal and voluntary, provided by the efforts of non-professionals—child minders and voluntary play groups. (Currently there are three times as many under-fives with child minders as in day nurseries, and eight times as many in play groups as in nursery schools.)

It is with these points at the back of one's mind that the reader should judge these books. Two more (on parental involvement and work with under-five-year-old children) will follow. Bruner's own book gives the overview of the research, the other three deal with particular types of preschool provision.

With the exception of the day nursery study, all the field work took place in Oxfordshire. Lack of day nurseries there forced the field workers to look at this form of provision in London. Localising the work in a single authority gives a continuity in focus, but also raises the question of what is a representative authority for the national scene.

The clearest example of this problem is the study of child minders. Several years ago the Jacksons raised the alarm about backstreet, unregistered minders looking after large numbers of children in appalling conditions for many hours of the day. More recently, Mayall and Petrie's research on registered minders found the experience was cramping and unstimulating for children, and concluded that it was often unsatisfactory to both children and their mothers.

By contrast, the Oxford study of child minders reports that the "gross stereotype of mercenary, uncaring women, herding vast numbers of small children into a damp and dangerous basement with nothing to do all day", was ill founded. According to this report, Oxford child minders are mothers that "have a great affection for children generally, who enjoy their company, and who find great satisfaction in staying at home and caring for them".

It is tempting to see Oxfordshire as different to the inner city areas, and its findings irrelevant to other parts of the country. This would be mistaken, partly because the unrepresentative nature of the authority gives added force to other findings and to their general argument. Again, child minding provides an excellent illustration: the authors find it hard to imagine "a nicer or better intentioned set of minders". Nevertheless, they are critical of the belief that simply because someone is a well intentioned and an experienced mother she will make an effective minder for someone else's child.

As the authors put it (and document their judgment) "the great danger of this myth is that it denies that minded children may have needs, wants, fears and anxieties that are different from the minders' own children, or that their behaviour may have a different meaning . . . it does not follow that the minder's experience with her own child will enable her to understand a child's behaviour or his underlying feelings".

Stressing the unrepresentativeness of the research location may result in ignoring the main thrust of the findings. First of all, the reports note considerable *variability* in style within all types of preschool provision. The study of day nurseries notes two distinctive models: one in which the child appears to decide what he or she should be doing, the other in which adults appear to be structuring and directing activities. In the former, the social and emotional development of the children seem to be the predominant goals, in the latter cognitive growth and skill acquisition.

The fact that different day nurseries within the same area have different objectives and styles may not worry us unduly. But the authors concluded that for some children in some day nurseries "it may not be in the children's best interest to be in day care, because of the type of provision".

A similar point about variability is made on the report on play groups. While welcoming their existence, Bruner notes that they vary widely in their quality. "There are some that are lively and imaginative, others are dull and routine. . ."

Child minding is more varied in style and quality: the researchers found that even with minders that do not fit into the deprived stereotype a quarter of the children were disturbed or distressed,

continued overleaf

and that for at least one-third of the children minding created problems. This was not because of accommodation difficulties or lack of qualified minders, but because of something about the social and emotional relationship between parents, minder and child.

This point relates to the second main finding that cuts across all reports, namely the isolation of pre-school facilities from each other and the parents they are designed to assist. The administrative separation of educational and social services provision (nursery schools and day nurseries) is so well established that they have already been the subject of two interdepartmental circulars. Nevertheless, the study of day nurseries notes that they are still isolated from outside educational influences, to the detriment of both children and staff.

The private nature of the parent-child minder relationship and the location of the service in the latter's home results in no real communication between mothers and minders. Bruner calls this the culture of domestic privacy. Minders say they do not wish to pry into the lives of mothers; mothers talk about not wanting to interfere in the personal routines and habits of the minders. Each sees her life as autonomous from the other. The result is that the child often suffers.

Perhaps the overriding characteristic of preschool provision stressed in these studies is that it does not fit neatly into the authority structure of the educational establishment. All types of provision are cut off from each other, and "there are no binding guidelines, no inspectorate, little hierarchical control by local education authorities. Rather, it is a set of loosely connected and autonomous small units."

This is the key to the team's central conclusions: without underestimating the need for more and better-funded provision, it is the opening up of the preschool field to discussion and scrutiny from outside that is stressed. Child care (both inside and outside the family) is essentially a private world. Contacts between parents, minders, play group leaders, etc, are rare, links with other agencies few and often off-putting. Accountability is lacking, and the reports emphasize the need for a debate that involves providers and receivers of services.

The task is a delicate one: professional sensitivities are real, and any open discussion must not threaten the confidence of parents in their own skills as child rearers. Bruner points to the heavy assault on parental self-confidence in aiding the development of their children, despite the findings of Barbara Tizard that, as far as language development is concerned, homes are more effective than preschool facilities. Nevertheless, Bruner concludes that a public debate on the scale and nature of provision is required, not least because present discussions tend to be about single facilities or particular issues, rather than the general perspective of caring for children.

It is here that Bruner's book is relevant. He sees a different role for the research community, not as detached experts seeking technical solutions to problems set by the political and professional process, but as actors in a public debate designed to scrutinize schooling. His view is that the lack of such a debate, and educational research's failure to help formulate it, goes far to explain current educational pessimism and the weak role played by educational research in policy making and implementation.

"Consciousness raising" is his slogan, and in these volumes one sees its expression. It will be interesting to see by what means they are used to raise levels of public consciousness. One straw in the wind is that there has already been a nursery "sit-in" in one of the project schools, as a protest against cuts and threats of closure.

Last week the Programme for Reform in Secondary Education (PRISE) held a conference on 'minischools'. Here Virginia Makins looks at the latest innovation within secondary schools, while Rick Rogers reports on PRISE in our pressure group series

Getting a mini on the road

Virginia Makins

minischool (sk-) *n.* Semi-autonomous unit in a secondary school where a group of teachers take responsibility for the education and welfare of 100 or more pupils.

It's unlikely that this definition will ever make the *Oxford English Dictionary.* But if a group of teachers who met in Leicestershire over the last weekend have their way, it should at least begin to filter into educational discussions.

The Programme for Reform in Secondary Education (PRISE) organized a conference on minischools, starring three schools that have adopted a particular way of organizing secondary schools. The schools are an all-through comprehensive at Telford, in Shropshire—Madeley Court, and two Leicestershire community colleges—Thomas Estley, an 11 to 14 High School, and Countesthorpe, a 14 to 18 Upper School.

There are differences between the three. But they seem to agree on the purposes and benefits of their minischools (or "teams", as they all call them in practice). One main idea is to make a small, cohesive, social and educational base for pupils in a big secondary school. The other is to break down the barrier between "academic" and "pastoral" concerns that exists in so many comprehensives, and to encourage teachers from different subject departments to work together when planning and assessing the work of individual pupils.

What the schools have done is to split up their pupils into "teams" of 100 to 150 pupils, with four to seven teachers. Each team has its own area, which is used both for teaching and as a social base for pupils (pupils also go out to specialist areas for some lessons).

The teams are subdivided into tutor groups, and whenever possible tutors teach their own group. Tutors are responsible for academic work and the pastoral care of their group of pupils, backed by their colleagues in the team. In all the schools the teams include a specialist teacher for English, maths, social studies, and science. Countesthorpe teams include art, and Thomas Estley teams design, and either music or physical education.

At Countesthorpe tutors often work informally with pupils in their tutor group on the core subjects of English, maths and social studies. At Thomas Estley, there is a more formal arrangement where many teachers teach subsidiary subjects, working in teams alongside subject specialists. Department heads run weekly meetings which amount to in-service training for teachers from other specialisms.

At Madeley Court and Countesthorpe, the teams are subdivisions of year groups, and operate only for the younger pupils (11s to 13s at Madeley, 14s to 16s at Countesthorpe). At Thomas Estley, the teams have "gone vertical", and each team has children from all three year groups.

Teams at all the schools handle home-school relations (at Madeley, working in an educational priority area, improved relations with parents is seen as one of the great successes of the system). They arrange their own outings and projects, look after their own territory, do some of their own fund raising, and evolve their own rules and standards of behaviour.

Within an agreed framework, and in close consultation with subject departments, they plan the curriculum and assess the work of pupils in the team. "It means growth comes from the grass roots instead of being imposed from above. Chances for change are identified by the teachers themselves", says John James, a deputy head at Madeley Court.

All the schools say the system brings considerable social benefits. Discipline problems are lessened, vandalism disappears. "It's made a tremendous difference to the fabric of the school", says John James. Standards of behaviour and attitudes to work are set by a small cohesive group of teachers and pupils who know each other well: "Everybody is more polite", says Di Griffin, head of Thomas Estley.

At Thomas Estley School, children across a three-year age-range work together in a team.

But the schools are quick to stress the academic benefits. "I'm anxious that it should not be seen as a more sophisticated device for control", says John Watts, head of Countesthorpe. "It does pay off in terms of social peacefulness, but the real justification is that it makes for more coherent planning of an individual student's programme, and improves the quality of learning."

All the schools opened in the past ten years. At Countesthorpe the minischool system was hammered out after a couple of years, by a staff who, from the start, had been committed to innovation. At Madeley, it was started two years ago on the initiative of a new head, and they say it is still very much at the development stage. John James says "It takes time for teachers to come out of their specialisms and work as a unit."

Thomas Estley is the newest school, and started with a team system for its first small intake of 11-year-olds. The "vertical" system developed naturally, and curriculum and resources could easily be developed to fit. The result is an extremely flexible organisation which allows for class or team teaching, vertical or single-age grouping, depending on the preferences of teams and subject departments.

The school now has three teams of about 150 children and seven teachers (the school is expanding fast—by 1982 there will be 720 pupils). Teaching takes place in half-teams, with 75 pupils and three teachers for any period.

Maths and humanities are vertically grouped, with 11 to 14-year-olds together. Science, English and languages are taught in single age groups. For design, the first two years are taught together. For physical education, older boys and girls are taught separately. Science teachers take individual classes, English teachers work sometimes in pairs and sometimes singly, and maths and humanities work in teams of three. The aim (not always achieved in practice) is that each child spends seven periods of a 20-period week with his or her tutor, and in every lesson children know which teacher is responsible for their work.

The teachers are full of praise for the system. They say the close links between teachers in different subjects mean they get a rounded picture of children's work and abilities. Inexperienced teachers get a lot of close support in the teams, and discipline is easier with experienced teachers at hand. "You can voice what bothers you, knowing you will get support", said a teacher.

Regular weekly team meetings, with most subjects represented, make it easier to develop a consistent strategy for children in difficulties, and make sure it is implemented. Teachers who held pastoral jobs in other schools are particularly enthusiastic. Gerry Gleaves, head of physical education, was a deputy head of year in another school. "It was a lousy job, all you did was sort out problems. The other staff passed the buck."

The development of minischools certainly needs some special circumstances—a staff reasonably committed to the idea, appropriate buildings which lend themselves to large, fairly open teaching spaces, a local authority prepared to back the idea with money for minor conversions, knocking down walls or putting sinks or science equipment into team areas.

But it does seem to have considerable benefits for schools, teachers and children. Bob Smith, the head of mathematics at Thomas Estley, perhaps sees the system at its most evolved. He organizes the teaching of a highly specialist subject using some non-specialist teachers, and teaching mixed-ability, mixed-age groups. He says: "This way you see the whole development of a child. It now seems completely illogical to work any other way—just daft."

Not so much a programme...

Rick Rogers

PRISE stands for the Programme for Reform in Secondary Education. Many of its members will deny that the organization is a pressure group at all. Robin Chambers, the PRISE chairman and head of Clissold Park comprehensive, says: "We are a fluid organization—very small and not in the business of being a mass movement." Zoe Image, a teacher and the PRISE secretary, claims: "It is an intellectual response rather than a banner-waving one."

But pressure group it is—albeit of a hybrid sort. And those same members will, later in the conversation, refer unprompted to PRISE as a pressure group. The ambiguity arises because of the way PRISE does things and the people it seeks to influence.

PRISE developed in the mid-1970s, out of a concern by teachers and educationists committed to comprehensive education, who found that most like-minded colleagues were not looking critically enough at what was happening in comprehensive schools. That critical running was being made by people who were, essentially, opposed to comprehensive education.

The most common response to their attacks was to hold fast to one's beliefs and close one's eyes to what was not working well. This played neatly into the hands of the anti-comprehensive lobby. A different approach seemed vital.

A familiar rollcall of names—for example, Harry Rée, Maurice Kogan, Caroline Benn, Maurice Peston, Margaret Maden, Margaret Miles—decided to organize a weekend conference in February, 1975. It was attended by a small but high-powered pro-comprehensive group of 40 teachers, administrators and academics.

The idea was to discuss the present condition of secondary education, and the "desirability for an inquiry into or commission on secondary education". The outcome was nothing so grand, but probably more effective: PRISE.

"Our response", says Margaret Maden, head of Islington Green comprehensive and a past PRISE chairwoman, "was that we had got the Campaign for Comprehensive Education, which responded to criticism in a largely political-cum-polemical way, backed up by a lot of hard fact-finding and statistics. Very useful.

"But we thought that something else was needed—a group where, because we were all people who were quite clear that comprehensive education was the right way forward, could look critically at ourselves and be more reflective.

"We had won the reorganization argument. But we needed what was then called a final push—to analyse and decide what we mean by good practice in comprehensive schools, and then disseminate it."

At first PRISE attracted a wide range of people—teachers, education officers, heads, governors, advisers, college of education staff, even parents. Membership peaked around 400. It went down badly during 1978 to 80/90—due mainly to "an organizational cock-up"—but has jumped back to about 300.

The majority now are teachers, with as many heads as other teachers. The group is weakest on parents. Nor does there seem much concern about this. Indeed it is very much a radical trade association rather than a consumer body.

A greater problem is felt to be that two-thirds of the membership are London based. The idea of having regional groups has not taken off—and there are currently only "pockets of activity" in places like Leicester, Milton Keynes, Nottingham and Oxfordshire.

Finance comes from members' subscriptions (£3 a year) plus any profits from the two or three conferences organized every year (this year there are four). There are close ties with the Campaign for Comprehensive Education, which elects two members to PRISE's 15-strong management committee.

The main link for most members is the newsletter *Prisenews* (three times a year) and attending one conference a year. There is a hard core of 60 to 70 members who go to every conference, and meet together more often informally. Within them, there are the regulars — about 25 to 30, who are either on the management committee, or form part of four or five study groups set up each year.

The basic official PRISE objective is to win improvements in the ways comprehensive schools are organized and managed, and in the curriculum offered by them. That is a solid enough aim—and one which, say, the main teachers' unions would compositely put their names to. The difference—and the excitement—come in the way PRISE seeks to achieve that aim.

PRISE attempts to bring together the various "stake-holders" in the comprehensive system: teachers, heads, governors, LEA advisers and administrators, parents. As such, PRISE is more about study groups and conferences; not about up-front campaigning.

Harry Rée was aware early on of the gap, even the mistrust, that exists between teachers and administrators and between administrators and academics. Yet they were concerned about and responsible for the same things. Get them together, and not only can you bridge the gap, but also change each other's thinking and, eventually, ways of doing back in school or county hall.

Much time and energy are invested in the study groups. These have two basic purposes: to enable a small number of committed people to work as a unit on a chosen issue to produce material for public distribution; and to "generate" a conference.

The groups meet every three or four weeks for up to a year. Detailed guidelines have been drawn up by Harry Rée and Maurice Kogan on how to produce papers for discussion; how to arrange a conference, and advise on group membership.

For example: "The composition of each group should be sufficiently broad to make sure that the PRISE objective of eclecticism is met." The "control and management of schools" study group has five members—a head, an l.e.a. inspector, a professor of social administration, a teacher (the head of a school English department), and a chairman of a school governing body.

The most difficult task for the groups is knowing how to present a detailed run-down of a year's solid work to the very mixed audience at a conference. For the conference is the main arena of influence — the pressure point — for PRISE.

"We have always felt", says Margaret Maden, "that if we can run a good conference with two or three hundred people present, then they will go back to the schools and education offices, and what they do in the future will be influenced by what they have observed, absorbed and questioned at the conference." In short, convert a head and you can improve one school; convert a chief education officer and you can improve several.

Robin Chambers puts it this way: "The Secretary of State should be able to go to a PRISE conference and feel that something important was being said." Mark Carlisle has yet to attend one; his predecessor missed out too.

Many members refer to PRISE's "tremendous" morale-boosting properties—"being with people interested in getting things moving in education". In the cold climate of the eighties that should become increasingly valuable.

It has also been called a rest-cure for a busy coterie—an educational health farm. Being in PRISE though is hard work, and can provide an urgency missing from conventional self-indulgence. For example: "The best thing for me is being able to meet with people who haven't been cowed by the sillier criticisms of comprehensive schools."

"It's enormously encouraging to meet with PRISE people who, on the whole, are intellectually able, sane *and* progressive. The mutual support offered is very important, particularly now, when 'trimming' is the order of the day—not just financially but also philosophically."

"It's an organization to think and work hard in."

PRISE, then, refreshes the parts other groups cannot reach.

What does PRISE "think hard" about? There have already been study groups and conferences on mixed ability teaching, assessment and exams, running schools, school and work. Current issues include the control and management of schools.

Two innovative conferences this summer are the one held last weekend on minischools (establishing small semi-autonomous schools within larger schools), and another on education and independence (assessment and teaching and learning through independent study). To some, PRISE is regarded as "a powerful contribution to in-service training as it should be".

At its best though, PRISE's achievement is not just in being a front runner in explaining and promoting some educational change, but also in trying to pick off and take with it key people in education—from teachers to chief education officers—who can help to do the job for it. It is what Robin Chambers calls "constructive pressure—being pressured without feeling threatened".

The biggest disappointment has been the failure to involve more people. Margaret Maden says: "There are an awful lot of teachers in comprehensive schools who very much welcome the opportunity to reflect on what they are doing or not doing. I am absolutely convinced that the ability to do this improves the quality of your work. But it is not the normal pattern of most comprehensive schools to build in that facility. And we are not getting enough of these teachers into PRISE."

PRISE encourages the need for pluralism: "The notion of polemizing doesn't figure very largely. There seem to us to be many different ways in which comprehensive schools can be effective—whether talking about the curriculum, teaching or managing schools."

That characteristic has been much criticized in the past as being too academic and too hesitant. And some members have been lost because of it. So too was an initial manifesto, abandoned when no agreement could be reached on what it should say.

The differing views as to what sort of group PRISE should be, which surfaced at its launching conference in October, 1975, are still around, if less vocal: should it be more political? Should it concentrate solely on secondary education? Should it be more like the other conventionally campaigning pressure groups?

Currently the pluralists prevail. It has not quite become what Maurice Kogan envisaged: "a small group of high-powered educationalists producing seminal documents designed to improve existing comprehensives." For, as with many voluntary groups, those involved are already too busy.

The result is inevitable. Not enough time is put into organization—too little recruiting, too little dissemination of information and material. The cost is a low media profile, a smaller membership than need or should be, and an elitist feel to the meetings. Much good thinking "has gone to waste, except for those who did the thinking".

The management committee recognize the problems. They would like to have a part-time paid organizer, to make *Prisenews* better and more widely read than it is, to produce books and pamphlets based on the work done.

As yet there seems little impetus to sort out these problems. Their base remains too narrow and their time limited. But if PRISE wishes to extend its sphere of influence, these tasks must be taken up. Until they are, the criticisms—and self-criticisms—will stick.

Rick Rogers is education correspondent of the New Statesman.

PRISE can be contacted through Zoe Image at the Camden/Westminster Teachers Centre, 100 Stanhope Street, London NW1 (01-387 6593), or Richard Barnes at the Stantonbury Campus, Milton Keynes MK14 6BN (0908 314055).

Next week's article in this series will be on the Society of Teachers Opposed to Physical Punishment (STOPP).

We all wear jeans

‘Class is what people say it is.’ Well, perhaps. John Vincent examines a new study of the problem

Class: Image and Reality in Britain, France and the U.S.A. since 1930.
By Arthur Marwick.
Collins £9.95.
00 216199 0.

Professor Marwick is Professor of History and Dean of Arts at the Open University. It is mildly relevant that he rose from a semi-academic, politically committed, books-in-the-home Scottish council house background, via an Edinburgh council school, a direct grant school, Edinburgh University, and Balliol, to his present position of national influence. It is not surprising that his previous books, like this one, have explored large scale social change in twentieth-century Britain in a manner by much his own. The reticent Englishman may at times find Professor Marwick's unstoppable flow a little too reminiscent of the Ancient Mariner. The author would no doubt reply that this is an ambitious book. It is a fair answer, for even to outline the nature of classes in Britain, France, and America involves an enormous academic literature, to say nothing of non-academic sources. His bibliography is a happy hunting-ground, while the “filmography” lists large numbers of films, from *Passport to Pimlico* to *The Graduate*, which have provided inspiration.

What is class? For the author, this presents few problems. Away, he says, with Marxian classes, rooted in production and existing chiefly to detest other classes. But he is not a mere anti-Marxist revisionist, for he also says away with the alternative, classes rooted in production but getting on quite well together, and classes not rooted in production at all but still having a cordial detestation of each other for a' that. These doctrines are not necessarily false, but they are none the less doctrines, not observable facts about stratification, or common expressions used by people when talking about class.

For Professor Marwick, class is (very nearly) what people say it is, or have said it was. It is a continually fluctuating stream of subjectivity which the historian can only roughly and anecdotally convey. Before going on to consider the oddness of this approach, let us note that if the author has let his enthusiasm for subjective images of class run away with him, he has nevertheless done his homework on the objective studies of stratification. He knows his Giddens and his small town surveys, he knows who owns what, how peasant vote, and what proportion of the higher civil service went to Clarendon schools. But he does not respond to this material, does not make an argument of it; he conscientiously “pots” it, no more. What really interests him as an historian is how class has been described or portrayed in ordinary non-academic contexts.

Colloquial usage divides society into two classes (if power is in question—“us” and “them”) or three classes if it is a question of money, status, culture, and pattern of life. This seems an enduring pattern, even if it is perhaps no more than a fact about the simple thoughts of simple men. The man in the street can be wheeled on with equal truth as a supporter of a theory of irreducible social dichotomy, or as a sound believer in harmonious social gradations. (There is little evidence that the man in the street gives more than perfunctory attention to the matter—why should he?) When one gets away from colloquial usage, the picture gets more complicated. British and American sociologists often prefer a six or seven-class system which they see as corresponding to observable strata (and cultures—a word not on Professor Marwick's lips. He forgets the old definition of lower middle class as those who never entertained). British marketing men, interestingly, are happiest with a four-class system of AB, C1, C2, DE. The French, of course, confuse the issue. Many French sociologists want intellectuals to be a class; some see priests as a class; and then there are the peasants, the nobility, and a middle class very different from that of Britain and America.

So much for the patterns actually used. None of them is obviously false, and one subjective usage is as good as another. The myths and genteelisms deceive no one, but may contain a germ of truth. It is no surprise that American steelworkers and even farmhands consider themselves middle class, that American political utterance avoids the term working class but speaks of the Common Man, and that the class below the manual working class is seen by those above as a much clearer entity than in France or Britain. Is this a capitalist mystification which robs the American worker of his class consciousness? Hardly, on the outspoken and highly class-conscious statements by American workers printed here. They show a working class which is politically apathetic not because of absence of class feeling, but because it is sharply aware of itself as being separate from both the classes above and below, and therefore expresses its sense of class conflict partly by low political participation, partly by a patriotic and conservative resentment of the alliance between capitalism and the welfare classes. America, with its rigid taboos on class, is the country most responsive to Marxian analysis, while France, with its sophisticated Marxist culture, is still best understood through the vision of Balzac.

Marwick is most tantalizing on the subject of upper classes. In America he sees the purely social kind of upper class embodied in the *Social Registers* as the nucleus of a single national upper class in a political and economic sense. Not having a House of Lords, so to say, they are finding it necessary to invent at least an Upper Ten Thousand. America must become increasingly a hereditary country, but the process has not got far as yet. France, on the other hand, swarms with both real and false members of a noblesse whose functions are limited to the display of the *particule* and the maintenance of social exclusiveness. The effect of 1789 has merely been to increase the numbers of pretenders to nobility (like Giscard and de Gaulle). Having abolished the landed gentry, the French have found it necessary to reinvent an urban equivalent.

Britain is a different story. The sociology of the British upper class remains to be written. This tells us something about sociologists, who are sociologically themselves a deviant group and rarely come from old English families. It tells us something about their methods: the “upper class” shows up as 1 per cent or so of any sample, which is enough to put the statistically conscious into a dither. It is partly a result of the almost total success of upper class disinformation about death duties, penal taxation, and their self-portrayal as a failed aristocratic, rural residue. The consequence is that the middle class come near to perceiving the British upper class as anachronistic victims of history.

Professor Marwick has no definite message. His conclusions are a bit light: that class in the sense of culture is disintegrating (we all wear jeans), but that in economic terms class is strengthening under the impact of inflation, itself a consequence of class struggle. He toys at times with the idea that class may be a social and moral good, but his feelings do not seem much engaged either way beyond some conventional egalitarianism. He does not explore the possibility that class-based cultures matter more than class itself. Those who want an academically rigorous epitome of the literature on stratification must look elsewhere. This is a book of social impression and anecdotes, of which the best concerns the horrific hirsute face of Professor Marwick which adorns the back cover, with only the kindly *Guardian* eyes to show that he is a stray from *Mrs Weber's Diary* and not one of the great villains of history.

A viewer wrote to him: “... I wonder whether ... you could make some effort to improve your unkempt appearance. It was clear from your accent and dress last night that you have risen, by dint of hard study, from the working classes. Your accent is completely acceptable, but your appearance is NOT.” Professor Marwick enjoys the joke, but the reader may wonder whether unkempt books and unkempt looks are symptoms of the same class culture, and agree with him when he describes his work as “littered with evidence. Some I have scarcely tried to interpret, some I have probably misunderstood”.

No towering figures?

W. W. Robson on contemporary English verse

The Oxford Book of Contemporary Verse 1945-1980. Chosen by D. J. Enright.
Oxford University Press £7.50. 19 214108 2. £3.50. 281260 2.
Trying to Explain. Essays by Donald Davie.
Carcanet New Press £6.95. 85635 343 4.

Mr Enright has, very sensibly, interpreted “contemporary verse” as meaning “recent verse in English”. About half of his poets, by my reckoning, could be described as English without further explanation or qualification; the rest hail from Scotland, Wales, Northern Ireland, or from the United States, or from the Commonwealth or ex-Commonwealth. But he has aimed at quality, not geographical coverage; no one should complain that Sierra Leone, say, or Guyana, is not represented.

He has included 40 poets. There seems no point in arguing about particular inclusions or exclusions, “who loses and who wins, who's in, who's out”. Philip Larkin in his *Oxford Book of Twentieth Century Verse* managed to take in a larger number of poets, but at the price of meagre representation for many of them. Mr Enright has been able to give his chosen poets seven or so pages each. Some at least of his principles of exclusion seem uncontroversial. For example, he has left out poets who made their names in the thirties and forties. His positive choice favours the middle-aged (the youngest poet was born in 1942). Most of his poets are reasonably well known to those interested in contemporary verse.

About his choices within their work there may be room for more argument. In his introduction he speaks in favour of Q's principle of going for what he thinks the best, regardless of whether it has been already much anthologized (Q included the “Ode to a Nightingale” in the *Oxford Book of English Verse*). But Mr Enright believes he can find poems from those authors as good as the widely anthologized ones, and where he can, he goes for them. Thus he omits, for example, Larkin's “Church Going” and “Dockery and Son”, Donald Davie's “Remembering the Thirties”, Thom Gunn's “On the Move”, and his own “On the Death of a Child”. I think Mr Enright's decision here is defensible but mistaken. He should have acted as if his book were the only anthology of contemporary verse. The Oxford Books have quasi-institutional status. No one trying to do for current English verse what Q did for English verse in general could possibly have omitted, for example, Stevie Smith's “Not Waving but Drowning”. It may well be the only poem for which she is likely to be remembered. Mr Enright's policy would have been more apt for a purely personal anthology.

Naturally some excluded poets, and their friends, may feel disappointed or resentful. But Mr Enright's book has no flavour of the clique. He himself was associated with the “Movement” of the fifties and some of the “Movement” are here. But he also includes poets who had nothing to do with it, and one or two who were strongly hostile to it. It would be difficult to gather from these pages just what the Movement was—or was supposed to be.

Has he done a good job? My first impression is that he has—within the boundaries of his own taste, and the widespread contemporary notion of what poetry is. This notion, to a historically minded reader, seems a very limited one. We should not expect to find epic or tragedy: considerations of space, alone, would rule them out. But there is little or no “public”, formal, functional verse here: no epithalamia, no elegies, no idylls, no hymns, no anthems, no ballades, etc, etc. What we get from these poets is mostly what the seventeenth century would have called “a copy of verses”. Often this is a wry, marginal comment on life. The poet does not commit himself very strongly or very emotionally. An ingredient of irony acts as a tranquillizer. The prevailing mood is something like a twentieth-century version of Matthew Arnold or Clough, but without their occasional sonority, or poignancy. Devoutness, ribaldry, wild fancy are out. Mr Hughes alone represents the dithyrambic. Intellectually, the atmosphere is agnostic and secular; the mode of expression is journalistic-ironic.

Technically the level of accomplishment is very high. There is a good deal of free verse, but there is also much writing in strict forms, some of it metrically and rhythmically original and interesting. The American poets (Wilbur, Hecht for instance) are more adroit and sophisticated craftsmen than the British.

No towering figure dominates the volume. (*Is there a towering figure in poetry today?*) Negatively speaking, the poets appear to be united in their determination not to write like T. S. Eliot—at any rate, the Eliot of “The Waste Land”. Otherwise, they go their own ways. One or two of the American poets seem to be moving in part of Auden's territory. But the general influence is simply the *Zeitgeist*—the diffused consciousness of what they agree in feeling to be an awful century.

There is, I suppose, no living tradition of major poetry today. Now and then a poet rages against his chains; now and then he tries to forget them in a never-never land. The poets of this collection are more apt to contemplate them with light irony and a touch of self-pity. I felt a certain lack of the direct conviction which great poems share with some poems no one would call great—“The Village Blacksmith”, or “When all the world is young, lad”. Strong attack and bite are nowadays confined to purely comic verse. Some of Amis's and Larkin's poems have this quality, but Mr Enright has not emphasized it in his selection from them.

I have so far found only one poem in the book that goes on to my private list of great poems; Larkin's “The Explosion”. But there is much else that I found interesting and impressive. In particular there is Charles Tomlinson's “Charlotte Corday”, and Thom Gunn's “In Santa Maria del Popolo”. These are solid poems—something more important than “movements”. Mr Enright's criteria, he tells us, were “civility, passion and order”. Perhaps his anthology is a little short on passion. But the other two qualities are widely present, and we should be grateful for them. The poets are good conversationalists. They do not bore, insult or ignore the reader as some (perhaps greater) poets have sometimes done.

Among the poets prominent in the anthology is Donald Davie, who has devoted his life to the promotion of an intelligent and critical public for contemporary poetry. It is good to have this miscellany of his recent prose writings—reviews, essays, lectures, interviews. It has an air of workshop criticism about it. And if some sawdust and shavings from the workshop are included, that does not matter. The main subject is American poetry, and Davie says many things that are likely to irritate and provoke the casual, flippant kind of British reader—to his benefit. I recommend especially the group of essays on Ezra Pound.

God, schlock and football

Roy Shaw reviews a week's television

On Sunday (when I started viewing for this article), television still makes token obeisance to God, but the major part of the offerings reflect a great change from the Presbyterian-style “Reith Sundays” of my youth. Today, the Sunday programmes are much like any other day, but there is still an early evening “God-slot”. The present one on ITV as *Credo*, and last week's was a thoughtful and provocative review of the more challenging attitude to the problem of poverty in this country that has been taken up by the churches working together in admirable Christian unity.

Of course, the churches have traditionally been involved in direct action to mitigate the effects of poverty, running children's homes and family centres. Now, however, they have decided that picking up the pieces after poverty has struck is not enough and they have made direct appeals to the Government to take preventive action. The Secretary of State for Social Services contributed a warning to the churches against “interfering in material things” and thereby losing their spiritual force. This nineteenth-century view that religion should be concerned only with personal salvation—a form of spiritual egotism—was soundly repudiated and the programme ended with an encouraging assurance that the churches would go on working in “the dusty area of politics”. This was religious programming at its best.

Later on ITV, *Come Sunday*, very efficiently presented by the Bishop of Winchester, represented an enormous step forward from the unlamented *Stars on Sunday*—religious television at its worst—even if it still included some pretty mawkish songs of uplift. *Songs of Praise* on BBC 1 represents trad religion, and is surely due for similar re-thinking.

The most stimulatingly fresh approach to religion, politics and art was demonstrated by Dennis Potter in the *Levin Interview* (BBC 2). Potter, our best television playwright, was once a committed Labour man, but has moved on intellectually. Not the extreme right like Kingsley Amis or Paul Johnson, but to a rejection of all crude political attitudinizing. He sees the present political debate as a “dialectic of decay”, with each side over-using “easy words”. He spoke earnestly (but not too earnestly) of a commitment in both religion and politics to a questioning, searching stance. Any accusation of vagueness or fence-sitting could be amply repudiated by reference to the positive values in his many television plays. In television ratings terms, Potter was probably no better as an interviewee than he had been (in his own view) as a parliamentary candidate; but in television's flood of easy words, this was a rare encounter with a mind tempered by suffering (not mentioned here), and uncorrupted by success.

Dennis Potter

It is a pity that public concern about the quality of television has been left largely in the hands of Mrs Mary Whitehouse, a sincere but very limited lady. I would like to see something like a Society For Promoting Television for the Intelligent Layman. Some television still tries to blind him with science (e g, James Burke) and far more insults his intelligence. But one lady would get the Society's award for her work in two very different programmes on BBC 1. She is Judith Hann, who gives regular sterling service in *Tomorrow's World*, a programme whose consistent quality we take too much for granted. On Wednesday, she was joint-presenter of *The Risk Business*, devoted this week to the machinery and machinations of the mass-market publishing business.

The programme was called *The Hype*, but it could more illuminatingly have been called *The Abuses of Literacy*. It dealt with books sold like, and even sold with, soap powder. The content of the books was described by the £80 million trade itself as “schlock”, and it is aimed (exclusively, it seemed) at women. One firm (Mills and Boon), producing 10 new titles a month, and they sell like hot cakes at Woolworth's and other outlets. Another (Futura's Troubador series) specialises in “bodice strippers” in historical settings.

An executive of the firm told us that rape was a common event in these stories, but hastened to assure us they were not *nasty* rapes, just “fantasy rapes”. Another publisher told us the aim was to find titles that would sell a million copies and unsurprisingly added: “We try not to pass judgement on literary merit.” Another meant much the same when he said “We must not be *élitist*”, thus adding yet another instance of the gross misuse of this word.

It was saddening to learn that Penguin Books are moving into this world. What a falling off is here! But a lively lady literary agent, who appeared to have no misgivings, gave the explanation for this and the whole mass-publishing scene: “It's all to do with money”. Visually the programme was riveting, and Judith Hann (ably helped by Sophy Robinson) steered us through this jungle and its ethics with admirable clarity and impartiality. No need to denounce however, when the spokesmen for the business so clearly gave the game away themselves. A disturbing but brilliant programme whose editor, Michael Blakstad, deserves the gratitude of us all, especially teachers and all who resent the exploitation of women.

Unfortunately, BBC 1 also gave us this week the nearest thing that television dare give us to the kind of “literature” *The Risk Business* dealt with. This was *Knots Landing* (daughter of *Dallas*?). I might ask why on earth the BBC imports such American television schlock, did I not already know the answer, which is that they must compete with ITV for at least half the viewers. In this episode daughter hates her visiting mother, the reasons are explained in copious crude flashbacks to childhood and to a shot where she is shown being turned away from her mother's door with a baby in her arms. (I thought *that* went out with Victorian melodrama.) Even her friends have to have their emotions explained by flashbacks. One says her mother died when she was 12, and duly registers distress at the memory. Lest we don't get the point, the flashback shows her standing by her mother's coffin crying “Don't leave me momma!”. Later, the heroine laments, “All I wanted was a momma”, and the last words of the episode, after the inevitable reconciliation are, “I love you momma!”. Mrs Whitehouse would probably rejoice at this moral ending, but I had to rinse out my mind with a few chapters of a good novel.

Flashbacks were much more intelligently and effectively used in *Too close to the edge*, ITV's Playhouse offering, by Howard Lawrence and Michael Ferguson. Mr Ferguson also directed this highly sensitive and restrained portrait of a middle-aged, successful businessman (superbly acted by Kenneth Watson), suffering from anxiety neurosis. His doctor, who surprisingly also operated as a psychiatrist, took him through his family history to discover the cause of his anxiety. Inevitably, the family history was shown in flashback, but it was handled very differently from *Knots Landing*, and there was a revealing episode when he visited his father to try to come to terms with him. He did not, and there was no “I love you poppa” at the end of this play.

The best comedy of the week was provided by the last of the present series of *Not the Nine O'Clock News*, and I await its return with keen anticipation. Max Boyce's Welsh Humour (BBC 1) leaves this Englishman largely untickled, but the Welsh footballers who thrashed England provided (also on BBC 1) the most exciting television of the week and I responded ungrudgingly to their stylish football, stylishly followed by cameramen whose skill never ceases to astonish me.

Sir Roy Shaw is Secretary-General of the Arts Council.

New notes

Following the première last month of Malcolm Williamson's Fifth Symphony by the Brent Youth Symphony Orchestra come works by Edward Gregson and Douglas Young for the Crodon Schools' Music Association and the Leicestershire Schools' Symphony Orchestra respectively.

The Gregson work, *The Salamander and the Moonraker*, was given on May 7, 8 and 16 in the Fairfield Halls as part of the Croydon Schools' 1980 Music Festival. Written for the 10 to 12 age group, the music is eminently singable, often catchy with more than an occasional hint of Gregson's brass band sound. Elsewhere ranks of young percussionists conjured up appropriate “spacey” effects to Reg Anderson's narration of Susan Gregson's libretto. Conductor Roy Terry conjured a fine, focused tone from an enormous choir who sustained from memory a long programme which also included John Byrt's *Dives and Lazarus*.

The Leicestershire Schools' Symphony Orchestra under Peter Fletcher continue to perform a remarkable double service to contemporary orchestral music and adventurous programming. In Christ Church, Spitalfields where they appeared on May 16, they have come upon possibly the ideal venue for their London visits—ideal that is when the public can be persuaded to go there. The church has a warm resonance, more than a little responsible for the orchestra's tight intonation and powerful string sound. *Third Night Journey under the Sea*, Young's third major work for this group is altogether more cohesive and compelling than before, and his professed aim for synthesis between the East/West, static/dynamic philosophies is here more of a fact and less of a confusion. The ensemble spends most of the time scattered in seven groups about the auditorium, each going its own way on allotted aspects of a central theme. The theme is simplicity itself, being not much more than ostinati and intervallic permutations around the note G. Things come together at the end both aurally and visually when the orchestra re-seats itself on stage—an effect not as gimmicky as it would appear, in the context of the music.

The Young piece is not really technically demanding but a programme that also included Ives, Ravel, Tippett, Penderecki and Messiaen more than made up for this.

A. Peggie

From a Dark Tower

Louis MacNeice in the BBC. By Barbara Coulton.
Faber £12.50.
571 11637 3.

If Louis MacNeice is thought of at all—he is still a very underrated writer—it is probably as a poet of the thirties, one of the Auden mob. Yet he was only 32 when the decade ended and, although already admired for his poetry (especially “Autumn Journal”) had not yet settled into the career which was to earn him his bread-and-butter and, some suspect, to dissipate his talent. Born in Belfast, the son of an Anglican rector who later became a bishop, he had taken a First in Greats at Oxford, married on the last day of his last term and become an assistant lecturer in Classics at Birmingham University. In 1936 he had moved to London, with a lectureship in Greek at Bedford College. But, apart from the writing of poetry, all this was really a false start. His first wife left him in 1935 and went to live in America and he himself, visiting America shortly after the outbreak of the Second World War, thought of staying there like his friend Auden. Instead he returned to England “to a past which is not there”, married again and joined the BBC's Features Department, where he worked as writer and producer for the remaining 2 years of his life.

Barbara Coulton devotes her first chapter to MacNeice's early history and her second to that of the Features Department, which at the time he joined it was a subsidiary section of the Drama Department and did not become fully independent (under its great captain and talent-spotter Laurence Gilliam) until 1945. Alas, having whetted one's appetite for this long and apparently unlikely match between the individualist and the institution, Ms Coulton fails to satisfy it. She takes pains to chronicle MacNeice's work for the department, script by script, and makes some attempt to relate it thematically to his poetry, but she gives little sense of its quality either as radio or literature. Nothing is more dreary or useless in the critical biography of a literary figure than summaries of his subject-matter. Ms Coulton is an indefatigable summarizer. Ploughing through the abridged plots of even the more notable scripts—“The Dark Tower”, “Prisoner's Progress” or (for heaven's sake!) the translation of Goethe's *Faust*—she contrives to reduce MacNeice's dramatic *oeuvre* to its lowest common denominator—allegory of a now sadly dated kind.

Compared with his poems, of course, MacNeice's radio scripts *are* too simplistic; lacking his own voice and the constant infusion of sensitive and penetrating autobiography which is characteristic of the poems, they have more of the sermon than of life about them. Above all, one misses the self-questioning intelligence of the poems. It is as if MacNeice never trusted his full weight to drama. Did he not have the time and energy to find a way of doing so? Was the form too public and objective for his particular gift? Did anyone else at the time manage any better? Was the competition too low-powered? Not observing the problem, Ms Coulton does not raise the question. Her method, in any case, is calculated to make the scripts seem thinner than perhaps they really are and although she quotes MacNeice's disillusioned lines (from “Autumn Sequel”) about writing for radio:

> But aims too often languish and instead
> We hack and hack. What ought to soar and flame
> Shies at its take-off, all our kites collapse . . .

she herself shies away politely from any proper examination of what working for the BBC did for or to him.

What of the other side of the relationship, that Kafka world of corridors and Controllers, from which as far as possible Gilliam sheltered his band of creative talents, which once listed Dylan Thomas as an actor to be less frequently employed and which as soon as Gilliam died in 1964 liquidated his department? Ms Coulton gives us glimpses of its murky depths—an anecdote, for instance, of MacNeice's reply to a time-and-motion study asking what he had been doing during the blank spaces on his work-sheet: “thinking”—and refers occasionally to the heavy drinking which supported so many of its denizens, including MacNeice. But, like the incidents of MacNeice's own life, the story of the BBC at this formative period—its dragons and its heroes—forms only a vague backdrop to Ms Coulton's primary interest in her catalogue of scripts.

Perhaps I am too hard on Ms Coulton. She admires MacNeice even if she cannot explain why he is admirable. In the absence of a full-scale biography her book is something to be going on with, so long as those who read it make sure that they also re-read the poetry.

John Spurling

10th National Festival of Music for Youth
Fairfield Halls, Croydon
July 17 to 20, 1980
The National Festival of Music for Youth is the largest and most comprehensive event for young musicians in Europe and embraces every form of instrumental ensemble. 3,000 young musicians will perform over 200 works in 12 classes from full symphony orchestra to electronic music group, from mediaeval ensemble to contemporary big band.
SPECIAL EVENT
“Jazz at the Fairfield” — July 18
A special evening concert featuring 200 of Britain's finest young jazz and big band musicians.
SPECIAL EVENT
“Tenth Anniversary Concert” — July 19
The Festival's Tenth Anniversary Concert with Julian Lloyd-Webber, the Essex Youth Orchestra, Croydon Schools Centre for Wind Players and the Bromley Schools Choir in a programme that will include the Cello Concerto No. 1 in A minor by Saint-Saens, the Debussy Nocturnes and the Polovtsian Dances.
Full information about all these events is available from
The National Festival of Music for Youth
23a Kings Road, LONDON SW3 4RP

Breaking the chains

Patrick Carnegy on opera

Fidelio, anthem of Amnesty and many another cause, is so loaded with Admirable Sentiment as to be less easy to stage than is commonly imagined. Some kind of bridge has to be built between the impulse which fired Beethoven, the general Gospel of Freedom enshrined in the work, and the anxieties and aspirations of the modern world.

Producers schooled by the late Walter Felsenstein at the Komische Oper in East Berlin have always responded to this kind of challenge. If, in practice, this has led to intrusive sins of commission, it has also rescued whole areas of the repertory from the canary-fancier's gilded cage, and from pandering to what Jonathan Miller has dubbed the "pools winners' fantasy".

The trick has been to vitalize the social context of the piece; Joachim Herz's starting point of defining relationships and avoiding stereotype characterizations is always pure gain.

The credibility of *Fidelio* itself being secure and unassailable, Herz looks beyond it, seeking to extend Beethoven's meaning along avenues opened up by hindsight and modern experience. Herz allows Beethoven to tell his own story almost to the end before he joins in. The first surprise is something that was there all the time in the text: Rocco, minutes after being party to Pizzaro's attempted murder of Florestan, boasts that he himself had been instrumental in the rescue. This etches an acid residual impression of a man whom one is generally inclined to forgive.

Herz's most novel coup is reserved for the moment when Leonora is allowed to remove Florestan's chains. The blaze of light is extinguished at the momentous A major interrupted cadence (Herz's staging is always meticulously geared to the music) so that Leonora and Florestan are silhouettes at the front, while behind a gauze at the rear, seen as though in a dream, a tableau of unknown prisoners, manacled arms held aloft, protests the lot of those who will always be less lucky than Florestan. An unforgettable vision (though too protracted), tempering the general rejoicing. And when light returns to the scene, it does so not from above but from the metallic grid floor below, looking forward to the day when light shall be kindled even in the deepest dungeon.

Josephine Barstow was well cast as Fidelio. With cropped hair and quick, purposive stride, she prevails upon Rocco not through any ingratiating pose of helpfulness, but *out of a finely calculated efficiency* and cold competence. Only once doe she "forget" her role, desperately scanning the prisoners' faces for any sign of Florestan. The fearsome difficulties of the "Abscheulicher" were superbly met; the tenacious, terrier-like quality in Miss Barstow's voice seemed exactly suited to engage with and vanquish Beethoven's supra-vocal line.

Alberto Remedios, unfairly miscast as Florestan, found that same craggy, quasi-instrumental, ecstatic line, barely negotiable and had to fall back on attacking wherever he could and fudging wherever he could not. Given an Italianate vocal line, it would have been a very different story.

Dennis Wicks gave us a memorably unbluff Rocco, Eilene Hannan, a Marzelline quite untroubled by living over so terrible a shop. Neil Howlett's Pizarro was the rather too familiar study in curled-lip villainy, though he found more meaning in the spoken lines than anybody else. John Tomlinson sang Don Fernando powerfully but without either he or Herz answering the question posed in the programme as to *who* this benevolent agent really is. Deus ex machina, divine providence?—it would be nice to know.

The chorus sang altogether splendidly, but the breadth and musicality of Mark Elder's conducting were undermined by orchestral playing that sounded under-rehearsed and below par.

..Una Partita (1933) by Zandonai (1883-1944), a Mascagni pupil and pale epigone of Puccini, was given its first British performance by Morley College. Surges of vacuous lyricism failed to rescue this Don Giovanni story from banality, though they helped Warwick Dyer demonstrate the potential of a *powerful and exciting tenor voice*. The college opera chorus came into its own in Puccini's Suor Angelica, the second and vastly superior half of this double-bill. Some technical deficiency barely detracted from Clare Goddard's moving Angelica, while Isobel Beattie (Abbess) and Hazel Wood (Princess) were also impressive. The operas were produced by Andrew Downie, and conducted by David Shaw.

Finally, an all-too-brief word of praise for Nicholas Hytner's Turn of the Screw production for Kent Opera at Sadler's Wells. This had the inestimable advantage over Jonathan Miller's recent version at the Coliseum in that Flora and Miles were sung—and very well too—by real children, Rebecca Platt and Sam Monck. Meryl Drower's no-nonsense Governess was as down-to-earth as the production itself—surely a more authentic if less "interesting" approach than Dr Miller's "all-in-the-mind" hypothesis. Roger Norrington conducted.

Adolescent art

Michael Clarke

Salvador Dali. The Tate Gallery until June 29.

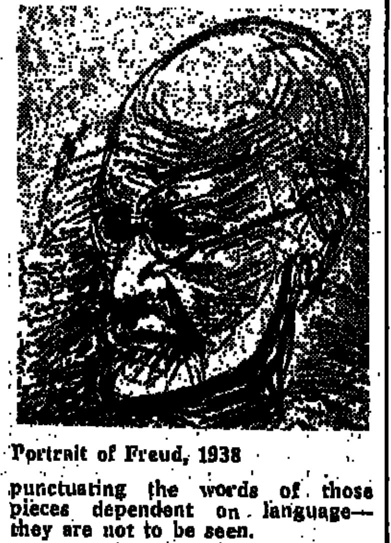
Pier and Ocean. Construction in The Art of The Seventies.
Hayward Gallery until June 22.

How an artist endowed with such a small talent and so apparently indifferent to the decent values of the majority should become one of the most popular twentieth-century painters is a question certainly worth asking. A creative vacuum yawns just beneath the surface of all Dali's work and the only possible interest it can have for us now lies in how he managed to camouflage the fact for so long.

One way lay through his perversely pretentious, paranoiac-critical method called from his reading of psycho-analytical literature. Dali took the liberty of manipulating the world according to his own omnipotent will; the result being the now famous distortions and multiple images. Another way was through his enormous technical facility which allowed him to produce what he accurately described as "hand painted dream photographs"; a *trompe l'oeil* illusionism that has been enviously admired by most adolescents ever since.

Dissatisfied with the restrictions that surround him, Dali lacks the will or the way radically to change them through his pictures. The macabre manipulations so obviously meant to provoke are at the same time made reassuring by the essentially traditional, structural apparatus which contains them. Dali's paintings are no more the result of "delirious associations and interpretation" than they are "images of concrete irrationality". The language is merely one more rhetorical device. What they reveal is not the strategy of the subversive but the calculated con-tricks of the commercial illustrator.

Spots, like so much confetti, are almost everywhere in The Hayward exhibition. Spangling Wolf Knoebel's 50-odd night-sky photographs or acting as boundary markers in Douglas Huebler's Lower Manhattan Location Piece they are still contained but Daniel Buren has scattered them about the gallery itself; on the floors, up the stairs, out onto the terraces and very likely into the offices and toilets too. It is not without significance that in the very places where you would most expect to find them—punctuating the words of those pieces dependent on language—they are not to be seen.



Portrait of Freud, 1938

Although Piet Mondrian never reduced his own work to a full-stop, *Pier and Ocean* takes its title from drawings and paintings done by him during the First World War. Symbolizing the thrust of man's meaningful constructions (the pier) into the meaningless chaos of nature (the ocean), they are, nevertheless, minimally rendered in short, vertical and horizontal lines; pluses and minuses that hint now at the punched out cards of the computer.

The hint is worth taking for it is the example of communications theory that has been so blighting an influence on much of the work in this exhibition.

Paradoxically, the so-called dematerialization of the art object during the late sixties and seventies, that presumed ascent of the idea over the means, methods and contexts of art, appears at The Hayward as stubbornly material and opaque. Too often the medium drowns the message or the idea is so patently obvious that it is only unintended levity that keeps the thing afloat at all. A one-inch circle of cord on a wall or molten lead splashed between wall and floor remain just that. A splash is a splash is a splash, maybe, but more than one splash in this exhibition is the result of someone or other falling off the pier into the ocean.

York Festival & Mystery Plays
6 - 30 June
Festival Director Richard Gregson-Williams
Programme now available for England's largest Arts Festival, including the York Mystery Plays directed by Patrick Garland. Please send SAE to Festival Office 1 Museum Street York YO1 2DT. Tel (0904) 26421

Actors act actors

John James on theatre

The Dresser by Ronald Harwood at The Queen's Theatre.
Hay Fever by Noel Coward at The Lyric Theatre, Hammersmith.
The Hothouse by Harold Pinter at the Hampstead Theatre.
Steven Berkoff's Hamlet at The Round House.
The Merry Wives of Windsor by the RSC at the Aldwych Theatre.

Ronald Harwood's *The Dresser* centres on the final performance of *King Lear* by an old actor-manager in the Wolfit tradition. The elderly thespian collapses under the pressures of touring Shakespeare in wartime with a company reduced to "old men and nancy-boys". Despair laps round him, fear shakes him, but the show must go on. The effort exalts and kills him. That he makes it at all is due to the cajoling, managing subserviency of his dresser Norman—a failed actor with a history of mental breakdown hinted at. The resonances of Shakespeare's tragedy underscore the tinselled comi-tragedy of "Sir" and his "Fool" Norman. Michael Elliott's finely judged direction blends laughter and pathos in a wonderfully seedy backstage setting by Laurie Dennet. Freddie Jones is magnificently monstrous as "Sir" and Tom Courtenay rivets attention as Norman in a brilliant performance—minutely observed and deeply felt.

Actors also act actors in Coward's *Hay Fever*. The horrors of spending a weekend with the Blisses are hilariously run through by a cast of good actors under Michael Blakemore's expert direction. The designs (Julia Trevelyan Oman) are accurate but unlikely and Constance Cummings is the wrong actress to essay the shallow brilliance of Judith Bliss. But the play rattles on with great good humour and the production adds to The Lyric's growing reputation.

Pinter's reputation will stand the mistake of changing his mind and putting on *The Hothouse*. Written in 1958 (before *The Caretaker*) it *was "put aside for further deliberation"* and directed now by the author. Roote commands an unspecified governmental "establishment"—perhaps a psychiatric unit on the Soviet pattern. He and his staff—Gibbs, Lamb, Lush, Tubb, Lobb and Miss Cutts—talk endlessly about two unseen patients, Nos 6457 dead (murdered?) and 6459 delivered (sired by Roote?). They exchange enigmatic remarks and insult one another in long tirades which mix word-lists and petitions, teasing a line of talk like knotted string and sounding like characters in an EFL primer. All, except Gibbs, are slaughtered in a sudden uprising of the patients, a crude device worked crudely by jabbering sound-effects. Christian symbols used marginally might suggest to academics that there is more to *The Hothouse* than meets eye or ear. Not so: despite valiant acting it is stupefyingly boring. Pinter's youthful judgment was right: it had been better left alone.

The same might be said of Steven Berkoff's *Hamlet*. Nine actors in thirties dress march on to a tennis court surrounded by chairs. In blinding white light three begin the opening scene, moving like lunar astronauts confronting a ghost programmed along the diagonal. Then we move to the assembled court, all in black save Hamlet suited in blue pin-stripe (though he talks of his black habit). There is much shouting and self-conscious posturing; only Polonius suggested some understanding of this masterwork. I fled.

The Merry Wives of Windsor is no masterwork. The tomfooleries of Falstaff's pretended love to Mrs Ford and Mrs Page, the wooing of Anne Page and the tricks attendant thereon are no more than Shakespearean pot-boiling to please Elizabeth I. But Trevor Nunn and John Caird direct the ragbag of chauvinistic fun loving detail and the result is delightful. Geoffrey Hutchings (Dr Caius), David Threlfall (Slender), Bob Peck (Page), Timothy Spall (Simple), work wonders with their parts; indeed, all the actors go to it with a will and show the RSC in sparkling form.

The life of Oscar

Sue Lermon reviews 'The Tin Drum'

Volker Schlöndorff has undertaken the transposition of Günter Grass's great and reverberating novel, *The Tin Drum* (Odeon, Haymarket) to the screen with breathtaking faithfulness. The film stands to the original as a perfect *aide-mémoire*. There is the potato field with Oscar's grandmother conceiving his mother under four skirts, there is the apartment in which Oscar sits under the table while his parents—two fathers and one mother—play skat, there is the trap door to the cellar, unwittingly left open on Oscar's third birthday and apparently, through a fall, stopping Oscar's further growth, there is the theatre with its shimmering window-panes shattering gloriously under the power of Oscar's glass-breaking voice, there is the Church of the Sacred Heart, *there the drum shop*, there the Polish Post Office, and so on.

The topography of Oscar's autobiography is laid out before us. Danzig, a city whose divisive history might almost have been preparing it for its twentieth-century experience, is caught for us in the refracted light of Oscar's observation. And there is Oscar himself, his family, his neighbours, his fellow-citizens, looking so in place; there are no shocks, they are so rightly cast—even Oscar in his stunted beauty does not disturb the long-standing admirer of Grass's work.

A full two-and-a-half-hour film (cut, though, by the censors for English distribution) can only be a fragment of that work, and there are significant losses aside from the inevitable omission of incident. The reader is introduced to Oscar in a mental hospital, postwar, where he is writing his rich, mature, fantastic, interminable history, reviving the past, and many permutations thereof, on his drum; the spectator is deprived of the framework, with all its resonances, deprived too of the fragility of the account, the film giving a kind of stamp of objective certainty to Oscar's narration. Instead, he has merely Oscar's commentary in a *faux-naïf* voice, aiding an impression that Oscar liked to impart that he never grew up.

And the drum tends to a perfunctory and literal roll beyond the scene where Oscar disrupts a Nazi rally by leading, from under the rostrum, the band into a waltz. The result is a more starkly symbolic Oscar and a film that seems, quite unfairly, an easy achievement in comparison with a book testifying to the five years spent by Grass in Paris sweating out his vision of apocalypse then.

Drama and Mimesis. Themes in Drama 2. Edited by James Redmond. Cambridge University Press £12.50.

Is Eric Bentley right when he ticks us off for falsifying by over-sophistication if we choose to suppose that when Aristotle writes of Mimesis he means anything more than direct slice-of-life imitation? The question echoes in various ways through all the essays in this, the second in Cambridge University Press's handsome series of "Themes in Drama".

In one of the most interesting essays in the present batch, for instance, Jonathan Dollimore looks at *The Revenger's Tragedy* in terms of Renaissance theory of reality as well as Renaissance theory of drama, for how can one judge one before one has defined the terms it derives from the other? Elsewhere, John Fuegi considers Brecht's practice in relation to his theoretical announcement that his plays were *nichtaristotelisch*, and points out tellingly the contradictions between the two and the way that Brecht, whether or not he cared to accept it, did belong to a clearly defined European theatrical tradition as well as to various oriental traditions which he was happier to acknowledge.

Who are the masters?

Maurice Peston reviews a new study of the power of the Civil Service

The Civil Servants: an Inquiry into Britain's Ruling Class. By Peter Kellner and Lord Crowther-Hunt. Macdonald £9.95. 354 04487 7.

I am not sure what image is conjured up by the words civil servant. In their excellent book Peter Kellner and Norman Crowther-Hunt remind us that the range of people who are civil servants is extremely wide and varied. They themselves concentrate on the most senior officials, but remind us that it is clerical officers, executive officers and such specialists as inspectors of taxes that the public are most acquainted with. If the Civil Service is unpopular, it must be more to do with these people than with the permanent secretaries, whom the average man never meets and whose jobs he would find incomprehensible. (I should add that the unpopularity of civil servants is much more to be attributed to unscrupulous politicians and newspapers or to the behaviour of a variety of other workers in the public sector than to their own treatment of the general public.) More to the point, since, in my opinion, the Civil Service is a reasonably efficient organization, or set of organizations, especially when compared with most of British industry and commerce, it is the lower level staff who are as much responsible as anyone else. It is not a criticism of Kellner and Crowther-Hunt that their main emphasis lies elsewhere, but it does suggest that there are other books to be written.

The present book opens with a considerable section on the Fulton Committee. This is not surprising in that Norman Crowther-Hunt was a member of that committee and was as much committed to its recommendations as anybody could possibly be. We are presented, therefore, with the Fulton critique of the administrative class as it then was, and especially its celebrated attack on the cult of the generalist. This is followed by two chapters on how the former head of the Civil Service (now Lord Armstrong) outmanoeuvered the reformers and eventually prevensed many of the major changes happening. What I did not realize is how he was helped in this regard by the Civil Service unions which, for the most part, were as opposed to new developments as he was.

Interesting though all this is, I am bound to say it has a rather dated quality. Nothing now seems more irrelevant to our present difficulties than the sixties with their Wilsonian view of science in government and the need for institutional reform. Indeed, while the sixties look disastrous at the time from today's vantage point they look excellent compared with the seventies. (And bad though the seventies were, they too will appear in 1990 to be satisfactory compared with the eighties.

Twenty years ago it seemed to be the case that what was wrong with the country was either caused directly by the government or persisted because of government failure to put things right. It was then argued that government errors were due in large part to the incapacity of the Civil Service. It followed that Civil Service *reform could lead* to social and economic advance. If the generalist, arts-biased graduates of Oxbridge were replaced by social scientists from the LSE or Essex, we would all be better off.

Now, while I share with Kellner and Crowther-Hunt their criticism of the Civil Service at this level, it does seem to me that the claims of Fulton were much exaggerated. This is because Fulton was based on the typical sixties assumption that the expertise existed to solve our problems, and even that the solutions were there ready to hand. It then followed that what was needed was the presence of this expertise within the Civil Service and the acceptance of these solutions.

But the seventies were not like that. They were a decade in which the experts in any field hardly covered themselves with glory. Their diagnoses and predictions were wrong, and their chief policy prescription was either more or less expenditure, depending on political position. I do not excuse the Civil Service from their share of the blame, but it is not at all *obvious that matters would have* been improved or would be improved much in the next 10 years if Fulton had gone ahead full steam.

Returning to the book itself, part two comprises a lively account of the recruitment, training, and career pattern of senior officials. Here, there appears what the authors call "an academic con-man", Sir Cyril Burt, whom, one ought to have guessed, in 1946 was called in to advise on the qualities that administrators should have and how to identify them. Whatever other reform is needed, the most urgent is to help officials and ministers identify and avoid academic con-men!

An especially interesting section of the book is a description by Peter Kellner of the two days he spent actually observing a Civil Service Selection Board in action. This is a brilliant piece of reporting which everybody, but not least the prospective candidate, will find fascinating. As someone who has sat on selection boards for the Economic Service, I can vouchsafe the accuracy of its tone. For those worried about bias in recruitment, they will see clearly how it arises. They will also see here and subsequently in the chapters on careers and on the work of senior officials, that the bias in selection is simply towards the Civil Service as it exists and operates. In other words, it is not a reflection of irrational prejudice. If the existing Civil Service is what ministers want, new recruits must fit into it, and this is what C.S.S.B. does admirably.

What then do we want our Civil Service to be? This question permeates the whole of the book, but especially part three entitled, Who are the Masters Now? One view of the Civil Service is that they offer Ministers a set of alternatives, from which the Ministers choose, and which the civil servants put into practice. They will clarify any of the alternatives if called upon, but will not answer the question, "what would you do?", let alone offer an opinion without being asked. This restaurant view of the public service is widely believed in, both normatively and positively, and is unmitigated nonsense. It does not happen in practice, and no sensible minister would want it to happen.

A first class civil service could not be built on such passivity. Even if the distinction between means and ends can be maintained in practice (which I doubt), civil servants have vast experience of the former, and can hardly be expected to refrain from using it in the face of ministerial ignorance. But, even on the question of ends, given that these always have unforseen consequences, officials would regard it as their duty to express an opinion. I might add in this connexion that the ministers I have served were well aware of civil service prejudices, or learned about them rapidly, and could easily allow for them in practice.

Thus, to take an obvious example, at my short time at the DES not all officials were equally enthusiastic for our policies. But all ministers were aware of this, and, indeed, used to joke about it. They were also aware that they had to keep the pressure on, in areas where civil servants might have been a trifle recalcitrant. I would certainly describe policy making as one of conflict, but do not see this as other than indicating the strength of the public service rather than its weakness. Of course, there are ministers who are second rate (or more usually lazy or cowardly). They will be run by their officials. Even first-rate ministers find the struggle somewhat one-sided, but they can be helped by special advisors. But I do not accept that civil servants are simultaneously too powerful and excessively incompetent.

On the latter theme, in particular, Kellner and Crowther-Hunt do less than justice to Whitehall. It is true that the recruitment to the public service needs widening, and education and training must be improved. Officials spend too little time in specific posts, and not enough use is made of various specialists, who may also possess administrative and policy-making talents which they have kept secret from everybody including me. But each department viewed overall contains a remarkable degree of knowledge and expertise. Its strength lies precisely in its joint ability to get this material together, even though no single person can manage it alone. My experience has been that, whether it is inflation, unemployment, incomes policy or most areas of education, one would get a better briefing and clarification of the issues from Whitehall than from most corresponding departments in our universities. I might add that this would not have been true 20 years ago, and, presumably, must to a considerable extent be attributable to Fulton.

But, returning finally to power and politics, Kellner and Crowther-Hunt are right to place considerable stress on the secrecy problem. But what emerges from many of their examples is not just that it is the officials who wish to hide behind the cloak of secrecy, but ministers too. Moreover, the relevant policy struggle is more often between ministers (backed up by officials). Thus, the authors remind us that the Labour Government failed to fulfil its manifesto pledge on the public schools. They say, "The promise was not implemented, and Sir William Pile, Permanent Secretary and the Department of Education until 1976, played a part in the process". This is to give an entirely mistaken emphasis to what happened. It is ministers, and at a much higher level than the authors refer to, who sabotaged this policy. The fact that nothing would be done could even be discerned in the very first list of cabinet appointments made. To single out officials is absurd.

This leads to the final question. When is action sabotage and when is it acting in the public interest? Many senior officials I know are strong supporters of incomes policy, and regard monetarism in the form which the present government originally believed as nonsense. What are they to do? Should they be cowardly as some of them currently are, and keep quiet? Should they *speak up and risk their careers*, since the present group of ministers are much less liberal minded and tolerant of honest criticism than their Labour predecessors were? Or should they quietly undermine the extreme and radical initiative of the new administration?

It is one of the many merits of this book that such questions emerge forcefully. That it offers no consistent answers to them is hardly a criticism, since it is not obvious what those answers should be. I personally disagree with much of what Peter Kellner and Norman Crowther-Hunt have to say, but let them have the last word—"To challenge the character and operation of the Civil Service is to assault the very citadel of Britain's closed corporate state. Possibly the biggest question facing the British political system in the 1980s is whether, it has the will and the ammunition to mount the assault."

Lingo

It was originally a comparative adjective, and meant that something was greater than something else. It is a word of five letters. Fowler/Gowers regards it as a Vogue Word of the sort that attains popularity because of the ease with which it can be used to save the trouble of thinking of some other word, e g, chief, main, principal, etc.

One rude colonial, name of Cyrus Vance, came over the air on March 21, 1979, about something or other. In the space of about half a minute he included in his remarks: "... a major agreement ... a major, major agreement ... a major step ... a major effect ... a major impact ... the major ...". At this point I switched off. I cannot now remember what the man was trying to sell me. I vividly remember my impression that I was being sold a secondhand car. I did not buy it.

There is now no hope of restoring "major" to its real status, so let us not waste time or tears on trying. Let us merely point the finger of scorn at those who over-use it.

Recently, one MP managed to insert five "majors" into a brief article. All he meant was: "I want you to concentrate on these points, because they are the ones that support my angle." Now that I have alerted the English-speaking world to this insidious attempt to undermine its rational thought-processes, maybe "major" will show a diminishing return. In passing, one can't help suspecting that the Russian-speaking world has a similar mindbender: "gnelbtsch", or something of the sort.

Publishers are another lot who try to sell us things. "A major new publication." "This major contribution to. . ." "No other major approach to the subject has. . . ." Since publishers, like any other merchants, sell big things and little things, why are we never told that this is a "minor" bit of printed material? The answer is obvious.

Very major

Arguably, (yes, it is a deliberate mistake) the worst thing the BBC ever invented was presenters. I am talking about the regiment of splutters marching in the foot-steps of the late William Hardcastle. He was once asked whether the new format for BBC news programmes on radio was not rather scrappy, untidy, shallow, and vulgar: or words to that effect. He replied quietly and almost smugly: "A lot of people listen to them." If I had been is interrogator, I should have asked: "Is it that because of, or in spite of, the format?"

At any rate, presenters are great ones for "majors". "Our major story today is. . . ." "In his first major speech. . . ." "A major scandal. . . ." "The major baby food producers. . . ." Here is one that really gives the game away. There being nothing much to report (how dull), the presenter said: "We could so easily have been talking about a major crisis."

"A major potato event" hardly stirs the blood but the last two from my extensive collection stirred mine, at the time. One was from a lady presenter, and these tokens of sex equality in the BBC are even worse than their male colleagues, for drooling and lip-smacking about "gloom". She was talking about a strike. What kind of strike? Aha, well it had to be a big strike, so she had to call it a major strike. Not satisfied with that, she made it a very major strike. Even that did not seem gloomy enough. So, audibly cooing out she came with: "a very major strike indeed." How major can you get?

Finally, here is an example which suggests that, just as some of us are tone-deaf, some others are word-deaf: "The last two major miner confrontations. . . ." Ouch.

Truth in art, deceit in life

Victoria Glendinning on a new biography of Katherine Mansfield

The Life of Katherine Mansfield.
By Antony Alpers.
Cape £9.50. 224 01625 3.

Antony Alpers published a biography of Katherine Mansfield in 1953; he has now produced not an updated edition but a totally new book. When in the late 1940s he was working on the first, her husband, the unpopular John Middleton Murry, was still alive. But so were many other of the principals in the story, whom he then interviewed even though he was not able to use all the material they gave him. When you add to this now unrepeatable research the overwhelming amount of documentary evidence about K.M. and her contemporaries that has become available since, it is clear that Mr Alpers is in a uniquely strong position. His new book is very good indeed, though idiosyncratic in that the biographer's own voice is much in evidence; he gives a sort of running commentary to the narrative in the form of personal comments and jokey asides. This is entertaining: but an iota more of it would have been too much.

An awful lot about K. M. is already in print, and Mr Alpers does not reproduce it all. For example, alluding to the violent attack on Murry's personality that she wrote in a letter to him, Alpers says briskly: "The rest of this unkindly episode can be followed in the *Letters*, if it must." He concentrates on areas hitherto vague: the exact circumstances of her one-day marriage to George Bowden, of her elopement with her actor-friend Garnet Trowell, of her stay in the Bavarian town where she miscarried. Her perpetual ill-health began with gonorrhea and ended with TB; she suffered from the latter from 1911, though it was diagnosed only in 1917. (She died in 1923, aged 34.)

Mr Alpers makes sense of a depressing kind out of the Murrys tempestuous friendship with D. H. Lawrence and Frieda, and recreates well the irritating and adoring presence of Ida Baker, Katherine's "wife", who was dismissed when Katherine was fed up with her and summoned back when her nursing and companionship were needed. Alpers also rehabilitates Gurdjieff, the guru so often seen as virtually Katherine's "murderer", he has first-hand accounts of what went on at the commune in Fontainebleau, and presents Gurdjieff as showing "simple kindness to a young woman near death". With his group she found again "the gregarious unthinking active life of her own extended family" in New Zealand, rejected long ago in favour of a nomad existence.

Katherine was intense and elusive. She adopted a different personality, nickname, and even appearance for her different friends. She told lies. "How should we esteem a pursuit of truth in art by one who used so many deceits in life?", asks Mr Alpers, who writes intimately about her stories—her plotless, narrator-free "glimpses"—while considering that some passages from her journals and letters are even more "worthy to endure". (Her letters to Murry alone comprise twice as many words as her *Collected Stories*.) Perhaps it was her trickiness that enabled her to fit into Bloomsbury. "The espionage element in Bloomsbury is one of its neglected moral aspects", writes Mr Alpers, and he is very funny about how they reported on each other's activities and proclivities, plotting, lying, two-timing each other sexually, reading each other's letters whenever feasible, passing personal letters on to interested third parties. Katherine was part of this. And yet, "everyone knows how important Truth was . . . to Bloomsbury, and to those who lived the good life at Garsington, including Katherine herself, whose one aim as a writer was to get at truth."

The most significant part of this book is on the relationship between K. M. and the Queen of Bloomsbury. Mr Alpers demonstrates how conversations between the two influenced Virginia Woolf's method. More strikingly, he juxtaposes two passages—the opening of Katherine's "At the Bay" and a section from *The Waves* (beginning "The sun had not yet risen"), both describing a seaside dawn. The similarity of matter and manner is startling; much more startling is the superiority of Katherine's. Virginia Woolf wrote in her diary that K.M. was "the only writer I have ever been jealous of". As Mr Alpers comments, "On the showing of this comparison, Virginia's envy of K. M. is understandable."

Paperbacks

Diabolic familiars

Jan Baker

Witchcraft. By Charles Williams.
Aquarian Press £4.25. 85030 214 5.

"Toads and cats, judges and torturers." Thus Charles Williams describes the "diabolic familiars", indicating that the sins of power-lust, malice and cruelty exemplified by the witches appeared equally in their righteous persecutors. *Witchcraft* is a book as much concerned with the ethical problems of the Church as with the perverted religion of the witch.

Williams was a member of the Inklings, the Oxford circle grouped around C. S. Lewis and J. R. R. Tolkien, and his writing was much admired by Eliot and Auden, but today his name is not widely known and much of his work is out of print. As Glen Cavaliero says in his introduction, "the reason for the reprinting of this book is the author, not his subject."

Certainly, to the student of Williams's work, there are echoes of (and some penetrating insights into) his thought; his interest in the subject was governed by his orthodox Catholic belief, and he [illegible] analysed both with a singular combination of intellect and faith. Williams at one time belonged to the Order of the Golden Dawn (as did Yeats), but he provides no esoteric information beyond that given in the records he quotes. If any reader seeks a useful knowledge of the black arts, he says, "he must rely on his own heart, which will, no doubt, be one way or other sufficient." Nevertheless, there is material enough here to make fascinating reading.

His narratives range from Apuleius to the events at Salem, through St Joan and the vivid and moving description of the trial of Gilles de Rais; but the approach is not merely anecdotal. Williams synthesizes these accounts to trace the development of certain ideas: the possibility of a pact with hell, the parody of the sacrament. And thus the book also becomes a history of the Church's attitude to witchcraft.

The problem of the Church was originally one of definition: how far could sorcery be designated as heresy and therefore the legitimate prey of the Inquisition? The sin of the Church lay in its obsessive quest not only for correction but for vengeance—"the hateful energies of hate were enlisted on the side of Christendom." Williams's approval is reserved only for those who brought both intelligence and charity to their appalling task.

His prose style is admittedly something of an acquired taste, ranging from the ponderous to the poetic. But there are flashes of humour, and in his examination of the psychological sources of magic, the clarity of a penetrating intellect at work.

Glen Cavaliero has contributed a perceptive little introduction. If his writing in places becomes weighty with abstractions, that is merely the consequence of his valiant attempt to convey in a few paragraphs an idea of Williams's complex system of theological thought. In only one place is he misleading: he says that the tragedy of the Church's failure "is overthrown by jest—as happens in so many of Charles Williams' books", which seems to imply a facile doctrinal conclusion, not the careful analysis Williams actually provides. Nevertheless the background and summary are valuable; the more so if they direct the casual reader to the neglected corpus of Williams's work [illegible]

An unmisted eye

Sheila McLeod

The Tale Bearers. Essays on English, American and Other Writers. By V. S. Pritchett.
Chatto and Windus £6.50.
7011 2435 0.

The Tale Bearers is a misleading title for this miscellany of book reviews by V. S. Pritchett. It suggests a coherent, somewhat academic treatise on the nature of fiction, and that the writers under review are all storytellers who don't know when to stop or to be discreet. This is not so. Sir Victor has few literary axes to grind and surveys each of his subjects with an eye unmisted by theory. He knows, too, that there is more to writing fiction (or essays or diaries) than the telling of tales, whether in school or out of it. What emerges from almost every page of this book is that its author is essentially a writer of fiction himself.

The division into English and American writers makes sense (which is more than can be said for the other two categories—Characters and Exotics) because Sir Victor has something cogent to say about the national traits of both.

He sees the English obsessions as "social obligation and the virtue of worry", relieved only by the tendency of the English themselves to be "bad at drill, prone to brutal jokes, underhand tricks, romantic sensuality, poker-faced wangling and the smug exploitation of lucky accident". They are willing to pay the price of misanthropy "for the pleasure of making a go of life in clubs—day or night—parsonages, public schools, villas, furnished apartments and other privacies of the national masochism". Although they are "not notable for their sense of evil", "morally, the English are liable to picturesque outbursts of self-deception".

This is middle-to-upper-class England, an exclusive, self-enclosed territory, represented by such writers as Waugh, Forster and Angus Wilson. It is hardly surprising that so many of the other writers discussed in this collection do not or cannot belong to it, but see themselves as exiles. There is Conrad divorcing himself from his native Poland by adopting the English language, while Kipling remains wedded to India and Haggard to Africa. T. E. Lawrence became an exile partially because of a combination of illegitimacy and Anglo-Irishness. And Beerbohm "turned to literature and the arts for his nationality"—a move which Sir Victor sees as typical of "an intelligent and sensitive man without roots".

Perhaps all Americans—Sir Victor suggests all writers—are exiles of a sort. They are at least "free of our self-satisfactions of the nineteenth century", and so free to turn to the briefer art of the short story, which springs from transience and demands "an instant response to the exposed human being". Bellow's characters are exiled by their Jewishness, "moral types who have been forced by the American scene to behave like clowns". And James, whose presence dominates this book as a kind of touchstone, was the archetypal exile.

But Sir Victor is as much interested in personal national characteristics. With living writers he is tactful, but with the dead he is free to speculate on the elusive if telling relationship between the life and the art. The pieces on Conrad, Kipling and Haggard are particularly illuminating on this point. Sir Victor has the knack of tying the two together in a neat, commonsensical knot which manages to avoid the elaborations of amateur psychologising.

Although his method is exploratory, his tone is assured and often aphoristic. He can be crustily wrongheaded (notably about Ruth Jhabvala, whom he seems to misunderstand) but he is never boring. From this he is saved by the virtues he himself ascribes to Pepys—vitality and curiosity.

Think-pieces

Brian Davies

Pupil Strategies. Edited by Peter Wood.
Croom Helm £10.95. 7099 0116 X and £5.95. 7099 0343 X.

Sociologists of the everyday world are a lot more conscious of their weight than they used to be. With a bit of luck, they are now neither overwhelmed by a sense of knowing their place, nor without a sense of having a place to know. Being truly humanistic they are happy to leave the terror of absolutism to structuralists and Marxists for they know that there is more than one thing to know. Therefore they are much given to empirical work. At its weakest, this tends to be no better than social botany with every observer her own Linnaeus. At its best, it richly describes persons in process in structurally located context.

This volume knows what it is all about in these senses. It carries five empirical papers and one which reanalyses a variety of existing data. This latter by Hammersley and Turner expiates the guilty secret of historic interractionism—that it loves the deviant and has tended to forget that most pupils are not. Bird argues that the comprehensive cannot get a decent bit of deviant labelling done, anyway, a fact which will no doubt delight if not surprise the egregious Boyson if ever it gets to his ears.

MacLure and French tell us how infants learn to tune into teacher's questions. Denscombe relates how open classroom contexts are different from closed—they are friendlier, noisier and more teacher-indulgent. Megenn reports on girls' middle school peer groups. Ball tells us that if we would study pupil typification we must start at the beginning which is from where it goes on. All these are true to their genre: modest, self-conscious as to their limitations, determined to be "true" to their data. That they are sometimes "obvious" does not make them less essential.

The two think-pieces reflect properly on the general issues raised by the field-work. Hargreaves argues for a "split-level" sociological conception which allows us to make a proper distinction between *situation* and *structure* (a clip on the 3B ear is more likely to be teacher striking out for silence than a blow for capitalism). Hammersley argues that interactionism must keep an eye on the theoretical books and aim to be decently cumulative. The only real source of dismay is to be found in the editor's introduction. Here he tells us that *strategy* is the new key term which will enable us to connect the chalk face with the social formation (thus cutting conceptual inflation at a stroke). But to find out what it means, we have to spend another tenner to buy the already published companion volume, *Teacher Strategies*. No one would claim that there was a crook at the helm; but how did the structure of book publishing relations leave such a nice guy in such a tight spot?

Among this week's contributors:

Myra Barrs is English adviser for the London Borough of Brent.

Professor Brian Davies is at the Centre for Science Education, Chelsea College, London.

Victoria Glendinning's latest book is *Elizabeth Bowen: Portrait of a Writer*.

Maurice Peston is Professor of Economics at Queen Mary College, London, and was formerly Special Adviser to the Secretary of State for Education.

W. W. Robson is Professor of English Literature at Edinburgh University.

Feeling values

Cecily O'Neill

Drama for Understanding: Towards a Theory of Drama in Education.
By Gavin Bolton.
Longman £5.00. 582 36137 0. £2.50 36138 9.

In spite of the tentative title of his book, Gavin Bolton goes a long way towards establishing a sound theoretical basis for drama in education. Basing his position on a detailed examination of the kinds of learning which can occur in make-believe play, he offers a framework for analysing the different structures and strategies available to the teacher who wishes to use drama as a medium for learning. This learning, which he defines as a "change in understanding", he sees as the essential goal of drama teaching. It is clear that drama has potential for learning in terms of skills and objective knowledge, but the deepest kind of change is at the level of subjective meaning, which must be *felt* for it to be effective. This change in "felt value" represents a growth in personal knowledge.

Bolton begins by classifying three major orientations in the drama experiences which are offered in schools and colleges: Type A, Exercise; Type B, Dramatic Playing; and Type C, Theatre. Next, he lists their principal features. Teachers who are prepared to examine their own practice in terms of Bolton's classification will readily be able to identify both the advantages and limitations of a particular strategy.

His precise definitions and useful practical examples should encourage teachers, whatever their background and training, to work from their own skills and strengths, and yet move towards the possibility of achieving Type D drama—drama for understanding. Here, types A, B and C, are "folded in" to the developing structure of the work to allow "a constant enlarging or shifting of perspective so that participants have to reassess their current understanding".

Throughout, Bolton assumes that the teacher has a responsibility to work towards goals which are beyond and above the children's. The teacher is placed firmly at the centre of the activity, often working in role from within the experience, but even so he cannot lead his pupils towards a change in under- *their* intentions. This requires a standing unless he has respect for delicate balance, which teachers must work for, if drama is to be a worthwhile educational experience.

No teacher can make a child learn, but he can present him with the opportunity for learning. Bolton is realistic enough to recognize that very often it may be impossible to achieve Type D drama. Even a teacher of his skill and experience has had at times to settle for less. It is one of the strengths of the book that, among the many examples of his own work which illuminate his theory, he includes lessons in which he has failed to achieve his goals.

There may be many factors in a particular lesson working against any deepening of understanding. External constraints may operate to prevent it, or the group may lack the prerequisites for drama—the elements which must exist before one can hope to move the group towards a shift in values. But the process of reaching alternative goals will be itself of educational value. Bolton usefully identifies four stages through which a group may go in working towards this change—artificial drama, reinforcement, clarification and modification. Many of us will be forced to admit, if we examine our work by Bolton's standards, that our work too seldom goes beyond the second stage.

His remarks on tension, form, levels of meaning, reflection, symbolisation and assessment are extremely useful, although an index would have made them more readily accessible.

Finally, Bolton succeeds in making clear, particularly for the experienced teacher, what the purpose of his drama lessons should be. It is obvious that this purpose is most likely to be achieved by a synthesis of different types of drama, rather than by an insistence on the use of any one mode to the exclusion of others. Drama may have its roots in dramatic play, but its progress towards art, Bolton's second major objective, is dependent on the "cohesive elevating force of theatre form".

Children's literature

Anomie in dreamland

Myra Barrs

In **Pigwig and the Pirates** by John Dyke (published by Methuen £3.50), a band of evil pirates, led by Captain Orrible Gruesome, inadvertently kidnap Northcliff, a piglet, and the nephew of Pigwig and Matilda. Pigwig sets off after them in a little boat, tracking the pirates easily by the evidence of their crimes. Finally he traces them to a treasure island, and, while they are in a drunken sleep, rescues Northcliff, digs up the treasure, and makes off.

This simply told story is fulfilled up enormously by its comic illustrations, which make the most of the evil, spotty, leering pirates, and lend a lyrical note to the lone voyage of Pigwig.

The same contrast between a rather stilted text and energetic pictures is found in Bill Peet's Eli, (Andre Deutsch £3.50) an Aesopian kind of tale of an old lion who tags on to a flock of scavenging vultures in order to get food. When he saves one vulture (Vera) from a jackal he becomes an instant hero to the fawning vultures, who can't leave him alone. As he shakes them off in a fit of irritation, Vera makes him a promise: "No matter what you say we are still your friends, and in some way we old birds might prove to be useful some day". In the second half of the story the vultures keep their promise. The story is set in a comic strip kind of African country with gunkazunk grass, tumbaba trees, and a gumbazunka swamp. When the Zoobanga hunters leave over the horizon they are comic strip natives too. It is a pity that this kind of crudity is resorted to, and that Bill Pelt's funny quick pictures in nice crayony colours serve such a tired text.

The blotchy, colourful, faux naif pictures in Joanna Stubbs' UFO (Andre Deutsch £4.25) are accompanied by a longish text. It tells the story of Oj the shepherd boy and a mauve monster which hatches out of an egg that falls from the sky one night. The only response that the King, Queen and Council of Oj's country can make to the monster is to try and make war against it but the monster foils all their attempts with non-violent tactics and Oj befriends it until it flies into the sky to join its own kind. The writing in this story is as fanciful as the pictures: "High above the world a small band of space monsters hummed happily as they flew on the thousand year long journey to their own planet where the poppies, taller than earth oak trees, sway in the singing winds which mix with the monsters' humming to fill the air with strange music". Despite the general prettiness of this book, neither text nor pictures seem easy to read—both are too decorated.

In **Miserable Aunt Bertha** John Vernon Lord's exciting and surprising pictures are really the point of the book. This story is a moral tale. Miserable Aunt Bertha is visited by her resourceful nephew, John. Her anomie is total and apparently incurable, though John keeps thinking up possible distractions. Each gambit falls flat until in the end Aunt Bertha realizes that there is nothing she needs—nothing but her nephew's love.

The text in this book is mere doggerel:

A large box of chocolates tied
with a bow can often be trusted
to make a mood go
She starts with the creams
(She's searching for cherry)
But too many chocs never made
a girl merry.

However the illustrations alone make the book worth buying.

Dragon in the Woods by Christina Lastrego and Francesco Testa (Adam and Charles Black £2.95) is the only book in this batch where text and pictures seem to work together in complete harmony. It comes from a cartoon strip in an Italian children's comic, and tells the story of Julia, a nice tough little girl, Chico her dog, and their dream adventures. This most un-Alice like heroine manages to save her old dream-friend the Dragon, a delightfully comfortable creature with middle-age spread, who is trapped and locked up by the wicked Baron Hector and his soldiers. The narrative is a relatively complicated one, involving a dream within a dream, but the pictures are very easy to read, with a consistent, eccentric and humorous style.

Dream adventures are the main sustenance of Jim Bloggs in Gentleman Jim (Hamish Hamilton £3.25) Raymond Briggs' latest cartoon book describes the Walter Mittyish fantasies of a meek little lavatory attendant and his fight against faceless bureaucracy. But faceless bureaucracy is rather a thankless subject for a cartoonist. Jim himself and Hilda, his current bun of a wife, are drawn with minimal features, and the characters in the story tend to become a gallery of stereotypes. Reviewers have murmured politely that this book is one for the adult shelves, but the satire would have to be sharper and more inventive to compete with some of the talented cartoonists for adults now being published. Here, for instance, is Jim's reverie on the subject of "Ex-ectives":

"You see them in these adverts—they're usually youngish chaps with long hair and big knots in their ties, and they have three-piece suits with big pointed lapels—ex-ective suits they're called . . . and they have fountain pens in rolled gold with big gold nibs . . . and watches with no hands and numbers that light up all red . . . ex-ective watches they're called—triffic they are . . . you see them getting out of big cars and going into posh hotels . . . and there's always a chap like me holding the door open for them—the chap holding the door is always older with less hair and he wears a long overcoat with brass buttons on it . . . there's always a triffic lot of brass with these ex-ectives . . . brass locks on their cases, big brass clocks and door knockers and furniture with the knobs and corners made of brass . . ."

Like other passages in the book this shows too heavy a reliance on a weakish text. Pictures tend to be subordinated to words, despite some glowing set pieces. There is a sad lack of zest in this book, though perhaps zest should not be looked for in a story which begins in a public lavatory and ends in a prison.

Selim's wonderful staff beats off the lion menacing him from the opposite corner of the page. Heath Robinson's fantastical drawings for "The Magic Harp" come from The W. Heath Robinson Story Book (Beaver Books £1.50).

Dressing up

Costumes and Settings For Historical Plays Vol 5 The 19th Century.
By Jack Cassin Scott.
Batsford £4.95

Jack Cassin Scott's drawings are adequate in themselves, but for a book "intended for all those who are involved with drama", their arrangement is confusing and bizarre. Suppose I am dressing a play circa 1840 and need to know the masculine and feminine dress for indoor and outdoor wear of a middleclass family. I turn trustingly to the section "Early Victorian 1837-57" and I am shown a Regimental Sergeant Major 1897 and two foreign uniforms. Next come two lace caps c. 1871. Outdoor dress of the correct period follows, then Mr Cassin Scott's impish waywardness shows me a lady's hat c. 1887 and a male hairstyle c. 1864. He continues with four more pages out of period, whilst the final illustration is of a group of American negro slaves in bare feet and rags.

This small book attempts too much; not only does it purport to inform on costume from 1810-1900, but it also includes sections on stage properties, stage sets, lighting, and choice of plays.

Sounds better and better

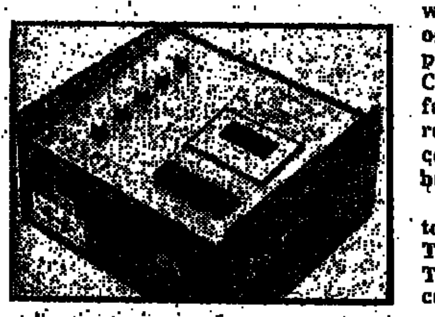
JOHN FREEMAN on audio-cassette recorders

Because of the lack of equipment suitable for classroom use education has been slower than the domestic market to change over to the compact cassette. Small cassette recorders produced in the 1960s were used in school for portable recording work but sound output was unsatisfactory for wider uses; spool loading recorders, on the other hand, produced the higher sound output needed.

In the early 1970s the shortage of mono-spool loading tape recorders meant that education had to use cassette equipment. (The Tandberg 1500 is the only mono spool loading tape recorder left and still offers top quality recordings for mono work.) However, there was still no cassette recorder with a high sound power output. Small cassette recorders were used for a time connected to portable amplifiers to boost their sound power output. British manufacturers of audio-visual equipment were not in a position to produce suitable equipment, as there was no reliable supply of cassette deck mechanisms.

The problem was finally overcome with help from the domestic section of the market: the Thorn electronics group started production of music centres (radio with record player and cassette recorder) and for these they need to produce the deck mechanism in this country. The deck was made available to smaller manufacturers and is now found in all types of specialist audio-visual equipment.

Domestic cassette recorders are still used in schools but rising costs forced manufacturers to drop some features and change production techniques to keep down the price. This has resulted in machines which are not always completely suitable for educational work. A useful guide when choosing cassette recorders, particularly domestic types, is the council for Educational Technology's User Specification, USPEC 4, covering mono cassette recorders and players. In USPEC 4 details of features described on machines for use in education and minimum performance figures are given.



Special designs

A large range of specially designed cassette recorders for school use are now offered. Two British companies using the Thorn cassette desk mechanism are Coomber of Worcester and Goodsell of Brighton. Coomber offer two styles of cassette recorder. The first is a large upright type fitted with a 250mm diameter loudspeaker, which has a choice of five or 15 watt sound power outputs (models 341 and 343). The second is a small case version with the cassette deck on a sloping panel angled towards the user. The loudspeaker, 200×125mm in size, is forward facing for classroom operation. These are offered in five watt (Model 307) or 15 watt (Model 309) versions. The Coomber recorders have been designed to give a good overall performance and to be simple to use. Recording level control is fully automatic and all units have strong wooden cases.

A new addition to the Coomber range is a small cassette player, the model 282. This unit can be used with a forward facing loudspeaker or connected to eight sets of head phones for group listening. Other Coomber cassette equipment manufactured for school use includes radio casette recorders, music centres and a cassette recorder with built-in tape/visual synchroniser.

The Goodsell company were first to design equipment taking the Thorn cassette deck mechanism. The range of Goodsell CTR series cassette recorders all have the main controls and the deck mechanism mounted on a top panel which slopes towards the user. The loudspeaker is forward facing, which makes it very suitable for classroom use. Standard CTR units are readily portable and are fitted with 200 x 125mm loudspeakers. An alternative case is higher and is fitted with a 250mm diameter loudspeaker.

All the Goodsell cassette recorders have manual recording level control and some provide full input mixing. Inputs and output connections are duplicated on both DIN and jack sockets allowing easy link-up with other sound equipment. The recorders are offered in three levels of sound power output: 5 watts, 12 watts and 20 watts. Also included in the range of Goodsell cassette equipment are radio recorders, cassette recorders with built-in tape visual synchronisers, language tutor and two cassette players.

There are also imported cassette recorders designed for classroom use. Two makes which produce a high sound power output and can make high quality recordings are the 3M Wollensak range of cassette recorders from the United States and the Tandberg TCR222 from Norway. The TCR222 is of particular interest as it has a hard wearing three motor cassette deck mechanism which is solenoid operated lending itself well suited to clock/timer recording of schools radio broadcasts.

The final type of cassette recorder design which has appeared in recent years is based on the domestic recorder and produced in factories making domestic cassette recorders. However, these machines have all the necessary features and matching performance for a wide range of educational uses. These units are normally small to medium size portable recorders with sound outputs of not more than two or three watts.

Small recorders

The two top models in the new range of small cassette recorders from Bell & Howell A-V Limited are the models 3196 and 3185. The 3196 is a mains/battery recorder player with features that include a mains connected warning indicator, manual plus automatic recording level control, automatic switching for chrome dioxide and normal tape cassettes, built-in microphone and cue, review and pause on the cassette deck. Output power is three watts and sockets are fitted for six sets of headphones. The Bell & Howell 3185 is a less sophisticated version of the 3196. There are two smaller machines in the Bell & Howell range, both mains/battery. They are the 3170 player and the 3179, a simple recorder player offering the basic requirements for cassette recording.

Both machines are provided with twin headphone sockets, mains connected indicators and cue, review and pause on the cassette deck. The sound power output from these machines is a little over ½ watt.

Rank Aldis have introduced two new small cassette machines which are readily portable and simple to use, they are the Classette 240 player and the Classette 244 recorder player. The machines are mains or battery operated and have sound outputs of ¾ watt. The internal loudspeaker is slightly angled towards the user and the cassette deck has cue and review function for programme searching and recap. Each machine has connections to take up to five sets of headphones. A simple tone switch is provided. The model 244 which may record as well as playback has a built-in microphone and automatic level control.

There are two other models in the Classette range, the 148B with a 1 watt output and the 152S with 2 watts output and forward facing loudspeaker. The Classette 152S also has a built-in tape visual synchronizer designed to operate with most slide and filmstrip systems.

It can be seen that from the brief details given here that there should be equipment now available to suit all educational needs from small portables to classroom recorders and high quality machines for those special recordings.

Gradgrind approaches

by Nick Thomas

How Britain Earns Its Living
Complete pack £12 plus VAT. Pupil's book £1.45. Teacher's guide £1.45.
Hodder and Stoughton, PO Box 702, Mill Road, Dunton Green, Sevenoaks, Kent TN13 2YD.

How Britain Earns Its Living is a pack intended to introduce 9 to 14-year-olds to the basic facts of industrial and commercial life, and above all, to this country's position in the international market. It is sponsored by the National Economic Development Office and consists of a pupil's book, a teacher's guide, 22 slides of manufacturing processes, a fifty-minute cassette of dramatized episodes and materials for playing the "UK Company" class game.

"In many ways the UK can be considered as a very large firm." In even more ways, of course, this model is drastically inappropriate. Its selection is geared to certain interests and attitudes which are quite openly acknowledged. "It is . . . important that pupils leaving school and going to work . . . should have a realistic appraisal on which to form their attitudes." "Realistic" here means a commitment to such notions as that "we" have to "beat" other countries; that "we . . . need a workforce which is mobile with respect both to type of job and geographical location"; or that "instead of thinking of 'profit'", it is often more useful to think of 'added value'".

"More useful to whom?" is the question that one hopes alert pupils will ask—and not only in response to the last point. It takes no very sophisticated grasp of economics to see that this kit is committed to persuading the workforce of the future that stateinterventionist capitalism is the natural and inevitable way of going about things.

We have here, in fact, a very clear example of the utilitarian (or Gradgrind) approach to education: not only should pupils learn skills which will be useful to employers, but they should also learn useful attitudes and beliefs. No awkward questions should be raised about matters like pollution, unemployment, overproduction, or overconsumption.

The more valuable aspect of this pact is its examination of a manufacturing company. Unfortunately, this is all wrapped around with notions like "added value". Two imaginary examples are used, a greeting card firm and a furniture factory. The tape offers a discussion between the two owners of the card firm about their options for combatting falling sales—means of reducing costs, means of increasing sales; and a debate between management and unions in the furniture firm about the proposed introduction of new machinery, and consequent redundancies. The conflict here is blandly fudged: "Some workers will have had to change their jobs, either within the firm or by . . . moving on to other firms to find jobs".

The remaining element of the kit is the "UK Company Game". "You are the directors of UK Company. As such, you have to make decisions about how the country's wealth, in terms of money and manpower, shall be invested each year to bring the biggest profits. You have control over five major manufacturing industries . . . " The game seems to fall right between two stools, being both exceedingly complicated and totally unrealistic; which is something one might well say about this pack as a whole.

First aid sketches

A brightly illustrated poster on first aid is now available from Safety Equipment Centres throughout the United Kingdom. Designed for use in homes and schools the poster uses Dr Owl and other creatures to get its message across.

Each sketch of an accident is accompanied by a caption which spells out the first aid steps to be taken before an expert arrives. The accidents include electric shock, poisoning, fractures, choking, etc.

The poster is approved by the St John Ambulance Association. It costs £1.50 by mail order with discounts for bulk orders.

Safety Equipment Centres Ltd, 33 Elm Road, New Malden, Surrey. Telephone 01-942 9557.

Screenprinting materials

E. J. Arnold's booklet "Introducing Screenprinting" explains the basic techniques, gives notes on photographic stencil making without a darkroom, and lists the basic equipment for beginners, all of which is available from the firm of E. J. Arnold.

A beginners' kit could be put together for less than £30 and the booklet costs 50p. The firm suggest that screenprinting at its simplest is suitable for primary schools.
E. J. Arnold & Son Ltd, Butterley Street, Leeds LS10 1AX.

Closet of curiosities

Two new displays were inaugurated at the ILEA's Geffrye Museum in East London last week: a "closet of curiosities" that belonged to the seventeenth century diarist John Evelyn, and four nineteenth century costumes.

Evelyn's ebony cabinet was made in Paris in 1652 and contains a selection of items loaned by the Victoria and Albert Museum to recreate the original contents as listed by John Evelyn. Closets of this kind contained works of art and specimens of natural history.
The Geffrye Museum is at Kingsland Road, London E2 8EA, telephone 739 8368.

Mechanics of French

by Brian Hill

French from France, 5.
By Pamela Symonds
A Chacun 90p. Workbook 55p. Teachers guide. £2.35 Filmstrips (5). £19 plus VAT. Spiritmaster. £11.
3 tapes, £17 plus VAT.
Longman Ltd., Harlow, Essex.

The latest part of the *French from France* series is now available. With its four predecessors (*TES*, January 6, 1978) it makes up a course intended for middle and secondary school beginners who are not academically inclined. It is also very suitable for "faux débutants". The five parts of the course do not correspond to school years, nor are they geared to examination syllabuses. There is enough material for two to three years of work.

Given the target pupils, motivation is clearly one of the key factors. *French from France* attempts to stimulate it, partly through content—relevant, topical material to which pupils can relate—and partly by the variety of the components.

The theme of part 5 is work in France, and the units reflect the lives of several workers, from firemen and policemen to hairdressers and typists. At the heart of the course is a 64-page pupil's book, containing a mixture of dialogues, narratives and exercises, illustrated with black and white photos.

If the pupils are interested in the theme of a particular unit the texts should work well, but if not, the level of vocabulary could alienate them further. Unit 6, for instance, "Un jeune mécanicien", contains phrases such as: *la benne basculante* and *les boulons du moteur*, though in fairness, they are introduced in context.

The introduction of new material in each unit is backed up by a tape, a filmstrip and photos. The tape contains commentaries to both the filmstrip and the presentation texts from the pupil's book, together with a number of oral and aural exercises. They are spoken in clear French at reasonable speed.

For the practice and reinforcement element, the course concentrates on the receptive skills with "vrai ou faux" exercises and multiple choice answers as standard. Some opportunities are also given for guided active oral work based on vocabulary from the presentation texts. All this is helped along by a workbook with lots of ingenious games and cunning devices to get pupils to manipulate the language.

French from France 5 is cemented together by an indispensable teacher's guide. This gives lists of topics, teaching points, solutions etc., and also provides detailed notes on each unit. The author has hidden away various grammar points within the texts and their whereabouts is revealed in these notes.

The strengths of this course lie in its variety, in the current everyday French it introduces, and in its subtle devices for reinforcement. Perhaps the main problem for a hard-pressed teacher is the complexity of the referencing.

A further slight worry is that revision, such a vital feature of work with low achievers, is rarely explicitly mentioned. Of the nine units only four are listed as revising elements of the course.

However, these are points for which a teacher familiar with the course can compensate. Overall, *French from France* is an interesting attempt to provide up to date and relevant material for the most difficult target audience, and is well worth consideration when looking at new course purchases.

Mariners ho!

by Martin Goldsmith

Operation Drake
A project of Capital Radio, Euston Tower, London NW1 3DR. Phone 01-388 1288

Operation Drake is a splendid media package; and also a promising stimulus for a wide range of possible learning projects. Basically, it is a two-year voyage round the world—roughly following Sir Francis Drake's route 400 years ago—in a sailing ship crewed by teams of young people. En route, these young explorers are taking part in a variety of carefully planned projects, surveys and explorations—an improvement on their predecessor's more sanguine activities.

More than 300 schools in the London area are following the expedition, which has another seven months to go. Capital Radio is providing a very thorough back-up—a weekly newsletter, free wall chart, visits from returned team-members, and two broadcast bulletins each week which unfortunately fall outside school hours: just after 6.00 pm on Wednesdays, and 4.30 pm on Sunday afternoons. Capital has also been collaborating with the ILEA.

Capital received many thousands of applications for the places it sponsored on *Operation Drake*, which indicates clearly enough the pool of enthusiasm for the project. It is not difficult to see how this interest can be turned to educational account: apart from geography, obviously, and history (the expedition is retracing the journeys of Drake and other early mariners), the scientific work has been organized so as to maximize its educational usefulness in fields like biology, ecology and pollution study, surveying techniques, medicine, anthropology and so on.

Although the voyage is on its return leg, it still seems worthwhile considering by schools not already involved. Some teachers may find its onward-and-upward atmosphere a bit dated, and tinged with ethnocentric notions of bringing civilization to the natives, but there is no denying the enthusiasm which the project is capable of generating.

Among the latest publications from the Council for Educational Technology is *USPEC 32—A Guide to the Selection of Microcomputers*. The guide does not recommend specific hardware, but aims to give the would-be buyer a guide to the facilities and performance to be looked for when purchasing equipment.
Council for Educational Technology for the United Kingdom, 3 Devonshire Street, London W1N 2BA.

The Toy Libraries Association together with Fisher-Price Toys are organising a series of seminars on *The Value of Play*. The seminars which are repeats of the national seminar held last year on the same subject will be held in six places throughout the United Kingdom. This month they will be in Belfast, Manchester and Stirling and in October they will take place in Bristol, Birmingham and London. Attendance will be free.
Further details can be obtained from Fisher-Price Toys Ltd, Scottish Life House, 29 St Katherine's Street, Northampton NN1 2QC.

Instruments of authentic and disarming subtlety

ROBIN MACONIE reviews a range of records for the classroom

Lute Songs of Thomas Campion
Introduced and performed by Robin Headlam Wells
Sussex Tapes H19, £6.50 cassette, £7.50 reel

The Grosvenor Museum, 27 Grosvenor Street, Chester

Susan Baker's Fiddles and Follies
Featuring Susan Baker: Argo ZK 86

Cults Percussion Ensemble
Music composed, arranged and conducted by Ron Forbes
Purchased from Alexander Leiper, Adviser in Music, Grampian Regional Council, Woodhill House, Ashgrove Road West, Aberdeen AB9 2LU, £3.50.

Robin Headlam Wells is a rarity: a lecturer in English literature (at Hull University) who is also an accomplished musician. His modestly styled introduction to and performance of a selection of Thomas Campion's lute songs is thus a significant reminder of the importance of music to a great tradition of English poetry which culminated in the Elizabethan lyric. That so many fine poets were also fine composers should encourage a greater study of the music by students of literature, and of the literature by music students.

In spite of the recent enormous growth of interest in early music it is still unusual to encounter a lutenist who also sings, so firmly entrenched still is the idea of specialism. Mr Wells has none of the anachronistic mannerisms of the professionally-trained singer. He matches his voice to the lute, and the result is a compound instrument of authentic and disarming subtlety. His performances have a quiet discretion and intimacy, a sense of scale and sharpness of timing which recording is able to bring, but which is hardly possible in a concert setting. Ideal for domestic listening, for the music, poetry or general studies classroom, or for individual listening from O level to undergraduate.

The Grosvenor Museum, Chester, is enviable possessor of a fine consort of four recorders made in the early 18th century by Peter Bressan. Now with commendable enterprise it has commissioned a recording of music of the period to enable the sound of these instruments to be more widely appreciated. The idea is excellent, the choice of composers—Dieupart, Hotteterre, Faber, Corelli and the anonymous Faronel's Ground—stimulating, and the disc itself is of a thickness and solidity seldom encountered nowadays.

So far so good, but unfortunately there are drawbacks as well, of a kind the inexperienced promoter is prey to. All the recorder players, who are addressed rather coyly in the sleeve notes by first names only, betray an unfamiliarity with the niceties of technique and interpretation that is positively alarming. Intonation dips and slides, notes sustained tend to swell and taper like cucumbers, and the exaggerated body movement that usually goes with such mannerisms is a possible reason for some strange double-image effects in stereo. What might have been a significant document of a fine set of instruments, through the use of inexpert players and only routine production turn out to be a mere souvenir.

Susan Baker's cheerful demonstration of her collection of old and odd violins and related instruments is modelled on the recital programme of the same name by which she has become known as a concert artist. There is much in the variety of music as in the instruments themselves to attract interest at all ages; teachers at primary level will find a lot for children to enjoy listening to and to learn about, while older specialists will appreciate the opportunity to hear and compare the sounds of so many rare and historically interesting variants on the standard violin.

The collection includes examples of early fiddles, miniature kit and pocket violins, mandolins, and hurdy-gurdy, also the curious walking-stick violin—a gimmick rather than a purposeful variant—and more modern curiosities such as the tin-horn Stroh violin, and the phono-fiddle of music hall comedy. There is also a violin made by George Robey, the twelfth to be built by this famous comedian and enthusiastic amateur maker. Particularly enticing are the different sounds of the dancing-masters' pocket size violins, which range from a full-length, but narrow-bodied eighteenth-century kit by Scott to the tiny bumble-bee-voiced Cuthbert pochette, only 12½ inches long, dating from the latter half of the seventeenth century.

One does not look for punctilious authenticity in a recording of this type, and the technical production has succeeded in capturing the essential quality of each instrument. Occasionally, however, Miss Baker's modern performance style has a tendency to overwhelm music and instrument, and I have some misgivings that the older and more delicate instruments appear to be tuned to modern pitch, a practice which could be putting them under dangerous stress.

Followers of The National Festival of Music for Youth will need no introduction to the Cults Percussion Ensemble, Aberdeen's triumphant answer to Carl Orff. This pleasant Grampian-sponsored recording is a deserved tribute to them and their conductor Ron Forbes, which can be recommended not only as a demonstration of what professional-style percussion playing sounds like, and the vast range of instruments and combinations available to the percussion player and composer, but also on the strength of Ron Forbes' music, a series of short pieces and arrangements eminently suitable for movement class, rhythm practice, games, or background music for a school play.

Body language

by Michael Evans

Zig-Zag Packs Number One: My Body
Authors: Lynne and Roger Manton
Ward Lock Education, 116 Baker Street, London, W1M 2BB.

My Body comprises six sets of cards which, when folded, make up concertinas of six pictures of A5 size; hence the title "zig-zag".

Each of these concertinas, or study folders as they should more properly be called, follows one theme. After an introductory folder illustrating various bodily parts and activities, there are folders dealing with the eyes, the mouth, the hands and the feet. There is also a folder that deals with looking after the body.

A glance at the very detailed and comprehensive notes will reveal that these study folders are intended for use by young infants and they are designed to provide a bridge between play and study that is chosen by the pupil, and work asignments that are directed by the teacher.

The cards are well drawn, colourful and attractive to look at. The titles and captions are clearly printed. Although the cards are laminated on both sides, at least one teacher who handled the material questioned whether they were substantial enough to stand up to the general wear and tear of the average infant classroom.

The apparent aim is for the children to work on their own at their own pace and to be positively discouraged from reporting back to the teacher at the end of each completed section. This is a somewhat optimistic hope with very young children who need constant reassurance.

Some of the vocabulary is rather too difficult for the youngest children. By the time the children can read the words with sufficient ease and fluency, they might find the pictorial matter rather beneath their dignity.

In spite of this criticism, however, this material has much to offer almost any teacher of very young children. The accompanying notes with the comprehensive suggestions for possible use, together with a very full book list, make this package particularly suitable for the inexperienced teacher.

Overturning stereotypes

ROBERT UNWIN reviews 'The Vikings'

BBC 2
Vikings
Fridays, 8.30 p.m.
Vikings (book), by Magnus Magnusson, published by BBC Publications and Bodley Head, £10.

Traditional images of the Vikings are not easily erased. Blond-haired warrior bands boarding longships in deep Scandinavian fiords; daring voyages amid mist shrouded, uncharted northern seas; pagan marauders of Christian civilization, plundering and raping: such are the mental pictures of successive generations, reinforced more recently by the cinema. Scholars of the past two decades have done much to modify this view, and it was to be expected that a new television series would attempt a more balanced representation.

As author and presenter of *Vikings!* Magnus Magnusson is is ideally qualified. Born in Iceland, the quintessential Viking colony, educated in Great Britain, translator of sagas and experienced popularizer of archaeology, Magnusson acknowledged his apologist stance without attempting to whitewash the worst atrocities of the ninth-century Danes.

The vitality of the Viking legacy was demonstrated at modern folk festivals in Scandinavia and the islands around Britain; at Hedeby where young Danes attempt to recapture the ferocious appetites of their ancestors; and in the action replays of heroic voyages which provide opportunities for experimental archaeology. Key processes of Viking technology were skilfully handled in the detailed study of the longship, and in the replication of Viking weaponry and jewelry by appreciative modern craftsmen. The range of evidence—folklore, mythology, runeology, sagas, eddas, and the finds from a score of archaeological sites—could not fail to impress. But the series achieved little of what it promised.

Technically, there were two recurring irritants in each programme. The music was used in competition with the narratives, and intruding between battle reconstruction or artifact display, it became a distraction. Many of the animated graphics were just as inappropriate, and, whereas the presenter held the attention as a storyteller, the combination of discordant music, graphic imaginings and simulated combat scenes went overboard.

The most serious shortcomings were in the approach. The programmes meandered through time and place and repeatedly lost their way. In any series on the Vikings, the decisive partition of ninth century England cries out for a detailed treatment of the Danelaw, but here we took the long road to Saxon Winchester.

Instead of stimulating curiosity and carrying out structured investigations, the evidence was seen as an end in itself. Many issues of the Viking age are not settled and there is still room for historical debate. To introduce a Russian historian to comment on the Viking contribution to the formation of the Russian state was a weak, one-sided attempt at a technique which, fully developed by several scholars exchanging views, might have brought out an important controversy of the Viking age.

The few questions which were asked related almost invariably to the technicalities of Viking life, but although the construction and sailing of the Viking longship was clarified, no attempt was made to explain, or even to speculate on, how the targets of trade or plunder were located.

The multi-causal factors which prompted the break out from Scandinavia were cursorily presented in a number of separate programmes, and despite the farming dimension shown on the Gotland picture stones, the internal pressures in northern Europe were scarcely touched on.

Recent scholarship on Ragnarr Lodbrok and his family provides speculation about the organization of warrior bands that could hold together settlements as widely separated as York and Dublin. Apart from the snakepit story—still a matter of debate—Ragnarr was scarcely mentioned and even less was said about his son Ivarr, who was, perhaps, the greatest war leader the British Isles saw before the coming of the Normans.

As an apologist, it was to be expected that Magnusson would emphasize the artifacts of commerce and everyday life, but more should surely have been done to compare the Viking achievement with other contemporary societies. Why did the Moorish visitor to Hedeby find the Danish trading community so primitive? How did it compare with the culture of Cordoba? Similarly, how did life in Gotland or Ladoga compare with Byzantium?

Vikings! covered much ground—and even more water—and it is unfortunate that the modern investigative techniques of history were not sufficiently used, particularly in a medium which can handle such approaches so readily.

Tearaway pensioners

Sean Grace on a series for the retired

CONTINUING EDUCATION
The 60, 70, 80 Show.
BBC 1, Sundays, 11.50 am

Few things can be more off-putting than the prospect of spending what used to be called the declining years in the exclusive company of a gaggle of other old jossers and their wives. But one of these must surely be the prospect of spending a goodly part of them in a holiday camp, splashing about with the rest of the sere and wrinkled before tottering back to HQ for sessions of Bingo and Olde Tyme dancing with the bald and bewigged.

Another must be the prospect of sinking slowly under in an ooze of unctious patronage to the accompaniment of a Palm Court rendering of Songs of Yesteryear. This must be the fate worse than death our mothers used to talk about.

In the event, these uncharitable speculations, prompted by the first couple of programmes, were seen to have done less than justice to *The 60, 70, 80 Show* and the roughest of justice to Roy Hudd, who presides over it, and Irene Thomas, who assists. Though Roy, who has been around for some time now, might well have spared his viewers some of the verbal patting which could have crinckled the skin on even the toughest old skull.

He seemed to be amazed that only 2 per cent of those approaching OAP status are receiving "pre-retirement education," although l.e.a.s are running courses for them up and down the country. God love him. It did not seem to occur to him, or to the l.e.a.s, that grandad at work might be like grandson in the classroom. He cannot wait to be let out.

But as the series goes on things are moving from good to better. Much valuable information is coming through—with names and addresses—on homes and holidays, hobbies and handicrafts, and even on spare-time jobs. Experts are putting us right on things we should have known 50 years ago.

If only we could be spared the sight of so many withered images of ourselves in our near dotage, things would be looking right up. Oh for the entry to these gentle sessions of just one tearaway grandson or daughter, to smash just one delicate china teacup—if only to assure us that we are all still in the land of the living.

Briefings

Radio and tv

General interest and OU

Eastern Europe: Access to Education (Saturday, 07.00, Thursday, 06.00 VHF3)

In Eastern Europe education has been used to change social structures; how effective has this been?

Teacher Supply (Saturday, 11.20. VFH4)

Discussion on the difficulty of forecasting the numbers of teachers needed in schools.

Astronomy before Copernicus (Thursday, 07.05. BBC1)

The universe as seen by a variety of ancient astronomers from Plato and Aristotle to the Ptolemaic and Hellenistic philosophers.

Education Matters (Sunday, 10.35. BBC1)

Adam Hopkins, formerly of *The Sunday Times*, in conversation with Richard Hoggart on the role of continuing education.

The Story of English Furniture (Sunday, 13.25. BBC1)

Ten programmes presented by Arthur Negus and Hugh Scully on the history of furniture.

A Touch of the Vapours (Sunday, 20.45. VHF4)

Was Napoleon murdered by his wallpaper? Were Colorado gold miners really stinking rich? David Jones of the *New Scientist* investigates the potential of olfactory medicine.

Time Out of Mind (Sunday, late night BBC1)

Can science fiction be considered as serious literature? Five television films discuss the genre.

Swim (Tuesday and Wednesday, 18.55. BBC2)

New series for swimmers and non-swimmers of all ages continues with breast-stroke.

Ranchers of the Sierra (Tuesday, 21.00. ITV)

One of three documentaries featuring people living on the frontier of change in South America.

The Land that Came in from the Cold (Wednesday, 10.45. ITV)

In less than 200 years the glaciers of Alaska have retreated 70 miles. This programme shows how life has returned to Glacier Bay, now designated as a national monument.

Verdant heritage

Basil Browne reviews "The English Garden"

The English Garden, as defined in the Thames Television series that finished on Tuesday, is a noble work of art which may very soon be lost if we do not take rapid steps to preserve it. This garden was on the grand scale: hollyhock, lupin and especially rhododendron got scarcely a mention for the series was concerned almost exclusively with garden architecture, the designers' intervention in the landscape.

The parks and gardens of historic houses took up most of the series, although we did begin by looking at chalk gentlemen hacked out of hillsides and at knot gardens and turf seats within castle walls. But until fortifications disappeared, scale was limited.

Then came the grand cultivation. Trees, hills, lakes and avenues were placed to create views. Plants were imported. Temples and grottoes were built for melancholy loitering, with authentic ruins for the really tragically disposed. Flowers, herbs and vegetables were mostly kept out of sight until used indoors.

It was all most informative, and pretty as a picture book. We were whisked from garden to garden at the breathtaking speed of about 10 gardens to a programme.

All the same, even beautiful gardens make static pictures, and despite a lot of posh helicopter shots the whole thing looked much more like a slide show than fascinating television. This impression was complemented by a commentary which at times reached new levels of tautological bathos.

When Charles II was restored to the throne we heard that the people "were glad to look back on everything that had happened before and look forward to the future with hopeful expectation". The commentary was spoken mellifluously and without enthusiasm by Sir John Gielgud.

Still, the English are nothing if not a race of snobs and gardeners, and all the peeking behind stately walls must have had its appeal, even if we didn't find out what the plants were called. Some of the gardens were magnificent. The visions of garden designers like the playwright Vanburgh, or Mr Kent, or Capability Brown, were staggering in scale.

In part six, director Richard Mervyn made the point he had been working towards through the latter part of the series. The English garden has been dreadfully neglected, and while historic houses are preserved in their original state with minute attention paid to furnishings and works of art, gardens are replanted with anachronistic species, avenues of majestic trees are lost from view by under-planting with shrubs, and modern garden designers think only in terms of concrete and flower tubs.

Suburban gardeners, meanwhile, are busy concreting their front gardens to accommodate boats and their back gardens for barbecues and swimming pools. (They can't have visited my part of East London where we grow flowers and vegetables.)

Enthusiasts who stayed with the series to its end will want to know that there is lavishly illustrated book, also called *The English Garden*, published by Michael Joseph at £9.50.

Prerogative of the doctor?

FRANCES FARRER previews "Medical Ethics"

Imagine you are a doctor and are asked (a) to prescribe the Pill for a 13-year-old (b) to give information about a patient to the police or (c) to provide the means for euthanasia. According to the doctors in *Medical Ethics* (May 27, 28, 29, 10.30 pm, Granada) you would score high points for saying yes to (a) and (c) and low points for saying yes to (b).

The series was produced by Brian *World in Action* Lapping and uses a mock courtroom format, questions being put by three "moderators" to members of the medical profession. They are talking about real, though fictionalized, cases on which they all have strongly entrenched positions. It makes fascinating and sometimes even gripping television.

A Matter of Life and Death (Thursday) is by far the liveliest of the three, mainly because of the dramatic capabilities of its moderator, Charles Nesson.

Any discussion of euthanasia has to deal with the question of quality of life: at what stage is the life not worth living, and is it possible for interested outsiders to make a humane assessment? The doctors were obliged to be very cagey on this topic, but the majority indicated that they would assist, if only by turning a blind eye to the empty pill bottle.

But when it came to the criteria on which the geriatric are judged to be past it, we were on very rocky ground.

Apparently if you don't respond to *Opportunity Knocks* you could be earning the red dot on the chart which means Not To Be Resuscitated, so no more antibiotics or thumps in the chest for you. The programme avoided the issue of economics presumably because no one can admit that it is a consideration.

In *Patients' Secrets* (Tuesday) we discover that if you swear your doctor to secrecy he or she is unlikely to give you away. "The medical profession must not put people off coming to them no matter what they may have done", said Dr Graeme Snodgrass, incidentally one of the wittiest contributors of the series. But this may mean doctors are not behaving as good citizens.

The patient may be a heroin dealer who has accidentally swallowed a plastic capsule full, or someone who has been in a shoot-out, or a 13-year-old involved in an incestuous affair.

The BMA handbook contains two exhortations which can be at odds. Doctors have a duty to the sick, and to society. Alan Goodson, chief constable of Leicestershire, felt the priority in some cases should be reversed, but this was vigorously opposed by the doctors.

A good deal of the impact depends on the moderator. Paul Sieghart's manner in *Patients' Secrets* is provoking and occasionally rather supercilious. Charles Nesson is actorish and interrupts a lot. Both approaches make for lively exchanges. The more obviously considered style of Arthur R. Miller, while just as valid, is less dramatic.

Mr Miller presides over *Doctor's Orders*, the one with the Roman Catholic cancer patient who should not become pregnant, the depressed mother about to be given ECT, and the young husband who wants a vasectomy.

This programme is very revealing of attitudes and we find that the status quo in domestic relationships is very dear to doctors. Wives need not necessarily be told about vasectomies, unmarried couples are unreliable, mention of a mistress in Paris gets a lot of laughs.

The largest flaws in a strong series seem to me to be these: no patients are invited on to the programme; sometimes too many cases are not fully discussed, and once or twice the moderators intervene in conversations which if left alone might have developed very interestingly. But a strong overall impression remains.

Jonathan Glover of New College, Oxford, says on the euthanasia issue: "I wonder really whether these strategies aren't something to make doctors feel comfortable rather than something that's really moral. That's my scepticism."

Chinese tots

by Carolyn O'Grady

THAMES
Afternoon Plus—China's Under Sevens
Tuesday, May 13, 2.00 pm.

Many of the recent crop of documentaries on China have adopted a microcosmic approach—The Peking Ballet—or looked at a small, sensational but uncharacteristic aspect of Chinese life—the recent TV Eye production on transplant surgery. While fascinating, these programmes often don't satisfy our craving for facts about day-to-day life in China. A 20-minute programme in the *Afternoon Plus* series this week adopted a straightforward documentary approach to one large aspect of Chinese society—its treatment of under-seven-year-olds.

China's feelings for and treatment of its under-sevens, the programme demonstrated, is the antithesis of the West's. From the age of two months Chinese babies become the responsibility of the state. The vast majority of mothers go out to work leaving their babies in state creches. (Here very little is done for them in the way of stimulation until they are one year old (shots of vast rows of unadorned cots containing largely unattended babies must have horrified Western viewers).

In kindergarten, however, the children develop a warm relationship with their teachers which tends to be more important to them than that with their parents. Lessons are very formal, discipline strict and every opportunity is taken for political indoctrination. To Western ears it sounds grim, but the children looked normal and happy enough, and the teachers were obviously kindly and dedicated.

There are several anomalies. A kindly teacher explains that talented children are encouraged to develop their gifts and, in fact, China is setting up special schools for talented children.

China's Under-Sevens, like all programmes on this enigmatic people, raised more questions than it answered, but it still covered the sort of ground which most people expect revealed on television following China's open door policy. Producers of programmes about this country have tended to forget that where China is concerned the mundane details of life are extraordinary to Western ears and eyes, an attitude evidenced by the timing and length of this programme.

talkback

The other curriculum

G. K. Gulliver

Examinations are the best motivator for the child who can succeed at examinations. Conversely, nothing demotivates children more quickly than examinations for which the child feels no optimism. Faced with this paradox, the teaching profession has experimented with examinations for some time, always bearing in mind that good results will motivate parents and employers as well as pupils.

The turmoil over examinations during the past five years, the growth of Mode III titles at CSE, the exploration of alternative assessment procedures such as the Swindon Record of Personal Achievement Scheme, the search for national standards by means of APU, are all explained by indecision about examinations—are they the objective of schooling or merely the best means to an end at present available?

The ground swell of opinion among those concerned about what is taught in the classroom is that schools are omitting much that is necessary to successful living simply because it cannot be examined. They are arguing for a curriculum that deals with life issues rather than linear learning, one focused upon decision making rather than recall.

This "other" curriculum was born in many strange areas—temporary classrooms at the back of school yards where the system-failures are being "contained"; in the crash courses for leavers set up once the examination entry pattern has established which youngsters would get in the way of run-up procedures; or in those pilot schemes for the less able called "Design for Living" or "Good Citizenship".

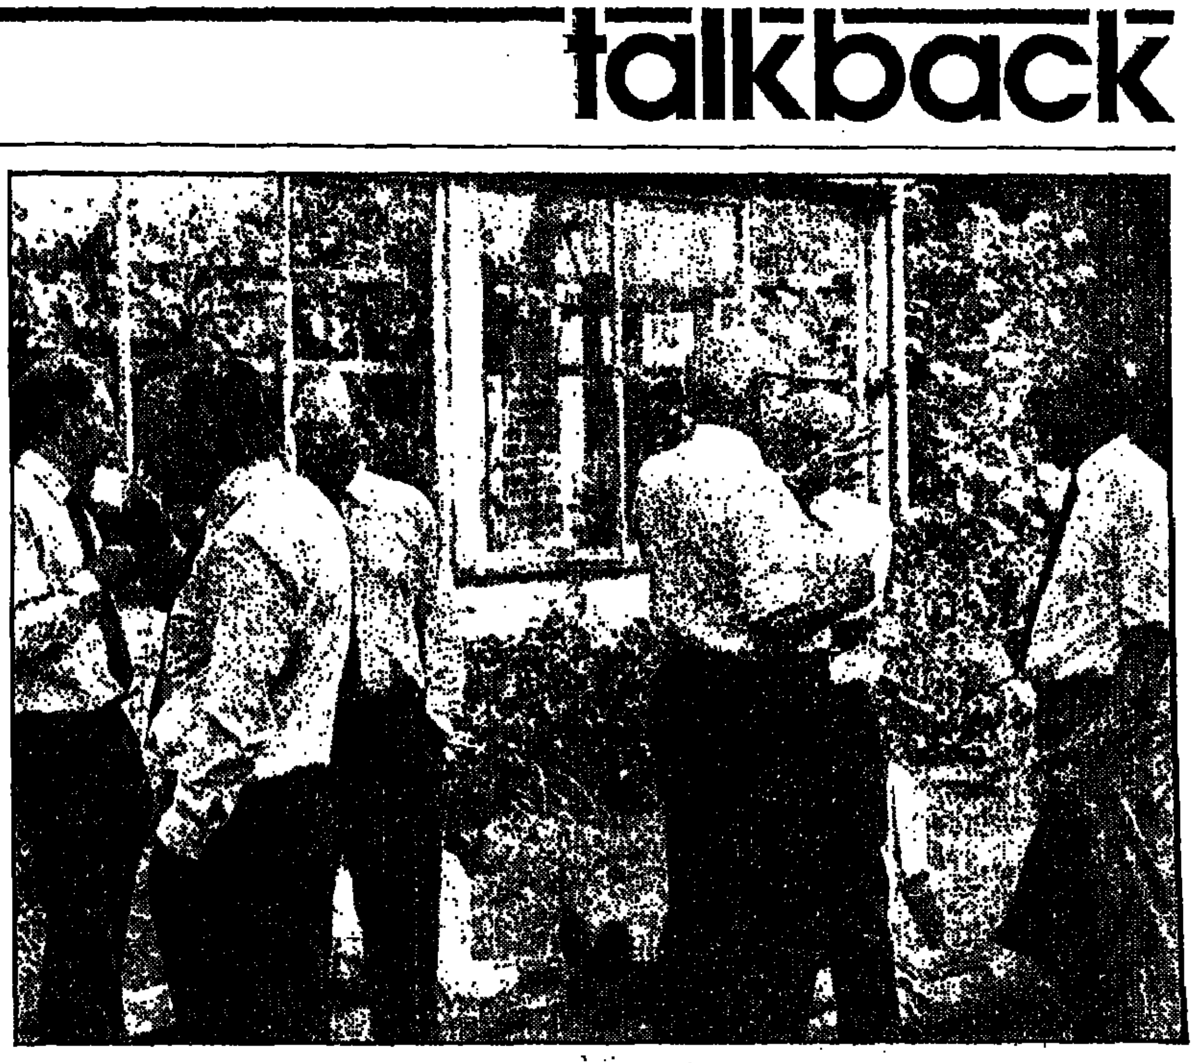
Those teachers who are working on the "other" curriculum are engaged, knowingly or otherwise, upon the new frontier in education. Do we have sufficient people in our schools who are prepared to: teach values-scrutiny as opposed to preset standards of behaviour; question whether leisure is a right; examine consumption as a benefit or a threat; analyse the isolation that occurs when a man or woman works far away from an end product; illustrate that critical decision paths are often begun before the capacity to look ahead has developed; explain that good parenthood is not inborn, and may not arrive with the child; show that responsibility for other human beings is a difficult code to live by, that empathy hurts?

The list is endless, because it starts from a proposition that culture transmitted from one generation to another is complete to the generation giving it, but only raw material to the generation taking it. They will refashion it into a culture which works for them.

As the other curriculum emerges from its aims and purposes stage, it will set many new problems for educators. Some will doggedly set about discovering whether or not it can be examined. Many will decry it as outside of the brief for schools.

Head teachers will agonise about whether it should be core provision for all pupils or a "soft" option. Teachers whose life work has been to reorganize what they learned in university for the benefit of children will protest that nobody has trained them to teach about life. Publishers will worry about how to produce saleable material around issues when such issues change too quickly for production, marketing and reward.

Many pressure groups from outside the profession will cry for the issues that matter to them to be properly treated—child battering; violence on television, sexual equality—the list is as endless as the clamour. The new methods too will bring their troubles. Are we well enough trained in small group discussion to cope with life issue teaching? Can the new content be infused through the existing subject structure?



Teabreak for the examiners, guardians of the traditional curriculum.

All in all, the other curriculum is undergoing as painful a process of birth as any other discipline that has emerged to share in the curriculum. But however painful the process, it is happening.

At present the concern for life issues is only a footnote for the professional pundit—but one that occurs ever more frequently. The simple image of the educational pin-ball machine sums it all up. The teachers fasten their attention on the vertical board which flashes up the results. The child is the ball—bruised and battered in the field of play.

The challenge to the profession is to be more concerned about the game than the results.

G. K. Gulliver is head of the Blakelaw School, Newcastle upon Tyne.

Reading and music

Audrey Wisbey

Henrietta Dombey asks ("Wrong on cue", 11th April) if the daily repetition of single notes really helps a child to learn to read?

Audiological research shows the massive amount of repetition necessary for the learning of any sound, and that sounds are initially learnt one at a time. Language and intelligence are both heavily dependent on the ability to make the act of comparison before discrimination and the span of spatial/temporal pattern can be developed.

This requires an initial stable reference point. Where hearing is concerned, it is the memory that must provide this, since sound is both transient and ephemeral; that memory must be established.

Vowel sounds are musically pitched chords. Pitch is the subjective sensation of the frequency of vibrations per second arriving at the cortex. The actual sensation will vary according to the duration and intensity of the stimulus.

The absolute pitch of a vowel sound will of course be controlled by the frequency range of the speaker's voice, but each unit must develop the same stable relationship to the tonal centre as say "fah" does to "doh".

The single speech sounds varying in pitch and tone are then blended together into temporal patterns, which can later be codified by spatial patterns of symbols. The process of blending can be initiated by copying them, once they are recognized through the hearing system.

This is because the speech organs must move to produce the next sound, and in so doing change the shape and size of the resonating cavity producing the speech sounds. Consequently the small changes of pitch and tone are available for learning and eventually recognition.

Is this not why small children of all nationalities playing together quickly learn each other's language, whereas we "oldies" need grammatical rules to assist us in the same way as the hearing impaired?

The position is further aggravated and indeed complicated by the need for immediate analysis of the highly transient but complex speech sound. In effect, they are musical chords, and identification relies on the ability to detect the composition of each chord.

Music education provides the experience often missed by children during early bouts of hearing problems, to proceed by learning one aspect of sound at a time, logically and progressively. Why is this considered "spurious"?

As to the so-called lack of evidence that hearing disorders affect language skills, may I suggest that not only my own work with several thousands of children over a period of 20 years is studied, but also that of many others—Murphy, Hamilton and Owrid, Luria, and Bruner. There is no lack of evidence, just the desire for its exploration and discovery and ultimately the ability to appreciate and accept its understanding.

Of course, more than half the population of five-year-old children show the immaturity resulting in the reversal of letters and words —who said all "five-year-olds" were mature? I merely suggested that the reversal problem is one of immaturity of function.

Nor did I say that visual acuity was responsible for the dyslexics' problems; in fact the majority of those I have seen had 6/6 visual acuity or better in both eyes when tested monocularly, as happens in most school medical checks. What I did say was that the coordination of both eyes together was frequently the problem.

A difficulty in maintaining the convergence necessary in all positions of gaze under the unnatural, stressful and highly dynamic conditions required for the lateral movement of left to right, or the establishment of stable hand/eye relationships whether crossed or uncrossed, can only happen when a stable reference eye in the small area of central vision, about 2° in the case of a child, has been established.

Instead of suggesting that teachers experiment with exercises I recommended that all children should receive an orthoptic and ophthalmic investigation. Certainly the report of the Optical Information Council that a staggering 24.8 per cent of school children had previously non-detected visual problems, prevents me from agreeing with Henrietta Dombey that a child passing a school medical will be sure not to have any visual problems.

The nature of the difficulty will naturally vary according to the type of visual/hearing problem. Earlier hearing problems will cause substitution of sounds, but organization of patterns of letters will also depend on the efficiency of re-fixating, since the amount of central vision at each fixation is very small.

This means that only about five letters can be learnt at each fixation. Re-fixation means binocular muscle control and coordination to bring those "little tunnels of good vision" together for fixation.

Experiments involving the wearing of reversing glasses shows how apparently reversed objects are restored to their actual when they are touched, or when multi-sensory information is available or when they do not exist in their reversed form.

I believe this to be the explanation as to why reversals only affect those symbols or words which are identical except when they are viewed from different angles, such as b, d, p and q and why so many children are helped when multi-sensory information aids symbol recognition.

Finally, whether a child can sing in tune or not will depend on all the factors involved in developing the appropriate feedback. For a variety of clinical, environmental, behavioural, and other reasons—including the sheer lack of opportunity—children could learn to read and yet fail to learn to sing in tune, while a few could sing in tune yet be failing to learn to read. The reasons for and the nature of the failure is what is important.

Audrey Wisbey is a consultant in learning problems.

Rules are rules

Graham Rowland

The place: any school. A boy aged 10, kicking a tennis ball and reliving 'Match of the Day', has wandered into the school library at playtime.

Teacher: What are you doing in here? You know you are not allowed here unless you are accompanied by a teacher!

Boy: I was just. . . .

Teacher: You know the rules! (And rules are binding).

Boy: I wanted to look at. . . .

Teacher: We've tried letting children come by themselves and books were left on the wrong shelves. . . . (Dog-eared memories were catalogued in the teacher's brain.)

Boy: (Reddens) . . . but I haven't, Sir. . . .

Teacher: Mrs Hardcastle spends hours looking after the library, searching for lost tickets, tidying the shelves, repairing torn dust jackets—and she has to teach a class!

Boy: (Reduced to silence and regretting already this chapter in his life.)

Teacher: Anyway the library is open on Tuesday, Thursday and Friday afternoons when the parents help. Why couldn't you wait till then?

Boy: I thought I might . . . .

Teacher: That's just it! You didn't think! You thought you would please yourself. But what would happen if all the children came to the library whenever they felt like it?

Boy: (growing rapidly in experience): We were having a lesson on rabbits, Sir, and I thought I could find out [illegible]

Teacher: But this is playtime—everyone should be in the playground at playtime. You heard the headmaster. Now out you go . . . have you put the books back on the proper shelves? Otherwise Mrs Hardcastle will have more work to do.

Boy: (growing rapidly in some experiences and having others torn out): I was just looking. . . . I didn't touch anything.

Teacher: (as boy leaves the library and disappears into the playground): Don't let me have to tell you again.

(Mrs Hardcastle arrives)

I've just had to send one of the second year children out again, Mrs Hardcastle.

Mrs Hardcastle (her limp-covered figure crumpling into an easy chair):

Not again! If you could have seen the state of some of the shelves when we tried to let a few "hand-picked" children stay in, it would have really made you wonder. Anyway, I don't see that there's any real need for them to be in during playtimes, when we've arranged for so many afternoons to be open now. Books are so expensive these days, and so easily damaged.

Teacher: Quite. I don't think the child did actually disturb anything, I caught him in time.

(Mrs Hardcastle, Scale II, and the teacher part, content to have done the right thing for the school, and to have published the rules once again.

The Boy, 10 years old and saved from disturbing the shelves, sighs with the thought that he had successfully withdrawn from the library. Whatever had possessed him to go there in the first place? He turned down a corner of his memory: he wouldn't make the same mistake twice. Libraries were places for books not people, he concluded, and returned to the margins of the real world.)

Graham Rowland is headmaster of Woodbury Primary School, Devon.

'Can't somebody take them camping?'

Ivor Goodson reports on one school's abortive attempt to withdraw a group of 'problem children' from ordinary classes

Another kind of withdrawal: teenagers in a separate unit outside school.

The problem of disruptive pupils has received considerable publicity recently. It has been the subject of debate at a number of conferences, and of pamphlets produced by teachers' unions. A sort of consensus policy seems to be emerging.

The Daily Telegraph, reporting on an annual teachers conference, quoted one speaker who summarized the delegates' viewpoint in respect to those pupils "who deliberately provoke and disrupt".

> "I don't like the term 'sin bin', but there is a need for this noisy minority to be placed into separate units and taught in small groups or on a one-to-one basis. That would rob them of their captive audience".

While understanding the attractions of the "sin bin" or "special units" approach, I wish to question its efficacy simply on pragmatic grounds. I shall not deal with the reasons why pupils initially become disruptive, nor seek to legitimize or apologize for their behaviour. I shall discuss the strategy within its own frame of reference—as a strategy for allowing the ordinary undisruptive pupils to get on with their schooling, and for letting teachers get on with their job.

My example is based on events in a school, situated in a new estate, which opened in September with 300 children and 30 staff. From the beginning there were complaints from some teachers about "problem" kids. These teachers taught subjects such as integrated science and local studies, which were options taught alongside O level options like History and German. It was in these "sink" options that the problems first appeared.

Initially, the problems were identified with five boys who went to these options in a group. At a staff meeting in early October, the head first introduced the topic, stating: "I want us to think of ways of involving the 'thickies'—the five oak trees". Apart from symbolic protest from two teachers, the staff enthusiastically reviewed the problem, but the meeting was inconclusive.

By late November the problem was growing. At this stage there were thought to be a dozen "oak trees"—the flora of deviance, as it were, was blossoming. Both the integrated science teacher and the local studies teacher had had enough: "these children need a different curriculum"; "the only way is to entertain them"; "can't somebody take them camping?" Both teachers, who by now had become close friends, felt that the students "should be at work".

The head, for his part, engaged in the task of "drawing up a list of problems": the staff enthusiastically joined in — "Oh! yes, he must be on the list"; "she's a certainty"; "he strikes me as a good candidate". The head was dissatisfied: "I've only got seven . . ." The staff tried again: a list of 11 emerged.

Over the Christmas holiday and the first few weeks of the second term the matter rested. By early February the head had revised a strategy to put to the staff—the problem kids were to be withdrawn. After a long discussion about rooms with adequate security—"you can't lock the doors and the windows open in that room"—it was decided to withdraw 11 children under the coordination of the Senior Counsellor.

A number of staff protested against the withdrawal strategy. Two kinds of reasoning emerged: first, there were those who did not want to take such a problem group; second, some felt that putting all the problems together would simply compound the difficulties, and besides, they argued, it could hardly help the children in question—"on simple commonsense grounds, if you put problems together they will be aggravated".

In the face of this unexpected, and rather protracted, verbal opposition, the head was adamant: "When it comes to a crisis like this, I'm flat on the side of the staff, the children pass through". The discussion was thereby guillotined.

The next day all staff received a circular listing the reasons for the withdrawal group and the mode of organisation. Among the reasons were: "To aid the personal development of these children." "To ensure equal opportunities." "To ensure sustained and continuous work." "To equip them with much-needed basic skills." The group was to meet at certain periods in the head's anteroom. At other periods specialist staff would be assigned to the group.

The specialist staff were undesignated. At this stage a major problem was encountered. None of the staff were keen to offer their "specialist expertise" to such a group. In a series of interviews with individual staff, at least three members threatened resignation.

Interestingly, it was mainly opponents of the scheme that were approached: by and large these were staff already working fairly successfully as tutors or specialists with the group in question. Without exception, as at the staff meeting, they felt withdrawal would ruin their relationship with the children, that their involvement would be conceived by the children as traitorous acquiescence in a scheme of thinly-disguised punishment.

A number of staff refused to the end to participate, but eventually the head had enough teachers to begin the scheme in skeleton form. For the remaining four weeks of term the scheme seemed to offer at least containment. However, close scrutiny of the students' timetables shows that even at this stage there were problems. Because of the recalcitrant staff, the students had a timetable for only 22 out of the 35 periods.

The summer term began badly, with rumours that the deputy head had been attacked in one of the lessons, but had not reported it to anyone. It was later confirmed that he had been beaten up by three boys, and he was subsequently freed from his commitment. The group was now often seen around the school corridors, apparently at a loose end.

One of the other members of staff involved, who had been suffering from sleeplessness, was away for three weeks. One of the group left precipitously to join the Army, and another soon followed. By now it was clear that the group's timetable had all but collapsed. Several students were fixed up with "work visits" for part of the week.

The first suspension followed an outbreak of theft and bullying; two more of the group were suspended for generally offensive behaviour. The punishments were announced at assembly. Two days later three of the original "oak trees" threatened the head in his study. Two were immediately expelled. In the final days of term one of the girls ran off with an unemployed brother of one of the boys in the group.

At the final meeting of the staff a request for a progress report on the group was received by the head in stony silence, and then ignored. At this meeting the head announced that one of the main staff opponents of the scheme was leaving, and in the following summer two other opponents followed.

Ivor Goodson is head of the Schools Unit and Senior Fellow, European Research Centre, University of Sussex.

HEADTEACHER Group 9

£9,627+£198+£201(2)+£204=£10,431

THE KING DAVID HIGH SCHOOL (MIXED)
Childwall Road, Liverpool L15 6UZ

The King David High School is a Voluntary Aided Jewish School. It has 540 on roll (320 Jewish and 220 non-Jewish pupils) and caters for boys and girls from 11 years to pre-university with a 6th form of 80.

The school is housed in modern buildings with a swimming pool and playing fields. It has a well established staff of 40, augmented by peripatetic music teachers.

The Governors are anxious to appoint a Head Teacher who would continue to build up the high academic reputation established at the school.

Further particulars and forms available from (SAE), The Director of Education, 14 Sir Thomas Street, Liverpool L1 6BJ, to be returned to Mr. E. Felton (Clerk to the Governors), Rex Cohen Court, Lathbury Lane, Liverpool 17, quoting reference P & M 650 (b). Closing date 28th May, 1980.

AVON COUNTY
FILTON HIGH SCHOOL
New Road, Filton,
Bristol BS12 6QT
(Co-educational 11 to 18 Comprehensive School)
Required from September: DIRECTOR of SIXTH FORM (Senior Teacher Scale). A strong Sixth Form of all academic levels comprising 120-plus students is established in purpose-built accommodation, managed by a team of senior staff and tutors responsible for academic, personal and vocational guidance. Experience in these fields and with the 16 to 19 age range required. Ability to make and maintain excellent personal relations with staff and students essential. Teaching subject immaterial.
Application by letter to the Head immediately with curriculum vitae and names of two referees.
Quote 980-16.5.80.

BATH
BEECHEN CLIFF SCHOOL
Alexandra Park
DEPUTY HEAD Group 12 required for September, if possible, with responsibility for pastoral oversight of years three, four and five, and an involvement in curriculum development.
There are 1,500 boys in the school, 250 of them in the Sixth Form.

BEDFORDSHIRE
SOUTHERN AREA

ASHCROFT HIGH SCHOOL
Crawley Green Road, Luton
Headmaster: Mr G. Boden, BA, BPhil

Required for September, 1980: an experienced TEACHER, preferably a GRADUATE, to join the senior management team of the school. The principal role would be responsibility for organising the Resource Centre. Applicants with proven experience of Audio-Visual Aid equipment would be preferred. Ability to teach Chemistry/Physics would be a distinct advantage.
Some assistance with accommodation may be possible.

HALYARD HIGH SCHOOL
Emerald Road, Luton
Headmaster:
Mr B. D. Round, BA

SECOND MASTER/MISTRESS

Applications are invited from well qualified and experienced TEACHERS for the post of SECOND MASTER/MISTRESS at this Group 11 school. September appointment. Some assistance with accommodation may be possible.
Further details and application forms obtainable from and returnable to the Headmaster.

BEDFORDSHIRE
NORTHERN AREA

THE SAMUEL WHITBREAD UPPER SCHOOL AND COMMUNITY COLLEGE
Clifton Road, Shefford, Beds
Headmaster: Mr K. S. Dodsworth

SECOND DEPUTY HEAD

Required for September 1980. (Group 10 becoming Group 11.) The successful applicant will be one of a team of three deputies, each of whom has a specific brief (besides sharing the overall management of the school). The special responsibility attaching to this post will depend to some extent on the experience of the applicant.
Application forms and further details available from the Headmaster at the School. Please telephone the School direct. Telephone Hitchin (0462) 812798.

BRENT
(London Borough of)
WILLIAM GLADSTONE HIGH (MIXED) SCHOOL
Parkside, N.W.2
Headmaster: R. A. Mort, B.A.
Required from September—DEPUTY HEAD (Group 10). The vacancy is because of promotion. The school has been a natural growth six-form entry mixed Comprehensive. It opened in 1974 with a first-year intake only and has grown to its present size of well over 900. With the first large intake into its Lower Sixth next year the roll should be over 1,000. It is situated in very pleasant surroundings and comprises a main block of three floors, a sports hall, large playing field and self-contained staff area. The school is supplied with modern equipment and specialized accommodation in all departments. Teaching throughout Years 1 to 3 is organized mainly on a mixed-ability basis and an option system is in use for Years 4 and 5. The successful candidate will be expected to have experience in both the pastoral and academic-timetabling aspects of the position.
Further details on request. Application forms (s.a.e.) from Director of Education, P.O. Box 1, Chesterfield House, 9 Park Lane, Wembley HA9 7RW, returnable to the Head of the School within 10 days.
London Allowance of £609 per annum is payable and there is a scheme for assistance with removal expenses including legal fees, etc., travelling and lodging allowances.

HOUNSLOW
(London Borough of)
EDUCATION COMMITTEE
Education Department, The Civic Centre, Lampton Road, Hounslow TW3 4DN
FELTHAM SCHOOL
Boundaries Road, Feltham,
Middlesex TW13 5DY
Telephone Number: 01-890 0167
(11-18) Co-educational Comprehensive School.
Number on roll 1,750
Headmaster: Paul M. Grant, B.Sc.
Required for September 1980, a well-qualified enthusiastic REMEDIAL TEACHER (Scale 1) with initiative to work with a team of five full-time teachers. A willingness to specialise in the teaching of Mathematics would be an asset as well as general remedial teaching and therapeutic and social training involving adventure pursuits. The Special Education Department is a large well-equipped department which operates on full-time and part-time withdrawal systems for years 1-5.
The school is organised on a House system of pastoral care. Every member of staff is attached to a House and is expected to contribute to the life and work of the House. A separate block accommodates Upper School (years 5 and 6) approximately 500 pupils.
This 10/11-form entry Comprehensive school is situated near London Airport, M3, M4 and the open countryside of the Thames Valley. The buildings are modern and well-equipped and a building programme is planned in order to provide a new purpose-built school with extensive dual use community facilities on one site. The new building and community involvement offers exciting opportunities for wide experience and career development.
London allowance £408 payable.
Letters of application (no forms) to the Headmaster within seven days giving details of qualifications, experience and the names and addresses of two referees.
A. Groves, Director of Education.

Required for September, a GRADUATE to teach LATIN and CLASSICAL STUDIES throughout this co-educational comprehensive school of 1,150 pupils.

Classical Studies is taught to all pupils in Years 1 and 2 and thereafter becomes an option to C.S.E./"O" level. Latin is started in the 2nd Year and is taken to C.S.E./"O" level.

It is hoped that Latin and Classical Civilisation will be taught, to "A" level in the future.

Application forms and further details are available from the Headmaster, to whom completed forms should be returned as soon as possible (S.A.E. please).

OXFORD

SUMMER FIELDS

Required in September Resident TEACHER for LATIN: mainly middle school level, but C.E. work also available.

Ability to coach soccer and interest in out-of-school activities a great asset. Good salary and accommodation.

Apply in writing with curriculum vitae and names of referees to the Headmaster, Summer Fields, Oxford, OX2 7EN.

Commercial Subjects

Heads of Department

BARNET

(London Borough of)
WOODHOUSE SCHOOL AND SIXTH FORM CENTRE
Woodhouse Road, N. Finchley, N.12
Tel.: 01-445 1210

Three-form Mixed Grammar, evolving into a Sixth Form College. Sixth Form 300.

Required September, 1980, HEAD OF BUSINESS STUDIES Scale 3. Experienced teacher to lead expanding department within rapidly developing Sixth Form Centre.

During its transition from a grammar school the centre has introduced popular courses in typewriting (up to R.S.A. Stage III), shorthand (Pitman's 2000), commerce, office practice and accounts.

Candidates should be familiar with recent curricular developments in the skills subjects and Business Studies ("O/A"); links with industry, and course structures suited to the one-year pupil.

A full secretarial course is to be offered, as well as business studies, in which area the candidate's main teaching commitment will lie. Awareness of recent technological resources an advantage.

In approved cases assistance may be given towards the payment of removal expenses and separation allowances.

Assistance may also be sometimes possible with a limited amount of temporary housing, dependent upon availability.

Priority will be given to teachers of certain shortage subjects.

Forms of application from Headmaster should be returned to school as soon as possible (S.A.E.).

Director of Educational Services.

BRENT

(London Borough of)
SLADEBROOK HIGH (MIXED) SCHOOL
Brenfield Road, NW10 8HE
(Roll 800, Social Priority School)

Required from September, 1980: HEAD of COMMERCE (Scale 3).

At present typing only is taught in Years 4 and 5 to C.S.E. level. There is a popular one year commerce course in the Sixth Form consisting of Shorthand (Pitmans New Era) and Typing to R.S.A. Stage 2, also Commerce and Principles of Accounts.

London Allowance of £609 per annum is payable and there is a scheme for assistance with removal expenses including legal fees, etc., travelling and lodging allowances.

Candidates should apply by letter to the Head of the school within seven days giving age, present post, qualifications, experience and references, enclosing s.a.e. for reply.

EAST SUSSEX

TIDEWAY SCHOOL
Southdown Road,
Newhaven BN9 9JL

Required for September HEAD of COMMERCE (Scale 3). Thriving Department offering wide range of skills and theory both in Years 4 and 5 as well as 6th Form Commercial/Secretarial Course. Outstanding opportunity to develop a Department further in both the Skills and Business Studies area.

Relocation grants available in approved cases.

Application forms (S.A.E. please) from the Headmaster.

EAST SUSSEX

BEACON SCHOOL
East Beeches Road, Crowborough

Number on Roll: 1,180 Girls
Comprehensive
Required for September 1980, HONOURS GRADUATE in ENGLISH (Scale 1) to share in teaching up to Advanced level standard. The work in the Department will include "O" level/C.S.E. and Junior teaching. £177 per annum London Fringe Allowance.
Applications with full curriculum vitae and names of two referees to the Headmistress as soon as possible (S.A.E.).
Closing date June 9 1980.

BERKSHIRE
HIGHDOWN SCHOOL
Surley Row, Emmer Green
Reading RG4 8LR
Number on Roll 1,500 Mixed
(11-18 Comprehensive)
Applications are invited from qualified GRADUATES for two posts in the ENGLISH FACULTY (Scale 1) for September 1980. The work in the 1st-3rd years is based upon mixed ability groups, in years 4-5 the subject is taught in sets. Both posts will involve teaching across the complete age and attainment range. The ability to offer Drama will be an advantage in relation to one post.
Application forms and further particulars from the Headmaster (S.A.E.).
Closing date June 9 1980.

BERKSHIRE
EASTHAMPSTEAD PARK SCHOOL
Easthampstead Park, Wokingham
(Number on roll 1,450 comprehensive)
Required for September, 1980, TEACHER of ENGLISH and DRAMA (Scale 1) to join a successful and well-established department.
Full details and application forms from the Principal (S.A.E.). Closing date June 9

BRENT
(London Borough of)
ALPERTON HIGH (MIXED) SCHOOL
Stanley Avenue, Wembley, HA0 4JE
(Roll 1,400, 11-18, 200 in Sixth Form)
Headteacher: Mrs. J. Dunn, B.Ed.
Required in September for this Comprehensive School,
A GRADUATE TEACHER of ENGLISH (Scale 1) to join a strong and active department. The post is for Upper School and therefore includes work with 4th, 5th and 6th forms towards the full range of public examinations, including C.E.E. The school is strongly multi-ethnic and a suitable syllabus for such a community is given great consideration.
An interest in developing Drama in the Upper School could be an advantage, but is not an essential.
London Allowance of £609 per annum is payable and there is a scheme for assistance with removal expenses including legal fees etc., travelling and lodging allowances.
Candidates should apply by letter to the Head of the School within 7 days giving age, present post, qualifications, experience and references, enclosing S.A.E. for reply.

BRISTOL
CHEW VALLEY SCHOOL
Chew Magna
(900 mixed comprehensive; 11 to 18)
Required for September, ENGLISH TEACHER to teach across the full ability range. Successful experience with A-level teaching or Drama teaching would be an advantage. A Scale 2 post may be available for a suitably qualified and experienced candidate. The school stands in the heart of the countryside, overlooking Chew Valley Lake, and is situated five miles south of Bristol.
Applications should be made immediately to the Headmaster.

Telephone: 01-656 0994
Tenable: 1st September 1980

A SOCIOLOGY TEACHER able to offer some GEOGRAPHY, up to "O" level, required in this 11-18 mixed comprehensive high school (900 on roll, including 400 in sixth form). Social Studies and Sociology are taken at C.S.E. and "O" level, and Sociology is especially popular in the sixth form.

Salary—Burnham Scale 1 with London Area Allowance.

Please send S.A.E. for application form from and returnable to the Head Teacher at the above address as soon as possible.

Gwent
County Council

REQUIRED FOR SEPTEMBER 1, 1980:—

Applications are invited from qualified teachers for the following vacancies:—

ABERSYCHAN COMPREHENSIVE SCHOOL, Nr. Pontypool
This school will open in September, 1980, as an 11 to 18 school initially but will become an 11 to 16 school eventually.
MATHEMATICS to "O" level.
Application forms returned to the Headmaster of Abersychan Grammar Technical School, Old Lane, Abersychan.

CHEPSTOW COMPREHENSIVE SCHOOL (11-18)
PHYSICS Graduate to become Second in the Department. There is a general science commitment. Scale 2 for suitable candidate.

HARTRIDGE COMPREHENSIVE SCHOOL, Newport (11-18)
ENGLISH Graduate to teach throughout the school.

PONTLLANFRAITH COMPREHENSIVE SCHOOL (11-18)
(a) **GEOGRAPHY** to teach to CSE and "O" level. Ability to offer Geology to "O" level an asset.
(b) **WELSH** to CSE and "O" level.

ST. JOSEPH'S R.C. COMPREHENSIVE SCHOOL, Newport (11-18)
BIOLOGY, Graduate preferred. Scale 2 for suitable candidate. Application forms available from and returned to the Clerk of the Governors, St Joseph's Comprehensive School, Tredegar Park, Newport, Gwent NP1 9YS.

TREDEGAR COMPREHENSIVE SCHOOL (11-18)
ENGLISH to teach across the whole ability-range in the lower school.

ADVISORY TEACHERS FOR COMPUTER AND MICRO-ELECTRONICS APPLICATIONS IN SCHOOLS (2 VACANCIES)
Required for September 1, or as soon as possible. Teachers with experience and qualifications in the use of Computers and Micro-Electronic Systems are required. They will be based at the Gwent College of Higher Education, Newport. Their work will include arranging and contributing to the In-service Training of Teachers developing a resources centre for micro-electronic applications across the curriculum and teaching in schools (Scale 4).

Application forms and further information available from the Director of Education, County Hall, Cwmbran, Gwent, on receipt of stamped addressed envelope, should be returned to the Headmaster of the school concerned by May 31, 1980. Completed forms in respect of the vacancies for Advisory Teachers for Computer should be returned to the undersigned by the same date.

The successful applicant will be required to submit a satisfactory medical report on appointment.

HARINGEY
(Borough of)
NORTHUMBERLAND PARK MIXED COMPREHENSIVE SCHOOL
Trulock Road,
Tottenham N17 0PG
Telephone 01-801 0091
Roll: 1,100

Required for September 1980, TEACHER of HISTORY/SOCIOLOGY, Scale 1 or 2 (according to qualifications and experience).

Northumberland Park School is a thriving purpose-built community school with fine facilities where general standards and a carefully structured pastoral system enjoy a high priority. The successful candidate will join an energetic and committed staff.

An enthusiastic, suitably qualified teacher of History/Sociology is required to join a well established department within the Humanities Faculty. The department contributes to an integrated Humanities course in years one to three where teaching is in mixed ability groups. C.S.E., "O" level courses are offered in History, Sociology, Social Studies, Economics and Politics. The person appointed would have the opportunity to teach at most levels and would be expected to make a positive contribution to the work of the Humanities team.

London Allowance (£609) payable. Removal expenses: 100 per cent allowed in approved cases. Social Priority: £201 to £276.

Applicants wishing to visit the school are welcome to do so. Application by letter to the Headmaster as soon as possible. Interviews are expected to take place Friday, May 23, 1980.

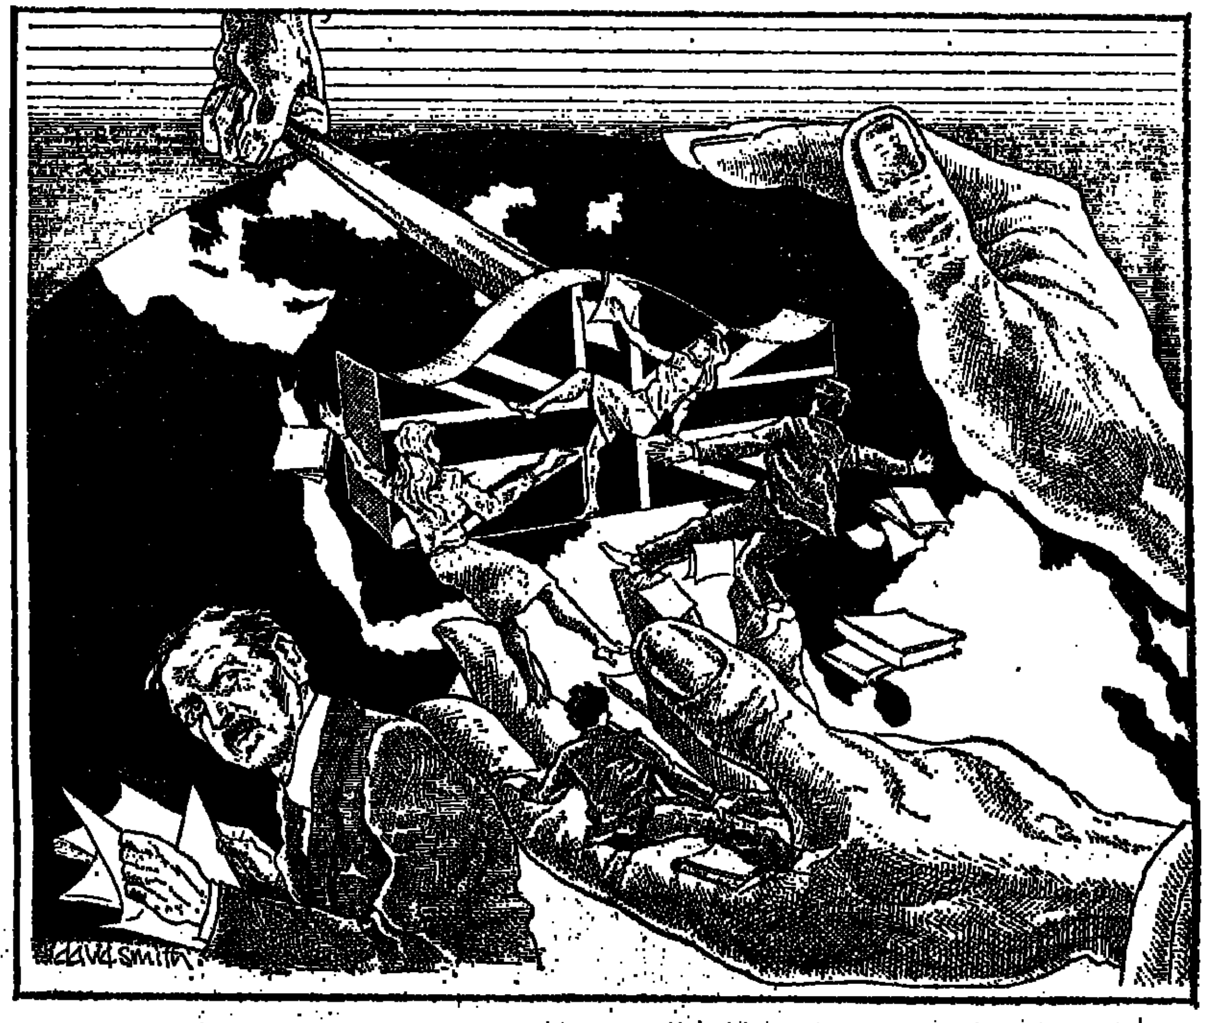
The British Council

Spending cuts force bitter choices

Britain's main agency for cultural diplomacy and educational aid has been hit by savage spending cuts. Moves are being made to increase its own earnings, but the continuing lack of a firm government policy in this field makes future work uncertain. In this introduction to a 12-page special report, Hilary Wilce looks at the present state of the British Council.



More than 500 posts have been swept off the British Council's global board in the first round of spending cuts. Further cutbacks in posts and programmes are to come. What will it mean to Britain's international relations?

Funds to drop by 23 per cent

The British Council has been so hard hit by two rounds of public expenditure cuts that, having trimmed away all the fat, it is now in the uncomfortable position of deciding whether to cut off an arm or a leg.

As it does so, it knows there are plenty of people who would be happy to see it disappear altogether. Because it deals in intangibles and operates in an area where too many official bodies jostle and overlap it has always been an easy target for critics.

But most people in Britain probably care little, either way. The British Council faces outwards, and at home is often known as nothing more than a name at the bottom of an advertisement for overseas teaching posts.

By 1984, when the full effect of the phased cuts will be felt, the council will have lost 23 per cent of its government grants-in-aid, core budget funds which at present make up about 46 per cent of its total expenditure.

Last autumn it was told to make an 11 per cent saving on this core budget for 1980-81. The hasty trimming and chopping which ensued affected all parts of the council's work. Book purchasing funds are being cut by 39 per cent; arts promotion money is being trimmed by 21 per cent; money for overseas visitors will drop by 25 per cent. Offices in Costa Rica, Mauritius, and Zaire (all but a token presence) are being closed, and specialist teaching staff are being withdrawn from eight countries. In all, 368 London-based posts and 179 posts for locally engaged staff overseas are to be lost in this first round of cuts.

More cuts are to come. Last month the Government announced a further cut of £3.9m at 1979 prices in the core budget, to be phased over three years.

Ways of making these savings are now under review. The arts promotion programme appears vulnerable, although no firm decisions have yet been taken.

The council is debating whether it is better to withdraw from more countries and concentrate resources, or maintain a thin geographical spread. "But we have to ask ourselves, what is the point of having a chap in Vienna if he has no money to spend", Mr Peter Naylor, controller of one of the council's three overseas divisions, said.

Such navel-gazing is a traditional occupation in the council's modern headquarters, tucked behind Trafalgar Square. Funds and support have always been prey to the prevailing political climate, and council officers feel—with some justification—that their work is poorly appreciated by the holders of the public purse, and the tax payers whose money is being spent.

As a result, most officers have a marshalled range of arguments and justifications, carefully polished from long years of self-defence. They point to specific instances, culled from their own experience, where council contacts have led to visible national gain, and complain that in spite of their wide range of specialist educational and scientific services they are still seen as people who spend public money sending morris dancers to Mogadishu. "I don't think we've ever sent morris dancers anywhere", Mr Eddy Rayner, controller of the director-general's department, said.

This problem of accountability has plagued the council since its creation in 1934. In 1940 it was granted a Royal Charter, but this only lays down one specific task: to encourage the spread of the English language abroad. Otherwise it is charged with the ill-defined task of developing closer links with other countries.

Today this means operating in 82 countries, with a London-appointed staff of 360 and 2,000 locally-engaged staff. It organizes direct and indirect teaching of English, administers educational and scientific aid programmes, runs libraries, promotes British books, organizes arts events, sends specialist visitors abroad and looks after overseas visitors and students in Britain.

In recent years it has taken on far more educational aid work, done on behalf of the Overseas Development Administration. Last financial year the council was given nearly £40m, 37 per cent of its total expenditure to spend on this.

The only reason for supporting all these activities with public money can be that they are thought, ultimately, to bring Britain concrete political and economy gain.

But do they? And does the way in which they are carried out?

Certainly the British Council is extremely well known overseas and far better respected than it is at home. Officers are hard working, well informed, and enjoy an enormous range of contacts within the countries in which they serve. (One argument for keeping the council separate from the foreign service is the freedom to make such contacts that officers enjoy. Another is that, in some countries, people are far happier to be seen going in and out of non-embassy buildings, and at times the council has been allowed to stay in countries when diplomatic relations with Britain have been broken off. Inevitably this has led to rumours of spying. ("That was always a cover, wasn't it, like the Peace Corps", says a character in Graham Greene's *The Human Factor*.)

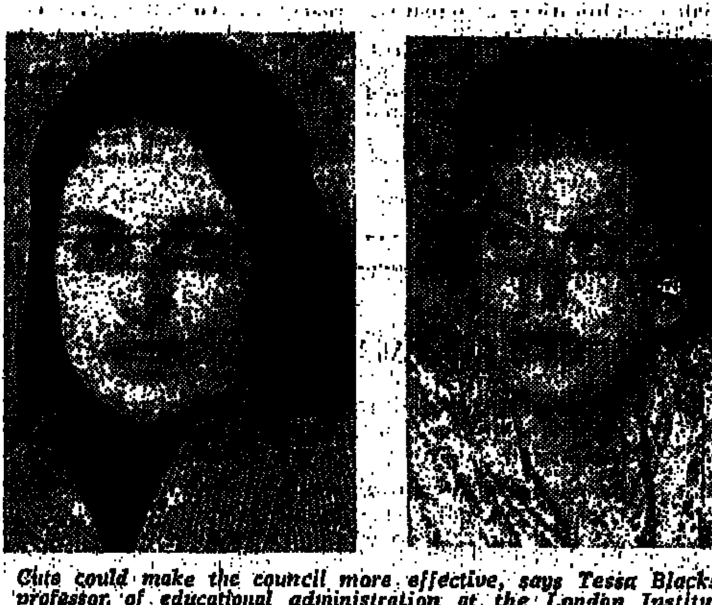
Other countries consider cultural diplomacy a sound investment. A favourite council argument is that other nations spend far more than we do in the international battle for hearts and minds. "If cultural diplomacy is not worth doing, then the French and Germans are five times as stupid as we are," Sir Charles Troughton, the council's chairman, said.

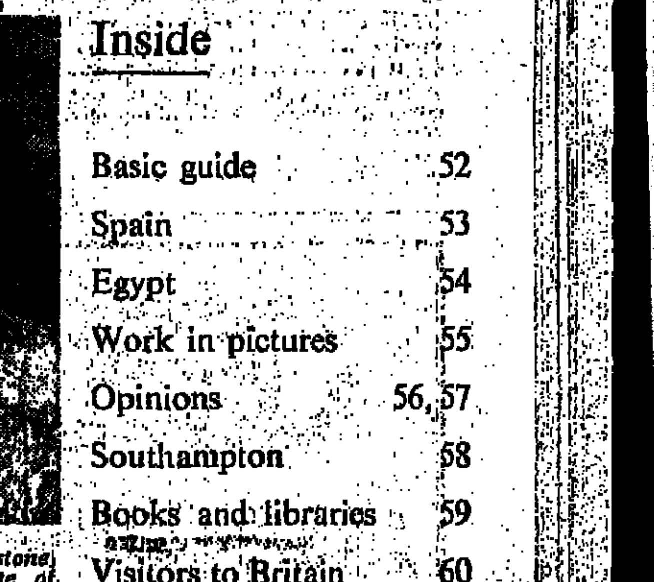
He points out that he has never yet visited a country where the cabinet or equivalent has not contained at least one member who has had some past contact with the British Council. And there are plenty of people at home willing to spring to the defence of council activities. Sir Henry Moore wrote to the Prime Minister in protest against its budget cuts, arguing that he has paid far more in taxes than has ever been spent on council promotion of his work overseas, and the Publishers' Association has also protested strongly about the current cuts.

But while it is certainly true that the overall mass of links, exchanges and contacts set up by the council must help promote general goodwill between Britain and other countries, it will never be possible to know exactly how much is gained by, for example, supporting in-service English teacher training in Spain, or sending Egyptian technicians to study in Britain.

In 1977 the Central Policy Review Staff, in its Review of Overseas Representation, suggested abolishing the council entirely. It argued that too many bodies were duplicating each other's educational and cultural work, and that much of this work was of doubtful value anyway. "If Ministers were starting from

Continued on page 61





Cuts could make the council more effective, says Tessa Blackstone, professor of educational administration at the London Institute of Education (left), and advises "stop mollycoddling overseas visitors". But Judith Hart, former Minister of Overseas Development, asks: What are we sacrificing to Friedmanism? Page 56

History: nearly 50 years of changing directions

The British Council was set up in 1934 by a joint committee of the Board of Education and the Board of Trade as a response to the propaganda voices of pre-war Italy and Germany.

Work began in Europe and the Near East, teaching English, recruiting teachers, providing books and fostering interest in British art. Six years later the council obtained its Royal Charter.

During the war it was concerned mainly with sustaining good relations with neutral countries and setting up a country-wide network of centres to provide for the educational and welfare needs of overseas people in wartime Britain.

After the war demarcation lines were drawn up between the British Council, the Central Office of Information and the BBC Overseas Services. The emphasis of the council's work came to be on satisfying the demand from educationists, scientists and artists in the liberated countries for re-established links with Britain.

In 1948 a House of Commons Select Committee examined the council and broadly approved its work, but post-war belt-tightening under Sir Stafford Cripps meant large-scale redundancies. Work in Europe was severely curtailed, both because of lack of funds and because of agitation within underdeveloped countries seeking independence meant that more attention had to be directed towards colonial and ex-colonial countries.

The Drogheda Independent Committee of Enquiry into the Overseas Information Services in 1954 helped to accelerate this trend away from Europe towards work in the developing world—in India, Pakistan, the Far East, and the Middle East. In 1969 there was the first Commonwealth Education Conference, and in 1961 the Department of Technical Cooperation, now the Overseas Development Administration, was created.

Other governmental reviews allocated money to book work and Commonwealth educational development. In 1954 Paul Sinker, former First Civil Service Commissioner, became director-general of the council. He identified its main tasks as English teaching, the printed word and the interchange of persons. He also identified new areas of work, such as educational television, and set the stage for the expansion of UK-based staff and activities.

In 1969, the Duncan Review Committee on Overseas Representations recommended a shift of emphasis back towards Europe, but this only came under the Heath Government. In a move timed to coincide with Britain's entry into European Economic Community, in 1972, Sir Geoffrey Rippon, then Chancellor of the Duchy of Lancaster, announced an extra £3.5m, spread over four years. Considerably more attention was paid to youth and academic exchanges.

At the same time agreements concluded with the then Ministry of Overseas Development led to an expansion of educational aid work. Council representatives (the chief council officer in a country) were formally recognized as education advisors to HM Missions.

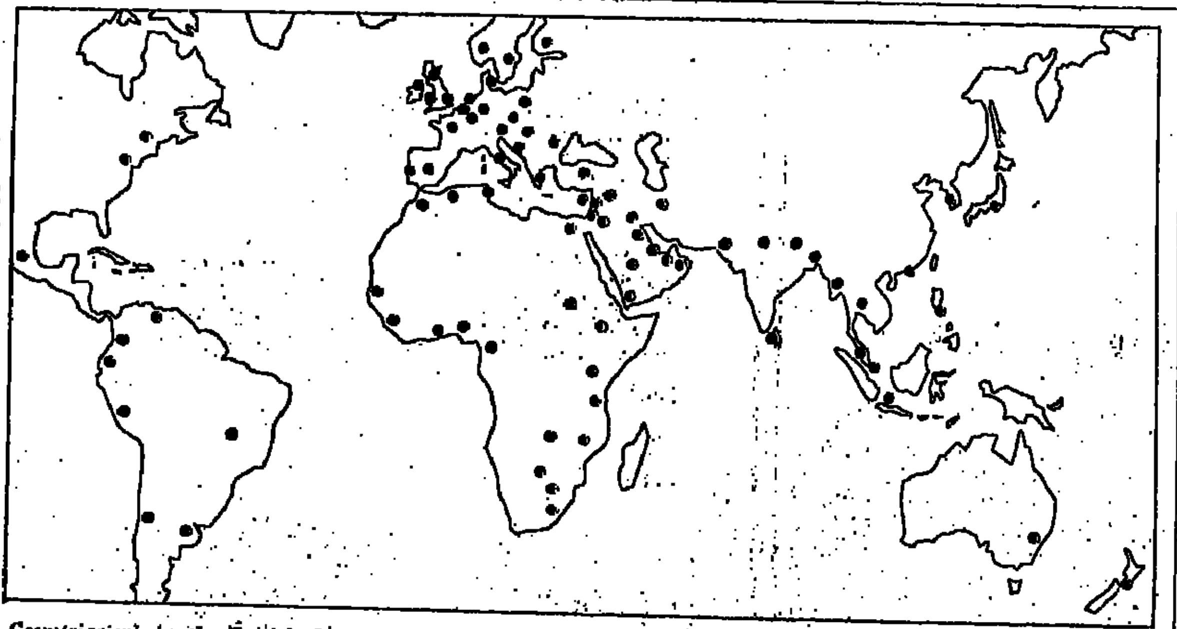
Another review of the council in 1969-70 was critical of aspects of its administration, while a major management review resulted in the opening up of its heavily centralized budgetary control procedures.

This was an essential preliminary to the more entrepreneurial role the council was forced to adopt after the oil price rise of 1973.

Government funds were tight and the use of aid money subject to closer control, so earned revenue was increased by expansion in the field of direct English teaching, and by winning contracts from the international lending agencies.

In 1977 the Central Policy Review Staff's Review of Overseas Representation (the Berrill report) proposed either the abolition, or the severe truncation of the council. The council survived these proposals and, in the rationalization of international educational and cultural work now going on, is taking on responsibility for other organizations.

But following a recent interdepartmental review, the council was told to effect an 11 per cent saving on its core budget for 1980-81, and earlier this year it was told that a further £3.9m was to be axed from this part of its budget over three years to 1984. Ways of making these savings in a coherent fashion are now being examined.



Countries where the British Council maintains representations.

Places: withdrawals now underway

The council at present operates in 82 countries, although this number is likely to change according to both the application of spending cuts and the world situation.

The Russian invasion of Afghanistan recently forced it to withdraw from Kabul, and the minimal operation being maintained in Tehran was closed down following the attempted rescue of the American hostages.

But work is underway to reopen an office in Salisbury, Zimbabwe, and although the situation in Uganda remains too unstable for council work to begin again in Kampala, this could change.

The expenditure cuts so far put into effect have meant withdrawal from Malta (where the office had been closed already by Dom Mintoff's government in retaliation for a trade move by the British Government), Mauritius, and Zaire. A recently opened English English teaching centre in Costa Rica has been closed.

Significant staff reductions are planned for the following Commonwealth countries: Australia, Bangladesh, Cyprus, India, Lesotho, Malaysia, Nigeria and Sierra Leone. Staff are also being withdrawn from the Middle East, Maghreb, Austria, Brazil, Indonesia, Mexico, Pakistan, Poland, Turkey and Yugoslavia.

The council maintains large representations (between nine and 25 London-appointed staff) in India (25), Nigeria (14), West Germany, Brazil, Ivory Coast, Egypt, Spain, Indonesia, Kenya, Malaysia and Turkey.

These larger offices contain a mixture of general administrators, English language specialists, library and book specialists, and scientists. The mixture of staff, funds and work varies enormously according to the individual country. France, for instance, has a lively cultural programme and many short-tour visitors. The Kenya representation, on the other hand, is primarily concerned with administering educational aid programmes.

The council runs a library in East Jerusalem (the West Bank) but administers this from London. The Madrid office runs the only British Council school in the world.

There are council representatives in Scotland, Wales and Northern Ireland. Regional offices are maintained in Birmingham, Bristol, Cambridge, Exeter, Leeds, Manchester, Newcastle, Nottingham, Oxford, and Southampton.

People: overseas wives start to feel the strain

The council employs 360 London-appointed staff serving overseas and 2,000 locally engaged staff.

Salary scales are related to Civil Service salaries. An officer entering the overseas career service, who is over 26, could expect a starting salary of £5,950. The highest graded overseas posts are the Representative, France, and the Representative, India, with salaries of about £18,000. Most career officers are graduates, and many have higher specialist qualifications as scientists or English language experts.

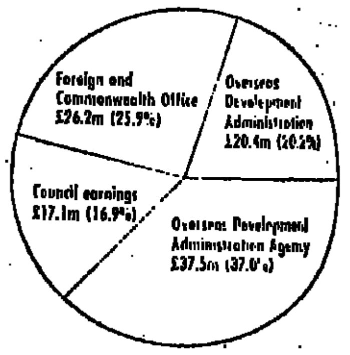
Home-based staff in the United Kingdom start at about £3,600 to £4,250. Local conditions of employment vary according to the country concerned.

Council staff serving overseas tend to work long hours and to spend free time making contacts. A recruitment booklet says: "Your wife's role will be as important as yours . . . you will be expected to together act as hosts to local people and to visitors from Britain".

As with other overseas services, this can cause domestic friction as an increasing number of wives wish to pursue their own careers. (In a very few cases, husbands follow their [illegible] council wives around the world.)

Money: complicated mix of funds

British Council funding is complex. The diagram (right) shows the main sources of money. Figures are for 1979/80.



The top two slices, added together, comprise the grant-in-aid from the Government which comes from both the Foreign and Commonwealth Office and the Overseas Development Administration, and the money given to the council by the Overseas Development Administration to administer specific aid schemes.

These aid schemes are financed by what is known as the ODA agency money, the bottom right hand slice of funds.

The fourth slice, council earnings, is money which comes from running English classes, setting up and managing education projects, recruiting teachers for overseas posts, placing and caring for students at the request of overseas governments and international agencies, organizing examinations and testing English.

The council is hoping to increase its self-earned funds. But the amount of ODA agency money is going down. The recent White Paper on expenditure cuts announced a 14 per cent cut in the aid budget, phased over three years. This is likely, in turn, to affect the level of aid administration money within the core budget.

As a non-governmental body supported to a high degree by public funds, the council has considerable, but not total freedom, in its work. Broadly speaking the Government decides in which countries, and on what scale, the council will work. The council decides what kind of work it will do, and how it will do it. All council work, however, is conditioned by the demands and circumstances of each particular country.

For the current financial year, Government grant-in-aid (the top two slices of funds) is down from £46.6m to £41.4m. That part of these funds given for the administration of aid projects is down from £5.9m to £5.3m. ODA agency money for this year is £44.7m. Council earnings are estimated at about £20m. One of the hardest-hit programmes so far is the low-priced books scheme, which is to be reduced from a planned £2m at the beginning of the last financial year to £0.97m this year.

Spanish students learn English using the council's closed-circuit television system. But was such sophisticated equipment a good investment?

A lucrative English teaching operation is the basis of the British Council's work in Spain. By Hilary Wilce

Madrid's balancing act

At the beginning of the academic year students queue around the block to enrol for British Council English language teaching in Madrid. There are similar scenes outside the council's other two institutes in Spain, in Barcelona and Valencia.

About 6,500 students are learning English in Spain through the British Council and Mr John Wright, the country's English language officer, said: "My impression is that we are 100 per cent oversubscribed every time. The pressure on places is just enormous".

The council has a high worldwide reputation for its English teaching. Competitive fees and the "official" status of the organization make it first choice for large numbers of language students around the world—a total of 42,000 in 1979/80, with 100,000 more students learning English in institutes and societies associated with the council.

Spain is one of the largest direct teaching operations but France, Greece and Italy also have quite large programmes, and there are other major ones in the Middle and Far East.

In Spain the English language teaching operation is by far the most visible and manpower-intensive part of the council's work. All levels are taught, from beginners to takers of the University of Cambridge Certificate of Proficiency in English. Just under 90 locally-engaged teachers are employed in the three institutes. In Madrid alone 13 classrooms are in constant use, day and evening, and a visitor to the *Instituto Britanico*, the council's rather elegant headquarters in the centre of the city, has to push through throngs of students.

It is a healthy situation. The promotion of the English language is the one specific task set down in the council's Royal Charter, and in Spain there is no difficulty at all in selling the product.

Senior politicians, administrators and industrialists have learnt English through the council since it began classes in 1940, and now their sons and daughters are following suit. As a result the council is short neither of friends nor influence.

Perhaps more important, though, in the current harsh economic climate, is the fact that the direct teaching operation is not only self-financing but also provides funds for other parts of the council's programme. Some of the profit is clawed back to London, but most stays in Spain.

Income from direct teaching has grown considerably over recent years. In 1973/4 it brought in £336,343. By 1974/5 this had jumped to £642,000 and revenue from teaching in 1979/80 is expected to be about £1½m once the final sums are done.

Not all of this is profit, of course. Teacher salaries alone account for £1m.

But in past years there has been enough left over to finance the installation of a closed circuit television system, with a studio and TV monitors in all the classrooms. The system is supervised by a specialist engineer, and is used both for producing teaching films and for research into English language teaching methodology.

Some critics however feel the expensive equipment is underused and perhaps should not have been bought in the first place.

Money from direct English teaching is also used to finance other council programmes, and to supply such ancillary services as a security guard—a necessary precaution when bombing incidents are far from rare.

"But this makes us a curious blend of the strong and vulnerable," Spain's British Council representative, Mr Ian Fraser, said. "It makes us strong in that we are generating money; but it makes us vulnerable in that London, knowing this, will think we can take a higher proportion of cuts than other places."

His fears have been realized. This financial year Spain is taking a cut of £162,000 on a direct country budget of £385,740 in 1979/80. Some of this will be made up by an increase in fees for English language lessons, but staff and programmes are having to be cut.

This curtailment comes just at a time when work in Spain should not be cut back, according to Ian Fraser. The country is going through an important time of transition. It is still in the process of hammering out its own brand of democracy; the Basque country and Catalonia are setting up their own autonomous systems of governments; and EEC membership is on the horizon. All kinds of institutions are under examination and as the country matures and builds new international links, the traditional ties with Britain need to be reaffirmed, he feels.

"They see in us a model to follow. There are all kinds of opportunities here at the moment."

The sentiment is echoed by all eight London appointed staff in Madrid, and their three colleagues in Barcelona, all of whom feel frustrated by the lack of resources with which to expand their work.

One way of continuing the same level of activities might be to expand the direct teaching of English operation. In 1979 this was done by retaking control of the Valencia institute from local direction, a move made possible by money earned through teaching English.

But apart from practical problems of finding more space and capital to invest in expansion, there are other, less tangible, considerations.

Ian Fraser is concerned that the balance of council work should not be tipped too far in any one direction.

"It is absolutely vital that the British Council should continue to be seen as the cultural ambassador of Great Britain. If our earned revenue were to become too high then it would be difficult for us to retain our claim to be the official British cultural agency. If we were to allow that to approach a level of 100 per cent Spanish funding, it would be both difficult and dangerous. We must not let the direct teaching of English totally overwhelm our other activities. If we did, aspects of our status would be open to question, for example our tax exemption."

Britain has a cultural convention with Spain which must be honoured. Significantly, 100 per cent of the British Government funds which subsidize the council's work in the country come from the Foreign and Commonwealth Office. There is no aid programme.

An important part of council work is to promote visits and exchanges in the fields of the social sciences, the arts and, most particularly, the sciences.

Dr Robin Wright, an engineer, is the science officer in Spain. He has tried to expand the programme of scientific contacts beyond the traditional fields, such as medicine, to a wide range of applied sciences, from hospital engineering to data transmission.

This science programme has been kept healthy by infusions of cash from the English teaching operation. Now the number of exchanges is to be cut, and Robin Wright is searching for ways and means of making a little go a long way.

One of his ideas is to organise seminars where participants would be charged fees which would cover the costs of bringing specialist speakers over from Great Britain. Publication of the papers could also help to cover costs.

Cultural manifestations (as the jargon terms them) are also a valuable part of the Spanish operation, council officers believe. A major Henry Moore exhibition is planned for Spain next year, and a recent Age of Shakespeare exhibition, which visited Madrid, Valencia and Barcelona was well received. Earlier this year the Old Vic Company toured Barcelona and Madrid, and the London Oratory Choir has been among the musical groups which recently toured Spain.

Council libraries in Madrid, Barcelona and Valencia have been hit by across the board cuts. As lending libraries they are primarily used by language students, but they are also widely used as reference libraries. In Madrid, in addition, a hard-pressed information service handles about 60 personal and written en-

Atlas 80

Compiled by M Renwick and W Pick
Suggested age range: 9-13

* A new concept in school atlases designed as the result of schools-based research into children's ability to use and understand maps.
* All the maps are on the same scale or on scales bearing a simple relationship to one another. Every physical and political map has an inset map of the British Isles to the same scale.
* A colour-coded index helps children locate places quickly and easily, and necessary information is repeated in the key to each map.
* A useful section of world maps showing amongst other things, oil production, population, endangered wild life.
* A wide variety of thematic maps linked to carefully selected colour photographs provide abundant topic work material.
* Also available is the Atlas 80 Workbook, an ideal activity guide and all-purpose tool for illustrating the countless ways in which an atlas can be used for reference in any curriculum.

International contracts help keep the unkindest cuts at bay

Council work in Egypt is typical of operations in the developing world. But, increasingly, someone other than the British tax-payer is footing the bill. By Hilary Wilce

The office of the British Council representative in Cairo has a magnificent view of the Nile. Full-sailed *feluccas* pass by on the wide brown river, and the occasional, incongruous, rowing eight.

The council's Egyptian headquarters is an elegant waterside villa with a faintly colonial atmosphere and a garden which is an oasis of green calm in what must be one of the noisiest and dustiest cities in the world.

But times are changing. A fair portion of the garden has recently had to make way for a new block of teaching laboratories, and more than one council officer now serving in Egypt has been known to muse aloud on the useful profit that could be made from selling the prime-site villa for property development.

However, the work in Egypt—mainly administering aid projects and running direct teaching operations—will almost certainly escape the worst of the various current belt-tightenings.

For one thing the country is politically and economically important to Britain and the large bilateral aid programme is unlikely to be reduced seriously in the recently-announced aid cuts.

For another, there are opportunities for the council to keep up the scale of its operations both by increasing the amount of money earned by direct teaching, and by winning more contracts to supply educational services under aid projects backed by the international lending agencies.

Nine council officers and just over 20 education contract staff work in Egypt. Most are based in Cairo, but there is also a British Council office in Alexandria, on the coast at the western edge of the Nile delta, which functions mainly as an English teaching institute.

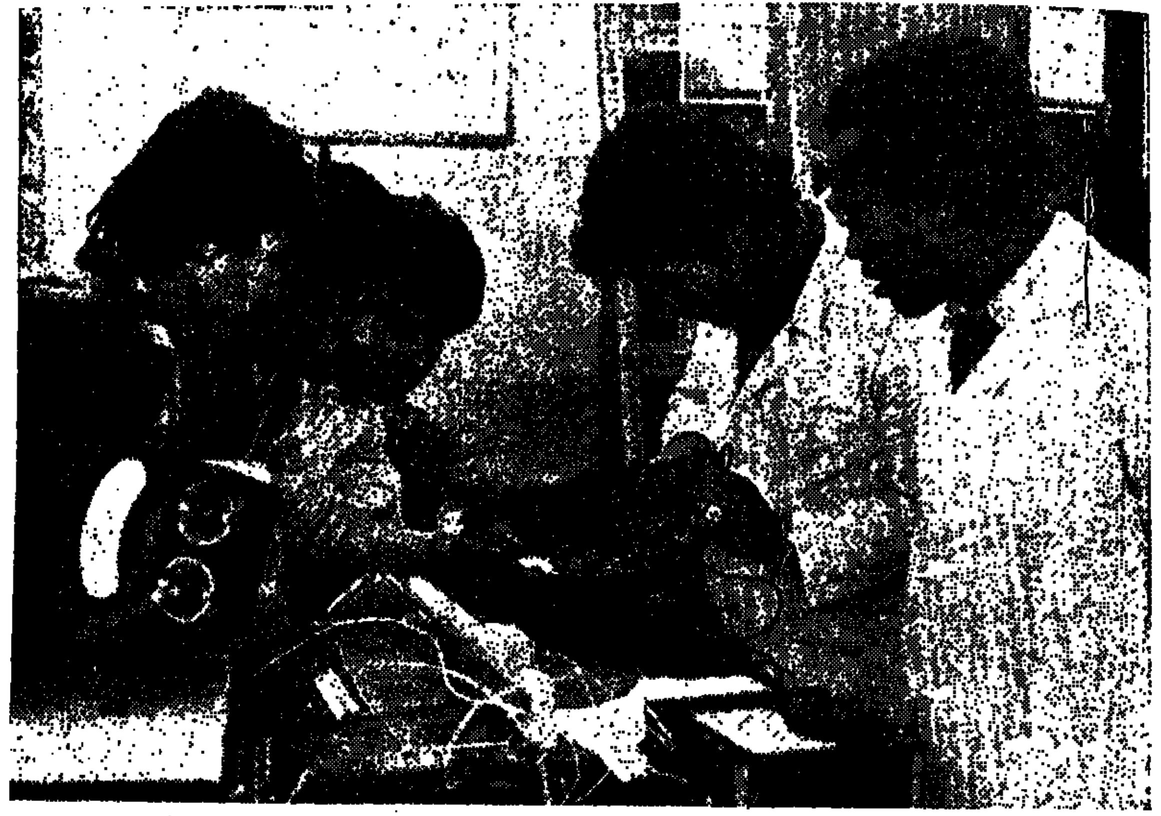
Cairo and Alexandria have about 1,200 students apiece, and both teaching operations could expand greatly if they had the staff and facilities. The demand for English lessons is enormous, but, increasingly, the trend within the council is to provide classes for organizations rather than individuals. Cairo sewerage workers are currently being sent for English language lessons at the council.

Other work involves administering technical education programmes, seeing to the placing of English language specialists in key university posts, and making and maintaining a whole range of scientific, educational and publishing contacts. There are the usual council information services, including a lending and reference library.

Eighty per cent of the representation's grant-in-aid comes from the Overseas Development Administration, and only 20 per cent from the Foreign and Commonwealth Office, and in many ways the work in Egypt is typical of council operations in the developing world.

But in other ways it is quite distinct.

Uniquely, it runs a direct teaching of science operation, which is just getting on its feet. This is based in a new building, next to the English language classrooms, in the back garden, and the theory is that fee-paying students taking science O levels will cover the cost of running practical laboratory technician training courses, for which there is a desperate need.



Students at Moharren Bey Technical School, Alexandria; work with British equipment. Boosting vocational training is an important part of the British aid programme in Egypt. Council officers administer the schemes. Internationally-funded work is now being grafted onto this particular British project.

The project cost £60,000 to get going and as yet rather fewer O level students have come forward than was hoped. If the project does not work out exactly as was originally planned, other means will have to be found to make it self-supporting.

More significantly, in terms of council developments throughout the world, much of the education and training work now being administered by officers in Egypt is being paid for, not by the British tax-payer, but by World Bank loans.

Until recently aid projects backed by the international lending agencies tended to be concerned mainly with providing buildings and equipment. Recently they have begun to want an education and training component built into the schemes.

In Egypt the council has successfully bid for contracts worth £1m under the first phases of a major World Bank education project to expand and upgrade vocational and practical skill-based training. Further phases of this project are in the planning pipeline, and the council may also be able to win contracts for work funded by other agencies, such as the European Development Fund.

"If the council in Egypt over the next three years or so can't sign contracts to the value of half a million pounds a year, I would be pretty disappointed," Dr Geoff Penzer, science officer, said. "And with reasonable luck and skill we should double that."

Such client-funded work is essentially the same as traditional council operations. "Basically we ask ourselves 'Is this a project which ODA might fund?' If the answer is yes, then there need be no theological debate over whether we should be doing it," Dr Penzer said.

It includes providing English language training in Egypt, arranging for technical training in Britain, and supplying general recruitment and consultancy services. The grassroots bridge building, which is the underlying point to much of the council's work, is simply carried on with someone else's money.

Some of this internationally funded development is being grafted on to British aid work. A technical teacher training scheme at Moherrem Bey, in Alexandria, for instance, is being developed within a technical school which has been set up with British funds and services. Such continuity along with Egypt's traditional educational links with Britain, have put the council in a good position to capture lucrative contracts.

Mr Malcolm Dalziel, the British Council representative in Egypt, is fully in favour of this direction of development. "I will make it one of my main tasks to see Britain gets as large a cut as possible of any money that is available. But the main thing about it is that it means people are still going to and from Britain."

At 43 he is one of the council's younger senior men. He joined after studying history at Oxford and has worked in Pakistan, Malaysia and the Sudan, making speedy progress up the council's hierarchy.

Pipe-smoking and direct, he almost appears to welcome the challenge of finding ways and means of continuing to get things done, even with shrinking funds.

Unusually within the council, he advocates a systematic management approach to the somewhat hazy business of cultural diplomacy, and has regular staff "prayer meetings" to discuss all aspects of council work.

His priorities for Egypt are carefully listed. Encouraging the spread of the English language comes first, helping to upgrade technical skills comes second. Third comes support for young scientists, fourth comes library development work, fifth comes work with students, and last and quite definitely least comes cultural programmes.

"We keep a deliberately low profile on culture. It would have to be done at a high level, particularly in Cairo and Alexandria and our concentration is, rightly I feel, on the science and educational side."

He has also decided not to use any funds to bring out specialist visitors from Britain, arguing that this can be funded from other sources and that the money is better used to increase the budget for visits the other way.

But like council representatives around the world, he still faces the unpleasant daily task of telling endless people that money is drying up and exchange and scholarship programmes are being cut back.

In Cairo the task is made harder by the fact that Egypt, which is not one of the world's richest countries, nevertheless feels morally obliged to give educational aid to the rest of the Arab world. There is a certain incomprehension, and a genuine sadness, that Britain no longer has funds for this kind of work among all the council's wide-ranging contacts. And among council staff there is obvious frustration, not only that work is being curtailed, but that all the many benefits they know follows in its wake will also be lost.

Malcolm Dalziel believes it is important to maximize the representation's revenue-earning capacity. "Personally I think I would have been feeling like this without the current crisis. We shouldn't have to wait for a crisis to concentrate the mind. You always need to redeploy resources, even in the good times."

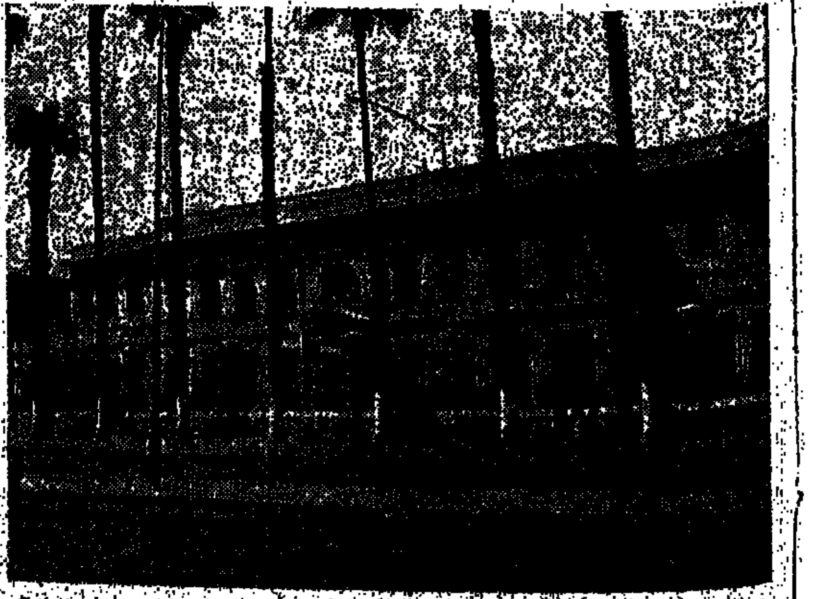
But several unknowns hamper his planning. A country policy review is in the council's London pipeline; a marketing team is currently reporting on Egyptian opportunities; and he still does not know how British aid cuts will affect work in Egypt.

What he does know is that his gross country budget has been cut by £40,000 on a 1979-80 budget of £280,000. Savings are planned through the trimming of posts, cutting back of grants and scholarships, and making more efficient use of resources such as classroom space.

But Malcolm Dalziel feels it is important not to narrow down, even in the face of such odds. He wants money to invest in getting the Alexandria English teaching operation on a better financial footing, and feels that "council work is infinite. It should be growing, should be changing and not wasting taxpayers' money in doing so."

Meanwhile he watches the vast expansion of American aid of all kinds in Egypt following the Camp David agreement, and hears that the Japanese are also becoming active cultural diplomats in this volatile and key part of the world.

"If we don't do it, others will," he said. "And are."



Cairo University: one port of call for council officers maintaining contacts at every level.

NEW

Reading and Thinking in English

A new series of four books forming a course in reading comprehension for students of English who need to read the specialist English met in textbooks, reports, articles, journals etc. The course was initially developed in a project sponsored jointly by the University of Andes, Bogota, Colombia, and the British Overseas Development Ministry in association with the British Council.

The subject-matter is varied, so that the student becomes accustomed to reading and thinking in specialized language without being biased towards any one subject. The complete course takes students from a basic level of English to one at which authentic, unsimplified texts can be understood. The course is graded but has been designed to allow for entry at any stage.

The four books in the series are:
Concepts in use (near beginner)
Exploring functions (pre-intermediate)
Discovering discourse (intermediate)
Discourse in action (advanced) available mid-1980.

There are Teacher's Editions to accompany each book. These provide a detailed teacher's guide, notes on the units, and keys to the exercises. Students working on their own should use the Teacher's Edition since it also contains a self-study guide.

For further details and a prospectus please write to English Language Teaching Department, Oxford University Press, Walton Street, Oxford OX2 6DP.

HOW OUR PRODUCTS HELP THE BRITISH COUNCIL DO A GREAT JOB OVERSEAS!

PROMOTING BRITAIN ABROAD

The best way to learn about a country, apart from living there, is to read its newspapers. Here in Britain we are fortunate in having such a wide and diverse selection, and our leading quality newspapers are known and respected throughout the world.
Many British Council offices abroad keep newspapers for the use of their visitors, and these are eagerly read by both language students and those wishing to keep up with the latest developments in their country. Newspapers themselves can be a nuisance, however, they are bulky to store, dirty to handle, and deteriorate rapidly. We have come up with a solution to these problems by being able to supply a wide selection of quality newspapers and magazines on microfilm. This has enabled many council offices to provide a wider range of publications, and longer back-file runs than would be possible using paper copies, and still be able to save valuable shelf space for other information products.

Over the past few years we have sold our microfilm publications and hard copy indexes and reference books to libraries in virtually every country in the world, and in many cases the local librarian first saw our products at the British Council office. We are very grateful for the assistance we have received from the staff of the various offices abroad, especially those in Cologne and Amsterdam, and we look forward to working together in the future—helping to promote Britain abroad.

INDEXES AND REFERENCE BOOKS
Apart from our microfilm publications, we publish a selection of hard-cover indexes and reference books. These can be used as access tools to the paper or microfilm, and as fact-finding sources in their own right.

THE TIMES INDEX
The most comprehensive and versatile fact-finding source available. Contains references to events as reported in the pages of THE TIMES, THE SUNDAY TIMES, TLS, TES and THES. The Index is published monthly, with an annual cumulative volume which provides a definitive account of the year's happenings as recorded by five of the world's foremost newspapers.

TLS CUMULATIVE INDEX 1902-1980
A new Index to the wealth of information contained in the pages of THE TIMES LITERARY SUPPLEMENT. The first part, which is now available brings together all the references from 1902 to 1939. The second part, to be published Autumn 1981, will cover the years 1940 to 1980.

OBITUARIES FROM THE TIMES 1951-1975
A three-volume set of reprinted obituaries from the world-famous Times Obituaries Columns. These volumes provide a unique source of biographical detail on 4,000 men and women from all walks of life, whose lives helped to shape the twentieth century.

BASE BOOKS

NORMAN COOK and CHRIS TTOFI

Base Books are a series of concise technical books specially designed for the foreign technical/science student who needs to be able to speak, read and write about his subject in English
Base Books have the major technical terms underlined in the text and explained very simply in the glossary
Base Books contain essential diagrams to clarify textual meaning
Base Books have exercises at the end of each chapter to test comprehension, practise basic language skills and familiarise the student with common technical/scientific language

Published so far: Air Conditioning *25430 9* Electric Lighting and Heating *25436 8* Household Appliances *25434 1* Radio *25431 7* Record Players and Tape Recorders *25433 3* Refrigeration *25429 5* Television *25432 5* plus Answers to Exercises: Refrigeration, Air Conditioning, Electricity 286 22 0 and Answers to Exercises: Radio, Television, Record Players and Tape Recorders *29314 2.*

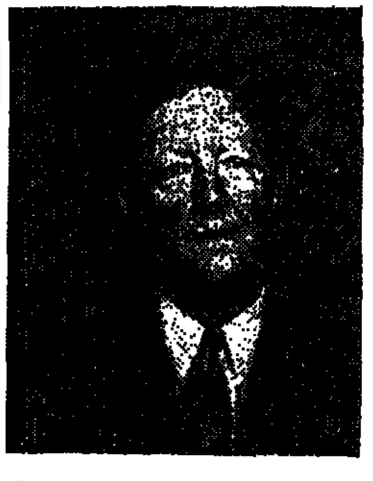
Hidden millions, acts of folly

Do we need the British Council? Does it do valuable work? Could it be done better? Critics and supporters put forward their views and suggestions



Government should not control scholarly liaisons

by Richard Griffiths

Few participants in Britain's official overseas activities in the field of higher education and research, the life blood of international intellectual relationships, would deny that these relationships are in a thorough mess and have been for most of the 1970s.

The intervention of the quango-hunters and the expenditure cutters has served only to make the situation more ridiculous, in that the various cohorts of aid administrators, primarily in and around ODA and the British Council, are being reshuffled but continue to exist; though now without enough operational money left to them, after meeting their inflating administrative costs, to undertake any significant volume of useful activities. The British Council's own scholars, the Commonwealth university interchange scheme which it financed, its specialist tourists and visitors programmes (useful but seldom very penetrative or productive of multiplier effects) have dwindled almost to nothing during the past year.

Fortunately private foundations and other agencies, being less staff intensive, have remained substantially operational. Moreover the ingenuity of academics in maintaining valued overseas contacts through hell and high water has also once again been invoked with some success. So all is not yet lost.

The present danger is that, under pressure from staff interests and in-house advisors, ministers may agree to a partial return to the Think Tank's 1977 solution of centralizing all government support for international scholarly relations in FCO/ODA, and to a lesser extent DES, as the puppeteers, with an unreformed British Council as the puppets. This would spell the end of effective intellectual collaboration between relevant United Kingdom institutions and their counterparts overseas, except to the extent that the subsidized activities of such bodies as the Royal Society and the British Academy in this field might, initially at any rate, remain exempt.

A totally different approach, involving a closer partnership between the Government and the relevant British scholarly institutions, is called for both in the interest of effectiveness and of economy in public expenditure. Its main elements are:

- The recognition by the Government that it is not for it and the British Council jointly to take over exclusive control of all international intellectual activities which in one way or another they support (a course which is being powerfully urged behind the scenes). It is further to encourage others, far better qualified, to undertake such tasks.
- The British Council should accept that their representatives' much-vaunted role as education advisers to United Kingdom missions overseas does not give them either the right or the duty to take over the devising and carrying out all scholarly contacts between overseas institutions and their British counterparts which have official blessing. They are simply not equipped to do so.
- Attitudes need to change; the British Council's functions need to be redefined and limited, its constitution and structure need to be recast; and the boundary areas between FCO, ODA and DES responsibility for international intellectual collaboration need to be thoroughly tidied up. Organizational reshuffling in itself, will achieve nothing. Nor will the pretence, beloved of officials, that international intellectual collaboration can best be achieved either by signing cultural agreements or as merely one of various elements which make up the educational sector of technical cooperation manpower and training programmes, costly agreed between them and overseas governments.

Richard Griffiths recently retired from being director of the Inter-University Council for Higher Education Overseas.

Simply shortsighted to cut libraries in the developing world

by Judith Hart

In money and staffing, half of the British Council's work overseas is financed directly from the overseas aid budget. It acts as the major executive agency of British help to developing countries in the field of education. And education is, of course, crucial to their development strategies.

I have had many opportunities to see the British Council in action in Africa and Asia and, over 10 years, to observe the subtle and important evolution of its work. The 1975 White Paper on "aid to the poorest", and the thrust of policies following it, commanded the enthusiasm of the staff. It is their commitment which is now so deeply frustrated by the cuts.

There are two crucial dimensions to British Council work in developing countries. The first is the long-standing policy of providing a library and reading room. I recall visiting these in Kampala, Uganda, in pre-Amin days, in India and southern Africa and, very recently, in Sri Lanka. Books, the source of education, are both difficult to get and too expensive to buy, and developing countries must give their priorities in expenditure to their schools and colleges.

Every reading room I have visited has been a scene of students quietly working on books they couldn't have found anywhere else. To cut any of these in any developing country (and remember that freedom of information can sometimes be less than complete—except in the British Council library) is a despicable act of folly. Yet it is to happen.

At Easter, in one developing country, two young ministers expressed their concern and anger. "I did all my reading there. It was the only place." So we sacrifice that to Friedmanism?

The second dimension is at the grassroots. High commission and embassy staffs are—almost, but not quite, inevitably—remote from "the people". They are on the diplomatic circuit, communicating only with ministers and officials. But meet a gathering of British Council people in the house of its representative, men and women working in the field, and you are talking in terms of the lives and problems of the people of the villages, in the countryside: and they know. The feedback from their work is crucial.

In recent years the Foreign Office has accepted that in many countries it is the aid relationship which is the most important element in our total foreign relations. I give a recent example. Guinea-Bissau, on the west coast of Africa, was a Portuguese colony, liberated in 1975. Its languages are Portuguese and, sometimes, French. Its ministers came to me to ask if there could be a cultural link with Britain, an institute to promote the English language, British culture and, specifically, Shakespeare. They wanted to loosen their Portuguese connexion, and did not want to replace it by a French connexion. It was a modest but important request. I understand it has now been abandoned because of the cuts. It vividly illustrates the point.

I do not enter into the argument about reductions in British Council work in European and other industrialized countries, which clearly affect, in spin-off, the arts here. What I do know, and what angers me deeply, is that the savage cuts in overseas aid are to reduce the British Council capacity for its immeasurably valuable work in the developing countries. It is foolish and shortsighted. In my view, it is immoral.

Judith Hart is Opposition spokesman on overseas development and a former Minister of Overseas Development.

Relationships must move towards interdependence

by Richard Jolly

Growing interdependence in economic matters is a cliché of the international world, but its implications for education and cultural exchange are still woefully neglected.

We joined the EEC seven years ago, but still fewer than 1,000 students from Community countries are studying in British universities or other institutions of higher education. In the United States a Presidential commission recently reported that the percentage of Americans studying a foreign language in high school had fallen from 15 per cent 10 years ago to eight per cent today—an appalling commentary on a nation's preparation for international understanding, as the commission rightly observed.

The Brandt report is the latest and most authoritative international document to stress that the fastest growing area of interdependence is between the developed and developing countries. It is also an area where over the next two decades the industrial countries must establish new types of relationships and approaches if their own economies are to regain long-run dynamism.

All this has direct implications for how we in Britain restructure our own educational and cultural relationships with developing countries. We are preoccupied by cuts at a time when the need is for restructuring and innovation, not just reductions. We need to move to a pattern of relationships related to *interdependence* in the 1980s and moving beyond the post-colonial concerns with *independence* which set our guidelines for the 1960s and 1970s.

What are the elements for such a new approach?

First the recognition that relationships must be built on mutual interests, openly acknowledging that in our present economic predicament we in Britain have just as much at stake in these relationships as the other partners involved. Trade and commercial links are one part of these relationships, but they go far beyond this. Ultimately, it is the recognition that in an interdependent world first-hand contact and professional understanding of the situations and perceptions of other countries is a vital part of tackling one's own problems.

Second, we need to be forward-looking to protect and develop the types of educational provision which are likely to be in growing demand. Developing countries will increasingly turn to Britain not for general education or training to fill basic gaps in their own systems but for high quality, educationally innovative, and technologically superior forms of higher education and study. Centres of excellence in Britain will have a premium, providing, of course, that the costs of attending them remain internationally competitive with those of other industrial countries.

Education and training which directly relates to those parts of British industry and professional practice which are internationally competitive will also be important, especially when other countries, aware of their own interdependence, wish to gain first-hand experience "inside Britain". Where we have needs for overseas experience, this can become a place for exchange agreements built on a genuine basis of two-way exchange.

The growing use of English as an international language is likely to provide us with a ready market and opportunity. A great deal of activity has already developed in this area, but much more is possible.

Finally, support for academic refugees is likely to remain an important area where humanitarian concerns can readily overlap with long-run mutual gains.

The refugee problem is widespread, not exceptional, stimulated by excesses of both right and left in many countries. It can affect the development and cultural pattern of countries or whole regions, like the southern cone in Latin America, or Uganda and Rhodesia, for a decade at a time.

Yet if Britain can maintain the sorts of programmes established over the last few years, the individuals it welcomes can prove to be useful friends in the years ahead. Yesterday's students in exile, today's refugees abroad, may well be tomorrow's heads of state and cabinet members, or if they remain in Britain, may be the Einsteins and Schumpeters.

The British Council is well set up to play a continuing part in all of these educational roles. What is now needed is to recognize the importance of maintaining and further developing this work for our own long-term survival.

Richard Jolly is director of the Institute of Development Studies at the University of Sussex.

Council now earns many more hidden millions

by William Clarke

The traditional idea of the British Council—a lecturer on literature discussing "streams of consciousness" to a small uninterested group in post-war Vienna—owes a lot to the film *The Third Man*. It was always unfair. But it contrasts strongly with present reality when the British Council has become a remarkable earner of invisible income (that is foreign income derived from offering a service to foreigners), in a variety of enterprising ways.

While the British export trade is constantly encouraged to learn (and use) foreign languages in overseas markets, the British Council is quietly smoothing the path of exporters in the opposite direction by teaching English to the foreigner and earning a nice penny (or rather franc, dollar or yen) for its exertions. This is done at home and abroad. Up to about two or three years ago the council probably earned no more than £2m a year in foreign income.

But since then two new areas have been developed significantly. In the first place the council has begun to teach English on a contractual basis with both overseas governments and foreign businesses. Hong Kong has been a particularly receptive area. These exercises alone are bringing in £9m a year. There are also the natural spin-offs to the book trade. Since the total foreign earnings of the book trade is probably running at £350m annually it is likely that at least £100m of this, if not more, can be attributed to the council's educational efforts.

Secondly, the British Council has been expanding its offerings of educational packages overseas, especially in the richer of the developing countries. Earnings from these educational activities are believed to be over £6m a year.

Beyond these precise activities the British Council, by its own exertions, encourages and helps other invisible exporters overseas. It is naturally difficult to quantify what these spin-offs might be. But a short time ago the British Council, in an attempt to assess earnings from Japan alone, estimated that perhaps £25m had been earned from its efforts.

My own committee, the Committee on Invisible Exports, has been particularly keen to benefit further from the British Council's activities in foreign markets. At a discussion 18 months ago, it became clear that the British Tourist Authority and several City financial institutions might benefit from joint talks with the British Council in the field of private technical education.

The British Tourist Authority in particular was under pressure to provide services of this kind, covering expertise in transport, catering and tourism generally. Beyond this were the needs of developing countries in computer technology, accountancy, and financial expertise.

The British Council, it was felt, could, through its network of overseas posts, direct foreign clients to this variety of expertise in Britain, in exactly the same way as it was doing in the normal educational field.

William M. Clarke is the director-general of the Committee on Invisible Exports.

Cuts will force a definition of objectives

by Tessa Blackstone

The old image many had of the British Council was of an organization, based abroad, full of scholarly but slightly effete gentlemen peddling British culture to foreigners.

Some still retain this impression, but it is a false one. The days of Olivia Manning's *Balkan Trilogy* are gone. The majority of the Council's British staff are in fact based in London, although its more senior employees divide their time between overseas postings and work in the UK. Most of them are employed on the administration of educational aid, which accounts for the largest part of the council's expenditure. Spending on the arts forms a fairly small part of the total. The rest is on educational interchange with developed as well as developing countries, libraries abroad, the sale of books and English language teaching.

Some are claiming that the substantial cuts the council is suffering from is one method the Foreign and Commonwealth Office is employing to avoid cutting its own activities so much. Whether this is true or not, both organizations can sustain fairly large cuts and emerge more streamlined and effective.

The cuts exercise will, of course, be painful for the council. Some people, particularly locally-engaged staff abroad, will lose their jobs. Some activities which give pleasure will have to be curtailed, for example some libraries will have to close. But if the cuts exercise is properly conducted it will confer a number of benefits.

First it will force a clearer definition of objectives. The council's multiple objectives have up till now not been as clearly defined in terms of high and low priority as they could be. The argument employed has been that their activities are part of a seamless robe that cannot be taken apart. But seamless robes are extravagant and old-fashioned garments on which we cannot rely.

Second, it will force a more rigorous and indeed sceptical examination of how far some of the methods employed really achieve these objectives. There has perhaps been a little too much casting of bread on the waters without enough checking up on who, if anyone, picked it up. The problem here is that it is hard to quantify the benefits that may or may not come from many of the council's activities.

Third, it will force a more commercial attitude on the council, which is particularly needed in English language teaching.

Lastly it may focus attention on some of the more wasteful administrative procedures which have been apparent in the past.

Space does not permit me to elaborate much on these principles. I would like simply to list a few points that seem worthy of Mr John Burgh, the new director-general's, consideration.

Streamline the council's committee structure. It is over-elaborate, with too many committees which have too many members with too much vested interest.

Get into the business of English language teaching on a profit-making basis in developed countries fast. There is a large and as yet only partly exploited market here.

Stop mollycoddling overseas visitors in the United Kingdom on British Council invitations. Most of them can look after themselves, and if it is made clear from the outset that that is expected, most of them will not mind.

Put pressure on the ODA to simplify stipends for overseas students. Some rough justice may be necessary to cut the administrative costs of regularly reimbursing students for small amounts for items such as fares.

Fight to maintain the educational aid programme, especially at the primary, secondary and technical levels. This is where the council's most worthwhile and important work lies.

Tessa Blackstone is professor of educational administration at the Institute of Education and was a member of the Think Tank team which reviewed overseas representation.

EDUCATIONAL POSTS OVERSEAS

SENIOR LECTURER IN ENGLISH LITERATURE
(POLAND)
Institute of English Studies, University of Lodz.
To teach English Literature with historical background and English composition.
Qualifications: Ph.D. in English Literature or equivalent and at least 3 years' university teaching experience.
Date of Appointment: September 1980.
Salary: £8,150-£11,224 p.a.
Benefits: free accommodation; employer's contribution to superannuation scheme; overseas allowance; one year Formula contract, renewable. 80 B 42

DIRECTOR OF STUDIES
(DUBAI, UNITED ARAB EMIRATES)
British Council Centre, Dubai. Required for September 1980.
To administer the teaching operation, to help the British Council Regional Director in pursuit of EFL/ESP contracts, training local staff and supervising the Resource Centre and Language Laboratory.
Qualifications: U.K. citizens aged between 25-35 with a degree, TEFL qualification and minimum 2 years' EFL experience essential. Postgraduate TEFL diploma and experience of ESP course design and implementation desirable.
Salary: £7,701-£9,480 p.a. Tax free.
Benefits: Overseas allowances, free furnished accommodation; employer's contribution to superannuation scheme; 2 year contract, renewable. 80 D 42

ASSISTANT DIRECTOR OF STUDIES
(SYRIA)
British Cultural Centre, Damascus. Required for October 1980.
To assist the British Council English Language Officer in setting up a new English teaching programme. 15 hours' teaching plus supervision and training of locally engaged teachers and preparation of supplementary materials.
Qualifications: U.K. citizens only. Degree and TEFL qualification, plus 3 years' relevant experience are essential. A qualification in linguistics and 5 years' previous experience in course organization preferred. Age 25-40. Married applicants where spouse qualified for local teaching contract or single candidates preferred.
Salary: £6,415-£8,295 p.a. tax free.
Benefits: Furnished accommodation; overseas allowance; outfit and baggage allowances; 2 year contract; employer's share of superannuation contribution. 80 D 41

2 LECTURER SUPERVISORS
(PORTUGAL)
The British Institute, Lisbon.
Two Lecturer Supervisors, tenable 1 September, 1980.
Duties: To co-ordinate teaching at a particular level, to advise Assistant Director of Studies on syllabus, liaison between management and teachers, to assist in training of Portuguese Teachers of English and in-service training of Institute teachers, some teaching duties.
Qualifications: Degree and PGCE, 5 years' teaching experience; 2 years' teacher training experience.
Salary: £6,415-£8,295 p.a.
Benefits: Baggage allowance; accommodation allowance; 2 year contract; 45 days annual leave. 80 D 32-33

TEACHER OF ENGLISH
(PORTUGAL)
Casa de Inglaterra, Coimbra.
Duties: To teach English Language at all levels for 24 hours per week. Some administrative duties.
Qualifications: Single candidates only; a degree and four years' EFL experience. PGCE preferred. Age 25-30.
Salary: £4,377-£7,047 p.a.
Benefits: Medical; baggage allowance; 45 days' annual leave; 2 year contract. 80 D 34

TEACHERS OF ENGLISH
(PORTUGAL)
Associacao Luso-Britanica de Porto (British Institute Oporto).
Required from September 1980. 2 teachers to teach English as a Foreign Language for 24 hours per week at all levels from beginners to advanced. Candidates, single persons or married couples both qualified to teach, should have a degree and two years' experience. A postgraduate qualification in TEFL is desirable.
Salary: £3,552-£6,064 payable in Escudos.
Benefits: Baggage allowance; medical; two year contract. 80 D 29-30

THREE TEACHERS OF ENGLISH
(BRAZIL)
Sociedade Brasileira de Cultura Inglesa, Sao Paulo.
Duties: To teach English as a Foreign Language for 24 hours per week at advanced level. Some administrative duties.
Qualifications: Degree (preferably English, Languages or Linguistics) and postgraduate qualification in TEFL, three years' TEFL experience, preferably overseas.
Salary: Cr$480,000-Cr$800,000 p.a. (approximately £4,705-£5,882 p.a.).
Benefits: Return fares; baggage allowance; medical and dental expenses, employer's share of superannuation; 30 days' annual leave; 2 year contract. 80 D 38-40

Return fares are paid. Local contracts are guaranteed by the British Council. Please write briefly stating qualifications and length of appropriate experience, quoting relevant reference number and title of post for further details and application form to The British Council (Appointments), 65 Davies Street, London W1Y 2AA.

Picture Cue Cards for Oral Language Practice
J.Y.K.Kerr

A unique approach to the use of visual aids for oral language practice at all levels. The six packs of fifty durable picture cards, many in full colour, cover basic vocabulary items in the fields of Household Objects, Everyday Activities, Food and Drink, Clothing, Local Places and Occupations. The Teacher's Handbook shows how these cards can be used with students of all ages and levels working in pairs or small groups. The cards act as cues for anything from highly controlled practice to free communication activities, developing the student's knowledge of English structures and functions. Find out more from your local booksellers.

Evans Brothers Limited, Montague House,

Evans

English language teaching is an important export.

The Centre for British Teachers provides English Language teaching programmes to foreign countries. We work closely with the British Council and overseas governments in order to introduce and run well organised and worthwhile teaching schemes.

Close ties that we have with government departments around the world are indicative of the importance of the English Language in international communications. One could say that the English Language is one of our country's most important exports. There is certainly world-wide demand for the services of the Centre.

Two excellent examples of our work have been the Centre's scheme in Germany, involving five West German State Governments, and the scheme with the Malaysian Government. In West Germany over 2,000 teachers have served with the Centre over the past ten years teaching in Secondary Schools and Continuation Colleges. For the academic year 1980/81 the Centre will have more than 170 British teachers in Germany.

In Malaysia, the Centre has 45 teachers currently serving in Malaysian Lower Secondary Schools. A further 80 teachers will join the scheme before Christmas this year and a further 75 before Christmas 1981. This means a total of 200 Centre teachers serving with the Malaysian Government. The British Council fully supports this scheme and has seconded one of its senior officers for a Key English Language Teaching (KELT) post, funded by the UK Government. This Centre scheme was successfully launched six months ago.

If you would like to know more about the activities of the Centre please write or phone:

Network of regional offices to be hit by closures?

Local centres in Britain look after visitors and liaise with universities and colleges. How necessary are they? Sandra Hempel visits Southampton, whose future now is uncertain

As the British Council decides how to make the spending cuts demanded by the Government, the future of its Southampton office hangs in the balance.

Southampton was a key town in the days when most students and visitors arriving under the auspices of the council came by sea. Now, however, the office is particularly vulnerable, according to its director, Mr Peter Mackenzie Smith, and the excellent road and rail links with London may well lead to a decision to administer the south of England direct from the capital.

The Southampton regional office, together with its sub-offices in Brighton and Canterbury, covers Hampshire, Sussex, parts of Surrey and Kent, the Isle of Wight and the Channel Islands.

The offices employ 15 people between them, including secretarial staff, and last year spent a total of £105,000 on running costs, including salaries. During the year 1978-79 the region had 430 students staying for more than three months and 350 staying for less, with another 515 short-term visitors.

The Southampton office, which operates out of very modest premises, has in its catchment area the universities of Southampton, Sussex, Kent and Surrey and polytechnics at Portsmouth and Brighton.

A regional office has two main functions. One is the responsibility for the welfare of those in British Council care, whether they are trainees on a two-year college course, or a delegation of overseas ministers of state on a week's study tour. This responsibility includes finding accommodation and providing the back-up administration and organization. In the case of students it includes helping people to adjust to their new surroundings and providing any other advice or moral support that might be needed.

The office's other priority is keeping close ties with local education institutions and education authorities, and acting as a link between them and London, advising the latter about any changes or new developments. The council's unique list of all higher education courses in Britain must be kept up to date.

"The council is sometimes described as a middleman between British culture and achievements and those who can benefit from them", Mr Mackenzie Smith said. "In the same way a regional office is the middleman between the region and the London headquarters."

An important part of his work is arranging short visits and study tours. These can be on any topic from school locations to town drains and the participants come from all over the world.

"This is a balancing act because we have to ensure the continuing goodwill of the institutions and individuals with whom we deal. It can only be done by seeing that they get some benefits in return for the help they give."

The problem is that the council is geared to meeting initiatives and acting on ideas that come from overseas. It is much more difficult to get a British-born scheme off the ground.

"Southampton University, for example, has one of the best electronics departments in the country. It is of great interest to the people in it to meet their opposite numbers in countries with similar track records. A visit from Japanese electronics experts is more mutually helpful than one from say, Swaziland, where the benefits are rather one-way. It is important to try to match what we, the British Council, want with what we can give back to the people providing it."

Local education authorities are particularly interested in talking to their European counterparts and it is this type of need for which the council should try to cater, Mr Mackenzie Smith believes. He sees an important part of his job as identifying the demand for this sort of cooperation and encouraging it.

For the students, the office's work consists mainly of administration and providing what Mr Mackenzie Smith sees as a safety net.

The staff are involved very little in academic matters. The selection is done overseas and the regional office is very much at the end of the line. If the selection and preparation work has been done properly, and it tends to be a fine art now, the region is receiving people who are highly likely to succeed. They are qualified for their particular course of study and highly motivated.

The regional office receives details and official documents for the student together with a recommendation about where he or she should go. The office then places them at the chosen institution. Once accommodation has been found and the student settled into it, the amount of contact he then has with the office is up to him.

"There is a continual debate about how much you should look after the student. It is sometimes suggested we should send them a ticket and a cheque and let them get on with it. In my view this is very dangerous. Universities and polytechnics often have their own welfare departments which means we are not needed, but many colleges of further education and technical colleges cater mainly for the local community and have no welfare provision. We don't cosset the student but we do try to provide a safety net should he need it. After all, the Government is investing money in him and it seems sensible to do what we can to see that the investment is protected."

Miss Jo Easton, one of three officers based at Southampton and responsible for day-to-day administration and liaison with students and visitors, believes that personal contact is vital. She regrets the loss of the region's social centres, closed because of lack of money, which provided a haven for many otherwise lonely and disoriented people.

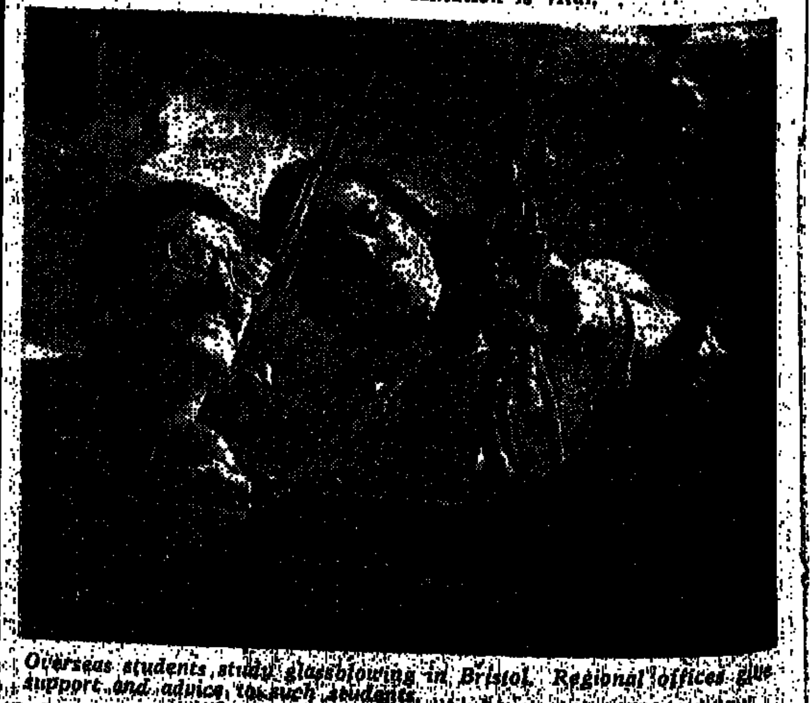
At any one time she has around a hundred people on her files. "With many it is just a question of finding them good accommodation and meals and letting them settle in, but others do have problems in adjusting. We used to have to teach many rather basic stuff, such as not to appear in front of their landladies unclothed. Now they seem more sophisticated but it is often only a veneer. Sometimes we get people who keep calling into the office on some pretext or another when what they really want is some reassurance and contact."

There are sometimes surprises. The 20 Rhodesian students straight from the bush of a war-torn country settled in to do their A levels with no problems. But, since official contact with Rhodesia was banned, the council had to deal with each student individually, from London.

A group of Chinese students at Chichester College of Technology proved to be a resounding success. "The college was delighted with them and the students' only complaint was that the holidays were too long."

Mr Mackenzie Smith believes that the crucial question, and the one which will determine the fate of Southampton, is whether the council needs the close relationship that the office has built up with local institutions in order to do its work.

"In my opinion, yes we do. Obviously it is a luxury to some extent and as our level of activity is reduced so the provision for it will decrease. It does not need a large office but some sort of local representation is vital."



Overseas students study glassblowing in Bristol. Regional offices give support and advice to such students.

Three ways to spread the printed word

Libraries, exhibitions and low-priced books are means by which the English language is encouraged world-wide. British publishers are among the beneficiaries. Sandra Hempel reports

Exhibition of art books in Leningrad.

The British Council's library and book work falls fairly neatly into three categories.

First, and best known, there is its network of English libraries overseas which, the council claims, forms one of the finest lending, reference and information services in the world. There is a library in nearly every country where there is a council office and in some countries, such as India, where there is no public library service, the demand is huge and the facilities extensive.

The libraries aim to specialize in books which meet the particular needs of each country and to keep students and others in touch with the latest British developments and achievements. They also provide the basis of the council's information service and help its work in education, English language teaching and science. The libraries vary from small reference collections to some with over 100,000 books.

Another important part of the council's work is its book promotions and exhibitions. Between 200 and 250 exhibitions a year are now held, varying in size and style from the council's participation in the Frankfurt Book Fair, the world's largest book exhibition, with a display of 6,000 books, to travelling collections of English teaching books touring the remote villages of underdeveloped countries in the back of a Landrover.

The third, and perhaps most threatened of the council's book work, is the low-priced books scheme. This is run on behalf of the Overseas Development Administration and through it the council sells tertiary level English textbooks to institutions and individuals in the Third World at between one half and one third of their normal price.

There are around 500 titles in the scheme and new ones are continually brought in. Many are used by universities as standard text books. This means the council has to ensure that none of these vital books are withdrawn, while still introducing the best of new publications.

"We work closely with the book trade," Mr Richard Goffin, deputy controller of the books division said. "We work, often though formal committees, with organizations such as the Publishers' Association and the National Book League, and with individual publishers, booksellers and sometimes with individual authors."

The book trade in Britain is very export-minded with 43 per cent of its output going overseas.

Subject suggestions for exhibitions and promotions usually come from the British Council office in the host country, whose staff are best placed to gauge local needs and interest. Other suggestions come from the publishers themselves and from independent experts who are frequently invited to choose books. The subjects range widely but most are in the medical, scientific and technical fields, or on English language and English teaching.

Among the suggestions for 1980-81, which must now be under a question mark, are: computer application, for Australia; telecommunications, Bahrain; teacher training methodology, Finland; educational technology, Jordan; and Open University texts, Poland. A request has come from Sierra Leone for an exhibition of books on primary teacher training and educational methods and the council officer notes that the subject is of major importance. "Despite the economic situation, books shown in previous exhibitions are being stocked by book sellers", runs the note.

As part of its promotion work the council produces a monthly journal, *British Book News*, which contains synopses, rather than review of forthcoming publications. It also runs a small department responsible for getting British books reviewed in overseas journals. It has a 60 per cent success rate.

The council provides other services to overseas students, book buyers and librarians. It organizes programmes for foreigners who want to study aspects of the British book world and every two years runs a training course for 25 librarians from developing countries. It has what are believed to be unique archives on the nature and trends of the book market in every country in the world. These are of particular value to book firms wanting to break into new markets.

English language teaching exhibition in Lahore.

"A lot of our work consists of helping those who would not otherwise be helped," said Mr Goffin. "If you are a librarian in the Gulf States and you have a query on British books where can you go for help except to the British Council? Individual publishers, if they have time at all to deal with queries of this kind, can only be expected to give information on their own books."

But with the current expenditure cuts it looks very much as though in future the man in the Gulf States will have his questions unanswered.

The cuts threaten all aspects of its library and book work. If overseas offices close then libraries will close and the lack of presence in a particular country will have the spin-off effect of making it very difficult and more expensive to hold a book exhibition in a country where there is no organizational base.

As a promoter of British books, the British Council's critics say it uses taxpayers' money to do what the book trade should be doing for itself. The present government is known to believe in encouraging industry to help itself and arguments about the difficulties that the book industry will face if the council cuts back its activities have so far fallen on deaf ears.

The British book industry is facing hard times. The high cost of printing and postage in Britain, the strength of the pound abroad, and the growing tendency towards "piracy" — illegal reproduction without paying for copyright — are only some of the factors which threaten British books.

Many British publishers are now printing in cheaper countries such as the United States and Hong Kong while foreign firms, including many Dutch and Scandinavian companies, are producing more and more books in English.

In an increasingly competitive world, other governments, including the French and Germans, are increasing their assistance to their publishers.

"If the British book industry is to survive then the Government should be providing more support instead of withdrawing what little help is available," Mr Goffin said.

Instead, however, its exhibitions, currently costing around £150,000 a year, are likely to be cut by around 20 per cent this year with more cuts in 1981-82. The cuts will affect both the numbers of exhibitions held and the size of whatever participation does continue.

It will hit hard the effort to export more books, Mr Goffin believes.

"A publisher's decision to send a representative to, say Korea, depends on whether a reasonable demand exists for British books. In many parts of the world booksellers are scarce and their stocks limited. They will only order a book if there is a demand for it and it is only by promotions and exhibitions within a country that you create a demand. Without it publishers cannot justify sending a salesman. It is a vicious circle."

In the same way the low-price scheme could collapse altogether, he believes. "It will gradually die if no new titles are brought in. Students in many developing countries can scarcely afford to buy even the subsidized books."

Mr Malcolm Rowland is secretary of the Book Development Council. His organization has made strong representations at, he says, "the highest level" against the cuts but he is not optimistic about the outcome.

"We came out against the Think Tank's proposals to run down the British Council and were successful but I think it is a different situation this time."

There are rumours, Mr Rowland said, that the low-priced books scheme will have its subsidy cut from £2m a year to £800,000. If this is true, it will make a nonsense of the scheme, he said.

"We are very worried indeed about the cuts. We strongly value the British Council's work in the entire book scene. Their offices overseas are our ears and eyes, feeding information back to us. If the cuts go ahead it will be absolutely disastrous."

Many people come to the United Kingdom on short courses, which are also organized for people already in the country. Here diplomats are given a brief introduction to British education.

Tens of thousands of students and visitors pass through British Council hands every year. Sandra Hempel reports.

Two-way traffic

The British Council is by far the largest agency for bringing overseas students and academics to Britain, It is also, according to the controller of the council's home division, Mr James Ure, the most successful organization of its kind anywhere in the world.

Students come from underdeveloped countries and, increasingly, from highly industrialized, wealthy countries such as West Germany. They come via the council's greatest strength: its network of 120 overseas offices. Last year 16,000 students and visitors were brought to Britain and it was arranged for 3,000 British experts and academics to go abroad. The council also helped 10,000 foreigners and 14,000 Britons to participate in youth exchange schemes.

The largest group of students—around 15,000—come to Britain through the technical cooperation scheme, part of Britain's official aid programme to developing countries. The council acts here as an agent for the Overseas Development Administration. The courses chosen have to meet the specific needs of the benefiting country. The "approved" areas of study vary slightly depending on the needs and circumstances of individual countries but many are common to all. Subjects such as health, public administration and agriculture are high on the list.

Each overseas government is told the size of the British training programme and the budget for the year and asked to nominate individuals most likely to benefit. The nominees are then selected by the council, given any help with use of English that might be needed, and given a basic briefing and orientation programme before arriving in Britain.

Students coming in under the aid programme have their fares, accommodation and fees paid by the ODA. The irony is that the increased fees for overseas students planned by the British government will also have to be paid by the ODA. This could result in a cut of around 10 per cent in student numbers for the scheme this year and another 10 per cent next year, according to Mr Ure.

The other smaller but rapidly growing groups of students coming into Britain via the council include those on other aid programmes. There are 16 United Nations-funded schemes, provided through agencies such as the World Health Organization. There are also those sent by the EEC through the European Development Fund, which is aimed at Third World countries. At the moment Britain gets more than half of all the trainees financed by the EDF. There are currently 330 of them in Britain and the number is growing. The council now has its own EEC representative in Brussels, who works quite separately from the Belgium regional office.

The council acts as an agent for the EEC and the UN and is paid by them, in the same way that it acts for the ODA. Britain gets the greatest share of EEC and UN-funded students because of the British Council's ability to look after them, according to Mr Ure. "No other country has anything to compare with the council. It occupies a vital position half-way between a government department and a private organization."

Another rapidly-growing category is the country-financed student group. For a full economic fee, the council will act for any country which needs its services and can afford to pay. The Middle East countries, with their vast oil wealth and huge demand for skilled manpower, are major customers.

"Around 1,500 people a year come under this scheme. An important bonus for the institutions receiving these students is that the council underwrites the training cost. The colleges are thus reassured that, whatever the political developments in the countries concerned, they will be paid. "The council is generally regarded as a good bet," Mr Ure said.

Students can normally study whatever their countries wish, but they invariably come to do soundly practical courses in subjects such as engineering.

There are other courses for which the initiative has come from the council itself. These are the specialist short courses where the sender country pays the full cost. The aim is to give overseas professionals and experts the chance to learn at first hand techniques and developments in which Britain is a pioneer.

Many of these are in the medical field but a particularly successful course, now in its twenty seventh year, brings bankers from countries such as Switzerland, Japan and the United States to study the workings of the City of London.

People sent abroad by the council tend to be academics and teachers rather than students. Academics go on sponsored lecture tours or advisory visits, sometimes in direct response to a request and sometimes on an exchange basis as part of a cultural agreement. Such exchanges are frequently with Eastern European countries.

The second category of Britons going out are teachers at any level from school to university. They are employed on council contracts to do specific jobs, usually for two years. Many of them are specialist English teachers. The council's involvement varies from acting as a recruiting agent to the supplying of a university professor free to a country under the British aid programme.

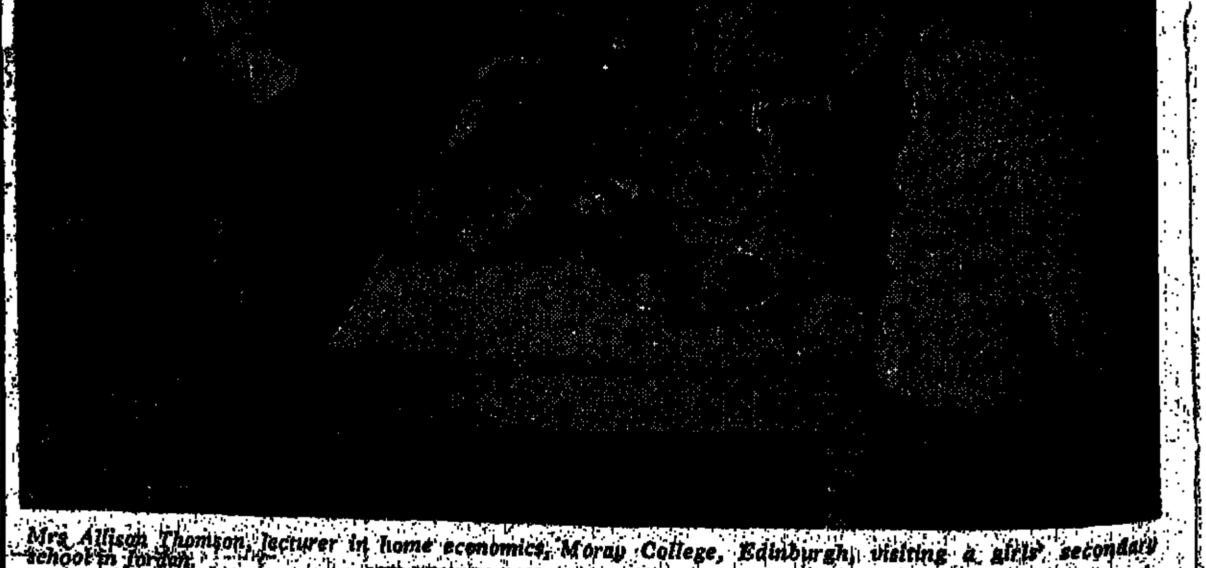
Although large numbers of young people take part in youth exchanges every year, the council plays a minor role which is usually confined to providing a small amount of money.

The youth exchanges are usually with Western European countries, particularly France and Germany. Some come about through the town twinning scheme which was initiated by the council.

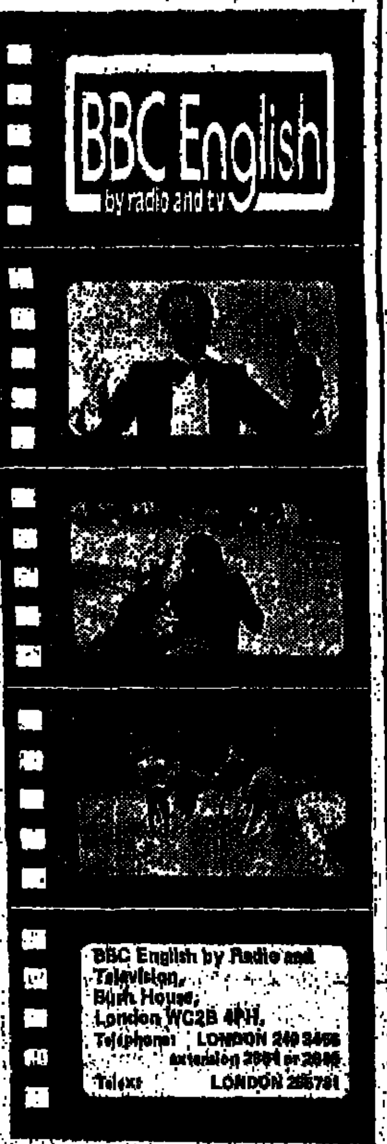
"In these cases the council acts as an initiator. We get schemes off the ground and, as the thing gains momentum, gradually withdraw leaving those involved to carry on the scheme with perhaps a small financial contribution from us," Mr Ure said.

It is this innovatory role which is particularly threatened by the spending cuts, he believes. There will be no funds available for new schemes, while all the council's well-established activities in bringing students and visitors in and out of Britain will be affected.

Whether the decision will be to close down certain overseas offices and pull out of countries, or whether it will be to maintain a greatly reduced presence in most countries, council officers are convinced that such will be the level of the cuts that they will do irreparable damage to the council's structure and its machinery for training cooperation and exchange.



Mrs Allison Thomson, lecturer in home economics, Moray College, Edinburgh, visiting a girls' secondary school in Jordan.



THREE NEW VIDEO COURSES
IN COLOUR
FROM THE BBC

Follow Me

A video series in sixty quarter-hour lessons for beginners, covering the Council of Europe's "Threshold Level" syllabus, with support materials for institutional use and for self-study.

The Sadrina Project

An intermediate level drama serial in twelve episodes, on travel and the tourist business, filmed in London and resorts in the Far East. With audio-cassettes and students' and teachers' handbooks.

Challenges

Six twenty-minute documentaries for advanced learners. Films and video-cassettes from the BBC. Complementary teaching package from Longman English Teaching Services.

Other BBC English film and video productions include: ON WE GO, a 30 episode beginners series; PEOPLE YOU MEET, a 26 episode intermediate series; THE BELLCREST STORY, a 13 episode advanced business English series; and SONGS ALIVE, English through traditional songs.

Call for UK cultural diplomacy policy

continued from page 51

scratch . . . they would not invent the British Council," the Think Tank team wrote.

But as Dr David Owen pointed out when he was Foreign Secretary, if the council ceased to exist something similar would have to be invented. It survived the Think Tank's recommendation and in the rationalization of the muddled area of international educational cooperation now going on, it is other organizations which are going to the wall.

Talks are now taking place to decide how the Inter-University Council will be incorporated into the council, while TETOC, an independent ODA-funded company working in the technical training field, is to be taken over by the council from next year.

Already an octopus of an organization, it is likely to graft on these two new arms without too much trouble.

In fact it is this multiplicity and flexibility—the very qualities which make it so hard for outsiders to get a clear picture of the council, and which cause much bureaucratic time-wasting—that make it almost certain to survive, whatever the odds.

Over the years it has learnt to accommodate itself to circumstances. The circumstances at present are bleak, and one arm of its operations which therefore seems set to grow fast in these post-oil crisis years is the provision of paid educational services.

Since its early days the council has made money from holding English classes. There are large direct teaching programmes in a number of countries, and the largest one (since the Iran operation closed down) in Hong Kong, has 8,800 students and brings in nearly £900,000 a year.

Other educational services are paid for either by the country concerned, in the case of relative wealthy countries like Saudi Arabia, or, increasingly, by the international lending agencies such as the World Bank, and the Asian Development Bank.

Until recently aid programmes funded by such agencies tended to concentrate on the provision of buildings and equipment. Now they have begun to include "liveware" in the programmes, and lucrative contracts to provide training and personnel have been up for auction.

At the time of writing the council had, since 1975, signed contracts to the value of almost £10m, although this figure could have jumped enormously with several bids for major contracts now in the pipeline.

The work now done under such contracts is essentially the same as traditional council work—sending people for training in the United Kingdom, recruiting specialist staff, providing English language training and helping to set up education institutions—and is a very useful way of continuing to promote British international cultural interests with someone else's money.

But competition for these contracts can be stiff and the council is having to take cautious steps to sell itself harder. One hundred thousand pounds has been spent on promotional material, and the consultancy services of Lancaster University's marketing department have been called in. A development unit has been investigating the market potential of certain promising countries and its report, recommending "investment to accumulate", is under consideration.

Dr John Blackwell, director of the educational contracts department, feels expansion in this direction could give the council "an added something, a kind of gingering up", but officers working in this area are obviously frustrated by the difficulties of trying to work in a business-like manner in what is not, and never has been, a business organization.

Equally, the market place is not an entirely comfortable place for officers who see themselves primarily as cultural diplomats. Words like "profit" and "client" do not slip easily from their tongues, and there is considerable soul-searching in some quarters as to how the British Council could continue in its official role if it began to earn all its own revenue.

The argument, however, is academic. Sir John Llewellyn, the council's recently retired director-general, feels sure the volume of paid educational services will continue to grow, "but fairly slowly". The new director-general, Mr John Burgh, who comes to the job from the Department of Trade, seems likely to encourage this trend, but even so the job-lot of different roles the council is asked to fulfil make it highly unlikely that it could ever metamorphose itself into a streamlined educational contracts business, even if that was considered desirable.

Meanwhile, on a day-to-day basis, the hunt for savings goes on. The first round of cuts was seen as hard, but fair. The second round was a body blow. "Over 20 per cent is simply unreasonable," Sir Charles Troughton said. There is resentment that the Foreign and Commonwealth Office has not been similarly hard hit, a feeling that reflects traditional tensions between the two bodies.

Still further curtailment of council work is in the pipeline. The aid programme is to be cut back by 14 over the next three years, and with it, no doubt, that part of the budget allocated to educational aid and administered by the council.

No doubt the British Council will soldier on in its traditionally accommodating way and, as ever, no one will be able to say what exactly has been lost by the cutbacks in its work.

And the time and effort wasted in implementing stop-go policies will continue until, as Sir John Llewellyn has said, "There is a government policy as to what it is they want the council to do; whether they accept that it is a valuable investment to put money into educational and cultural diplomacy. At the moment we simply have no policy in this field at all."

English lessons in Russia. Are paid services the key to the future?

Question mark hangs over Spain's programmes

continued from page 53

quiries a day about educational courses in Great Britain.

All the centres run low-key, low-budget programmes of lectures and films. Council staff take part in play readings, give talks on a wide variety of subjects (The Sutton Hoo Burial Ship, say, or more technical subjects for teachers of English) and continually trawl among friends and contacts for contributors to the activity programme.

Work has also been going on for some years within the teacher training system to help upgrade the skills of teachers of English. Specialized courses are run, normally in conjunction with university education departments, and support is given to special "English weeks". A travelling team from the Madrid office performs *English Without Tears*, a series of sketches to help teachers with their teaching methods.

This programme is currently on ice, while Spain sorts out administrative tangles resulting from the recent splitting of the Education Ministry into two. And its long-term future, like all the council's work in Spain, is under question from the Cuts.

Not that ebbing and flowing funds are new to council work here. In the 1950s, when the thrust of development was towards the Third World, a cut-back in funds led to the withdrawal from Bilbao and Valencia. Libraries in these centres were handed over to local control. In 1972, a year before Britain entered the EEC, Mr Geoffrey Rippon, then Chancellor of the Duchy of Lancaster, announced a package of additional funds for the council's work in Europe.

Three years later it was announced that the Rippon package was not to be renewed. Recent money earned from the direct teaching of English has allowed the council to begin work again in Valencia, but other planned developments—such as improved information systems within the council's library reference section—have now had to be shelved.

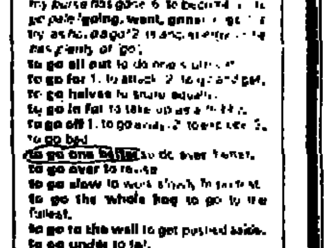
Possibly the only part of council work in Spain likely to remain entirely untouched by the cuts is the British Council school, the only one run by the council anywhere, which is more or less self-financed. The school which takes children from five to 14, and gives evening lessons to 14 to 17-year-olds, provides a British-type education for Spanish children in a mixture of Spanish and English. Although something of an anomaly in council terms, its popularity in Madrid ensures its future.

In overall terms, the same could be said of the British Council as a whole. Its position as the leading teacher of English in Spain gives it a solid base, both financially and in other ways, on which to build its other activities. If the purse strings are pulled even tighter, the council in Spain could no doubt find reserves of commercialism it at present does not wish to contemplate. In having such a fall-back position, the Spanish operation is both rare and lucky.

Go one better with Nelson

Nelson English Dictionary

F.R. Witty
Suggested age range: 11-13
* Presents over 13,000 words and phrases simply and clearly, including many contemporary words in current usage, numerous idioms, proverbs, phrases and compound words.
* Much more than a reference book of word meanings, The Nelson English Dictionary also provides an instructive guide to word usage: a comprehensive use-of-language section is featured at the front of the book.
* The phonetic pronunciation is given for more difficult words and the appropriate part of speech is given after each word.
* Available in either a cased edition or in limp covers, both offering exceptional value.
* Has its own non-consumable Workbook containing plenty of exercises and word puzzles as well as clear, explanatory pieces on language and punctuation.



to go all out to do one's utmost.
to go halves to share equally.
to go bad
to go one better
to go over to revise
to go slow to work slowly in protest.
to go the whole hog to go to the fullest.
to go to the wall to get pushed aside.
to go under to fail.

New The Nelson Illustrated Spelling Dictionary

W.T. Cunningham and Denys Thompson
Suggested age range: 11-13
* A new, large format dictionary with 500 illustrations.
* Specifically designed to help children with spelling difficulties.
* Definitions to 11,000 words given simply and with clear example sentences.
* A special easy-to-use reference system. Initial syllables are listed according to sound, and the reader is then referred to other possible ways of spelling the same sound.
* A useful appendix of rules and exercises in grammar and spelling.

British reggae group, Aswad, in Kenya (above). Anthony Rooley and Emma Kirkby, taking early music to the Middle East.

Beyond politics and economics

Every year hundreds of arts tours and exhibitions are arranged overseas. It is one of the most often questioned parts of the council's work. Brian Eastman gives an insider's view of the how and why of such tours, and what they actually achieve

In Britain the reggae group Aswad is one of several groups of black musicians, based around Ladbroke Grove in West London, currently struggling for a wider acceptance of their music. In Kenya they are, courtesy of the British Council, the "leading British reggae band".

The idea of taking British reggae to Kenya grew out of a realization that if music tours were to succeed on the level the council wanted—to demonstrate an inter-relationship between cultures much more fundamental than anything political or economic—then there had to be a direct link between the music sent out from Britain and the music of the country in which our artists were to perform.

Finding music for Africa that fitted that requirement had long been a problem. In 1977 I took The Spinners folk group around West Africa—Cameroun, Nigeria, Ghana, Sierra Leone, Senegal—in the hope that folk music would provide the fundamental link we were looking for.

There was no doubt that the ideas expressed in The Spinners' songs did often tie in with the themes of West African songs, but the music—the actual sound of the songs—had very little in common with the Africans' own music. The Spinners were a great success, but due more to their skill as entertainers than to their music finding its way to the hearts of the audiences. There was also the problem that The Spinners were well known to the expatriate community which, voracious for United Kingdom entertainment, often bought up tickets before the local inhabitants knew who or what The Spinners were.

Entertaining British expatriates is absolutely no part of the British Council brief.

But with reggae we found the ideal musical ambassador for Africa. West Indian reggae, with artists like Bob Marley and Peter Tosh, was already gaining a foothold in the African charts. In West Africa, particularly in Nigeria, indigenous reggae groups had sprung up, and in East Africa the religious aspect of the music—the Rastafarians consider Addis Ababa their spiritual home—had strong appeal. British reggae, while being West Indian based, is a style of music in its own right and its exponents, although being first generation immigrant, are usually British by nationality. The subjects for their songs reflect life in Britain today, but the sound of the music is very similar to the African sounds, both tribal and popular.

In Kenya we organized a big advance publicity campaign for Aswad so that by the time the group arrived one of their singles was already in the charts. Unlike musicians visiting on a purely commercial basis we did not restrict ourselves to playing in Nairobi but took the group up country to Nakuru and Nyeri and down the coast to Mombasa. This in itself won the support of the Kenyan press who were fulsome in their praise of the council's initiative.

Audience response to British reggae varied from the purely emotional expression of getting up and dancing to the rather more analytical approach of the music specialists in Nairobi, who were anxious to compare Aswad with the West Indian reggae artists they knew from records.

By the end of the tour the council staff in Kenya were calculating that Aswad had done more for Anglo/Kenyan cultural relations than any other arts event in the past five years.

Furthermore, the problem with expatriates had been overcome. Hardly any whites in Kenya had ever heard of reggae music, let alone Aswad.

Trying to implement this policy of finding music which relates to local experience has proved rather more difficult in the Middle East.

In 1978 the lute player Anthony Rooley, one of our leading early music specialists and founder of the Early Music Centre in London, suggested that European early music might be what we were looking for.

There is a fundamental link between Arabic and European music. The lute is a descendant of the Arabic instrument the 'ud, which found its way into Europe via Spain during the Moorish occupation. By the thirteenth century the instrument had reached Italy where it became the basis for the European musical renaissance. Very early European music, before the advent of polyphony, bears a close resemblance to Arabic music.

To try to discover whether these links had any meaning to Arabic audiences today, Anthony Rooley went on tour with the soprano Emma Kirkby. They visited Turkey, Iraq, Kuwait, United Arab Emirates, Oman, Yemen, Egypt and Jordan, and while they discovered that the relationship between Arabic and European music was indeed a very real one it seemed that interest in this link was very much one-sided.

Arabic musicians were happy to acknowledge the common factors between the music, but it was not something that really excited them.

Probably this is because for them music is a part of everyday life and they are not used to sitting quietly at concerts, treating music as a special event.

There was a discrepancy here between what the council achieved in the press and what happened with the audiences. The links between Arabic and European music are good to write about—they demonstrate a willingness on our part to try and find a common culture, and as such the council strengthened its position in the Middle East. But the personal experience of those who attended the concerts could not in the main be considered a lasting one.

Even by the sixteenth century, from which period most of the tour repertoire was drawn, European music had so diverged from its Arabic parent that today's listener finds it hard to believe they are of the same family.

Probably the greatest success of that tour was the contact Anthony Rooley made with fellow 'ud players. This may seem a small thing—one to one contact—but from that there already has grown a British involvement at music conferences organized in the Arabic world, and there is a growing recognition of a common cultural heritage.

The Spinners in West Africa

In South America musical tastes are very wide-ranging and, in many countries, very advanced. In 1977 the composer Peter Maxwell Davies and his chamber ensemble, The Fires of London, made a highly successful tour attracting large audiences. There are many young composers working in Brazil, Argentina, Venezuela and Colombia and modern music has perhaps more of a following there than it does in Britain. Maxwell Davies' music was particularly appropriate because of his use of medieval themes.

This appealed to South American audiences and since then the council has developed this growing interest in Latin/European early music by sending harpsichord specialist Christopher Hogwood on a three-week teaching scheme to Colombia, and the ensemble, The Consort of Musicke, is at present on a six-week tour of the continent.

My work with music for the council was concentrated on the developing countries, but just as much time and money is spent on musical activities within developed countries, particularly Europe.

The arts has been one of the target areas for cuts in the recent economies and I found it surprising that it was considered, in some quarters, to be more important to maintain the council's musical activities in developed countries than the developing.

Surely our musical links with Europe are strong and well known, and, while some musicians might not be able to tour without council support, musical exchange would by no means come to a halt.

In the developing countries nothing will happen without council support. British musicians, whose work relates closely to local tastes and backgrounds, can achieve in one tour to a developing country a relationship which no amount of treaties or economic agreements can ever produce.

Brian Eastman was, until recently, music officer responsible for the council's activities in the Middle East, Africa and South America.

Teach English in Malaysia.

A rewarding and enjoyable way to further your EFL experience.

The position is offered by the Malaysian Ministry of Education with the Centre for British Teachers. This is the second year of the scheme, and 45 Centre teachers are already teaching English in the lower Secondary Schools. During your stay in Malaysia we'll also help you to improve your professional skills in teaching English as a foreign language by arranging conferences and seminars, and by helping you to produce teaching materials.

The CBT provides a total plan of support, always available as needed.

- * A full Briefing in Britain for teachers and their families.
- * A 6-week Orientation Course in Malaysia including a course in Bahasa, visits to Malay villages, and detailed guidance on social and professional conduct in the country.
- * An extensive welfare network including help with finding accommodation, social security and medical benefits, and regular meetings of Centre teachers.
- * Payment of fares and baggage allowances.
- * Resettlement advice at the end of the contract.

CONTRACTS: Contracts run from November 1, 1980, for 26 months, renewable for a further 12 months.
INTERVIEWS: These will normally take place soon after applications are received; in special cases arrangements can be made to interview overseas candidates.
SALARIES: Attractive salary in a country which offers a good standard of living. A generous gratuity of two months' salary for every year's service completed is payable at the end of the contract.

QUALIFICATIONS: Aplicants should have: * A university degree. * A postgraduate teaching qualification. * A minimum of 3 years' TEFL experience, or 5 years' teaching of which 3 should be in TEFL.
If you can meet this stimulating challenge, write or phone for an application form and further details to: The Centre for British Teachers (TM 7), Quality House, Quality Court, Chancery Lane, London WC2A 1HP. Tel: 01-242 2984.

Apply by letter to the Headmaster with full curriculum vitae.

HERTFORDSHIRE
ST. JOAN OF ARC R.C. SCHOOL
High Street, Rickmansworth
(Roll 898 mixed all ability. Voluntary Aided. 11 to 18)
Required September, TEACHER of MATHEMATICS to join a successful department with well-established courses at C.S.E., "O" and "A" levels and a large 6th Form. The Department has a computer terminal and good facilities. Scale 1 plus London fringe allowance £177.
Application form and further details from the Headmaster. (Telephone: Rickmansworth 73881).

HERTFORDSHIRE
NICHOLAS HAWKSMOOR SCHOOL
Cowley Hill, Borehamwood
(All ability seven-form entry Upper School: 13 to 18 years)
Required for September 1980 TEACHER of MATHEMATICS. The subject is taught to C.S.E., "O" and "A" levels: S.M.P. course. Assistance with Games or other extra-curricular activities a recommendation.
Fringe Area Allowance.
Apply to Headmaster by letter (no forms) giving two referees.

HUMBERSIDE
COUNTY COUNCIL
EDUCATION DEPARTMENT
Kingston upon Hull Division
ST. MARY'S HIGH SCHOOL
Inglemire Lane, Hull
Head: Miss M. Dent, B.A.
Required for September 1980, a TEACHER of MATHEMATICS to C.S.E. and "O" level. Ability to help with "A" level work would be an advantage.
This is a Roman Catholic Comprehensive School for girls aged 13 to 18 years.
Application forms available from the Head should be returned by 30th May.

HUMBERSIDE
EDUCATION COMMITTEE
SCUNTHORPE DIVISION
BAYSGARTH SCHOOL
Barrow Road, Barton-on-Humber
Head Teacher: R. N. Smithson
No. on Roll: 1600
Required for September 1980, TEACHER of MATHEMATICS, Scale 1, to teach Mathematics to "O" level. For a candidate with suitable qualifications, Advanced Level work may be available. The School has an essentially rural catchment area where steady population growth is likely due to the opening of the Humber Bridge in the near future.
Application forms obtainable from the Head Teacher at the School to whom completed forms should be returned by 2nd June, 1980 (s.a.e. please).

HUMBERSIDE
EDUCATION COMMITTEE
SCUNTHORPE DIVISION
GOOLE GRAMMAR SCHOOL
Boothferry Road, Goole
Head Teacher: P. L. Teed
No. on Roll: 1260
Applications are invited for a post in this 13-18 Upper School to teach MATHEMATICS from September, 1980. This will, in the first instance, be a temporary Scale 1 appointment to fill a vacancy resulting from maternity leave; possibilities for permanency could, however, very possibly develop. The School's mathematics programme is based on S.M.P. and opportunities would exist for teaching the subject at all levels up to "O" level. Subsidiary Physics would be an advantage.
Application forms obtainable from the Head Teacher at the School to whom completed forms should be returned by 2nd June, 1980. (s.a.e. please).

HUMBERSIDE
EDUCATION COMMITTEE
SCUNTHORPE DIVISION
SIR JOHN NELTHORPE SCHOOL
Grammar School Road, Brigg
Head Teacher D. H. Coulson
No. on Roll 900
Required for September, 1980, a temporary Scale 1 TEACHER of MATHEMATICS. The post is temporary due to the Maternity Leave absence of the permanent post-holder and will be initially for up to 40 weeks with a possibility of permanency during the Summer, 1981.
The Sir John Nelthorpe School is a voluntary controlled, 11-18, co-educational 5/6 form entry Comprehensive School (900 pupils on roll—120 in the Sixth Form—60 boarders) located in the pleasant market town of Brigg.
Application forms obtainable from the Head Teacher at the School to whom completed forms should be returned by 2nd June, 1980. (s.a.e. please).

HUMBERSIDE
EDUCATION DEPARTMENT
EAST RIDING DIVISION
MATHEMATICS TEACHER—Scale 1—(two posts)
COTTINGHAM HIGH SCHOOL
Harland Way, Cottingham, North Humberside
(Co-educational; comprehensive 11 to 18 years)
Required for September, 1980, graduate teachers of Mathematics able to teach the subject to "A" level. There are well established courses in traditional Mathematics to "A" level. The school has its own micro-computer and computer terminal, and an interest in this aspect of the department's work would be an advantage.
Application forms and further details are available from the Head at the school to whom completed forms should be returned by 2nd June, 1980.

KENT
COUNTY COUNCIL
EDUCATION DEPARTMENT
GRAVESHAM DIVISION
ST. GEORGE'S C.E. SCHOOL
Meadow Road, Gravesend
Co-educational: 900 pupils
A TEACHER of MATHEMATICS and SCIENCE is required for September because of increased numbers. The Science teaching can be arranged to suit the qualifications of the successful applicant but it will certainly include Junior General Science.
St. George's is an all-ability 11-18 school and the first all-ability intake will reach the Sixth Form in September. The school is pleasantly situated on the edge of the town and facilities are good.
Apply to the Headmaster with full details and the names of referees.
GILLINGHAM DIVISION
ROBERT NAPIER SCHOOL
Applications are invited for the post of Assistant TEACHER of MATHEMATICS, Scale 1.
Application form available, on receipt of a stamped addressed envelope, from Mrs. L. Stanley, Headmistress, Robert Napier School, Third Avenue, Gillingham, Kent.

CANTERBURY DIVISION

SIMON LANGTON GRAMMAR SCHOOL FOR BOYS
Canterbury
Selective 11-18
620 boys (150 in the Sixth Form)
Required for September, 1980, a GRADUATE to teach MATHEMATICS throughout the school to Advanced and Scholarship level. Oxbridge work available. All pupils take Ordinary level in S.M.P. Mathematics and at present, nearly 90 Sixth Formers are taking Advanced level Mathematics courses. There is a strong tradition of involvement in games and a wide range of flourishing extra curricula activities.
Applications should be by letter with curriculum vitae and the names and addresses of two referees to the Headmaster, Simon Langton Boys Grammar School, Nackington Road, Canterbury, Kent CT4 7AS.

TONBRIDGE AND MALLING DIVISION
AYLESFORD SCHOOL (1,000)
Teapot Lane, Aylesford,
Maidstone, Kent
TEACHER for MATHEMATICS. Interest in Computer Studies or Technical Drawing an advantage.
The school, situated in a pleasant residential area, 3½ miles north west of Maidstone, is fully comprehensive in the first two years. At the age of 13-plus some abler pupils with the necessary ability, aptitude and potential for advanced level courses transfer to one of four upper schools; the remaining majority following courses leading to G.C.E. "O" level, C.S.E. and some non-examination courses.
Application should be made by letter to the Headmaster, stating relevant personal details, training and qualifications, together with the names of two referees.

SHEPWAY DIVISION

PENT VALLEY SECONDARY SCHOOL
Surrenden Road, Folkestone, Kent
Required for September, 1980 A TEACHER of MATHEMATICS. The school uses the Kent Mathematics Project, which is a programme of individualised courses in a combination of traditional and modern topics and leads to C.S.E. and, eventually, G.C.E.
This post would offer a newly qualified teacher the opportunity of joining a strong and enthusiastic team.
Letters of application in the first instance to the Headmaster, Surrenden Road, Folkestone, Kent.

KENT
COUNTY COUNCIL
EDUCATION DEPARTMENT

MEDWAY DIVISION

WARREN WOOD BOYS' SCHOOL
Arethusa Road, Rochester, Kent
TEACHER of MATHEMATICS, Scale 1. Required for September 1980, a well-qualified teacher of Mathematics for this three-form entry, 11-16 boys' school with up to 480 pupils on roll.
Letters of application plus curriculum vitae to the Headmaster, Warren Wood Boys' School, Arethusa Road, Rochester, Kent.
ROCHESTER, THE HUNDRED OF HOO SCHOOL
(Co-educational, 1,100 pupils)
Scale 1
TEACHER required in September to teach MATHEMATICS with some TECHNICAL DRAWING.
Traditional methods are used and a teacher is sought who will be keen to maintain the high standards of work and behaviour of this Upper Comprehensive School. Excellent facilities.
Letters of application, with the names of two referees, to be forwarded to the Headmaster.

CANTERBURY DIVISION

SIR WILLIAM NOTTIDGE SECONDARY SCHOOL
Whitstable, Kent. CT5 1PX
Required for September a TEACHER for MATHEMATICS. Scale 1 or Scale 2 available for an experienced teacher able to contribute to the development of the Department.
Application by letter and curriculum vitae to the Headmaster, from whom further details of the school may be obtained. (s.a.e. please).

DOVER DIVISION

CASTLEMOUNT SECONDARY SCHOOL
Laureston Place, Dover
(Group 9 (Mixed 750 on roll))
Required for September, TEACHER for MATHEMATICS (mainly traditional) to teach the subject preferably throughout the school to "O" level and C.S.E. Consideration will however be given to candidates who are only qualified to teach Years 1-3. Scale 1.
Applications by letter with full curriculum vitae with the names and addresses of two referees to the Headmaster, at the school.
ST. EDMUND'S R.C. SECONDARY SCHOOL,
Old Charlton Road, Dover
(Group 8) (Mixed 568)
Required, TEACHER of MATHEMATICS to take the subject throughout the school to C.S.E. level. Mixed syllabus with scope for developing own ideas.
Scale 2 post for a suitably experienced and qualified candidate.
Applications by letter with full curriculum vitae with names and addresses of two referees to the Headmaster at the school.

THANET DIVISION

HOLY CROSS R.C. SECONDARY SCHOOL
Broadstairs
Group 9 (Roll 630 Mixed)
Required September 1980, ASSISTANT TEACHER for MATHEMATICS/BOYS' PHYSICAL EDUCATION.
Scale 1 post.
College leavers considered.
Roman Catholics preferred.
Applications with names and addresses of two referees to the Headmaster.

ST. JOHN'S C.E. (CONTROLLED) SECONDARY SCHOOL
Margate
Required September 1980. ASSISTANT TEACHER to teach MATHEMATICS mainly in the middle age ranges in the School. (Scale 1.)
Applications with names and addresses of two referees to the Headmaster.
CONYNGHAM COUNTY SECONDARY SCHOOL
Ramsgate
Group 10 (Roll 862 Mixed)
Required September 1980, ASSISTANT TEACHER (Scale 1) of MATHEMATICS in a well organized and progressive department housed in a modern and attractive building.
College leavers considered. (Two posts available.)
Applications with names and addresses of two referees to the Headmaster.

TUNBRIDGE WELLS DIVISION

HUNTLEYS SECONDARY BOYS' SCHOOL
Culverden Down, Tunbridge Wells
Roll 620
Required for September, TEACHER of MATHEMATICS to join a department of three full-time staff.
Candidates would be required to teach up to C.S.E. initially but Mathematics is taught up to "O" level G.C.E.
The ability to teach Rural Science or Biology would be a particular recommendation but candidates should state any other subject which they can offer.
This is a Scale 1 post but an above Scale post may be available for a suitable candidate.
Letters of application enclosing curriculum vitae to the Headmaster at the School, giving names and addresses of two professional referees.

SHEPWAY DIVISION

FOLKESTONE GIRLS' GRAMMAR SCHOOL
(400 on Roll)
Coolinge Lane, Folkestone
Kent CT20 3QX
Required for September, a GRADUATE to teach MODERN MATHEMATICS to Ordinary level, Applied Mathematics to Advanced level, and if possible, Physics to Ordinary level.
This is a Scale 1 post suitable for a beginner.
Apply by letter to the Headmistress with curriculum vitae and the names and addresses of two referees.
WYNDGATE SECONDARY SCHOOL
Park Farm Road, Folkestone, Kent.
Present Number on Roll: 1,400 pupils
Age range: 11-17 years
Headmaster: H. D. Littlefield, Esq., B.Sc.
Required for September 1980, Scale 1 TEACHER to share the teaching of MATHEMATICS to C.S.E. level. The school uses S.M.P. and traditional Mathematics courses.
Applications to the Headmaster at the school with names and addresses of two referees. (No forms.) (S.A.E. please.)
SOUTHLAND'S SCHOOL
(Founded 1610)
New Romney
Southland's School is a well-developed 11-18 Comprehensive School with about 1,600 boys and girls, taking all the children of Romney Marsh. New Romney is a pleasant historic town close to the sea.
A TEACHER of MATHEMATICS is required for September 1980. The Department uses a mixture of traditional and modern methods and is developing very well at "A" and "O" level.
Opportunities exist for work to Advanced level and for the right person, a Scale 2 as co-ordinator of Lower School Science.
Apply by letter to the Headmaster (no forms), giving details of qualifications, experience and interests and the names of two referees.

KINGSTON upon Thames
(Royal Borough of)
SOUTHBOROUGH BOYS' SCHOOL
Hook Road, Surbiton, Surrey
KT6 5AS
Tel.: 01-397 2645
(958 boys on roll: 11 to 18)
Required for September, 1980, TEACHER for MATHEMATICS throughout the school up to "O" level and C.S.E., with possibility of "A" level work for a suitable candidate. An interest in computer would could be an advantage; the school has its own computer. A first appointment would be welcome. (Scale 1 post.)
London Allowance £408.
Assistance may be provided with removal expenses.
There is a possibility of rented accommodation through a teachers' housing association.
Application forms obtainable from the Headmaster at the school, to be returned to him as soon as possible.

Reference ET 21780/TES.

BRENT
(London Borough of)
WILLIAM GLADSTONE HIGH (MIXED) SCHOOL
Parkside, N.W.2
Mr. R. A. Mear, B.A.

This natural growth six-form-entry Comprehensive School opened in September 1974. In September 1980 we shall have reached the Upper Sixth Year stage with 1,020 pupils. The School, which is situated in very pleasant surroundings, comprises a main block of three floors, sports hall, large playing field and self-contained staff area. The school is supplied with the most modern equipment and specialized accommodation in all Departments. Teaching throughout Years One to Three is organized mainly on a mixed ability basis and an option system is in use for Years Four to Five.

Required from September:

TEACHER who can offer both FRENCH and GERMAN (Scale 2). Teaching is in mixed ability groups in the First Year, sets in Second and Third Years, and option groups in Years Four and Five. German is offered as a second language in the Third Year. The successful candidate will be Second in a Department that is being re-organized on the above lines.

London Allowance of £609 per annum is payable and there is a scheme for assistance with removal expenses including legal fees, etc., travelling and lodging allowances. Candidates should apply by letter to the Head of the School within seven days, giving age, present post, qualifications, experience and references, enclosing S.A.E. for reply.

BRENT
(London Borough of)
JOHN KELLY GIRLS' HIGH SCHOOL
Crest Road, NW2 7SN
(Roll 875; 11 to 18; Social Priority School)

Required from September: FRENCH TEACHER (Scale 1) to join enthusiastic department of Languages. Post will, initially, entail a small amount of English teaching but candidate will eventually be required to teach all levels of French, including an "A" level class. Candidate will be expected to maintain the high standards of work and discipline prevailing at the school.

London Allowance of £609 per annum is payable and there is a scheme for assistance with removal expenses including legal fees, etc., travelling and lodging allowances.

Candidates should apply by letter to the Head of the school within seven days, giving age, present post, qualifications, experience and references, enclosing S.A.E. for reply.

BRENT
(London Borough of)
ALPERTON HIGH (MIXED) SCHOOL
Stanley Avenue, Wembley, HA0 4JB
(Roll 1,400, 11-18, 200 in Sixth Form)
Headteacher: Mrs. J. Dunn, B.Ed.

Required from September for this 9-form entry Comprehensive School, TEACHER of FRENCH (Scale 1) to teach pupils aged 14-18 including "A" level work.

The school has nine language staff, enters over 140 students each year for the joint "O"/CSE 16-plus examination, and teaches French and German up to "A" level GCE. 32-booth Language Laboratory and audio visual aids are available.

London Allowance of £609 per annum is payable and there is a scheme for assistance with removal expenses including legal fees, etc., travelling and lodging allowances.

Candidates should apply by letter to the Head of the School within 7 days giving age, present post, qualifications, experience and references, enclosing S.A.E. for reply.

BRENT

DRIFFIELD SCHOOL
Manorfield Road, Driffield, North Humberside
(Rural comprehensive 11 to 18 years, number on roll 1,700)
TEACHER, GERMAN, Scale 1 (part-time)
Required for September 1980, a part-time TEACHER of GERMAN to work 0.5 of the weekly timetable.
Application forms and further details are available from the Head at the school, to whom completed forms should be returned by 2nd June, 1980.

KENT
COUNTY COUNCIL
EDUCATION DEPARTMENT
CANTERBURY DIVISION
SIMON LANGTON GIRLS' SCHOOL
Old Dover Road, Canterbury, Kent
(800 pupils)
Required for September to teach FRENCH to "A" level with Spanish to "O" level.
The school, a four form entry grammar school, handsomely sited on the outskirts of this University city, has a strong Language Department with exchanges well established with France and Germany.
The present post could be either temporary or permanent. In the latter case it could suit a newly qualified teacher. Teachers in post should apply at once; interviews will be held before May 31st.
Further details may be obtained from the Headmaster (Canterbury 63711) to whom a letter of application should be written stating qualifications and experience in full and giving the names of two referees and enclosing a S.A.E. as soon as possible.
DOVER DIVISION
SANDWICH COUNTY SECONDARY SCHOOL
Dover Road, Sandwich, Kent
(Group 10)
[illegible]
[illegible] capable of teaching FRENCH throughout the School to C.S.E. and "O" level G.C.E. standards.
There is no language laboratory but audio and visual aids are in use.
The post will be Scale 2 for a suitably experienced and qualified candidate.
Letters of application with full curriculum vitae with the names and addresses of two referees to the Headmaster at the School.
DEAL SECONDARY SCHOOL
Mill Road, Deal
(Group 11—1,150 mixed on roll)
MODERN LANGUAGES
Required September, two full-time posts within the Modern Languages Department.
One post will require some German to C.S.E. level.
French is taught to "O" level. A scale 2 post is available for a suitably qualified and experienced candidate willing to undertake special responsibility for developing exchanges with French and German Schools.
Letters of application with full curriculum vitae to the Headmaster at the school giving the names and addresses to two referees.
SEVENOAKS DIVISION
LONGFIELD SCHOOL
Main Road, Longfield, Dartford, Kent
Group 11—Roll 1,500 mixed
A TEACHER of FRENCH and GERMAN required from September 1980 to join a department of six full-time specialists offering courses in French, German and Spanish.
The appointment offers the opportunity to work with some colleagues teaching their native language, under experienced and vigorous departmental leadership, in an area with easy access to the continent.
A cybervox language laboratory is in use, as are a number of other technical aids.
The school is in the London "fringe" for allowance purposes, is attractively sited in a rural residential area, and has recently taken major enlargements into use.
It at present serves as an 11 to 18 all-ability school, but from 1981 will become an Upper School (13 to 18) in a three tier comprehensive scheme.
Applications should be by letter (no forms) to the Headmaster at the school, giving details of experience and qualifications and including the names of two professional referees.

NORFOLK
COUNTY COUNCIL
EDUCATION DEPARTMENT
HEWETT SCHOOL
Norwich
(Number on roll 1,850
Sixth Form 250 pupils)
Cecil Road, Norwich, NR1 2PL

Applications are invited from newly qualified and experienced TEACHERS to specialise in FRENCH and help with GERMAN. This is a well established department with languages taught to "A" and "S" level, and vigorous exchange programmes with various European countries. A Scale 2 post could be available for an experienced teacher.

Application form and details can be obtained, enclosing a stamped addressed envelope, from the Senior Secretary, Hewett School, Cecil Road, Norwich, NR1 2PL, to whom completed forms should be returned as soon as possible.

NORTHAMPTON
BRACKLEY MAGDALEN COLLEGE SCHOOL.
High Street, Brackley, Northants NN13 5AE

Required for September, a TEACHER of FRENCH (Scale 1) in this co-educational comprehensive school with 1250 pupils (100 boarders). It is hoped to appoint a teacher able to take the subject up to A-level. A Scale 2 post could be available for a suitably qualified or experienced candidate.

A residential post on the girls or the boys boarding side may be available, for either single or married teachers.

A readiness to help with games and out-of-school activities would be an advantage.

Application forms and further details from the Headteacher (S.A.E.).

NORTH YORKSHIRE
COUNTY COUNCIL
RIPON COUNTY SECONDARY SCHOOL
Clotherholme Road, Ripon HG4 2DE.
(870 on roll)

Required for September 1980, ASSISTANT TEACHER of FRENCH (Scale 1). This is a permanent post in a small department in this 11-16 years mixed secondary modern school which is organised on comprehensive lines. "O" level and C.S.E. examinations are taken.

Applications by letter to be sent direct to the Headmaster, Mr. J. H. Cooper, M.A. (Cantab.), F.R.I.C., giving details of experience and the names and addresses of two referees within seven days of the appearance of this advertisement. This is a readvertisement and previous applicants will be considered.

NORTH YORKSHIRE
COUNTY COUNCIL.
HARROGATE GRANBY HIGH SCHOOL.
Avondale Road, Harrogate
(11 to 18 Comprehensive)
Required for September —
A well-qualified TEACHER of MODERN LANGUAGES able to offer FRENCH and GERMAN (Scale 1). Some "A" level work in German could be available, also a little LATIN if desired. The Department is very strong with excellent examination results, good numbers taking "A"-level work, and splendid facilities.

The school is a large, thriving community on one site.

Apply immediately to the Headmaster at the School, giving full career details and names and addresses of two referees.

NORTH YORKSHIRE
COUNTY COUNCIL.
SETTLE HIGH SCHOOL.
Required for September, 1980 —
A Graduate TEACHER of FRENCH. Ability to assist with junior English an advantage.

The school is a 13 to 18 comprehensive school of about 700 students, serving a rural area.

Further details and application forms from the Headmaster, The High School, Settle, North Yorkshire BD24 0AU (s.a.e.).

CLWYD COUNTY COUNCIL
Required for the commencement of the Autumn Term (28.8.80)

30.4.80

JOHN HOWARD DAVIES,
Director of Education.

Music Appointments

1. **Secondary Consortium Teacher (Music) Scale 3/4.** Experienced teacher required to be attached to a consortium of schools in Birmingham. Initiative and enthusiasm for secondary education as well as an insight into current trends in music education necessary for this senior appointment.

Instrumental Appointments

2a. **Percussion Scale 1 or 2:** Suitable training in orchestral percussion essential, and an interest in kit drums will be an advantage for this appointment.

b. **Brass Scale 1 or 2: A Brass Band Specialist** required to teach brass instruments in Primary and Secondary schools and to establish and develop schools' Brass Bands under the direction of the Head of Brass. Candidates should have experience of training bands to a high level of performance.

Teachers appointed to the above two posts will join a well-established team and work with groups and individual pupils. Opportunities for regular ensemble and orchestral playing may be available.

3. **Qualified Music Therapist** to work in Special Schools **Scale 1 or 2.** There is a Senior Music Therapist who has already organized and developed teaching and other music activities in Special Schools. It has been decided to increase the number of qualified therapists to co-ordinate the work in the city. These new appointments offer exciting opportunities for contributing to music on a school campus and also to Teachers' courses.

4. **Scale 1 Teachers of Music** required in various schools in the city. These posts are open to applicants leaving colleges this year.

Forms of application and further information from: Office of the Music Inspector, Martineau Teachers' Centre, 225, Bristol Road, Birmingham B5 7UB. There is a scheme for assistance with removal expenses.

**BIRMINGHAM
CITY COUNCIL**

NOTTINGHAMSHIRE
COUNTY COUNCIL

HEREFORD AND WORCESTER
COUNTY COUNCIL

EVESHAM HIGH SCHOOL
Four Pools Road
Evesham WR11 6DQ

Required for September 1980 a qualified and experienced GRADUATE TEACHER of PHYSICS (Scale 2) to be responsible for the subject to "A" and University Entrance standard. There are two specialist laboratories and two full-time Physicists in a self-contained, well-equipped and congenial Science Faculty: vacancy due to promotion.

Candidates should apply in the first instance by letter with details of training and experience and the names of two referees, to the Headmaster at the school, from whom details of the post and of the school are available.

HERTFORDSHIRE
COUNTY COUNCIL
NORTH HERTS DIVISION
NORTON SCHOOL
Letchworth Garden City
(Co-educational, 800 on roll)
PHYSICS GRADUATE required for September, 1980, to join an experienced and successful team to teach the subject to "A" level. The Department is very well equipped and a Nuffield approach is adopted throughout the school.

No forms. Apply by letter to the Headmaster with curriculum vitae and names and addresses of two referees.

HERTFORDSHIRE

GRANGE PARK SCHOOL
London Road, Bushey, Watford

All-ability boys' school in pleasant area with excellent site and facilities.

Required September, TEACHER for PHYSICS, Scale 1 (with possibility of Scale 2 for suitably qualified and experienced candidate) plus London fringe allowance £177. The person appointed will be responsible for the "A" level Physics teaching. The Schools Council Integrated Science Project (S.C.I.S.P.) course is used in the main school.

Further details from the Headmaster, to whom letters of application should be sent giving details of qualifications and names and addresses of two referees.

HERTFORDSHIRE
MONKS WALK SCHOOL
Welwyn Garden City, Herts.
GRADUATE TEACHER of PHYSICS required to share "O" and "A" level work as member of a Science team. Some S.C.I.S.P. or General Science work. Excellent facilities in six-form entry all-ability school (including on-line computing facilities), outer London fringe allowance.
Applications (with curriculum vitae and names of two referees) to the Headmaster at the school.

HERTFORDSHIRE
COUNTY COUNCIL
STEVENAGE DIVISION
THE BEDWELL SCHOOL
Telford Avenue, Stevenage
Herts SG2 0AN
TEACHER required for September for BIOLOGY throughout the school to Advanced level. Further details of the post are available from the Headmaster at the school.
Letters of application (no forms) should be sent, together with the names of two referees, to the Headmaster as soon as possible.

HERTFORDSHIRE

LANGLEYBURY SCHOOL
Hunton Bridge, Kings Langley
Roll: 865 mixed all ability, 11 to 18

Required September TEACHER of PHYSICS or GENERAL SCIENCE. Scale 1 plus *London fringe allowance £177.* Langleybury School is a five form entry school in post-war buildings and in Langleybury House, in rural surroundings.

Apply to Headmaster with curriculum vitae, including the names, addresses and telephone numbers of two referees.

HILLINGDON
(London Borough of)

GREENWAY SCHOOL
The Greenway, Uxbridge
Middlesex UB8 2PR
(Number on roll, 766; 60 in Sixth Form)

A TEACHER is required for SCIENCE, Scale 1, in September. The Science Department has the benefit of a new suite of six laboratories and the teacher appointed would be joining a well-established and successful department. Applications from newly qualified teachers would be welcomed. Please apply by letter to the Headmaster at the School.
London Allowance payable.

HUMBERSIDE
EDUCATION DEPARTMENT
EAST RIDING DIVISION
COTTINGHAM HIGH SCHOOL
Harland Way, Cottingham, North Humberside
(Coeducational comprehensive 11 to 18 years)
CHEMISTRY TEACHER, Scale 1, required for September, 1980, a teacher of Chemistry to teach the subject to year 1-3. Ability to teach to "O" level would be an advantage.
Application forms and further details are available from the Head at the school, to whom completed forms should be returned by 2nd June, 1980.

HUMBERSIDE
EDUCATION DEPARTMENT
EAST RIDING DIVISION
SOUTH HOLDERNESS SCHOOL
Preston, Hull
(Coeducational Comprehensive 11 to 18; number on roll 1,600)
PHYSICS TEACHER, Scale 1. Required for September, 1980, a TEACHER of PHYSICS, qualified to teach the subject to external examination levels, and to assist with combined science courses. Science subjects are taken by all pupils and are very strong in the Sixth Form.
Application forms and further details are available from the Head at the school, to whom completed forms should be returned by 2nd June, 1980.

HUMBERSIDE
EDUCATION DEPARTMENT
EAST RIDING DIVISION
LONGCROFT SCHOOL
Burton Road, Beverley, North Humberside
(Eight-form entry Coeducational Comprehensive; number on roll 1,550)
PHYSICS TEACHER, Scale 1. Required for September, 1980, a well-qualified GRADUATE to teach PHYSICS with a little GENERAL SCIENCE to pupils in the age range 11 to 18 years initially in a well-equipped and successful Science department. There will be a possibility of "A" level work at a later stage.
Application forms and further details are available from the Head at the school, to whom completed forms should be returned by 2nd June, 1980.

HUMBERSIDE
COUNTY COUNCIL
EDUCATION DEPARTMENT
KINGSTON UPON HULL DIVISION
SIR HENRY COOPER HIGH SCHOOL
Thorpepark Road, Hull.
Head: Roger Cole, M.A.
Required for September, 1980, a TEACHER of PHYSICS, Scale 1 to all levels, including examination work.
Assistance with some other subject would help.
This is a mixed comprehensive school for about 1,200 pupils aged 13 to 18.
Further particulars may be obtained from the Head to whom applications should be returned by 30th May.

HUMBERSIDE
COUNTY COUNCIL
EDUCATION DEPARTMENT
KINGSTON UPON HULL DIVISION
SIR LEO SCHULTZ HIGH SCHOOL
Danepark Road, Orchard Park, Hull
Head: Mrs J. W. Sturman, M.A.
Required for September 1980, a TEACHER of CHEMISTRY and GENERAL SCIENCE (Scale 1) to join a strong Science Department. There are excellent facilities in a purpose-built block and courses to C.S.E., "O" and "A" level are well developed.
This is a mixed comprehensive school of about 960 pupils aged 13 to 18.
Further information and application forms available from the Head, to whom completed forms should be returned by May 30, 1980.

HUMBERSIDE

SCUNTHORPE DIVISION
SIR JOHN NELTHORPE SCHOOL
Grammar School Road, Brigg
Head Teacher: D. H. Coulson
(Number on roll 700)
Required for September, 1980, a Scale 1 TEACHER of GENERAL SCIENCE in the lower school. An ability to assist with Biology teaching in the Middle School would be an advantage.
The Sir John Nelthorpe School is a voluntary controlled, 11-18 co-educational 4/5 form entry Comprehensive School (900 pupils on roll—120 in the Sixth Form—40 boarders), located in the pleasant market town of Brigg.
Application forms obtainable from the Head Teacher at the school, to whom completed forms should be returned by 2nd June, 1980 (S.A.E. please).

SECONDARY
Science
continued

HUMBERSIDE
EDUCATION DEPARTMENT
EAST RIDING DIVISION
HOWDEN SCHOOL
Derwent Road, Howden, Goole,
North Humberside
(Developing Comprehensive 11 to 18, number on roll 850)

PHYSICS TEACHER, Scale 3, required for September, 1980, a well qualified teacher to be in charge of Physics within the Science department. Able to teach throughout the age range up to and including "A" level.

Application forms and further details are available from the Head at the school, to whom completed forms should be returned by 2nd June, 1980.

HUMBERSIDE
COUNTY COUNCIL
EDUCATION DEPARTMENT
KINGSTON UPON HULL DIVISION
NEWLAND HIGH SCHOOL
Cottingham Road, Hull
Head: Miss D. M. Nicholson, M.A.

Required in September, a Graduate TEACHER of BIOLOGY to teach the subject at all levels in this Comprehensive Senior High School for Girls of 13 to 18. The subject is studied to C.S.E., "O", "A" and "S" levels as well as in non-examination courses, and some Sixth Form work would be available for a suitable applicant. The ability to undertake "A" level fieldwork would be an advantage.

Application forms available from the Head, should be returned by May 30 1980.

ISLE OF WIGHT
COUNTY COUNCIL
CARISBROOKE HIGH SCHOOL
(Age range 13 to 18 years
1,117 on roll)
Mountbatten Drive, Newport
Isle of Wight PO30 5QU

Required for September, Scale 1, SCIENCE TEACHER to join the Science team in an integrated faculty. "A" level teaching is available in any of the separate Sciences for an appropriately qualified person. The faculty has an outstanding record of curriculum development and the person sought would have every opportunity to meet and practise new ideas of education. An interest in computer assisted learning would be welcomed.

Please write direct to the Headmaster from whom further details are available, giving curriculum vitae and two referees (S.A.E. please). State full range of capabilities.

KENT
COUNTY COUNCIL
EDUCATION DEPARTMENT

DARTFORD DIVISION

DOWNS SCHOOL
Green Street Green Road
Dartford, Kent
(Roll 1,300, mixed)

Required for September: Well-qualified GRADUATE to teach CHEMISTRY in this 11 to 18 wide-ability school (140 in Sixth Form). Must be competent to teach subject throughout school including "A" level standard. Students completing postgraduate courses will be considered.

Fringe Allowance. Removal expenses in approved cases.

Applications to the Headmaster by letter with full curriculum vitae and naming two referees.

GRAVESHAM DIVISION

ST. GEORGE'S C.E. SCHOOL
Meadow Road, Gravesend
(Co-educational; 960 pupils)

A TEACHER of MATHEMATICS and SCIENCE is required for September because of increased numbers. The Science teaching can be arranged to suit the qualifications of the successful applicant but it will certainly include Junior General Science.

St. George's is an all-ability 11 to 18 school and the first all-ability intake will reach the Sixth Form in September. The school is pleasantly situated on the edge of the town and facilities are good.

Apply to the Headmaster with full details and the names of referees.

MEDWAY DIVISION

CHRISTCHURCH SECONDARY SCHOOL FOR GIRLS
Maple Hall Road, Chatham, Kent

Required for September 1980: a TEACHER of BIOLOGY with interest in Rural Studies. This is a temporary appointment for one year, owing to the secondment of the present teacher, but it may well lead to a permanent appointment.

Apply in detail to the Headmistress together with two referees and enclosing a stamped addressed envelope.

CHATHAM TECHNICAL HIGH SCHOOL FOR BOYS
Subject: PHYSICS Scale 1 post.

Required September PHYSICS GRADUATE to share teaching of subject to G.C.E. "O" and "A" level classes. School has strong science tradition, well equipped laboratories and established Nuffield courses. Possibility of Scale 2 post for applicant with successful teaching experience.

Please state subsidiary subjects/interests.

Apply by letter (2 referees) to The Headmaster, Chatham Technical High School for Boys, Holcombe, Maidstone Road, Chatham, Kent ME4 6JB
Telephone: Medway (0634) 63126

CANTERBURY DIVISION
THE ARCHBISHOP'S C.E. (Aided) SECONDARY SCHOOL
Canterbury

Required for September, 1980, an experienced TEACHER to be 2nd in the Science Department, Scale 2 post, to specialise in BIOLOGY and assist with the running of the Department. Courses are offered in general and human Biology to C.S.E. and G.C.E. "O" level.

Applications by letter as soon as possible to the Headmaster at the school in St. Stephen's Hill, Canterbury, giving full details of experience and qualifications and naming two referees. (S.A.E. please.)

TONBRIDGE AND MALLING DIVISION
TONBRIDGE GRAMMAR SCHOOL FOR GIRLS
Deakin Leas, Tonbridge, Kent.
(930 girls including 300 in Advanced Level Sixth.)

Required for September, 1980, an Honours GRADUATE to teach PHYSICS and CHEMISTRY throughout the school.

A beginner would be considered but a scaled post is available for a suitably qualified and experienced candidate. This is a strong department with good facilities.

Please apply to the Head Mistress at the School giving full curriculum vitae, the names and addresses of two professional referees. (S.A.E., please.)

THE HUGH CHRISTIE SCHOOL
Norwich Avenue, Tonbridge,
TN10 4QL
(1,650 pupils 11 to 18 mixed)

PHYSICS TEACHER with some general science to teach up to C.S.E. and "O" Level. A scale 2 post could be available to an experienced teacher.

Please apply direct to the Headmaster: Telephone Tonbridge 353544.

HUGH CHRISTIE SCHOOL
Norwich Avenue, Tonbridge.
The School is of wide ability with 1,763 pupils on roll.

Required for September, 1980. BIOLOGY TEACHER to teach up to "A" level with some General Science in the lower school.

Please apply direct to the Head Teacher at the School, Tonbridge 353044.

KENT
TUNBRIDGE WELLS
THE SKINNERS' SCHOOL
(Voluntary Aided Grammar School of 680 boys: 170 in Sixth Form).

Required for September 1980, a GRADUATE to teach PHYSICS to "A" level. The School uses Nuffield courses in junior forms as a foundation for more traditional G.C.E. work. An interest in Electronics and readiness to assist with Games, especially hockey and Rugby football, will each be a recommendation.

Apply by letter to the Headmaster, enclosing curriculum vitae and naming two referees.

KINGSTON upon Thames
(Royal Borough of)
HOLLYFIELD SCHOOL
Surbiton Hill Road, Surbiton
Surrey KT6 4TU
(01-399 2657)
(1,000 pupils, co-educational, non-selective, 11 to 18, strong Sixth Form)

Required for September, two TEACHERS to join the SCIENCE DEPARTMENT. One must be a CHEMIST; the other could be a PHYSICIST with an interest in ELECTRONICS, or a BIOLOGIST with a broad science background. The three main Sciences are taught up to university entrance standard, and are popular subjects in the school. The department is innovative and supportive. One post is available with a Scale 2 allowance, but applicants seeking a first post are welcome to apply for either.

London Allowance £408.

Assistance may be provided with removal expenses.

Application forms, and further details, from the Headmaster at the school, to whom they should be returned as soon as possible.

KINGSTON upon Thames
(Royal Borough of)
TOLWORTH GIRLS' SCHOOL
Fullers Way North, Surbiton,
Surrey KT6 7LQ
(Telephone: 01-397 3854)
1,059 girls on roll

Required for September 1980, a GRADUATE TEACHER of PHYSICS (Scale 1) to join a successful department of eight teachers. The successful applicant will be required to teach Integrated Science to junior forms and Physics to C.S.E., "O" and "A" level. The Science department is housed in modern, well-equipped laboratories.

London allowance £408.

Assistance may be provided with removal expenses.

Application forms obtainable from the Headmistress at the school to be returned to her as soon as possible.

LEEDS CITY COUNCIL
DEPARTMENT OF EDUCATION

Unless otherwise stated—
Closing date for receipt of applications is 6th June, 1980.
In respect of Headships and Deputy Headships in all schools, and other posts in primary, middle and special schools, forms are available from and should be returned to the Director of Education, Department of Education, Great George Street, Leeds, LS1 3AE.
For other posts in secondary and high schools, applications by letter should be made to the Head Teacher of the school concerned, giving full details and the names of two referees.
The post reference number should be quoted on all correspondence.
Applications requiring acknowledgment and requests for forms and/or details must be accompanied by a stamped, addressed envelope.

Further details from the Head. Apply immediately (no forms) with full particulars and the names and addresses of two referees (S.A.E.).

SOLIHULL EDUCATION COMMITTEE
Kingshurst School, Cooks Lane, Kingshurst,
Birmingham, B37 6NU

Qualified Teachers

Required for September, 1980,
for the following Scale 1 posts in this 11-16, all-ability school (1,200 pupils on roll):

ENGLISH
A large and successful department with courses to C.S.E. and G.C.E. 'O' level.

MUSIC
A small Department intent upon becoming a force within the school. Successful wind band and developing orchestra. A firm tradition of supporting musical productions.

GEOGRAPHY
Taught as a separate discipline with courses leading to C.S.E. and G.C.E. 'O' level, and a developing tradition of fieldwork.

HISTORY
Taught as a separate discipline with courses leading to C.S.E. and G.C.E. 'O' level.

RELIGIOUS EDUCATION
Calling for a teacher having a sincere commitment to teach Religious Education from the Christian viewpoint, especially in lower school, but also aware of the wider educational values of the subject to upper school students.

RELIGIOUS EDUCATION
To teach half-time in the R.E. Department described above. Readiness to offer half-time in another subject —English, Humanities, Commerce, French.

TECHNICAL STUDIES
To join a creative team working on a design basis. Candidates may have a bias towards Metalwork or Woodwork but will need to be prepared to work in wood, metal, plastics and technical drawing. Three new rooms have recently been added to the Department. This post is suitable for a teacher seeking a first appointment.

COMMERCE
To teach Commerce and Office Practices to C.S.E. and G.C.E. 'O' level and to develop an Economics course. The ability to teach typing and shorthand would be an advantage, but is not essential and readiness to teach some time in another subject such as Geography, French, History.

SCIENCE
To teach Combined Science to lower school classes and one of—Physics, Chemistry or Biology in upper school.

Letters of application and names of referees to the Headmaster.

SECONDARY
Science
continued

LINCOLNSHIRE

NORFOLK
COUNTY COUNCIL
EDUCATION DEPARTMENT
THORPE ST. ANDREW SCHOOL
Longfields Road,
Thorpe St. Andrew, Norwich,
NR7 0NB
(1,500 on roll; aged 11-18)
Required for September, 1980, a Qualified TEACHER (Scale 2) to take responsibilities in the Supportive and Social Education Department. The work includes responsibilities for non-examination courses in the Upper school.
Application forms from and replies to the Headmaster at the school (s.a.e. foolscap, please).

OXFORDSHIRE
COUNTY COUNCIL

CHIPPING NORTON SCHOOL
Burford Road, Chipping Norton,
Oxon.
Tel.: Chipping Norton 2007
Comprehensive—1,000 on roll

Joint HEAD of HOME and COMMUNITY STUDIES (Scale 2) required for September, 1980. To share with a colleague responsibility for a successful, original course devised by the school in Years 4 and 5 for pupils with a limited examination programme in other fields. Candidates should combine the ability to teach some practical or creative skills (not necessarily the traditional technical subjects) with concern for the individual and a readiness to plan simple programmes of community studies and service.

The successful applicant may be asked to offer a very small number of periods elsewhere in the time-table so that other teaching subjects should be stated.

Applications by letter to the Headmaster with full curriculum vitae and two names for reference as soon as possible. Further details available on request (s.a.e., please).

Scale 1 Posts

BROMLEY
(London Borough of)
THE RAMSDEN SCHOOL FOR BOYS
Ullmans Road, Orpington, Kent
Six-form Entry Comprehensive
Headmaster: D. A. Davies, B.Sc.
Telephone: Orpington 31075

Required for September 1980, an enthusiastic TEACHER to join a team of seven engaged in the development of DESIGN and TECHNOLOGY beyond traditional skill-based activities. Individual members of the department contribute their own particular skills and experience to a common approach to problem solving through the use of a wide range of materials. Interest and experience in Metalworking and/or Building Construction would be particularly welcome. The ability to offer Technical Drawing would be an added advantage. A Scale 2 post could be available for a suitably qualified and experienced candidate.

The Technical Studies Department consists of five workshops, two drawing offices, a Roadcraft centre and a Sixth Form workshop, with established courses leading to C.S.E. Modes 1 and 3 and G.C.E. "O" and "A" level.

London Allowance, £508.

The school is housed in modern buildings on an attractive site shared by the Ramsden School for Girls. The joint Sixth Form of 170 boys and girls already offers a wide range of well established G.C.E. Advanced level courses.

Removal expenses payable in approved cases.

Applications direct to the Headmaster at the school, giving full details of qualifications and experience, together with names, addresses and telephone numbers of two referees.

SPECIAL EDUCATIONAL SERVICES
ASSISTANT HEAD TEACHER
(Re-Advertisement)
LUGTON SCHOOL (DALKEITH)

Applications are invited from registered teachers with experience of work with handicapped pupils. All applicants must hold a special qualification for teaching handicapped pupils. The appointment will be effective from the beginning of school session 1980/81.
Further information may be obtained by contacting the Head Teacher at the school (phone number 031-663 7146).
Salary will be in accordance with the current Scottish Teachers Salaries Memorandum.
The following allowances are paid.

Responsibility Allowance	£696 per annum
Special Qualification for teaching handicapped pupils	£225 per annum
Allowance for teaching secondary age pupils	£81 per annum

REGIONAL ASSESSMENT CENTRE
TEACHER

Applications are invited from registered teachers interested in teaching children who have appeared before Children's Hearings and who are resident within the Centre or its adjacent St. Katharine's Unit for varying lengths of time. The posts afford opportunity for teaching children of wide range of age and ability. In St. Katharine's Unit there is a focus in the work of the care and teaching staff on the preparation of children to be re-integrated into their local communities. Experience of remedial or special education would be an advantage.
Further information may be obtained by telephoning the Head Teacher (031-661 8489).
Salary will be in accordance with the current Scottish Teachers Salaries Memorandum.
The following allowances are payable where appropriate

Assessment Centre Allowance	£351 per annum
Remedial Teaching Allowance	£144 per annum
Remedial Qualification Allowance	£162 per annum

Application forms for the above posts are available from the Divisional Education Officer, Division 2 Personnel, 40 Torphichen Street, Edinburgh EH3 8JJ.
Closing date for applications is 30 May, 1980.

Tayside Regional Council

EDUCATION

HEAD TEACHER

AUCHTERARDER HIGH SCHOOL

Applications are invited from suitably qualified registered teachers for the above post. The School has a Secondary Department with a roll of 350 in S1-5 and a Primary Department with a roll of 300. The present Headmaster retires in October, 1980, and the successful applicant will be expected to take up duty as soon as possible thereafter.

Candidates must hold a Teaching Qualification (Secondary Education), have had considerable secondary school teaching experience and currently hold a post of responsibility. Salary is in accordance with the Scottish Teachers' Salaries Memorandum, with a Responsibility Allowance of £4,554 per annum.

Application forms and further details are obtainable from the Divisional Education Officer, 8 York Place, Perth PH2 8EW, to whom they should be returned by 2nd June, 1980.

Edinburgh Merchant Company

GEORGE WATSON'S COLLEGE

Biology/Chemistry Teacher

(temporary part-time)

Applications are invited for the above post from Wednesday, August 27th, 1980, from graduates in an appropriate subject who are registered, or eligible for registration, with the General Teaching Council.

Applicants must be prepared to teach Biology and Chemistry to O grade. The total teaching time would amount to slightly more than half the timetable.

Salary according to National Scales.

Applications, including age, education, training and experience in science teaching, with the names of two referees, should be sent to the Principal, George Watson's College, Colinton Road, Edinburgh EH10 5EG, by Tuesday, June 3rd, 1980.

ORKNEY ISLANDS COUNCIL

Education Department

LECTURER IN CATERING

A lecturer in catering is required in August 1980 for the further education department of Kirkwall Grammar School. The successful candidate will teach courses leading to city and guilds examinations in catering.

Applicants should have an appropriate qualification in catering; experience in a college of further education will be considered an advantage.

The salary is that of lecturer B (£4,449-£6,839 per annum plus an Islands allowance of £312).

Application forms, which should be returned not later than 6th June 1980, may be obtained from the Director of Education, Council Offices, Kirkwall, Orkney.

ORKNEY ISLANDS COUNCIL

Education Department

(Re-advertisement)
Required from September, 1980:

GRADUATE to teach LATIN to [illegible] "A" level.

Please state second subject offered and whether second subject is at "O" level or "A" level. Scale 1 post with possibility of allowance for candidate with suitable experience.

College has purpose built accommodation opened in 1972.

Please send S.A.E. to the Principal at the above address for application form and further details. Completed applications to be returned as soon as possible.

Previous candidates need not re-apply as their applications will also be considered.

Special Education

Headships

CALDERDALE
METROPOLITAN BOROUGH COUNCIL
EDUCATION DEPARTMENT
FRIENDLY FOLD HOUSE
(50 on roll)
Lentilfield Street, Lee Mount, Halifax HX3 5PT
Required for 26 August, 1980, a suitably qualified and experienced TEACHER as HEAD of a Unit which is involved in the educational assessment of younger children with a wide variety of problems. Close liaison with educational psychologists is a necessary part of the duties and an ability to discuss children and advise staff members is essential.
Application forms and further details obtainable (on receipt of foolscap S.A.E.) from the Chief Education Officer, Alexandra Buildings, King Edward Street, Halifax HX1 1UR, to whom completed forms should be returned by 30th May, 1980.

ROTHERHAM
(Metropolitan Borough of)
DEPARTMENT OF EDUCATION
NEWMAN SCHOOL
125 on roll. Age range 5-16
Required for January 1981
HEADTEACHER—Group 7(S)
Required at this school which caters at present mainly for physically handicapped children. Within proposed development plans Newman will eventually cater for a more homogeneous group of children with increased emphasis on the younger age range.
The Authority is seeking applications from enthusiastic teachers who will be capable and eager to continue the development policies that are being instituted.
The School has a tradition of extra curricular activities and among its facilities are a hydrotherapy pool, an environmental studies centre and a pony riding scheme.
There is on-site support from the Area Health Authority and the Schools' Psychological Service.
Closing Date: 30th June, 1980.
Application forms available from The Principal Appointments Officer, Council Offices, Grove Road, Moorgate, Rotherham S60 2ES. Telephone Rotherham 63411, extn. 26.
R. W. Ellis, Director of Personnel Resources.

Deputy Headships Senior Masters/Mistresses

HEREFORD AND WORCESTER
COUNTY COUNCIL
RIGBY HALL SCHOOL
Rigby Lane, Bromsgrove
DEPUTY HEAD TEACHER
Group 6(S)
Applications are invited from suitably qualified and experienced TEACHERS for appointment as DEPUTY HEAD TEACHER for this Day Special E.S.N.(M) and (S) school.
Further details and application forms available from the Headmaster on receipt of a stamped, addressed envelope. Interested prospective applicants may visit the school by arrangement with the Head.

NEWCASTLE upon Tyne
(City of)
EDUCATION COMMITTEE
REMEDIAL TEACHING SERVICE
SENIOR ASSISTANT REMEDIAL TEACHER
(Scale 4 post)
Required from September 1980, a suitably qualified and experienced TEACHER for appointment to the post of SENIOR ASSISTANT REMEDIAL TEACHER within the Remedial Teaching Service.
Applicants should be very experienced in Remedial Education and should have a relevant advanced qualification.
The Senior Assistant is Deputy to the Head of the Service on a Scale 4 post.
Application forms and further particulars obtainable from Jack Chadderton, Director of Education, Civic Centre, Newcastle upon Tyne NE1 8PU, should be completed and returned to Mr. R. Chapple, Remedial Teaching Service, Eastview Clinic, Ayton Street, Newcastle upon Tyne NE6 2DE.

Heads of Department

Vacancy from 1st September, 1980. HOUSECRAFT Qualified TEACHER required for DOMESTIC SCIENCE, NEEDLEWORK. Fully equipped room. Scale 2 post for experienced teacher.
Details and application form from the Headmaster, Royal School for Deaf Children, 4 Church Road, Edgbaston, Birmingham B15 3TD.

BRENT
(London Borough of)
WOODFIELD SECONDARY SCHOOL
Glenwood Avenue, N.W.9
(Roll 100 plus, 11 to 16)
Required from September:
A qualified TEACHER of GENERAL SUBJECTS to be responsible for a class of 13 to 14 year old boys and girls at this Secondary School for E.S.N.(M) children. Experience in Special Schools is an advantage but not essential, but candidates must believe that good order and discipline are essential in the education of children and be prepared to work in a closely structured and relatively formal environment. An interest in Art/Craft and/or Music and/or Gardening would be an advantage. A Scale 2(S) post is available for a candidate with experience and interests.
London Allowance of £609 per annum is payable and there is a scheme for assistance with removal expenses including legal fees, etc., travelling and lodging allowances. Candidates should apply by letter to the Head of the School within seven days giving age, present post, qualifications, experience and references, enclosing S.A.E. for reply.

BRENT
(London Borough of)
KINGSBURY GREEN JUNIOR MIXED AND INFANTS' SCHOOL
Old Kenton Lane, NW9 9ND
(Roll 277)
Required from September: Qualified TEACHER of the DEAF (Scale 2 plus Special Schools Allowance) to take charge of the older of two classes in the borough's Primary Partially Hearing Unit. Purpose-built premises in beautiful situation with all modern equipment.
London Allowance of £609 per annum is payable and there is a scheme for assistance with removal expenses including legal fees, etc., travelling and lodging allowances.
Candidates should apply by letter to the Head of the school within seven days, giving age, present post, qualifications, experience and references, enclosing S.A.E. for reply.

CORNWALL
EDUCATION COMMITTEE
COUNTY AUDIOLOGY SERVICE
Applications are invited from qualified TEACHERS of the DEAF for a TEMPORARY post, of one year, in the first instance, to work partly in the Partially Hearing Unit at Lostwithiel C.P. School and partly at other schools in the area on a peripatetic basis.
Salary, Burnham Scale 2, plus Special Schools Allowance.
Application forms and further details from Special Services Section, Education Department, County Hall, Truro, on receipt of a stamped addressed envelope. Closing date June 6 1980.

DERBYSHIRE
EDUCATION COMMITTEE
ST. MARTIN'S SPECIAL SCHOOL
Wisgreaves Road, Alvaston, Derby
Applications are invited from suitably qualified and experienced TEACHERS for appointment as CLASS TEACHER (Scale 2(S)) for OUTDOOR PURSUITS, GARDENING and BOYS' P.E. from 1st September, 1980.
Application forms obtainable from the Head Teacher, should be returned to the school without delay.

ESSEX
CASTLEDON E.S.N.(M)
Bromfords Drive, Wickford
Telephone: Wickford 61252
(Roll 120)
TEACHER, Scale 3(S)
September. Experienced, enthusiastic TEACHER for SCHOOL LEAVERS department and senior school WOODWORK. Interest in outdoor pursuits an advantage.
Send S.A.E. to Area Education Office, The Bryn, Church Road, Basildon, Essex, for application form. Closing date 30th May.

HARINGEY
(Borough of)
Required for September, 1980:
SUNTRAP SCHOOL.
Seafront Road, Hayling Island, Hants.
Suntrap is a residential school for delicate pupils. A TEACHER is sought primarily to take responsibility for HOME ECONOMICS, NEEDLEWORK and PARENT CRAFT but able also to make a contribution to the main curriculum. A Scale 2 post is available for a suitably qualified and experienced teacher. The post also involves a margin of additional duties, a maximum involvement of an average of 10 hours per week, for which an additional duties allowance (currently £1,118 per annum) is payable.
Interested candidates are invited to contact the Head Teacher, Miss M. Jones on 07016 5085-4.

VALE SCHOOL
Vale Road, N.4
HEAD of PRIMARY DEPARTMENT.
The Vale School is an all age day school for physically handicapped pupils. An appropriately qualified and experienced teacher is sought to take general responsibility for the primary department, with particular emphasis on the assessment of pupils' needs and the on-going development of the curriculum. Burnham Scale 3(S). London Allowance £609 payable.
Interested candidates are invited to contact the Headteacher, Mrs. M. J. Hall, on 01-800 4772.
Removal expenses, 100 per cent allowed in approved cases.
Application forms (S.A.E.) may be obtained from the Chief Education Officer, Education Offices, Somerset Road, N.17, to whom the forms should be returned by 6th June.

HERTFORDSHIRE
COUNTY COUNCIL
ST. ALBANS DIVISION
KILLIGREW JM SCHOOL

Application forms and further details obtainable from and returnable to the Head Teacher at the Unit by 6th June, 1980.

CALDERDALE
METROPOLITAN BOROUGH COUNCIL
EDUCATION DEPARTMENT
PSYCHOLOGICAL SERVICE
A TEACHER Scale 1 (Scale 3 for suitably qualified) plus special school allowance is required to work as a member of the teaching-assessment team of psychologists, teachers and other professionals and parents at Friendly Fold House, the Psychological Service's Teaching Unit.
Friendly Fold House is an integral part of the Psychological Service and caters for 35 children aged 3 to 12 years, all of whom attend part-time for precise assessment of their educational needs. The emphasis is upon acceleration of learning in the areas of language, general cognitive development and basic academic skills.
Application forms and further details from the Principal Psychologist, Horton House, Horton Street, Halifax, to whom the completed forms should be returned as soon as possible.

CHESHIRE
EDUCATION COMMITTEE
RURAL SCIENCE: Scale 1
ST. JOSEPH'S COMMUNITY HOME
London Road, Nantwich
Required to join a team of 16 teachers. Scale 1 plus £474 special schools allowance plus £1,350 extraneous duty allowance.
Application forms and further details from the Assistant Principal.
Closing date: June 6th, 1980.

CHESHIRE
EDUCATION COMMITTEE
OVERLEIGH MIDDLE SCHOOL
Old Wrexham Road, Handbridge
Chester
Scale 1 plus SCA—460 pupils
Required to teach within the ESN (M) Unit. The person required should have teaching experience within an ESN Unit and received specialist training for this work.
Application forms available from the District Education Office, 16 Whitefriars, Chester (Telephone Chester 313050), to whom they should be returned by 11th June, 1980.

CUMBRIA
COUNTY COUNCIL
INGWELL SCHOOL
Moor Row
(116 ESN(M) mixed 9 to 16 years residential)
Required for September 1980, or as soon as possible thereafter, an ASSISTANT TEACHER to undertake general teaching duties in the basic subject areas. The person appointed will be expected to undertake regular extraneous and sleeping-in duties.
Salary—Burnham Scale 1 plus special allowance of £474 p.a. plus extraneous duties allowance.
Further details and application forms available from the Director of Education, 5 Portland Square, Carlisle to be returned within two weeks of this advertisement.

DERBY
ROYAL SCHOOL FOR THE DEAF
Required for September 1980, a qualified and experienced TEACHER of the hearing impaired for an interesting and stimulating new post, to establish links between school/home/careers.
Salary according to qualifications and experience.
Application forms should be obtained from the Principal, Royal School for the Deaf, Ashbourne Road, Derby DE3 3BH.

DORSET
SAINT FRANCIS SCHOOL FOR BOYS
Hooke, Beaminster
Dorset DT8 3NY
RCCO2. £4,104 to £4,476 (extended to £4,713 for qualifications). Owing to the last successful candidate for this post accepting another, we are re-advertising the position for June or September, 1980.
HOUSEFATHER
The successful candidate will work with a small group of maladjusted boys aged between 11 and 14. He will be expected to develop supportive relationships as well as undertaking the full range of administrative and caring tasks. Sleeping-in duties when undertaken will be at the rate of £4.92 per night. We are looking for a qualified man who has common sense, maturity, a warm personality and is sympathetic to the Christian philosophy. Although we are looking for a qualified Child Care Worker this post might suit a teacher who has had residential experience. Training opportunities exist. Good accommodation is provided free, as is board and lodging.
Eleven weeks holidays per year.
For further details and an application form write enclosing a S.A.E. to The Headmaster, or telephone Beaminster 862260.

EALING
(London Borough of)
EDUCATION SERVICE
MANDEVILLE SCHOOL
Eastcote Lane, Northolt
Middlesex UB5 4HW
Required from September 1980: Class TEACHER for small group of disturbed hyperactive children. Experience with mentally handicapped children essential. Scale 1.
Please contact Head for details (Telephone 01-864 4921).
London Allowance (£609) payable.
Application forms obtainable from the Head at the school (S.A.E.) to be returned as soon as possible.

EAST SUSSEX
TYLEHURST SCHOOL
Forest Row
A qualified and experienced TEACHER is required from 1st September 1980 at this independent special school for 25 maladjusted boys aged 10-17 years of average and above average intelligence. A knowledge of remedial methods is necessary for this post.
The therapeutic work of the school is based on building up good personal relationships rather than on an externally imposed discipline. Applicants need a real sympathy with the problems of emotionally disturbed boys. Previous experience and/or training in work of this nature is desirable.
Salary in accordance with Burnham Scale for Special Schools. The post is non-resident.
Further details and application forms may be obtained from the Principal. Closing date for applications 31st May 1980.

RE-ADVERTISEMENT

Bexley London Borough
WESTBROOKE SCHOOL
Welling
Group 4(S)
HEAD TEACHER

Applications are invited from suitably qualified and experienced teachers for the post of Head Teacher for this purpose-built Day School for up to 50 Primary aged maladjusted children. Appointment to commence 1st January, 1981.

Assistance with removal expenses, legal fees and disturbance allowance can be considered.

Application forms and further details available from Chief Education Officer for Schools (T.5), Town Hall, Crayford, Kent, DA1 4EN (enclosing foolscap s.a.e.), to whom they should be returned by Wednesday, 4th June.

AYCLIFFE SCHOOL
HEAD OF SPECIAL UNIT

We are looking for a suitably qualified and experienced person to manage a facility for the treatment of severely disturbed youngsters. Ability to understand and articulate complex ideas of treatment and to organise and manage wide-ranging resources is more important than the professional background of the applicant.

Aycliffe School is the central facility for the assessment and treatment of severely disordered youngsters in the North, under the control of Durham County Council. The Special Unit is of advanced design, has excellent resources and is attempting to implement pioneering ideas for the treatment of adolescents under conditions of graded security.

The post is residential. Good married or single accommodation is available at nationally agreed rates. The current salary is in the range £9,018 to £9,819 (under review). The area is well provided with amenities for both cultural and recreational pursuits.

Requests for further particulars and application forms to the Principal, Aycliffe School, Copelaw, Aycliffe, Darlington, Co. Durham. Closing date for applications Monday, 2nd June, 1980.

The Borough is within easy reach of Central London and bordered by Epping Forest. London Addition to salary payable.

Required for September 1980

BROOKFIELD HOUSE SCHOOL

Alders Avenue, Woodford Green, Essex IG8 9PY
Head Teacher: Mr. P. G. E. Jeffrey

Teacher, Scale 3(s)

Outer London Allowance payable to salary.

Brookfield House is an all-age day special school for physically handicapped. Recent additions to the building have provided new facilities. The school has an extended role to provide educational support for sick and physically handicapped children throughout the local authority's area.

The person appointed will be responsible for work with children who have special educational needs, with particular reference to perceptuo-motor and related learning difficulties.

Ability to make assessments will be required and the convening of case conferences and collation of interdisciplinary reports will be called for.

Qualification in special education and/or educational psychology an advantage. Teaching experience in special education essential.

Apply by letter to the Head Teacher enclosing curriculum vitae and naming two referees.

Waltham Forest

Meadows School, Tunbridge Wells, Kent

E.S.N./Maladjusted—Residential—Boys 10-16 years.

ASSISTANT TEACHER

Burnham Scale 1 plus SSA

Applications are invited for a General Subjects teacher, preferably with some remedial experience. The ability to offer art/craft or woodwork or P.E. or rural studies would be an advantage—but not essential.

The teacher appointed must be able to provide a stable, orderly environment in a caring atmosphere and to tolerate a wide range of learning and behaviour disorders. Possibility of extraneous duty hours. Accommodation for a single or married person could be available.

Applicants should be in sympathy with the Christian principles on which Barnardo's work is based. Conditions of service broadly in line with Local Authorities. Transferable pension.

Applications to: Mr. D. C. Vincent, Divisional Director (Child Care), London Division, Tanners Lane, Barkingside, Ilford, Essex. IG6 1QG.

Enquiries to: Mr. G. Wyllie, Principal. Tel.: 0892 28618.

The TES Goes To Work

THE TES NOW PROVIDES ON ITS "SCHOOL TO WORK" PAGE EACH WEEK, SPECIALIST NEWS COVERAGE OF THE DEVELOPING —AND CONTROVERSIAL— RELATIONSHIP BETWEEN EDUCATION AND INDUSTRY AND THE TRANSITION FROM SCHOOL TO WORK.

Industry and education need to know about each other. They also need to keep tabs on the rapidly growing activities of the agencies and organizations, public and voluntary, that deal with young people.

The "School to Work" page supplements the attention being paid throughout the paper to the needs and interest of industrial trainers, careers specialists, youth workers, and all those concerned with equipping the young for a full adult role.

The Times Educational Supplement's coverage of education has always been broad, and it has regarded industrial training and youth affairs as part of its field. In the past two years the growing national and professional concern has been reflected in the increased space and prominence given throughout the paper to these matters. The most important developments and initiatives by central government and others, such as the new national programme for school leavers, are often disclosed or foreshadowed in the TES before you can learn about them from any other source.

TES—The weekly for news about education at all levels—including vocational training.

From newsagents on Fridays price 25p.

CALMA

is an American-based company specializing in the production of computer systems for design applications. These applications cover integrated circuits, printed circuit boards, mapping and mechanical design. We are growing rapidly and have recently opened a new European customer support facility located in Kingston, Surrey, which is chartered to provide training to our customers on system usage and applications.

To support this activity we require young teachers preferably having specialized in either mathematics/physics or some related technical subject. Computer experience, whilst being an advantage, is not essential, as full training would be given.

Conditions of employment will reflect the high calibre of people being sought, and will prove very competitive.

Please write in the first instance to Calma Company, Neville House, 55 Eden Street, Kingston on Thames, Surrey.

Community Tutor for Adult Education

based at The Upper School, Stirchley, Telford
FE Lecturer II (currently £4,806-£7,686)
Qualified teachers are invited to apply for this challenging new post to begin in September, 1980, or January, 1981.
The duties are equally divided between organizational aspects of adult and community education and school teaching.

Applicants should state which subject(s) they can offer in the Community School. The primary responsibility will be the preparation of a balanced programme of adult and community education for the Stirchley district of Telford New Town.

Further details and application forms from the Headmaster (SAE).

Shropshire County Council

MINISTRY OF DEFENCE

BURNHAM LECTURER

GRADE I
(2 Posts)

at the School of Technical Training, RAF Halton
BUCKINGHAMSHIRE

Applications are invited from suitably qualified teachers to fill this post in September, 1980.

DUTIES. a. Teaching Aeronautical and Mechanical Engineering subjects to RAF Aircraft Engineering Technician Apprentices to ONC/TEC Diploma level.
b. Teaching Basic Science in Electrical subjects to ONC/TEC Diploma level within the Electrical Training Squadron.

QUALIFICATIONS. An appropriate engineering degree and a teaching qualification. Experience in engineering subjects is desirable.
SALARY. Salary will be in accordance with the Scales of Salaries for Teachers in Establishments for Further Education, i.e. £3,768-£6,438. A pensionable allowance is also paid for the slightly longer teaching year.

SUPERANNUATION. The appointment is superannuable under the Teachers' Scheme. The successful candidate will be granted established civil service status.

Requests for application forms and further information should be made to the Ministry of Defence, CM(S)4(L), Room 339, Lacon House, Theobalds Road, London WC1X 8RY, quoting reference AW/1554.

Closing date 6th June, 1980.

KENT COUNTY COUNCIL

Youth and Community Service

Centre Manager

Wellington Avenue Youth Centre

Chingford, London E4

A recognized professional qualification in Youth and Community work will be an essential requirement.

Salary in accordance with the Burnham (Further Education) Lecturer 1 Scale, rising to a maximum of £6,846 inclusive of London Weighting (pay award pending). Starting salary will be determined by the age, qualifications and relevant experience of the successful applicant.

For further details and an application form, write to the Chief Education Officer, Municipal Offices, High Road, Leyton, London E10 5QJ (telephone enquiries: 01-539 3650, extension 202). Closing date for receipt of applications: Friday, June 6, 1980. Post open to men and women.

Waltham Forest

Stevenage Borough Council

Applications are invited from men and women for the following posts:—

Leisure & Community Services Dept.

PLAYLEADER (Play bus)

AP2/3 £4,110 p.a.-£5,250 p.a. Incl.

PLAYBUS ASSISTANT MISC.

1-4 £2,760 p.a.-£3,864 p.a. Incl.

We have just expanded our play section to 12 full-time posts and are looking for two people who can work with the local community groups to establish and maintain a complementary programme of children's play and community use for our play bus. If you can accept the challenge of either of these posts (and are over 25 years of age with a clean driving licence) and want to work for a local authority with a progressive outlook in community provision then apply in writing stating age, qualifications, relevant experience, names and addresses of two referees to the Personnel Officer, Stevenage Borough Council, Southgate House Stevenage, Herts SG1 1HN.

Closing date 6 June, 1980.

YMCA NATIONAL COLLEGE

In association with North East London Polytechnic

Applications are invited for the new post of:

Tutor/Organizer in Youth and Community Work

with responsibility for a

DISTANCE TEACHING DEVELOPMENT PROJECT

Grade:
Burnham F.E. Senior Lecturer (£7,092-£8,871) (under review) plus London Allowance.

Location:
Based at YMCA National College but some travel outside London essential.

Duties:
(a) Initially to undertake a feasibility study into the proposed part-time Certificate Course in Youth and Community Work by distance teaching.
(b) To prepare for, and operate, the first such course.

Qualifications:
Qualifications and substantial experience in Youth and Community Work and/or related fields.

Duration:
Initially for one year, the DES Development Grant will be extended (given a positive feasibility study) to cover the duration of the first course.

Further particulars and application form available from:
The Principal, YMCA National College, 642 Forest Road, London E17 3EF.
(Closing date for applications, Monday, 9th June)

Hounslow

COMMUNITY EDUCATION TUTOR

LECTURER I (£3,956-£6,888) + London Weighting (under review)

Applications are invited from suitably qualified persons for this post at Isleworth Explorers Boys Club. Initiative, enthusiasm and experience in working with young people essential. The Club is well known for its programme of outdoor activities and is well supported by an active Management Committee.

Contact Mr Ruff or Mrs Downes for further information on 01-568 3697. Job description and application papers from The Principal, Community Education Service, Spring Grove Centre, Thornbury Road, Isleworth, Middlesex.

Closing date 13 June 1980.

Youth and Community Service

BRISTOL

BEDMINSTER DOWN BOYS' CLUB has three things going for it at the moment.

(1) Its famous Parliament has now been running for 10 years and is still breaking new ground.

(2) The £180,000 of building and plant at Bedminster has been enhanced by a £35,000 cottage in South Wales. So an extension of our work with difficult City kids is now possible.

(3) Do you want to be the third? We need a full-time ASSISTANT LEADER.

Salary: JNC Scale 2 £4,071 to £5,184 (under review).

Application forms and further details from: Bedminster Down Boys' Club, Winford Grove, Bedminster Down, Bristol BS13 7DY. Tel: Bristol 646243.

ESSEX

BARKINGSIDE JEWISH YOUTH CENTRE

DEPUTY YOUTH DIRECTOR

An opportunity for a qualified person to become part of a team serving the needs of young people in the community from a modern purpose-built centre. A knowledge of Jewish affairs an asset. Salary and conditions in accordance with J.N.C. scales.

For application form and job description write to the Chairman, Barkingside Jewish Youth Centre, Carlton Drive, Barkingside, Ilford, Essex, or telephone 551 1500 for an informal chat.

GENERAL SECRETARY

Required for Sunderland Central Y.M.C.A.

An executive and challenging position for a person of Christian commitment to further develop the work of the Association.

The Association caters for a full age range in the community, with an emphasis toward youth work.

Accommodation available. Salary Scale, J.N.C. 4.

Further information and application form on request to: Mr. R. L. Taylor, Chairman, Sunderland Central Y.M.C.A., 1-3 Toward Road, Sunderland SR1 2QF.

Closing date for applicants 16th June, 1980.

HEREFORD AND WORCESTER

(County Council of)

YOUTH SERVICE

A full-time YOUTH WORKER is required for a dual appointment in Bromsgrove at the Waseley Hills and the Catshill Youth Centres.

Salary J.N.C. Scale 2 £4,071 to £5,181.

Full details and application forms available from the County Youth Officer, County Education Office, Castle Street, Worcester, to whom applications should be returned by 23rd June 1980.

LIVERPOOL

CROXTETH YOUTH WING

WARDEN

Applications are invited for the post of Warden at this purpose-built Youth Centre, attached to a Comprehensive School situated on a Corporation housing estate on the north-east boundary of the city.

Salary and conditions in accordance with J.N.C. 3 (1), £5,460 to £6,120 (qualified); £5,204 to £5,591 (unqualified).

Full details and application forms available from (and returnable to): Mrs. J. Barron, A.C.E.O., Area 3, Abingdon Road, Liverpool 4 (S.A.E.).

Closing date May 26, 1980.

LIVERPOOL
LIVERPOOL JEWISH YOUTH AND COMMUNITY CENTRE
(Harold House)
Requires a qualified and experienced
YOUTH WORKER.
To have overall responsibility for work with young people aged from 8 to 18.

The Centre caters for the social, recreational, and cultural needs of a wide variety of ages within the Liverpool Jewish Community, and a most challenging position awaits the right person, who will join a team of workers.

Salary: J.N.C. Range 3.

Application, enclosing curriculum vitae, should be addressed to: The Chairman, Liverpool Jewish Youth and Community Centre, Harold House, Dunbabin Road, Liverpool L15 6XL.

LIVERPOOL
RIALTO COMMUNITY CENTRE
DEPUTY WARDEN
Applications are invited for the post of DEPUTY WARDEN at this Community Centre situated in an inner area of the city.

Salary and conditions in accordance with the J.N.C. 3 (1)—£5,051 to £5,658 (qualified); £5,204 to £5,591 (unqualified).

Full details and forms available from (S.A.E.) and returnable to Area Community Education Office, Area 2, Wellington Road, Liverpool L8 4TX. Closing date 2nd June 1980.

Aycliffe School

Head of Regional Assessment Centre

Applications are invited from suitably qualified and experienced persons to assist the Principal in the organization and operation of the Regional Assessment Centre.

Aycliffe is the regional centre, under the control of Durham County Council, concerned with the assessment of severely disordered boys and girls from the northern quarter of England and frequently other parts of the country. As well as the appropriate academic background and potential for contributing to the development of the assessment process, applicants must have a high level of administrative experience and show evidence of ability to lead a highly qualified multi-disciplinary team with extensive specialist resources.

The post is residential. Good married or single accommodation is available at nationally agreed rates. The current salary is in the range £9,018 to £9,819 per annum (under review).

Requests for further particulars and application forms to the Principal, Aycliffe School, Copelaw, Aycliffe, Darlington, co Durham. Closing date for applications: Monday, June 2, 1980.

WOLVERHAMPTON BOROUGH COUNCIL

Social Services Department

Danescourt Observation and Assessment Centre

Applications are invited for 2 posts of Deputy Officers in Charge at the above establishment which is due to open shortly.

Danescourt is a purpose-built centre in an exceptionally attractive setting which will provide 24 residential places in three self-contained units together with a 4-place secure unit. The centre is designed to help a group of older children who are at present placed outside the Borough.

Education and Craft Instructions will be provided on the premises. The Child Psychology Service is prepared to make a considerable input into the Centre. The Department is looking for qualified and experienced personnel who are prepared to work as a team with flexibility and imagination. Residential accommodation of a very high standard is available.

Salary grade 7 (£7,077-£7,722) per annum.

Previous applicants for these posts need not apply.

Application forms and further details from Director of Social Services, Civic Centre, Wolverhampton.

COMMUNITY EDUCATION AND RECREATION OFFICERS

1. CASTLE VALE (AEYC/SJW/228)
2. COLMERS FARM (AEYC/SJW/229)

Burnham Further Education Senior Lecturer

£7,092-£8,280 (bar)

These new appointments have been created as part of the continuing development of the Authority's Integrated Adult Education, Youth and Community Service. The successful candidates will be responsible to the Principal of the appropriate area Institute for the promotion and co-ordination of adult education, youth and community work in the designated neighbourhoods.

The appointment at Colmers Farm is funded under the Urban Programme and is tenable for a period of three years in the first instance.

For application form and further details please write, enclosing stamped addressed envelope, to the Chief Education Officer, City of Birmingham Education Department, Adult Education, Youth and Community Division, Margaret Street, Birmingham, B3 3BU. Closing date: Monday, 9th June, 1980. There is a scheme for assistance with removal expenses.

BIRMINGHAM CITY COUNCIL

---

ilea INNER LONDON EDUCATION AUTHORITY

YOUTH WORKERS

JNC salaries and conditions.
Qualified salary scales including London Allowance:

Scale 2:	£4,680—£5,793
Scale 3L:	£5,640—£6,267
Scale 3H:	£6,108—£6,729
Scale 4L:	£6,420—£7,086

Appointment will be to the service of the Authority with secondment to the Group/Club for posts 2 and 4.

Assistance may be given towards household removal expenses. Details and forms, returnable by 6th June 1980, from the Education Officer (CEC 5), The County Hall, London SE1 7PB. (Please enclose foolscap s.a.e.)

WESTBOURNE YOUTH ACTIVITIES CENTRE,

St. Luke's Road, Paddington, W11.

Salary Scale 4L

An experienced and qualified Youth Worker required as Worker-in-Charge of this Centre, which is a new concept devised to make the premises and its resources fully available to all interested local youth groups for specific activities on an agreed rota. The Centre is seen as being neither a youth club nor a youth centre of the traditional type, but it is hoped that it will reflect the best elements of each.

The Worker will have the full support of the ILEA Youth Officers and an Advisory House Committee.

He/She will have considerable experience of working with young people, preferably in both a formal and an informal setting, and be of proven administrative ability.

BENGALI WORKERS ACTION GROUP

Salary Scale 3L

Qualified Detached Youth Worker, preferably fluent in English/Bengali, required to work with Bengali youth primarily in Camden.

He/She will be responsible for making contact with Bengali youth, assisting them to use existing services, establishing new services and groups, informing other agencies of the needs of Bengali youth, influencing local policy and assisting in developing effective youth involvement in a proposed community centre. The person appointed will be required to have independence, drive and initiative to undertake developmental work and the ability to work co-operatively with a range of different agencies. He/She should be a teacher or otherwise qualified as a youth worker.

KILBURN GRANGE YOUTH ACTIVITIES CENTRE,

Linstead Street, NW6.

Senior: Salary Scale 3H
Assistant: Salary Scale 2

Experienced Youth Workers required as Senior and Assistant Youth Workers.

This Youth Activities Centre is an innovation which has been devised to make full use of the premises and resources by local youth groups and the workers will have the full support of the House Committee and Youth Officers.

The Senior Worker will have had wide experience of youth work and/or proven administrative ability.

The Assistant Youth Worker will be a qualified youth worker (includes teachers) prepared to work in a structured situation.

TOWNMEAD YOUTH CLUB, St. Michael's Youth Centre,

Townmead Road, Fulham, SW6.

Salary Scale 3H

Full-time Youth Worker required to lead the team in this recently converted Youth Centre operating in Sands End, an inadequately served area in south Fulham. The premises allow for the development of a varied programme designed to meet the needs of local young people and the community. The team includes a full-time Assistant, part-time paid and voluntary Workers. There is a strong and active Management Committee committed to the demanding nature of the work.

YOUTH AND COMMUNITY SERVICE continued

LONDON

JACKSONS LANE COMMUNITY CENTRE
Archway Road, N 6

Required a WORKER with ability in community work and arts administration with an interest (experience) in all the arts, e.g., film, mime, music, to work within the framework of a community theatre.

Salary £4,500 to £4,800. Full applications to the Centre secretary by May 23 with two referees.

Further information from Paul Barnett on 340 5226.

LONDON

INNER LONDON EDUCATION AUTHORITY

YOUTH WORKERS

J N C. Salaries and Conditions

Qualified salary scales, including London allowances: Scale 2, £4,680 to £5,793; Scale 3H, £6,108 to £6,729.

Appointment will be to the service of the Authority with secondment to the Club for Post 1.

Assistance may be given towards household removal expenses.

Details and forms returnable by May 30 1980, from the Education Officer (CEC 8), The County Hall, SE1 7PB. (Stamped addressed foolscap envelope.)

(1) EBURY BRIDGE YOUTH CLUB
Westminster
Salary Scale 2
Ebury Bridge, SW1

Due to promotion a second full-time WORKER is required for this neighbourhood Club in south Westminster. Applicants should have experience and initiative and enjoy general club work and out-of-club activities.

(2) WAPPING YOUTH CLUB
Tench Street, E1
Salary Scale 3H

Experienced YOUTH WORKER required to take charge of the Club and to co-ordinate the work of a group of committed local part-time youth workers. Part of his/her responsibilities will be to contact unattached young people.

Strong links will need to be made with the Shadwell Basin Project. To this end experience in water activities would be an advantage.

NATIONAL ASSOCIATION OF YOUTH CLUBS

YOUTH WORK SERVICES DIRECTOR

To head the newly created NAYC Youth Work Services Team. The team is concerned with the provision of services that effect, facilitate and improve work with young people at a local level. The services are usually provided through a network of local associations of youth clubs but in some cases are delivered directly to young people. The team will include staff currently responsible for Sports and Competitions; Work with Girls; Work with Members Under 14s, Resources and Information.

This team operates alongside the Staff and Organisational Development Team and the Projects Team.

The person appointed should have a range of youth work experience and be able to co-ordinate, manage and develop an increased range of services to associations and youth clubs. NAYC expects to be operating in Leicester from November, 1980. The post is pensionable and a car allowance is provided. Salary from September in range £8,367-£9,255.

Further details and application form from: Mr. I. Michael Butterfield, Chief Executive, National Association of Youth Clubs, P.O. Box 1, Nuneaton, Warwickshire CV11 4DB. Tel.: Nuneaton (0682) 341921.

Closing date: Friday, 20 June, 1980. Interviews: 15, 16 July, 1980.

NORFOLK

COUNTY COUNCIL
YOUTH AND COMMUNITY SERVICE
DIVISIONAL YOUTH AND COMMUNITY OFFICER

Qualified YOUTH and COMMUNITY WORKER or qualified TEACHER to be based at the Spinney Youth and Community Centre, which is in the Earlham district of Norwich. You will need to be able to demonstrate practical youth leadership skills.

The Spinney, at Earlham, is an important centre, surrounded by several housing estates and the post of Divisional Officer based on it calls for a person with exceptional talents. The departing worker is moving to a training post with the National Youth Bureau.

Salary within range 3 of the J.N.C. salaries document 1979, £5,499 to £6,120 per annum (points 4-8).

Application forms and further details (on receipt of S.A.E.) from the County Education Officer, Further Education Division (reference F.E./A.), County Hall, Martineau Lane, Norwich NR1 2DL. Closing date May 30 1980.

SURREY

SENIOR YOUTH AND COMMUNITY WORKER
Ashtead

Based at the Ashtead Centre, you will be responsible for the promotion and co-ordination of Youth and Community work at the Ashtead and neighbouring Cygnet Club, Leatherhead. A trainee worker is soon to be appointed at the Cygnet Club and you will be required to develop and support the trainee's role.

Knowledge and experience of youth service, administration and committee work is required. An interest in Drama, Creative Arts, or some other specialism is desirable. The salary will be within the range £5,088 to £6,654.

If you are interested telephone Mr George Cooper, the Area Youth and Community Officer, for more details, or an informal chat. Tel: Leatherhead 77401, Ext. 67.

WIRRAL

(Metropolitan Borough of)

WIRRAL EDUCATION COMMITTEE

Appointment of full-time detached YOUTH WORKERS for the Leasowe Project.

Salary J.N.C. Range 3 (1 to 5).

Applicants should have a particular interest, or experience in detached youth work in the local community. The project is being run under an Urban Aid scheme and has approximately one year to run, with the possibility of an extension for a further year.

Application forms from the Director of Education, Municipal Offices, Cleveland Street, Birkenhead, to be returned by 30th May, 1980.

Teaching English in Munich

The Cambridge Institut, Munich, requires

Teachers of English

as a foreign language from August 25, 1980.

The school is the Munich examination centre for the Cambridge Proficiency and First Certificate, the Oxford Preliminary, and the ARELS examinations. It has a staff of 18 British teachers and is equipped with language laboratories and a video studio. Teaching is mainly to small groups of young adults.

The posts carry a basic salary of DM1,850.00 per month. There are nine weeks' paid holiday a year. The travel allowance to Munich is DM200.00.

Applicants must be:—
(a) of British nationality;
(b) modern language graduates with a PGCE (by August, 1980);
(c) aged between 23 and 27;
(d) available to attend an interview in London.

Successful candidates will be offered an initial contract for twelve months, renewable for a further year. Salaries are tax-free for this period.

Applicants are asked to send a curriculum vitae and a recent photograph to:—
Cambridge Institut, Hildegardstr 8, 8000 Munich 22
West Germany

Training Planning Officer

We have an opportunity for a suitably qualified person to earn a high *tax-free* salary as a Training Planning Officer . . .

. . . working in Saudi Arabia with BRITISH AEROSPACE

Applicants should either hold a BSc in aeronautical/mechanical engineering, electrical/electronic engineering or mathematics with statistics, or have a BEd degree with a bias towards education management. The post requires at least 4 years' experience as a teacher or lecturer, preferably at a technical college, polytechnic or their military equivalent, and experience of training/education management and planning, gained preferably in a large technical training establishment, is also essential.

In addition to high *tax-free* remuneration which reflects a recent pay award, the successful candidate will also receive free accommodation, messing, medical care and other benefits, including generous travel-paid home leave.

Please apply giving brief details of experience to:—

Mr. J. L. Stringfellow, Personnel Officer Dept., 171/TES
Saudi Arabia Support Dept.,
FREEPOST, British Aerospace Aircraft Group,
Warton Division, Warton Aerodrome,
Preston, Lancs. PR4 1LA.

Ministry of Education

Vacancies

TEACHERS

There will be vacancies with effect from May and September, 1980, for teachers in schools controlled by the Zimbabwe Ministry of Education. Enquiries are invited particularly from male primary school teachers and certificated graduates with high school experience.

Application forms and details of the attractive conditions of service may be obtained by writing to:

The Secretary for Education
P.O. Box 8022
Causeway
Salisbury
Zimbabwe

Education Development Officer (Science)

Join a small team recruiting, selecting and training volunteers for posts in Secondary Schools and Teacher Training Institutions in developing countries.

The post is London-based but involves some travel within the United Kingdom and occasionally overseas. The person appointed will have a commitment to meeting educational needs in developing countries. Ideally he or she will be a trained science teacher with overseas teaching experience. Primary and/or integrated science teaching experience would be an advantage though not essential.

The post falls vacant in August/September, but would be held open until December/January for the right applicant.

Incremental salary starting betwen £4,400 to £5,200. For further details contact the Personnel Officer, Voluntary Service Overseas, 9 Belgrave Square, London SW1 8BW; telephone 235 5191.

THE BRITISH COUNCIL

United World College of South East Asia
SINGAPORE

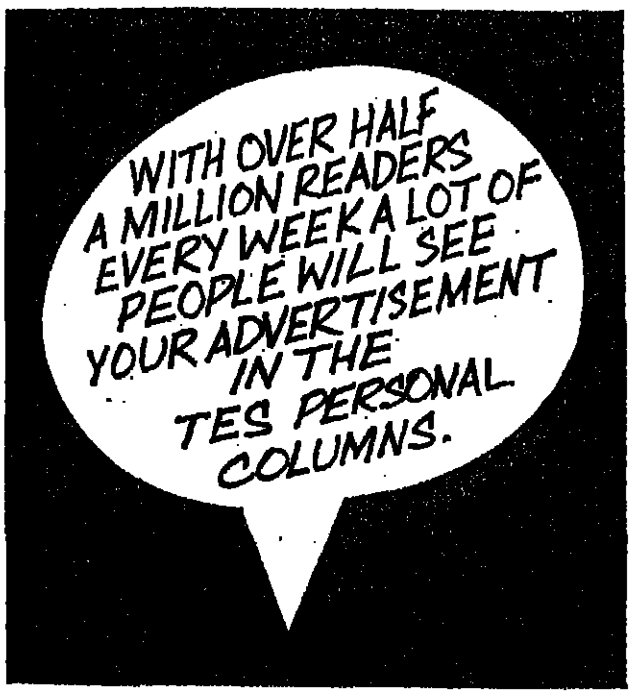
MATHEMATICS TEACHER

An experienced teacher of Mathematics is required for January 1981 or earlier to teach throughout the school up to pre-University level.

The College has 1,300 students aged 11 to 19, of over 40 nationalities, and 100 staff. In the Upper School International Baccalaureate courses are taught, while at the end of the 5th year students take London GCE 'O' levels. The College promotes activities leading to better international awareness and emphasises social service and personal adventure.

Initial contracts are for three years. Details of salary and conditions of service will be sent to interested candidates.

Letters of application should include details of qualifications and experience, the names and addresses of two referees, and should be addressed to The Headmaster, United World College of S. E. Asia, Pasir Panjang, P.O. Box 15, Singapore 9111, to arrive not later than 16th June, 1980. Interviews will be held in London in late July.



WITH OVER HALF A MILLION READERS EVERY WEEK A LOT OF PEOPLE WILL SEE YOUR ADVERTISEMENT IN THE TES PERSONAL COLUMNS.

GABBITAS—THRING

GREENACRES SCHOOL

NAIROBI

A qualified and experienced teacher of CHEMISTRY to "O" level is required for September 1980 for this private girls' day school in its own grounds, just outside Nairobi. The School caters for girls aged from 5–16 years, of whom there are 220 altogether, with 100 in the senior section, most of whom are British.

The successful applicant will be single, and the ability to help with games would be an advantage.

A salary of £4,500 is offered with full board and lodging provided free of charge. The contract is for two years and a return air ticket is provided.

Interviews for this post will be held before 6th June. In view of the shortage of time, please send, as soon as possible, a curriculum vitae, the names, addresses and telephone numbers of three referees, including your current employer, and a letter of application to:—

Mrs. J. Longworth,
Advertised Posts Department,
Gabbitas-Thring Services Ltd.,
6, 7 & 8 Sackville Street, London W1X 2BR,
Tel: 01-734 0161

Educational Liaison

We are increasing our activities in the area of Community Affairs with special emphasis on Education.

Applications are invited to fill the vacancy created by the retirement of the current postholder. The Manager, Educational Liaison, is responsible for administering the funds allocated for educational support, including those for BP Schoolteacher Fellowships. He or she will also have responsibility for developing the "Teachers in Industry" Scheme and for supervising the BP Group Schools Link Scheme, including running courses and arranging Work Experience for pupils. The post could be filled by a Senior Teacher or Adviser in Science, Economics or Business Studies, who has wide contacts in the educational world and particular experience in Schools/Industry Liaison.

The starting salary will be based on experience and qualifications but will be unlikely to be less than £13,500. Attractive benefits include Inner London Allowance and a non-contributory pension scheme.

Please write, giving full details of qualifications, career history and any special experience/interest in the work outlined above, to:

BP

Sue Bartholomeou, Central Recruitment, The British Petroleum Company Limited, Britannic House, Moor Lane, London EC2Y 9BU.

Closing date for applications is 31st May, 1980.

LANCASHIRE
COUNTY COUNCIL

EDUCATION DEPARTMENT

CAREERS SERVICE

TEMPORARY SPECIALIST CAREERS OFFICER
(Unemployment)
(District of Blackpool):

Salary Scale A.P. 5 £5,973 to £6,381

The Lancashire Careers Service has a team of six Specialist Careers Officers and six Specialist Employment Officers working with unemployed young people in six centres within the County. The Specialist Careers Officer post in Blackpool was established in October, 1975, and the postholder is now resuming duty as a District Careers Officer.

Applications for this post are invited from qualified and experienced Careers Officers who have a particular interest in work of this kind. Further details and application forms may be obtained from the Chief Education Officer, P.O. Box 61, County Hall, Preston PR1 8RJ, quoting reference A750/JM.

Closing date: 2nd June, 1980.

NORFOLK

COUNTY COUNCIL
EDUCATION DEPARTMENT
PRINCIPAL CAREERS OFFICER
Salary P.O.1 (points 6 to 10), £8,328 to £9,330 per annum

Applicants should be suitably qualified and have had experience at a Senior level in the Careers Service. In addition to the administration of the Careers Service there are opportunities for engaging in Careers Education and the training of Careers Teachers. The person appointed will be required to provide a car for which purpose a County Council loan scheme is available. The vacancy arises in August on the retirement of the present Principal Careers Officer.

Application forms and further details on receipt of S.A.E. from County Education Officer, Room 6, Education Department, County Hall, Martineau Lane, Norwich NR1 2DL, to be returned by 4th June, 1980.

NORFOLK

COUNTY COUNCIL
EDUCATION DEPARTMENT
COMMUNITY AND RECREATIONAL SERVICES OFFICER
Salary Grade SO1/SO2,
Scale £6,636 to £7,722 per annum.

Duties include maintaining contact with voluntary sports organizations in the county, advising on physical education programmes and equipment for young people and adults, preparing information on grant claims, visiting and advising on village hall and playing field matters, and acting as secretary to the Norfolk County Playing Fields Association. The officer is expected to spend about half the time in the office and will be an essential car user.

Application forms and further details on receipt of S.A.E. from County Education Officer, Room 8, Education Department, County Hall, Martineau Lane, Norwich NR1 2DL, to be returned by 4th June, 1980.

NORTH TYNESIDE

Applications are invited for appointment to the following post:

ASSISTANT PRINCIPAL CAREERS OFFICER

Salary Scale S.O. 2, £7,287 to £7,722 per annum.

Candidates should have appropriate qualifications and substantial experience in the Careers Service at a senior level.

The duties will consist of providing assistance in the management, development and administration of the Service and the successful applicant is expected to take overall responsibility for specific areas of the work of the Service.

Conditions of service in accordance with the N.J.C. Scheme for Local Authority A.P.T. & C. Services. Closing date: June 3 1980.

Write for application forms including S.A.E. to the Personnel Department, 7 Northumberland Square, North Shields.

NOTTINGHAMSHIRE

COUNTY COUNCIL
EDUCATION SPECIALIST CAREERS OFFICER
(Unemployment)
£5,973 to £6,381 per annum

Applications are sought for this new post under the Government's "Strengthening Scheme". The successful candidate will be appointed to the Bassetlaw District and will be responsible to the District Careers Officer. He/she will be based in the Worksop Office and will need to pay some attention to the needs of unemployed young people in the Retford area.

Duties will include maintaining existing and developing new contacts with employers; guidance and placing work with long-term unemployed young people; identification of young people for various elements within the Youth Opportunities Programme; monitoring the progress of young people on special schemes and assisting the transition from schemes into employment; liaising closely with Community Service Agency and Training Workshop staff.

Relocation expenses will be granted in appropriate cases.

Application forms and further details from the Director of Education (YB1), Careers Service Headquarters, County Hall, West Bridgford, Nottingham NG2 7QP; telephone Nottingham (0602) 863366, ext. 3431. Closing date: June 6, 1980. Please quote reference 145.

Challenging post for qualified youth worker, preferably with training experience. Initiative and Christian conviction. Layman or minister.

Details from: Youth Secretary, 86 Tavistock Place, London WC1H 9RT.

Psychological and Child Guidance Services

CHIEF PSYCHOLOGIST

Soulbury Scale Head Teachers Group 11
(£10-681-£11,691, under review)

Joint Psychological and Child Guidance Service

Applications are invited for this post, at the head of a large multi-disciplinary service. In addition to referral-based work the Service operates a variety of in-service training, advisory and systems-based approaches. The Chief Psychologist has a major advisory role within both the Education and Social Services Departments, as well as managing the Joint Psychological and Child Guidance Service.

This post offers great professional satisfaction to fully qualified educational psychologists of high calibre, with proven professional and managerial capability, and visionary capacity.

It is expected that interviews will be held on 20th and 24th June, 1980.

Informal enquiries may be addressed to the present Chief Psychologist, Dr. G. W. Herbert, at the George Road Child Guidance Centre (021-454 1168/9).

Candidates, male/female, may obtain application forms (returnable by Friday, 30th May, 1980) and further particulars from:

The Chief Education Officer, Personnel Division, Room 1001, Education Department, Margaret Street, Birmingham B3 3BU. Telephone 021-235 2587.

Canvassing will disqualify.

BIRMINGHAM CITY COUNCIL

When you're a Hestair Hope Representative doors open for you.

Will you stride, boldly through them?

We'll refrain from giving you our company history, interesting though it is. Because if you are a regular reader of this paper you will already know us by our advertising. And, you may have already seen our annual catalogue or one of our many direct mail shots. In which case we hardly need tell you that a Hestair Hope Representative can offer customers an unbeatable range backed by unbeatable service.

But, we have other customers besides those in Education. We supply many other market sectors so you'll be expected to develop existing and new business in Education, leisure and industrial markets.

By doing so, you'll justify a salary package of around £5,500, plus the usual fringe benefits. Of course, you wouldn't expect to do the job without a company car. So, there's a Ford Cortina waiting just for you.

Our existing sales force is aged between 25 and 35. We won't exclude you if you're not quite within this age group. But, you'll need to match the energy, ambition and self-motivation that our current representatives display.

Do that and you'll find that doors will open for you. All you have to do is stride, boldly through them to develop a worthwhile career in selling.

Write, first of all for an application form to:–
Jill Brundrell, Sales Co-ordinator,
Hestair Hope Ltd.,
St. Phillips Drive, Royton,
Oldham OL2 6AG.

TEACHERS

Looking for a change in direction?
Opportunity for real career development?
Financial rewards related to your efforts?

MERCURI URVAL, the UK subsidiary of the Swedish Mercuri Organisation, as part of its continued expansion programme, has opportunities for consultants, men or women, in Manchester and London. The company's experience of employing teachers has successfully shown that people from a teaching environment have been able to develop successful careers in the assessment of sales and management personnel.

If you have good communication skills, are used to organising and working with people and can get across intangible ideas, then this could be the opportunity that you are looking for. In addition, you should be aged 28-40, educated to degree level and determined to succeed in a challenging and changing environment.

We offer a generous salary package, company car and other large company benefits along with a full programme of training and development.

Interested? Then send full personal and career details to Mercuri Urval Ltd., Six Acre House, Town Square, Sale, Cheshire M33 1XZ, quoting reference 533

Mercuri Urval

EFL Editor

Evans

We have a vacancy in our busy ELT Department.

We are looking for an editor with sound, all-round experience of editorial work, preferably in Educational publishing.

Experience or qualifications in EFL will be a distinct advantage.

Salary and conditions as per NUJ house agreement.

Beatriz Casoy, ELT Divisional Manager,
Evans Brothers Limited, Montague House,
Russell Square, London WC1B 5BX

SCHOOLS COUNCIL

Applications are invited for the post of

Co-ordinator for Language and Learning

for September 1980 or as soon as possible thereafter.

The work is part of the Schools Council's Programme for Developing a Curriculum for a Changing World.

The co-ordinator will need to work closely with teachers and administrators in a variety of contexts and should have participated in aspects of curriculum development relevant to this activity such as language across the curriculum, especially talk, oracy, drama, and communication skills, particularly at a practical level. Recent school experience is essential as is an ability to write for a range of audiences.

The co-ordinator will be based at the Department of English, University of London Institute of Education under the directorship of Professor Harold Rosen. The post will be initially for a two year period and it is hoped that secondment at full existing salary plus a special allowance of £250 can be arranged. Alternatively the salary of the co-ordinator would be in the region of £7,000–£8,000.

Application forms and further information may be obtained from Mrs. A. Stewart, Schools Council, 160 Great Portland Street, London W1N 6LL. Tel: 01-580 0352 ext 351.

Closing date for receipt of applications is June 10th.

MGP Mary Glasgow Publications Ltd.

E.F.L. WRITER/EDITOR

Our English Department wishes to appoint a writer/editor to work on its EFL magazines. The successful candidate will be working as part of a team, initially writing and editing material for the lower end of the secondary school market.

We are interested in hearing from you if you:

- are a graduate aged between 25 and 30
- have a knowledge of EFL through formal qualifications and/or teaching experience
- have creative flair
- can write/create quickly under constant pressure of schedules
- have some relevant publishing experience
- can type.

The starting salary will be on the scale £3,850-£5,500 p.a. (currently under review).

Please apply with c.v. to: Philip Gallagher/Jane Myles, Mary Glasgow Publications Ltd., 140 Kensington Church Street, London W8 4BN.

COURSES

Garnett College

Education and Training for Teachers and Administrators in Further Education

Applications are invited for the following courses:—

Bachelor of Education *Council for National Academic Awards*

Three years' part-time study. Prepares candidates for further study and research in further education. Candidates should be serving teachers with an initial teaching qualification and a minimum of two years' experience.

Diploma in Further Education *University of London*

One year full-time or three years' part-time study. Relates the study of further education to contemporary educational theory and to current developments. Candidates should have reasonably substantial teaching or administrative experience in further education, administration or industrial training.

Diploma in Educational Management *University of London*

Two years' part-time study. Aims to provide a sound academic grounding in educational management and an opportunity to improve management skills. Candidates should have reasonably substantial teaching and/or administrative experience in further education or associated fields.

Diploma in Educational Technology *University of London* (for Further Education)

Two years' part-time study. Develops professional competencies in the management and organisation of learning resources. Candidates should have initial professional qualifications and be experienced teachers, librarians or administrators in further or higher educational establishments, local government service or industrial training.

Diploma in English Language Studies in Further Education *University of London*

Two years' part-time study. Aims to provide a depth study of language that can be applied to the practice of teaching and enable the holder to act in an advisory capacity on matters of language within their further education college. Candidates should have a relevant degree (or equivalent), and be a trained teacher with a minimum of three years' teaching experience.

Short Courses

A range of short courses is run throughout the year by the Garnett Centre for Short Courses and Curriculum Development. Copies of the programme are available on request.

Certificate in Education *University of London*

Sandwich or part-time courses extending over one, two, or three years. Provide a basic course in the theory and practice of further education for those engaged in the teaching or training of the 16–60 age group.

ilea

Candidates should apply as soon as possible specifying the course(s) in which they are interested, to the Principal (Ref. THES) Garnett College, Downshire House, Roehampton Lane, London SW15 4HR (Telephone 01-789 6533).

MINERVA Outdoor Ventures, experts in outdoor education for the young, invite you to bring a school party to our farmhouse centre in the Brecon Beacons, South Wales. We specialise in Adventure Weeks and Field Study Courses, individually designed to suit your own special requirements. Canoeing, pony trekking, climbing, archery, caving and much more in small groups and absolute safety. We are very experienced and pride ourselves on our caring supervision. Ideal for age groups nine to 18. [illegible] approved. Your first trip? Don't worry. We take all the problems off you. Beginners our speciality. —Details from Minerva Outdoor Ventures, Crown House, 19 London Road, High Wycombe, Bucks. Tel. (0494) 445383.
